#### **REGULAR SESSION FEE REFUNDS**

#### **Materials and Service Fees:**

To be eligible for a refund of materials and service fees a student must completely withdraw from the university. There will be no refund for a reduction of unit load. To be eligible for a refund of materials and service fees, a student withdrawing from the university must obtain a withdrawal card from the Registrar's Office and file a refund application with the Cashier's Office, CLS 108, not later than 14 days following the day the academic term begins. All but \$15.00 will be refunded. For additional information contact the Cashier's Office or telephone 286-5253.

#### Nonresident and foreign student tuition:

Tuition paid for a course scheduled to continue for an entire semester may be refunded in accordance with the following schedule, if application thereof is received by the Cashier's Office within the following time limits:

	Time Limit	Am	ount of ref	und
1)	Before or during the first week of the semester	100	percent of	fee
2)	During the second week of the semester	90	percent of	fee
3)	During the third week of the semester	70	percent of	fee
4)	During the fourth week of the semester	50	percent of	fee
5)	During the fifth week of the semester	. 30	percent of	fee
6)	During the sixth week of the semester	20	percent of	fee

38-9 5 190

#### 8 / Schedule of Fees

#### Parking Fee:

This schedule of refunds refers to calendar days, commencing on the date of the term when instruction begins: Non-reserved space per semester:

Period	Amount of Refund
31–60 days	75 percent of fee
61-90 days	50 percent of fee
91-end of term	None

The student applies for the parking refund at the security office in the Administration Building, bringing with him his parking decal.

The late registration fee is not refundable. The Cashier's Office should be consulted for further refund details

#### SUMMER SESSION FEES

Tuition, each session	(per unit) \$27.00
Term I.	2.00
Student union Co-	
Term I	
Term II	
Parking fees: Nonreserved spaces: Six-week session	2.00
Three-week session	
EXTENSION COURSE FEES	
EXEMPTIONS	(per unit) 24.00

Students under Public Law 894, 87-815, California state veterans' dependents, or state rehabilitation programs will have fees paid for tuition and materials and service under provisions of these respective programs.

No fees of any kind shall be required of or collected from those individuals who qualify for such exemption under the provisions of the Alan Pattee Scholarship Act.

# **Debts Owed to the Institution**

From time to time the student may become indebted to the institution. This could occur, for example, when the student fails to repay money borrowed from the institution. Similarly, debts occur when the student fails to repay money borrowed from the institution. Similarly, debts occur when the student fails to pay institution dormitory or library fees, or when the student fails to pay for other services provided by the institution at the request of the student. Should this occur, Sections 42380 and 42381 of *Title 5* of the *California Administrative Code* authorize the institution to withhold "permission to register, to use facilities for which a fee is authorized to be charged, to receive services, materials, food or merchandise or any is authorized to be charged, to receive services, materials, food or merchandise or any combination of the above from any person owing a debt" until the debt is paid. For example, under these provisions the institution may withhold permission to register, and may withhold other services, such as grades and transcripts. If a student feels that he or she does not owe all or part of a particular fee or charge, the student should contact the campus business office. The business office, or another office on campus to which the student will be referred by the business office, will review the pertinent information, including information the student the business office, will review the pertinent information, including information the student may wish to present, and will advise the student of its conclusions with respect to the debt.

# THE CALIFORNIA STATE UNIVERSITY AND COLLEGES

# The California State University and Colleges

The individual California State Colleges were brought together as a system by the Donahoe Higher Education Act of 1960. In 1972 the system became The California State University and Colleges and fourteen of the nineteen campuses received the title University. The oldest campus—California State University, San Jose—was founded in 1857 and

became the first institution of public higher education in California. The newest campus-California State College, Bakersfield—began instruction in 1970.

Responsibility for The California State University and Colleges is vested in the Board of Trustees, whose members are appointed by the Governor. The Trustees appoint the Chancellor, who is the chief executive officer of the system, and the Presidents, who are the chief executive officers on the respective campuses.

The Trustees, the Chancellor and the Presidents develop systemwide policy, with actual implementation at the campus level taking place through broadly based consultative procedures. The Academic Senate of The California State University and Colleges, made up of elected representatives of the faculty from each campus, recommends academic policy to the Board of Trustees through the Chancellor.

Academic excellence has been achieved by The California State University and Colleges through a distinguished faculty, whose primary responsibility is superior teaching. While each campus in the system has its own unique geographic and curricular character, all campuses, as multipurpose institutions, offer undergraduate and graduate instruction for professional and occupational goals as well as broad liberal education. All of the campuses require for graduation a basic program of "General Education—Breadth Requirements" regardless of the type of bachelor's degree or major field selected by the student. A limited number of doctoral degrees is offered jointly with the University of California.

Presently, under the system's "New Approach to Higher Education," the campuses are implementing a wide variety of innovative programs to meet the changing needs of students and society. Among pilot programs under way are off-campus degree programs, weekend colleges, self-paced learning programs, and special testing programs to accelerate student progress toward a degree.

Enrollments in fall 1972 totaled 278,000 students, who were taught by a faculty of 15,500. Last year the system awarded over 55 percent of the bachelor's degrees and 35 percent of the master's degrees granted in California. Almost 360,000 persons have been graduated from the nineteen campuses since 1960.

#### California State University, San Diego

California State University, San Diego opened its doors for the first time in 1897 with a faculty of seven and with a total enrollment of 91 students. It was established initially as a two-year institution dedicated to the training of teachers. It was housed on the second floor of a downtown office building but soon moved to its own campus at Park Avenue at El Cajon Boulevard. It occupied these quarters until 1931 becoming meanwhile in 1931 a four-year teachers' college under the State Board of Education.

By 1931 it had grown beyond its facilities and moved to a new campus in what was then the far eastern outskirts of the city. What are now Arts and Sciences, the Women's Gymnasium, the Power Plant, and the central parts of the (old) library, Life Sciences, Speech, and Physical Sciences were the original buildings, erected in Spanish mission style with arches, an open-faced bell tower, covered walks, thick concrete walls, and red tile roofs. The motif

of the architecture has been preserved in the new buildings so that the campus has unity. In 1935, the college dropped "Teachers' " from its title and in 1960, it became part of the California State College System with a state-wide Board of Trustees and a chancellor.

In 1971 the California State Legislature authorized renaming of the system to California State University and Colleges. California State University, San Diego takes pride in its new status as well as great pride in its varied offerings at both undergraduate and graduate levels. its accreditation, its fine library, and its distinguished faculty of more than 1500 members. 68 per cent of whom have doctorates.

In recent years many new buildings of modern design have been added. Especially well equipped and spacious are Business Administration and Mathematics, Chemistry-Geology, Dramatic Arts, Engineering, Fine Arts, Home Economics, Industrial Arts, Life Sciences, the Malcolm A. Love Library, Music, Physics, Social Sciences, and gymnasiums for men and women. In addition, dining facilities, the student store, the student recreation center, and a large outdoor auditorium in the form of a Greek amphitheatre are all noteworthy. Two heated pools are available for year-round swimming, when school is in session.

The present site consists of 300 acres on the south mesa above Mission Valley, eleven miles from the Pacific Ocean. On crisp days, the forested Laguna ridge to the east and the high ground of Point Loma to the west are visible.

The natural sciences are housed in a \$25 million complex of fully equipped laboratory buildings on the northeast rim of the campus plateau. Astronomy is served by observatories on campus and in the nearby 6,000-foot-high Laguna Mountains. The university operates a computer center, seismology and weather stations, and two wind tunnels. Two biology field stations (one of 2500 acres) are maintained in forest and chaparral country. Specially designed laboratories also serve students in foreign languages, international relations, and public administration, as well as in the natural sciences.

#### Malcolm A. Love Library

The university library is located in the large new central Malcolm A. Love Library building opened to the students and faculty scholars in 1971. It provides ideal facilities for study and research. At the heart of the expanding campus, it is readily accessible from all directions. The five-floor building seats 3,750 readers and has an ultimate volume capacity of a million. Partially carpeted and furnished with many single place study carrels, the Love Library invites study and reflection.

The library's resources and services are noteworthy. Major services provided are: a central reference room, a specialized lower division library, a special collections room for rare books and archives, and areas for the sciences and engineering library, documents, educational

resources, current periodicals, and microforms. It has a listening room for phonorecords. Its collections are substantial. It has 670,000 volumes, including books, bound periodicals, and government documents. Additional resources include: 1,000,000 microfiches and microopaque cards, 22,000 reels of microfilm, 30,000 college catalogs, 62,000 curriculum material items, 23,000 scientific reports, 275,000 archival papers, and many other media. The library receives 10,000 periodical and other serial titles excluding government docu-

ments. It is a depository for United States, California, Illinois, New York, and Texas government publications. It receives all United Nations and Organziation of American States publications, and those of other national and international bodies.

Highly trained reference librarians assist students and faculty in their reading, study, and research. To aid the student in developing his powers in critical, independent thought through wide acquaintance with books, the library has an open shelf arrangement which gives direct access to nearly all books. Inexpensive copying machines are available throughout the building.

Several research centers on campus have collections not included in the library's holdings. Among them are: Public Administration and Urban Studies Laboratory, 50,000 items; Economics Research Center, 32,000 items; Geography and Geology Departments, 90,000 maps; International Relations Research Center, 14,000 items.

#### Accreditation

California State University, San Diego is a member of the following educational associations:

American Association of Colleges for Teacher Education American Association of Collegiate Schools of Business American Association of Schools and Departments of Journalism American Home Economics Association Association for University Business and Economic Research Council of Graduate Schools in the United States Council on Social Work Education Engineers' Council for Professional Development National Association of Schools of Music National League for Nursing Western Association of Graduate Schools Western Association of Schools and Colleges

California State University, San Diego's accreditation is validated through membership in the above associations. California State University, San Diego is also accredited by the National Council for Accreditation of Teacher Education and by the California State Board of Education. The journalism news editorial sequence is accredited by the American Council Education. The journalism news editorial sequence is accredited by the American Council on Education. The clinical services area of speech pathology and audiology is accredited by the American Speech and Hearing Association. It is on the approved list of the American Chemical Society and is approved by the Veterans Administration. The university has four professional schools: business administration, education, engineer-ing, and social work. See the descriptions of their programs in the section, Professional Curried

Curricula.

In addition, high quality preparation for many other professions is provided. It is suggested that the student refer to the various courses of study listed in the catalog. The bachelor's degree is offered in 63 areas, the master's degree in 51 areas, and three Ph.D.'s. Some of its recent noteworthy innovative programs are in Afro-American studies, Asian studies, ecology, Jewish studies, Mexican-American studies, religious studies, and women's studies.

# **Degrees** and Certificates

California State University, San Diego offers the following degrees and certificate:

Bachelor of Arts Bachelor of Science Bachelor of Vocational Education Bachelor of Music Doctor of Philosophy in Chemistry (with University of California, San Diego) Doctor of Philosophy in Ecology (with University of California, Riverside)

Doctor of Philosophy in Genetics (with University of California, Berkeley) Master of Arts Master of Science Master of Business Administration Master of City Planning Master of Public Administration Master of Social Work

A nondegree program leading to the Certificate in Public Administration is offered by Public Administration and Urban Studies.

# Types of Curricula Offered

California State University, San Diego offers the following types of curricula:

Undergraduate Curricula. Undergraduate curricula provide the following opportunities for study:

(1) Liberal arts and sciences: Curricula in the academic major fields, leading to the Bachelor of Arts degree in liberal arts and sciences.

(2) Applied arts and sciences: Curricula in major fields leading to the Bachelor of Science, Bachelor of Arts or Bachelor of Music degree in applied arts and sciences.

(3) Professional curricula: The School of Business Administration offers the Bachelor of Science degree in business administration with majors in seven fields; the School of Engineering offers the Bachelor of Science degree in engineering with specialization available in four fields; and the School of Education offers curricula in teacher education leading to

#### 22 / General Information

graduate credentials at all levels of public school teaching.

(4) Preprofessional and nondegree curricula: Programs are offered in predentistry, prelegal, and premedical, leading to transfer to professional schools. A nondegree program is offered in public service, leading to the Certificate in Public Administration. The Air Force offers an ROTC program, leading to a commission in the Air Force Reserve.

Graduate Curricula. The Graduate Division offers curricula leading to the Master of Arts or Master of Science degree in a wide variety of fields, the Master of Business Administration, the Master of City Planning, the Master of Public Administration, the Master of Social Work, and joint-doctoral programs in chemistry, ecology, and genetics.

# Imperial Valley Campus

#### Faculty

Professors: Rodney (Dean), Baldwin (Associate Dean), Smith (Coordinator of Extended Services)

Associate Professors: Ayala, Harmon

Assistant Professors: Burton, Duling, Franklin, Hill, Ikeda, King, B., Persen, Polich, K. (Librarian), Polich, J., Rice, Spencer, Ugarte, Wilson

Lecturers: Acres, Atwood, Crutcher, Gutierrez, Hinshaw, King, I., Sandlin, Wong

## Location and Function

The Imperial Valley campus is a division of California State University, San Diego. As such, it is fully accredited. Operating as a separate campus, its primary function is to provide collegiate instruction for the desert area of Southeastern California. The campus is located at Seventh Street and Heber Avenue in Calexico, adjacent to

Rockwood Plaza, a park near the center of the city. The buildings housing this campus are of early Spanish style architecture, complementing the geographic location which is within walking distance of Mexicali, Baja California, Mexico, a city of approximately 500,000 population. The campus is 120 miles east of San Diego via U.S. Interstate Highway 8. Its buildings are fully refrigerated in the summer.

The program at this campus is an integral part of California State University, San Diego and is under the general jurisdiction of the Vice President for Academic Affairs. The curriculum includes the recommended upper division and postgraduate program of courses leading to a bachelor's degree and/or the Standard Teaching Credentials with specializations in elementary, secondary, and special education. In addition to its regular program, the campus assists in the administration of extension courses for the area.

A major function of this campus is to foster better understanding and relations between Mexico and the United States. Since the campus is located within walking distance of the Mexicon metropolis of Mexicali, the student has a unique opportunity frequently to visit a foreign country and enjoy its educational, cultural, and recreational attractions. Mexicali is linked by highway, bus, trains and airplane to the rich cultural heritage of Hermosillo, Guaymas, Mazatlan, Guadalajara, and Mexico City.

The climate of Imperial Valley is dry and mild most of the college school year, with dune buggying, water skiing in the nearby Salton Sea, Gulf of California, Colorado River and golfing and hiking the year around.

The full-time faculty and many of the part-time faculty are regular members of the California State University, San Diego instructional staff. Serving at the Imperial Valley campus are full-time resident faculty members in the areas of anthropology, art, criminal justice administration, drama, economics, English, geography, history, mathematics, Mexican-American studies, music, political science, philosophy, psychology, sociology, Spanish, elementary education, secondary education, and special education. More than seventy per cent of the full-time faculty possess the doctoral degree. Part-time faculty, selected from outstanding educators and practicing professionals of Imperial Valley, augment the instructional programs of the Imperial Valley Campus.

Since the student-faculty ratio is low, personal student counseling can be provided. Each student is assigned a faculty adviser who assists him in arranging his program so that he is better able to realize his educational and occupational career goals.

#### Program

The program at the Imperial Valley campus is restricted to upper division and graduate students. The campus offers eleven majors leading to the bachelor degree and also a program designed to complete the standard elementary and standard secondary teaching credentials. The programs are similar to those described in this catalog, however, not all majors and minors are available at Imperial Valley Campus.

The Imperial Valley campus is structured to serve the needs of the following: (1) community college graduates, (2) transfer students who have satisfactorily completed two or more years of college work with an accredited college, (3) students working for the B.A. or B.S. degree, (4) persons now teaching, but who want to complete requirements for the bachelor degree and/or a teaching credential, (5) inservice teachers holding either a provisional credential or a partial fulfillment of requirements credential, (6) other upper division or graduate students who wish to expand their academic preparation.

For those transfer students needing certain lower division college work in connection with

92-9 5 460

#### 24 / Imperial Valley Campus

their work at this campus, there are available in the area the Imperial Valley College, College of the Desert, Mt. San Jacinto College, Palo Verde College, and Arizona Western College. These are public community colleges offering the first two years (60 units) of college course work.

This campus has a limited experimental student exchange with the two Mexican higher educational institutions in Mexicali, Baja California. Qualified students may be selected to attend classes for elective credit at either CETYS or Universidad Autonoma De Baja California.

THE WEEKEND COLLEGE is a special program offered only at Imperial Valley Campus. Classes are offered Friday evening through Sunday, enabling students to earn up to 12 units of college credit each semester by attending classes on weekends. Imperial Valley Campus schedules classes in three hour blocks, seven days a week, from 9:00 a.m. until 10:00 p.m., so commuting students may earn 9 to 12 units each semester by attending classes one or two days a week.

A schedule of classes, with instructions for registration, is published each semester and can be obtained on request from the Dean of the campus approximately six weeks before the dates of registration. All tests required for the programs offered at this campus are administered on campus. In addition the Graduate Record Examination, National Teachers Examinations, other tests are scheduled in accordance with the nationally advertised test dates.

#### **Registration and Commencement**

Registration for all classes offered at Imperial Valley Campus is held at the beginning of each semester (Fall, Spring, and Summer) at the Calexico campus. Continuing students, and those admitted or readmitted by the university, will be mailed detailed instructions for registration. All but continuing students need to file applications for admission with the Dean's office at Calexico. Currently enrolled and previously enrolled students at the San Diego Campus, registering for courses at Imperial Valley Campus, should notify the Dean's office in Calexico and request the Registrar's office at the San Diego Campus to forward student records to Calexico.

Commencement exercises are held once a year in Calexico at the end of the spring semester. Students graduating at the midyear, June graduates, and students completing requirements for graduation in the summer session are encouraged to participate.

# Physical Facilities: Offices, Classrooms, Student Union, Bookstore, Library

The campus consists of a cluster of eight large buildings set in an eight acre landscaped area in the center of the city of Calexico. The buildings are of early traditional Spanish architecture, with thick plastered walls and red tiled roofs.

The administration offices are located east of the central classroom building complex. All classrooms are large, comfortable, and equipped with refrigerated or heated air conditioning to suit the season. Resident faculty members maintain offices on campus in two faculty office buildings located north and south of the administration offices.

The student union is entirely separate from the office and classroom areas. The large six room building is furnished with television, sofas, lounge chairs, small tables, and easily moveable chairs for readily arranged conferences, meetings, and study areas. Snack facilities are available to students seven days a week. The Associated Student Body offices are located in the administration office building.

Books and other instructional materials may be purchased at the start of each semester at the campus bookstore. In addition to textbooks, paperback books on a variety of topics and supplies are available to students.

The Imperial Valley Campus library is housed in the south wing of the central building complex. It contains over 14,000 volumes, 200 periodical titles and a complete collection of California State approved texts. Additional loan privileges are available to students and faculty through the library at the San Diego Campus and the Southeastern California area public and school district libraries. Books and reference materials are also available from the two Mexican collegiate institutions located in Mexicali, Baja California, Mexico.

A good collection of audio-visual equipment is available for classroom use, including closed circuit TV and monitors. Films and other instruction materials are available to the staff and students through the Audio-Visual Departments of the San Diego Campus and of the Imperial County Education Center. Films are also rented from outside sources as needed.

## Placement, Employment, and Information

The university provides a centralized placement service in cooperation with the School of Education. Students are aided in securing part-time and full-time positions and in obtaining information concerning occupational trends. Staff members maintain contact with local organizations and community leaders for employment opportunities for graduates of this campus.

Further information on admission, registration, programs, and classes may be obtained by writing the Dean of the Campus, Imperial Valley Campus, California State University, San Diego, 720 Heber Avenue, Calexico, CA 92231, or calling 714-357-3721.

#### Special Programs and Services / 27

# **Special Programs and Services**

#### Summer Sessions and Extension Courses

California State University, San Diego conducts three summer sessions which offer credit applicable to graduation and residence requirements.

During the three-week Term I, three semester units of credit may be earned; during the six-week Term II, up to seven units of academic credit may be earned; during the three-week Term III, three units of credit may be earned. The tuition for the summer sessions is based upon the cost per semester unit. Write to the Dean of Summer Sessions for information concerning course offerings, special workshops, and requirements for admission. The Summer Sessions Bulletin is available in mid-March and is mailed free of charge upon request.

In order more adequately to serve the educational needs of the community, California State University, San Diego cooperates with off-campus organizations and groups in arranging extension classes in response to expressed needs when the enrollment is sufficiently large to finance the instruction. Offerings are made each semester in a number of areas including education, business administration, public administration and the arts and sciences. Classes may be organized at various locations within San Diego, and Imperial Counties. A minimum of 16 to 20 students is usually required in order to maintain a class. The usual class carries three units of credit and meets once a week, either in the late afternoon or evening. These courses are listed in a special *Bulletin of Extension Courses* published each semester.

For limitations on extension credit, see the section of this catalog on Credit for Extension Courses. Refer to the index for page number. For information on organization of classses, current offerings, and eligibility for registration, communicate with the Extension Division.

#### Honors Program

26

The Honors Program at California State University, San Diego provides opportunities for superior students to use and develop their talents in a variety of ways, both all-university and departmental.

Those who have taken the Advanced Placement Examinations should refer to the section of the catalog so titled.

Prior to entrance, freshmen who have superior high school records may, on the basis of their college aptitude test scores, be invited to participate in a special advising program. Here attention is given to individual needs and interests. Students in this program are given Honors at Entrance. Such students with permission of instructor, are eligible for the Honors colloquium (Humanities 66)

Some departments offer Honors sections of selected courses. Normally, admission is by invitation, but any student interested should consult the Class Schedule for the name of the faculty member in charge and consult with him to establish eligibility.

Upon completion of the sophomore year a student who has maintained a superior scholastic record may be eligible for admission to the upper division Honors Program of his major department. Specific requirements and details of these programs vary with the different departments. To apply, a student should consult his major adviser or the chairman of his major department.

The purpose of the California State University, San Diego Honors program is, within practicable limits, to meet the individual needs of the most capable students. Credit by examination, release from regular attendance, modification of curriculum requirements in the major and minor, and individual study are other opportunities available with the consent of the major adviser or other authorities. See also the section of this catalog titled "Graduation with Honors."

#### International Programs

A study abroad program is offered by The California State University and Colleges International Programs, under which students may enroll for a full academic year simultaneously at their home campus, where they earn academic credit and maintain campus residency, and at a distinguished foreign university or a special program center. Cooperating universities abroad include the University of Provence, France; the

University of Heidelberg, Germany; the University of Florence, Italy; the Universidad University of Heidelberg, Germany; the University of Florence, Italy; the Universidad Ibero-Americana, Mexico; the University of Uppsala, Sweden; the University of Madrid and the University of Granada, Spain; Tel Aviv University and the Hebrew University of Jerusalem, Israel; and Waseda University, Japan. In the United Kingdom, cooperating

universities, which may vary from year to year, include Dundee, Leicester, London, Oxford, and Sheffield. In addition, California State University and Colleges students may attend a special program in Taiwan, Republic of China, or an architectural program in Copenhagen, Denmark.

Eligibility is limited to students who will have upper division or graduate standing during their year of participation, who have a B (3.0) average or better in at least 30 semester or 45 quarter units in any two previous consecutive years; show ability to adapt to a new environment; and, in the cases of France, Germany, Mexico and Spain, are proficient in the language of instruction at the foreign university. Selection is made by a faculty committee on the students' home campus and by a statewide faculty committee.

The International Programs are supported by state funds to the extent that such funds would have been expended had the student concerned continued to study in California. Students assume costs for pre-departure orientation, insurance, transportation, housing and meals. Home campus registration fees, tuition on the home campus for out-of-state students (if the student is not a California resident) and personal incidental expenses or vacation travel costs while abroad are also paid for by the student. The Office of International Programs collects and administers funds for those items which the program must arrange or can negotiate more effectively: typically, home campus fees, orientation costs, insurance, outbound transportation, and housing in some centers. Students accepted in the International Programs may apply for any financial aid available at their home campus. Application for the 1974–75 academic year must be submitted before February 4, 1974 (except for United Kingdom applicants who must submit applications by January 7, 1974). Applicants are notified of acceptance by April 1, 1974. Detailed information may be obtained from Arts and Latters in Library Fast 357 or by writing to The California State University

from Arts and Letters in Library East 357, or by writing to The California State University and Colleges International Programs, 5670 Wilshire Boulevard, Los Angeles, California 90036.

#### **Research Bureaus**

#### Asian Studies Alvin D. Coox, Director

The Center for Asian Studies is an interdisciplinary organization in the College of Arts and Letters. Drawing upon faculty members from many areas, it performs such services as (1) securing and administering grants and other support for research and development in Asian Studies; (2) coordinating and publicizing the activities of faculty engaged in Asian-centered Studies; (3) developing and administering the Asian Studies program and relevant curricula at the undergraduate and graduate level; (4) responding to campus and community requests for information and services; (5) fostering campus and community interest in Asian Studies.

#### **Business and Economic Research** John B. McFall, Director

The Bureau of Business and Economic Research is a center for organized research activity serving the needs of the School of Business Administration. Operationally, it is a part of the School of Business Administration, with a director and staff, but serves in addition as a coordinating agency for studies which concern the university as a whole. Fiscal matters are

coordinated through the San Diego State University Foundation. The principal objectives of the bureau are to (1) conduct research in the areas of economics and business, with special reference to local and regional problems; (2) facilitate research in these areas by the faculty and students; (3) seek cooperative arrangements with outside individuals and organizations for conducting specific research projects; (4) analyze and interpret local and regional data; (5) publish the results of its investigations and aid faculty in publication of their research.

Graduate students and faculty are encouraged to make use of bureau facilities. The bureau is a member of the Association for University Business and Economic Research.

#### **Counselor** Education **Emery J. Cummins, Director**

The Center for the Study of Counselor Education is an interdisciplinary task force under the administrative jurisdiction of the Dean of the School of Education; fiscal matters are coordinated through the San Diego State University Foundation. The Center is designed to draw together faculty members from relevant disciplines such as anthropology, economics, education, psychology, social welfare, social work, sociology, and the college counseling center for such purposes as (1) securing and administering grants and other support for research and development in counselor education and guidance and (2) conducting programs or rendering services related to counselor education and guidance through contractual agreements with public or private agencies or organizations.

110-9 5 550

#### Special Programs and Services / 29

#### 28 / Special Programs and Services

#### Economic Education Joseph McClintic, Director

The Center for Economic Education works with the public schools to promote better economic education. The functions include (1) research, (2) the development, evaluation, collection, and dissemination of appropriate materials, (3) in-service and pre-service instruction, and (4) service. The development of more effective strategies and the evaluation of teaching at all levels is involved.

#### Economics Research Center Edward J. Neuner, Director

The Economics Research Center collects research materials, publishes occasional monographs, and encourages research of special interest to faculty and students in economics and related areas. The Center's facilities are currently utilized by the Economics Department for faculty seminars and economics conferences, by the Center for Research in Economic Development, by the Institute of Labor Economics, and by the local chapter of Omicron Delta Epsilon.

#### Educational Services and Research David H. Ford, Coordinator

The Bureau of Education Services and Research operates within the School of Education. The objective of the bureau is to improve the quality of education through research by (1) assisting with research activities of individual faculty members who wish to make use of its services, (2) cooperating in community and service studies, (3) serving faculty graduate advisers as a resource in research design and statistical techniques, and (4) engaging in the dissemination of educational research information.

#### European Studies Center Ernest M. Wolf, Director

The European Studies Center coordinates and supports teaching and research related to the European area. It supervises the major in European Studies for the A.B. degree and the minor in Humanities for secondary teaching with concentration in European Studies. It sponsors the annual California State University, San Diego Summer Seminar and Travel Study Tour to Europe in connection with the European Studies Summer Campus at Strasbourg, France. It administers the European Studies Center Laboratory in LE-507 which contains books, pamphlets, English and foreign language periodicals, and a slide collection on European art and geography. The laboratory room is open several hours each day for study and research by students and instructors in courses dealing with any aspect of European studies. The center also assists in the development of the university library's holdings in the European area and has created a special collection of library materials on European integration and unification which is being steadily and systematically expanded.

#### Labor Economics Adam Gifford, Coordinator

The Institute of Labor Economics is an activity of the Economics Department with its administration under a director. The Institute, located with the Economics Research Center in SS-338, provides materials and direction for research in labor problems, collective bargaining, labor legislation, and social security.

#### Latin American Studies Philip F. Flemion, Director

The Center for Latin American Studies seeks to encourage teaching and research related to Latin America. It has primary responsibility for the administration of the Latin American undergraduate and graduate degrees and the Mexican Summer School programs. The center sponsors a Latin American Lecture Series which provides the campus with public lectures given by guest speakers and members of the California State University, San Diego faculty who discuss a variety of Latin American topics. The center also assists in the development of the university library's Latin American holdings and has created a special collection of Latin American materials which is available in the center's reading room LE-543.

#### Marine Sciences Glenn A. Flittner, Director

The Bureau of Marine Sciences has been established to facilitate interdisciplinary education and research activity in the Marine Sciences at California State University, San Diego. The Bureau is administered by a director, and operated under the guidance of a Faculty Committee. Fiscal operation is coordinated through the San Diego State University Foundation.

#### Paleobiology Council Jason A. Lillegraven, Chairman

An interdisciplinary research and teaching agency to explore the fossil record. Composed of faculty members from the departments of Geology, Physical Science, and Zoology at California State University, San Diego in addition to professional paleontologists in other research and educational institutions in the greater San Diego area.

#### Public and Urban Affairs W. Richard Bigger, Director

The Institute of Public and Urban Affairs is an agency of California State University, San Diego, organized to conduct research into community and governmental problems. It also sponsors institutes and conferences related to community and governmental activities. It is staffed by members of the faculty of California State University, San Diego. Closely associated with the institute is the Public Administration Center with a specialized and growing collection of research materials. The institute engages in cooperative or joint research efforts with the various departments of instruction, institutes, and research centers of the university.

#### Public Economics George Babilot, Director

The Center for Public Economics is a facility of the Department of Economics to encourage research by students and faculty in all phases of non-market economic decision-making, encompassing the following areas: (1) the functioning of federal, state, and local fiscal systems, including the provision for and financing of public goods at each level; (2) the economic factors involved in environmental changes, in particular, their bearing on urban and local economic problems; (3) the economic dimensions of social decision-making. The center is designed to complement the curricular and degree programs in the Department of Economics and to be of service to related disciplines. It maintains research materials and facilities to assist research and publications in the area of public economics. The Center is located in OL 307.

#### Regional Environmental Studies Charles F. Cooper, Director

The Center for Regional Environmental Studies coordinates and encourages interdisciplinary research, educational, and public service programs related to environmental quality and improved use of environmental resources. Physical, biological, social, and institutional aspects of environmental problems are emphasized. The Center endeavors to serve as a point of contact between the University and governmental and private institutional concerned with environmental quality. Although the San Diego region receives primary attention, the Center's activities includes statewide, national, and international environmental programs.

#### Research in Economic Development Ibrahim I. Poroy, Director

The Center for Research in Economic Development is part of the Economics Department's effort to encourage research by students as part of their education and by the faculty. The Center, temporarily located in the Economics Research Center in SS-340, provides material and aid for research in problems related to less developed countries.

#### Social Research Aubrey Wendling, Director

The Social Research Center is a facility of the Department of Sociology. It provides physical equipment and space for the planning and processing of sociological research in such areas of investigation as urban growth and development, demographic factors, and social surveys. Current plans include expansion of the center to include laboratories for experimental studies of social organization. The center is administered for the Department of Sociology by a director and an assistant director, whose duties include consulting assistance

120-9 5 600

#### 30 / Special Programs and Services

in the designing and execution of studies and in the preparation of proposals to funding agencies.

#### Survey Research Oscar Kaplan, Director

The Center for Survey Research has been established to encourage nonprofit research in the sample survey field. The Center is prepared to undertake surveys requested by government or nongovernment organizations, and to do field work on a local, state, or national basis. Faculty members who wish to submit applications for off-campus support in survey research in the name of the Center may do so, upon approval of the project by the Center's Advisory Committee. The Center is administered by a Director.

#### Computer Center

The Computer Center is established to encourage and support the use of computers in all instructional, research and administrative activities of the University. The Center is a cooperative venture by the San Diego State Foundation, Aztec Shops and the University. The present equipment includes a medium size electronic digital computer-an IBM 360 Model 40 with 262,144 bytes of core storage, disks, tapes, a printer, card reader and punch. The supervisor is the Disk Operating System which supports the Assembler, COBOL, FORTRAN, PL/I and RPG languages. Remote job entry terminals are located in two buildings on campus. These terminals, consisting of a card reader and printer, are connected to the main computer in the Computer Center via telephone lines. A smaller digital computer, an IBM 1130 supports the APL and FORTRAN languages and has a plotting capability. Additional facilities include all necessary peripheral equipment to permit computer operation in the fields of scientific computation and commercial data processing. Timesharing terminals are strategically located throughout the campus and are tied by telephone lines to a CDC 3170 computer located at CSU, Northridge. Programming and data offered by several departments within the University.

#### **Research and Project Administration**

Research in all academic areas is carried on at California State University, San Diego, consistent with the Master Plan For Higher Education. California State University, San Diego also engages in projects such as federal educational contracts and institutes (both on the campus and in foreign countries) and other projects related to community and national goals. Research and project activities at California State University, San Diego are administered through the San Diego State University Foundation. Under general policies set down by the administration, California State University, San Diego has successfully maintained the balance, as envisioned in the Master Plan, between teaching and research, each complementing the other.

#### Audio-Visual Center

In general the Center provides professional assistance in the application of educational technology to achieve maximum efficiency in instruction. These functions include: (1) consultation on selection, acquisition, preparation, utilization and evaluation of instructional media and equipment; (2) organizing, equipping and maintaining instructional media facilities and resources; (3) developing and operating a service to provide, maintain and circulate instructional media and equipment for instruction; and (4) preparing materials required for instruction but not conveniently available from other sources.

#### San Diego State Press

The San Diego State Press operates under supervision of a publications board composed of representatives from each school and college. Financial assistance is coordinated through the San Diego State Foundation.

The Press publishes manuscripts and other works of both scholarly and practical educational value. In addition it publishes syllabi prepared for specific classes.

# **Financial Aid**

#### Cost of Living

Each student should plan his budget based on individual needs. The wide range of financial resources of students in a university as large as ours makes it difficult to give specific information on costs. At California State University, San Diego it is possible to live simply and participate moderately in campus life on a modest budget. The following table may serve as a guide.

Estimated Expenses for the Academic Year

imated Expenses for the Academic Tear	Living on Campus	Commuting
Materials, service, student activity, student union fee, facilities fee Books and supplies Personal Room, board, health	\$161 180 450 1250	\$161 180 400 
Transportation, parking		250
Total	\$2041	\$1591

In addition, foreign students and out-of-state students pay an annual tuition of \$1110. Typical expenses for married students without children average \$4,075 for a nine-month period.

#### **Financial Aid**

California State University, San Diego makes every effort to see that students who wish to attend are not prevented from doing so because of inadequate resources. Funds available to California State University, San Diego, however, are not unlimited and applications are considered on the basis of greatest financial need. Financial aid in the form of loans, grants, and part-time employment on or off the campus is made available to qualified applicants. In the majority of cases, a student will be offered a package financial aid plan which may include one or more of the types of aid.

Some loan programs-those for prospective teachers, nurses, and law enforcement agents-provide for partial cancellation of the indebtedness if after graduation the recipient is employed full time in the designated area. Some interest-free loans of modest size are available for emergencies. Some outright grants can be made to students from low-income families who would not, but for such a grant, be financially able to pursue a course of higher education. They are renewable as long as the need remains. Some grants are also available to full-time employees of certain law-enforcement agencies. Aliens, however, are eligible only for emergency loans.

#### Applying for Aid

All these financial aid programs, as well as others not described here, are administered by the Financial Aid Office, Administration Building Room 222. Interested persons should ask for the Financial Aid brochure. Counselors are available for guidance as to the most appropriate aid program for the individual. A form titled "Preliminary Financial Aid Application for 1973–74" is contained as Part C

in Admissions Application booklet. However, additional information is required for evaluation and determination of financial need. Intructions and any required additional forms will be furnished to those students for whom space at California State University, San Diego has been reserved. All such additional forms or requested documentation must be returned to the Financial Aid Office by April 13, 1973.

A completed Financial Aid application includes a Parent's Confidential Statement (PCS) or a Family Financial Statement (FFS). The PCS form may be obtained from your school counselor. It should be filed as soon as possible, in accordance with instructions therein. The FFS form is to be used by independent and married students; it may be obtained from your school counselor or from the Financial Aid Office. It, too, should be filed as soon as possible in accordance with instructions therein.

Financial Aid / 33

#### 32 / Financial Aid

#### Alan Pattee Scholarship

Surviving children, natural or adopted, of California peace officers or firemen killed in the line of duty are not charged fees or tuition of any kind while enrolled at any California State University or College, according to the Alan Pattee Scholarship Act and the Education Code, Section 23762. Students qualifying for these benefits are known as Alan Pattee scholars.

#### Scholarships

The California State University, San Diego Scholarship Committee will administer approximately 200 scholarships for the 1973–74 academic year. The awards average about \$200. These scholarships are donated by a number of individuals and organizations with the stipulation that the Scholarship Committee select the recipients. Application forms for applying for the 1973–74 program became available in the CSU, SD Scholarship Office on January 2, 1973. The deadline for applying will be February 28, 1973. Selections are based on recommendations received from the various Department Chairmen and financial need. Information is available from the Scholarship Office, Room 221, Administration Building. A similar program is anticipated for the 1974–75 academic year.

During the 1972–73 academic year about 500 students received scholarship, fellowships, grants, or stipends totaling approximately \$500,000 through the various Departments. Federal, State and private industry support programs of this nature are largely directed to students doing graduate work or to students preparing for some special field of work. Students who have decided on some particular area of study should check with an Adviser in the Department of their major to determine what scholarship, fellowship, grant or stipend support might be available to them.

For the 1972-73 academic year about 300 students received scholarships from donors who made their own selections and asked the college to administer the funds. These scholarships are generally from clubs and organizations helping students studying in areas of interest to that club or organization. Students should ask if a club or organization of which they or members of their family are members sponsor scholarships.

In addition to the scholarships granted to students directly by organizations and individuals, the following scholarships are awarded through the Scholarship Committee:

American Business Women's Association American Society of Military Comptrollers American Yugoslav Women's Club AMOCO Production Foundation Amsden Memorial Bank Administration Institute Baranofsky, Dorothy Memorial Biehl, Martha S. Health service: Mary Bradford, M.D.; C. Leland Colm, M.D.; Paul Constantine, M.D.; Jay Cohen, M.D.; James Crawford, M.D.; James W. Firoved, M.D.; Frank Grabarits, M.D.; Ralph M. King, M.D.; Kathleen Lilley, M.D.; Robert Vinton, M.D.; and Betty Zak, M.D.; Gertrude Anderson, R.N.; Elizabeth Brandt, R.N.; Verna Brooks, R.N.; Juanita Carroll, R.N.; Donna Castonguay, R.N.; Betty Chohan, R.N.; Patricia Coe, R.N.; Itele Erickson, R.N.; Virginia LeBlanc, R.N.; Virginia Myers, R.N.; Dorothy O'Carroll, R.N.; Joan Simcox, R.N.; Roy Stone, R.N.; Arlene Thompson, R.N.; and Frances Woodiwiss, R.N.

#### Advising and Innovative Education Center

The Center serves the university by coordinating the university-wide advising program, complementing the departmental faculty who advise students majoring in their disciplines. Additionally, the Center, acting as an idea and resource agent for innovative educational endeavors, encourages the development, funding and execution of plans for alternate methods of university instruction.

#### Counseling and Testing

These services are performed in the Student Counseling Office and the Test Office. The university makes them available to help students gain the greatest benefit from their university experience. Mature and well trained counselors are available for help in the solution of problems of a personal, social, or occupational nature. In addition, students wishing to set up a special major can receive guidance in the Counseling Office.

#### **Health Services**

As a part of the program of student personnel services the university provides health services for the protection and maintenance of student health. These services are administered under the supervision of a medical director-administrator. A full-time physician staff is available to the students when school is in regular session for consultation, treatment of minor physical conditions, emergencies and counsel as to follow-up procedures. Full-time nurses and technologists are also on duty when school is in regular session. Special clinics are conducted in Family Planning, Ear, Nose and Throat, Dermatology and Gynecology.

As a part of the admissions procedure a health history is required of all students. On the reverse side of the health history is a physical examination form to be completed by the private physician. Careful attention is given to student undergoing private remedial treatment, and those for whom a modified study load or a limited participation in physical education activities seems advisable. The physical examination must be completed as a condition to matriculation in accordance with Title 5, California Administrative Code, Paragraph 41200.

A student health insurance program sponsored by the Associated Students is currently in effect. This insurance, which covers hospitalization and specified medical and surgical services, may be purchased by the semester or the year through Aztec Shops, with enrollment open the first thirty days of each semester. Refund will be made to students graduating or dropping out of school on a prorated basis.

# Career Planning and Placement Center

California State University, San Diego provides a centralized placement service in cooperation with the various departments of the institution. Undergraduate students are aided in securing part-time and full-time positions and in obtaining information concerning occupational trends. Liaison is maintained with the Personnel Services Center on matters relating to senior vocational counseling. Staff members maintain constant liaison with schools, businesses, and industries. Early in his college career, the student should seek out a counselor appropriate to his academic and vocational goals.

These counselors, as well as special counselors to serve Chicano and Black students, are available at the Center. Credit courses related to career planning are offered. The Career Planning and Placement Center is located in the College Annex 5870 Hardy Avenue.

Going to college is regarded as a full-time job. Students are normally expected to spend in class and study a total of three hours per week for each unit of college work attempted. A normal 16-unit load therefore represents a 48-hour week. Students are strongly advised to take this into consideration before accepting any part-time job.

When registering for his last semester, the student should fill out a Career File and an Early Match System data card. With the information he thus provides, the Center staff can better assist him in seeking out rewarding and challenging full-time employment.

#### **Vocational Rehabilitation Services**

A student who has a physical or emotional disability which handicaps him vocationally may be eligible for the services of the State Department of Rehabilitation. These services include vocational counseling and guidance, training, and job placement. He may qualify also for financial assistance for educational and medical needs and to meet living expenses.

For further information, students should apply to the department at its district office, 1350 Front Street, San Diego, or call 232-4361.

### Study Skills Center

Standard English, free from flagrant errors in grammar and spelling, is required on written assignments throughout the university; moreover, passing of the Writing Competency Test or satisfactory completion of designated courses or remedial programs is a requirement for graduation.

To help students attain a reasonable degree of proficiency, the English Department offers several courses in composition, beginning with the freshman year. In addition, the Study Skills Center, offers a semitutorial service to those wishing to improve writing or reading ability or to get help with study problems or writing projects, either remedial or advanced. The service is open to all students at any level of college work. If interested, enroll in Study Skills R, W, or S, or simply come to the Center without registering.

### Audiology Diagnostic Center

The Audiology Diagnostic Center is a facility of the Speech Pathology and Audiology Department with its administration under a director. The center is located on the lower floor of the Education Building, adjacent to Health Services. The principal objectives of the center are: 1) to provide complete diagnostic information regarding the hearing loss for faculty, students, and staff; 2) to provide the same service to the community for a minimal fee administered through the University Foundation; 3) to provide hearing assessment of all freshmen and transfer students as part of their health examination; and, 4) to foster research in the area of hearing function and pathology. A minimal fee is charged for diagnostic evaluations. This center operates throughout the school year and in Summer Session II.

### Speech and Hearing Clinic

A speech and hearing clinic in which university students are trained in the application of speech, hearing and language pathology techniques, speech, lipreadiing and auditory training and language development for the hard of hearing and deaf, is held throughout the academic school year and in Summer Session II. The clinic admits those with speech and hearing problems of all ages. Because of limitations in staff, not all who apply can be admitted. A minimal fee is charged for diagnostic evaluation and therapy for outpatients but not for students enrolled at California State University, San Diego.

#### 36 / Student Services

#### **Clinical Training Center**

The Clinical Training Center prepares university students at the undergraduate and graduate levels to identify and diagnose children's and young adults' physiological and psychological difficulties, to teach and give remediation, and to test and counsel. Students from the departments of Education, Psychology, Social Work and Speech Pathology and Audiology receive a variety of carefully planned experiences, including an opportunity to work with children and youth under supervision on a one to one ratio or in very small groups. In addition, they take part in frequent staff meetings which utilize the interdisciplinary approach toward solution of children's problems. Meetings with parents of the children with whom they work is a regular function of the training program.

While the primary purpose of the Center is to train teachers and clinicians, a community service is offered to those who have problems with school achievement, speech, hearing, educational and vocational planning, and school adjustment. Referrals are ordinarily made by schools, other agencies, or individuals. Parents, for example, may make a referral either directly to the Center or through their child's school. In general, preference would be given to the child who might profit best by specialized help and who meets the needs of training college students. There are specific criteria of selection of children for each strand of the total program.

#### Student Activities

A rich field of extracurricular activities is available to California State University, San Diego students. The *Student Handbook*, available at the time of registration, gives information concerning the nature and scope of these opportunities. The Dean of Activities, Dorothy V. Simpson, and her staff are available to students desiring advice and assistance in planning campus activities.

A multitude of exciting opportunities are offered to students wishing to participate in student activities. Some students enjoy participation in musical and dramatic performing groups, the intercollegiate athletic program, and newspaper, magazine, radio, television and film productions. Other students participate in student organizations; among the approximately 200 student organizations offering membership are service groups, honor societies, professional societies, recreational organizations, departmental organizations, political organizations, religious organizations, national social fraternities and national social sororities.

There are 10 national sororities at CSU, San Diego which provide housing accommodations for approximately 290 women. A formal rush program is held during the Fall semester while informal rush continues throughout the entire year. For further information, contact the Panhellenic Office, California State University, San Diego, San Diego, California 92115.

The 15 national fraternities invite students for membership throughout the academic year and summer months. Interested students may obtain further information by writing to the Intrafraternity Council in care of the university activities office.

#### Student Centers

California State University, San Diego was the first of the California State University and Colleges to build and operate a permanent university center. The Aztec Center story started in the mid-1930's when students and faculty began accumulating funds for construction. In 1956, the Associated Students Council set aside a permanent portion of the Activities Fee for the building fund. Students voted to assess themselves a mandatory fee for the further development of the project in 1963. Two years later the U.S. Department of Housing and Urban Development extended a 40-year loan of \$2.9 million to enable construction to begin. The student union fee will be used to retire this indebtedness; no public tax money is involved. The furnishings and equipment were paid for with student funds and contributions from Aztec Shops, Ltd. From inception to the finalities of interior furnishings, students and faculty have shared alike in all phases of its planning and development. Financed by a student union fee, it is a non-profit, self-sustaining, self-liquidating, non-tax supported, student-financed operation.

Use of the center is the privilege of California State University, San Diego students, faculty, staff, alumni, and their guests. It provides a pleasant background for many cultural, social, and recreational activities. Its name reflects its unifying nature: a dynamic, enriching focal point for the social life of members of the campus community.

point for the social file of members of the campus community. The 110,000 square foot structure houses a portion of the activities program and includes several lounges, conference rooms, bowling lanes, and space for billiards, table tennis, an information booth, a U.S. Post Office branch, ticket office, lost and found, barber shop, student government center, a snack bar (Monty's Den), and a large hall (Montezuma Hall) for lectures, movies, and concerts.

In addition to the Center Facilities, Scripps Cottage and Park, and the Aquatics Center

151-9 6 115

complement the Associated Students commitment to provide facilities for student needs.

Scripps Cottage and Park serve the west side of the campus providing a relaxed atmosphere for student gatherings. The cottage originally was given to the campus from the estate of Ellen Browning Scripps. The cottage has been completely refurbished, and a lovely 40 acre park has been added to the area.

The Mission Bay Aquatic Center has recreational sailing, waterskiing, and water sports activities for the campus community at Santa Clara Point, in San Diego's beautiful Mission Bay. This complete aquatics recreation facility is available for the use of California State University, San Diego students year round. Water recreation and just plain fun await you.

#### Aztec Shops

Aztec Shops, Ltd. is a non-profit campus auxiliary organization serving California State University, San Diego exclusively. Its primary purpose is to provide bookstore and food services to the campus. Other services of the Shops include check cashing, free notary service, ticket sales, lost and found, a contract Post Office, and duplicating services.

The bookstore provides required textbooks, assigned class materials, reference works, and offers a large selection of general interest books and supplies.

Duplicating services provides Xerox copying, instant offset printing, poster printing, binding and collating.

#### Alumni Association

The primary purpose of the association is the promotion of the welfare of the university. The association carries on this purpose through fund raising activities. Contributions are turned over to the university to assist in the funding of scholarships, faculty chairs, equipment and building programs along with other worthy causes when needed.

A secondary purpose of the association is the dissemination of educational information, in behalf of the university to members of the association.

The association publishes a monthly Alumni News and the bi-annual El Campanario magazine to distribute news and information about the university to its members.

Membership in the association is open to any former student who was in regular attendance for at least a semester, as well as to past and present members of the faculty. Alumni House, at 5721 Lindo Paseo, is attractively furnished and has a garden area for outdoor events. Alumni and campus related groups are invited to use its facilities.

#### **Residence Halls**

Accommodations for 1668 single students are available in six residence halls on campus. Each of the buildings is fireproof and air-conditioned throughout. Five red-brick halls (one co-ed, one for men and three for women) accommodate 209 students each, with sleeping and study facilities on a two-students per room basis. The sixth residence, which is a high-rise co-ed, accommodates 623 students with 314 spaces for men. Adequate provision for study hours will be made, as well as an opportunity for participation in campus activities. Student government in each residence, working through the Associated Students of California State University, San Diego, sets standards for basic behavior in these residence halls. Each of the smaller residence halls is staffed by one Head Resident and five Assistants, with two Head Residents and appropriate staff in the larger hall.

Currently, the cost for room, health and accident insurance, and linens is approximately \$292 to \$387 per semester. Food service (19 meals per week) is available in The Commons on an optional basis.

IT IS THE RESPONSIBILITY OF EACH STUDENT AND/OR PARENT TO CONTACT THE HOUSING OFFICE IF ONE WISHES TO OBTAIN ON-CAMPUS HOUSING. THE EARLY APPLICATIONS ARE GIVEN PRIORITY IN DATE ORDER AS THE DEMAND EXCEEDS THE NUMBER OF SPACES ON THIS CAMPUS. To apply for housing, the student should send a self-addressed envelope to the Director of Housing Office. When the application is completed, it should be accompanied with a \$106 deposit, mailed to the Cashier's Office in the Campus Laboratory School. Your request for a space can not be firmed by the University until early summer. A student may apply as early as a year in advance. Applications are taken in order of date received. Though consideration will be given to a student's request for an individual hall and roommate, he can not be guaranteed a specific room.

No application can be honored if the student is not accepted for admission into California State University, San Diego by August 18 (January 24, spring semester). Clearing residency is not the same as being fully admitted to the university. Nor does receipt of a housing contract mean that the university is committed to admitting the student. The deposit will be refunded if a student, after having submitted his housing application, is denied admission to the university.

157-9 6 145

#### 38 / Student Services

During the Summer Sessions, rooms are available on a receipt-of-check date priority. A \$20 refundable security deposit should accompany a request for reservation.

Adjacent to the campus is a nine-story privately owned and operated coeducational residence hall, approved for California State University, San Diego students. Room and board are available for over 500 students. For information apply directly to El Conquistador, 5505 Montezuma Road, San Diego.

Information on other off-campus housing may be obtained from the Director of Housing, 5860 Hardy Avenue.

#### Transportation and Parking

Bus line transportation to the university, connecting with all areas of the metropolitan area, is available daily, except Sundays and holidays. Route S operates north-south on College Avenue, between the campus and the College Grove Shopping Center at Ryan Road. Transfer points for connecting east-west bus lines are at El Cajon Boulevard with Route E, at University Avenue with Route 7, and at Streamview Drive with Route 5.

A free bus runs between the University and Ocean Beach, Mission Beach and Pacific Beach in the morning and afternoon.

On-campus parking areas are provided for students, faculty and staff. A visitor information booth is located at the entrance to the campus on Campanile Drive.

# **Educational Opportunities Program**

This program is designed to assist undergraduate students from minority or low-income groups who wish to acquire a college education but have not been able to realize their potential because of economic, educational, or cultural environments. In cooperation with various federal, state, and local agencies, the Program recruits and enrolls students and provides scholastic and personal counselling during their undergraduate careers. Financial aid is disbursed through the Financial Aid Office to those students who prove financial need in accordance with federal and State guidelines. EOP and its supportive services attempt to insure that each student shall have the opportunity to reach his or her fullest potential.

#### Veterans

The Veterans Office (located in AS-107) provides eligible veterans and veterans' dependents with information and assistance in the establishment of benefits. Newly admitted students who will be receiving veteran's subsistence should contact the Veterans Office as soon as possible to insure that processing is begun promptly.

#### **Disabled** Students

A disabled student, as well as a student assisting him, has the right to pre-register for classes. He may get on the pre-registration list by contacting the Dean of Students Office (286-5211) and should also give the name of the student who will be assisting him. The Student Health Services authorizes special parking stickers giving special parking privileges for the more handicapped students. A Disabled Students Center is located in Room 110A of the Campus Lab School, and serves as a study and rest areas as well as a meeting room for an active chapter of the Disabled Students Union. Membership in the Disabled Students Union is open to the disabled and other students interested in helping to meet the needs of the handicapped on campus. For further information concerning wheelchair routes, special restrooms, inaccessible classrooms, etc., call Dean of Students Office, 286-5211; Activities Office, 286-5221, or Disabled Students Center, 286-6376.

# Regulations

Admission and Registration General Regulations Graduation Requirements

# Admission and Registration

### Admission to the Campus

Requirements for admission to the California State University and Colleges are in accordance with *Title 5*, Chapter 5, Subchapter 2 of the *California Administrative Code*, as amended by the Board of Trustees of the California State University and Colleges on November 24, 1970. A prospective applicant who is unsure of his status under the requirements is encouraged to consult his school or college counselor or the Campus Admissions Officer.

## Undergraduate Application Procedures-1974-75

All prospective undergraduate students must file a complete application for admission within the appropriate filing period. A complete application includes an application, a residence questionnaire, a data coding form, and the \$20.00 non-refundable application fee. Each undergraduate applicant may file only one application for any one term with The California State University and Colleges System. Applications may be obtained from any campus of the system or high school and community college counselors, and should be filed with the campus of first choice. Alternate choice campuses may be listed on the application. Applicants seeking financial aid should also complete and submit with the application a Preliminary Financial Aid Application.

## Graduate Application Procedures-1974-75

All applicants for any type of post-baccalaureate status (e.g., Master's degree aspirants, those seeking credentials, and those interested in taking courses for professional growth, those seeking credentials, and those interested in taking courses for professional growth, etc.) must file a complete application packet for admission to post-baccalaureate status within the appropriate filing period. A complete application packet for admission to post-baccalaureate status includes an "Application for Admission/Readmission" (for post-baccalaureate students), a "Residence Questionnaire", a "Supplemental Graduate Admissions Application", a "Data Coding Form", and the \$20.00 non-refundable application for Post-baccalaureate students when were availed as undergraduate to depict to the students to depict to the students of the students application for the students of the students o fee. Post-baccalaureate applicants who were enrolled as undergraduate students at the campus in the term immediately preceding the term for which they now wish to apply are also required to complete and submit an application packet and remit the \$20.00 non-refundable application fee. Applicants seeking financial aid should also complete and submit with the application material specified above, a "Preliminary Financial Aid" application.

Since applicants for post-baccalaureate programs will be limited to the choice of a single campus on each application, redirection to alternative campuses will be minimal. In the event that a post-baccalaureate applicant wishes to be considered by more than one campus, it will be necessary to submit a separate application (and fee) to each.

Application materials may be obtained from the Office of Admissions of any campus within the system and should be filed with the campus of first choice.

# Application Filing Periods-1974-75

Term	Initial Filing Period	Extended Filing Period (Begins on date given and continues until quotas are reached)
Summer, 1974	Ian. 1-31, 1974	guotas are reached)
Fall O. 1974	Nov 1-30 1973	Feb. 1, 1974
Fall S 1974	Nov 1_30 1073	Dec. 1, 1973

Quarter Calendar Bakersfield Dominguez Hills Hayward Humboldt Los Angeles

Cal Poly, Pomona San Bernardino Cal Poly, San Luis Obispo

#### **Initial Filing Period**

All applications filed during the initial filing period will receive equal consideration within established enrollment categories and quotas, irrespective of the time and date filed.

#### **Space Reservations**

Applicants who can be accommodated within category quotas will receive confirmation of space reservation. Although the space reservation is not a statement of admission, it is a commitment on the part of the campus to admit a student once eligibility has been determined. When the student receives notice of the space reservation, he should initiate action to have transcripts of all college and high school work sent to the campus where space has been reserved. The campus will inform him of the number of copies of transcripts required, dates for submittal, and where they should be sent. THE STUDENT SHOULD NOT REQUEST THAT TRANSCRIPTS BE SENT UNTIL REQUESTED TO DO SO BY THE CAMPUS WHERE SPACE HAS BEEN RESERVED.

#### Redirection

Applications of students who cannot be accommodated at their first choice campus will automatically be redirected to their second choice, and, if they cannot be accommodated there, to their third choice, etc.

#### Hardship Petitions

Each campus has established procedures to consider qualified applicants who would be faced with an extreme hardship if not admitted. Prospective hardship petitioners should contact the campus regarding specific policies governing hardship admission.

#### **Extended Filing Period**

Campuses not filing category quotas during the initial filing period will continue to accept applications during the extended filing period until quotas are filled. Application priority within the extended period will be granted in chronological order of application receipt by the campuses.

#### Filing of Records

File Official Transcripts. The applicant must file the following official transcripts with the Admissions Office:

- (1) Transcript from high school of graduation or last in attendance (not required of the graduate student who holds a bachelor's degree from an accredited institution, but is required of the student who holds a bachelor's degree from a nonaccredited institution).
- (2) Transcripts from EACH college attended (including extension, correspondence, summer session, or evening courses). Graduate students must file transcripts in
- duplicate if they plan to enter the master's degree program.
  (3) Photostat or true copy of the military separation form DD-214 (or equivalent) if applicant has had active military service. (Not required of graduate students.)

A transcript will be considered official and accepted to meet the regulations governing admission only if forwarded directly to San Diego State by the institution attended. All records or transcripts received by the college become the property of the college and will not be released nor will copies be made.

#### **Completion of Required Tests**

#### **Admissions Tests**

- (1) College Aptitude Test. The American College Test (ACT) or the Scholastic Aptitude Test (SAT) is required for matriculation of entering freshmen and transfer students with less than 60 units. Applicants should consult the high school counselor for dates and places where tests are given.
- \* The Stanislaus campus is on a modified semester plan, with an "early" fall semester, concluding before the December holidays, an interim term of one month, and a regular spring semester.

170-9 6 210

#### Admission / 41

#### 42 / Admission

- (2) Writing Competency Test. This test may be taken before registration by all undergraduate students transferring to this college with 45 units or more of advanced standing. Passing this test or satisfactory completion of designated courses or remedial programs is a graduation requirement for all students.
- *Test of English as a Foreign Language*. Applicants whose native language is not English must attain satisfactory scores on the Test of English as a Foreign Language (TOEFL). For further information see the section of this catalog on Admission of Foreign Students.

#### **Teacher Education Tests**

These tests are required of all candidates for teaching credentials. Refer to Admission to Teacher Education in the section of this catalog on the School of Education.

- (1) Fundamentals Test. This test is required of all candidates for the general elementary and kindergarten-primary credentials before admission to teacher education. May be taken before registration by students transferring to this college with 15 units or more of advanced standing. May also be taken during the regular semester. Make a reserva-tion for this test at the Test Office during the two weeks prior to the test date.
- (2)College Level Examination. This test is required of all candidates for any of the secondary school credentials before admission to teacher education. May be taken before registration by students transferring to this college with 60 units or more of advanced standing. May also be taken during the regular semester. Make a reservation for this test at the Test Office one month prior to test date. Fee required.

#### **Oualification Tests**

Mathematics Placement Examination. Required of students before enrollment in any of the following courses: Mathematics 3, 4, 12, 20, 21, 40, 50; and Economics 2. These examinations may be taken before registration. Reservations for the examinations are not required. Refer to the calendar in the Class Schedule for examination dates.

Graduate Aptitude Tests. This test is required of all graduate students who intend to enroll in a master's degree program. May be taken before registration. Also given during the regular semester. Make reservations for this test at the Test Office, Old Library. Refer to the Graduate Bulletin for full information and test dates.

# Undergraduate Admissions Requirements

#### **First-time Freshmen**

Applicants who have completed no college work \* after high school graduation will be considered for admission as first-time freshmen under one of the following provisions. Results of either the CEEB Scholastic Aptitude Test (SAT) or the American College Testing program examination (ACT) are acceptable in establishing eligibility. Registration forms for either test may be obtained from high school and community college counselors, State College testing offices or directly from the testing service at the address below:

SAI	ACT
CEEB Box 1025 Boxhalay, Calif, 94770	Registration Unit P.O. Box 168

Oct. 13, 1973	Oct 20 1973
Nov. 3, 1973	Dec. 8, 1973
Feb. 2, 1973	Feb. 23, 1974 Apr. 27, 1974
Apr. 6, 1974	June 15, 1974
line 99 10/A	

\* Exceptions: College credit earned concurrent with high school enrollment; college credit earned in summer session after high school and prior to regular matriculation in college; college credit granted for the CLEP or ADVANCED PLACEMENT programs, or military or USAFI courses; or college credit granted for some non-traditional learning experience, will *not* affect the applicant's status as a first-time freshman for application quota purposes as well as admission. Further, the accelerated student, who completes his high school program mid-year, who has applied to the California State University and Colleges for the following Fall term, but chooses to attend a local community college in the spring term will be considered a first-time freshman for application quota purposes as well as admission. All such college or advanced standing credit, if fully acceptable as transfer credit, will be granted the student after admission.

177-9 6 245

California High School Graduates and Legal Residents for Tuition Purposes must have a grade point average and total score on the SAT, or composite score on the ACT, which together provide an eligibility index placing them in the upper one-third of California high school graduates. The grade point average is based upon all high school course work completed in grades 10-12, excluding physical education and military science courses.

High school graduates from other states or possessions who are nonresidents for tuition purposes must present an eligibility index which places them in the upper one-sixth of California high school graduates. The following table gives grade point averages and test scores which together combine to establish eligibility.

#### Eligibility Index

The following chart is used in determining the eligibility of graduates of California high schools (or California legal residents) for freshman admission to a CSUC campus. Grade point averages are based on work completed in the last three years of high school, exclusive of physical education and military science. Scores shown are the SAT Total and the ACT Composite. Students with a given G.P.A. must present the corresponding test score. Conversely, students with a given ACT or SAT score must present the corresponding G.P.A. in order to be eligible.

The minimum eligibility index is: SAT = 3072 and ACT = 741. The index is computed either by multiplying the grade point average by 800 and adding it to the total SAT score, or multiplying the grade point average by 200 and adding it to 10 times the composite ACT score.

G.P.A.	A.C.T. Score	S.A.T. Score	G.P.A.	A.C.T. Score	S.A.T Score

<sup>1</sup> Students earning grade point averages above 3.20 are eligible for admission. <sup>2</sup> Students earning grade point averages below 2.0 are not eligible for admission.

Graduates of High Schools in a Foreign Country. Applicants who are graduates of foreign high schools must have preparation equivalent to that required of eligible California high school graduates. The campus will carefully review the previous record of all such applicants and only those with promise of academic success equivalent to that of eligible California high school graduates will be admitted. Such applicants are required to take the SAT or ACT only when specifically requested to do so.

Non-High School Graduates. Applicants who are over 18 years of age, but have not graduated from high school will be considered for admission only when preparation in all other ways is such that the campus believes promise of academic success is equivalent to that of eligible California high school graduates.

#### Admission / 45

#### 44 / Admission

High School Students. Students still enrolled in high school will be considered for enrollment in certain special programs if recommended by the principal and if preparation is equivalent to that required of eligible California high school graduates. Such admission is only for a given program and does not constitute the right to continued enrollment.

**Recommended Preparation.** Overall excellence of performance in high school subjects and evidence of academic potential provide the basis for admission at California State University, San Diego. While no specific course pattern is required, to prepare properly for a full program of university studies, the applicant is urged to include the following subjects in high school: college preparatory English (four years), foreign language (three or four years in the same language), college preparatory mathematics (algebra and geometry for all, two additional years for prospective science majors), college preparatory science with laboratory (one year of a life science, one year of chemistry, and a year of physics), a year of United States history, a year of senior civics, and a third year in the general area of social studies. In addition, the student should take classes in speech, music, art, and other subjects contributing to a general academic background. Prospective science majors should acquire skill in the use of the slide rule and in mechanical drawing. All students would find the ability to type useful in college.

# Admission as Undergraduate Transfers

Applicants for admission to the California State University and Colleges as undergraduate transfers will be considered for admission under one of the following provisions:

Applicants who have successfully completed 60 or more transferable semester units, or the equivalent, are eligible for admission if they have achieved a grade point average of 2.0 (C) and were in good standing at the last college attended. Nonresident applicants must have earned a grade point average of at least 2.4 (C+).

Applicants who have successfully completed fewer than 60 transferable semester units, or the equivalent, are eligibile for admission if they meet the above requirements and the current first-time freshman requirements. Applicants for admission as transfer students who have been continuously enrolled at a college since graduation from high school are eligible if they meet the first-time freshman requirements in effect at the time of their high school graduation. Either SAT or ACT test results are required of transfer applicants with fewer than 60 transferable semester units.

# **Evaluations of Transfer Credits**

Native speakers from foreign countries who have finished high school or the equivalent in that country will not be given credit for taking the elementary courses offered in that particular language. They will not be given credit for conversation courses in their native tongue.

#### Other Applicants

Applicants not admissible under one of the above provisions should enroll in a community college, or other appropriate institution. Only under the most unusual circumstances will such applicants be permitted to enroll in the campus. Permission is granted only by special colliferation.

California State University, San Diego offers a special program designed to expand educational opportunity for capable young people who, for a variety of reasons, have not previously had the opportunity. For detailed information regarding admission to this program, refer to the section of this catalog on the Educational Opportunities Program.

# Graduate Admission Requirements

All students holding a baccalaureate degree who desire to enroll at California State University, San Diego for post graduate study must apply for admission to California State University, San Diego through the Office of Admissions. In making the application, they must observe the procedures outlined above. On acceptance into the university, they will be admitted with unclassified graduate standing if they hold an acceptable bachelor's degree from an accredited institution or with undergraduate standing if they do not hold such a degree. For admission to graduate standing as an Unclassified Graduate Student, a student shall have completed a four-year college course and hold an acceptable baccalaureate degree from an accredited institution, or shall have completed equivalent academic preparation as determined by the appropriate campus authorities; and must satisfactorily meet the professional, personal, scholastic, and other standards for graduate study, including qualifying examinations, as the appropriate campus authorities may prescribe. Admission to a State University or College with Unclassified Graduate Standing does not constitute admission to graduate degree curricula.

#### **Classified Graduate Standing**

A student who has been admitted to a State University or College under the Unclassified Graduate requirement above may, upon application, be admitted to an authorized graduate degree curriculum if he satisfactorily meets the professional, personal, scholastic, and other standards for admission to the graduate degree curriculum, including qualifying examinations, as the appropriate campus authorities may prescribe. Only those applicants who show promise of success and fitness will be admitted to graduate degree curricula, and only those who continue to demonstrate a satisfactory level of scholastic competence and fitness, as determined by the appropriate campus authorities, shall be eligible to continue in such curricula. Students whose performance in a graduate degree curriculum is judged to be unsatisfactory by the authorities of the campus may be required to withdraw from all graduate degree curricula offered by the campus.

#### Admission as an International (Foreign) Student

The admission of international (foreign) students is governed by separate requirements. Prospective applicants from abroad should consult the individual campus catalogs and international (foreign) student informational brochures available from the campuses.

Applicants for admission as either graduates or undergraduates whose education has been in a foreign country should file an application for admission, official certificates and detailed transcripts of record from each secondary school and collegiate institution attended several months in advance of the opening of the semester in which the applicant expects to attend. If certificates and transcripts are not in English, they should be accompanied by certified English translations. Credentials will be evaluated in accordance with the general regulations governing admission to California State University, San Diego.

An applicant whose education has been in a language other than English must take the Test of English as a Foreign Language (TOEFL). This test is administered in most foreign countries and test scores must be received by the college before admission to the college can be granted. Information as to the time and place at which this test is given may be obtained by writing to: Educational Testing Service (TOEFL), Princeton, New Jersey, 08540, U.S.A. Upon arrival at California State University, San Diego, a further test of English will be given for the purpose of placing students in an English language program commensurate with their linguistic ability in English, and for use by advisers to assist students in planning an appropriate course of study. All students, undergraduates and graduate, are required to take one or more of the following courses, depending upon performance on the placement test: English 1X, English 1Y, English 5. These English courses must be taken in consecutive semesters, with first required course being taken during the student's first semester at California State University, San Diego. Foreign students transferring from another U.S. college may be required to take an English placement test.

Arrangements for housing should be completed before the student's arrival on the campus. Detailed information regarding housing may be obtained from the Director of Housing, California State University, San Diego. Scholarship aid for entering students is limited; no scholarships are specifically reserved for students from another country. Further information regarding scholarships will be found elsewhere in this catalog.

Upon arrival at California State University, San Diego the student should obtain an appointment as early as possible with the Coordinator of Foreign Student Admissions.

#### Limitation of Enrollment

Admission to a state university or college must be restricted in relation to the number of students for whom an adequate college education can be provided by the staff and facilities available. The Trustees have authority on the matter.

#### Registration / 47

#### 46 / Registration

# Registration

After a student has been admitted to the University, his first basic step is to register for classes. Registration at California State University, San Diego is held prior to the beginning of each semester and each summer session. It is conducted in two parts, one part for new and readmitted students and one for continuing students. The dates for registration are announced in the Class Schedule, which is issued each semester. Schedules are obtainable at the University bookstore, just before registration. They contain general information on registration, a listing of the times students are permitted to register, and the courses offered for the term, and a listing of the fees required for registration. Fees are payable at the time of registration and depend on the number of units selected. Registration times listed are based on priority numbers assigned to students at the time they are admitted. Priority numbers are placed on the Notice of Admission for entering students and on all student plastic identification cards. Students who cannot be present at registration, may have another person register for them at their scheduled time. The person designated must have his alternate's ID card and must pay his fees. He will also be required to provide necessary data on the student information card. Late registration at California State University, San Diego, is possible only in cases of genuine emergency. This involves petition action and additional fees and in no case is permitted beyond the first week of class.

# Determination of Residence for Nonresident Tuition Purposes

The following statement of the rules regarding residency determination for nonresident tuition purposes is not a complete discussion of the law, but a summary of the principal rules and their exceptions. The statutes governing residence determination for tuition purposes by The California State University and Colleges are found in Education Code Sections by the California State University and Coneges are found in Education Code Sections 22800-23754.4, 23758.2, 23762, and in *Title 5* of the *California Administrative Code, Article* 4 (commencing with Section 41901) of Subchapter 5 of Chapter 1, Part V. As this is written, those regulations are in the process of amendment to implement the uniform residence determination law enacted in Statutes 1972, Chapter 1100 (AB 666), so they are not reproduced here. A copy of the revised regulations is available for inspection upon request being made to the Office of Admissions and Records. The determination of whether a student qualifies as a "resident" for tuition purposes is made by the university or college after review of a residence questionnaire completed by each student upon entering the university or college. The residence questionnaire is designed to provide to the university or college information necessary for residency determination, including the applicability of any exceptions

The general rule is that a student must have been a California resident for at least one year immediately preceding the residence determination date in order to qualify as a "resident student" for tuition purposes. A residence determination date is set for each academic term and is the date from which residence is determined for that term.

Whether a student has acquired California residence usually depends on whether the student has attained majority; i.e., has become an adult. Majority is attained at 18 years of student has attained majority; i.e., has become an adult. Majority is attained at 18 years of age. If the student is a minor, residence is derived from (and therefore is the same as) that of the student's father. If the father is not living, the student's residence is that of the mother while she remains unmarried. The residence of a minor cannot be changed by act of the minor or that of the minor's guardian, so long as the minor's parents are living. Upon attaining majority, the student may acquire a residence apart from that of the parents. The acquisition of California residence by an adult requires both physical presence in the state, and at the same time, an intent to remain in California indefinitely, that is on

in the state, and at the same time, an intent to remain in California indefinitely, that is, an intent to regard California as one's permanent home. Although physical presence is easily proven, subjective intent is more difficult, requiring the student to present evidence of various objective manifestations of such intent. A woman may establish her own residence even though she be married.

An alien is not eligible to acquire residence until admitted into the United States for permanent residence under an immigrant visa.

There are several exceptions from nonresident tuition. These rules are limited in scope, and are quite detailed. If it appears that any of them may be applicable, the student may wish to discuss the matter with the residence clerk of the campus. Some of the exceptions

- 1. Minors whose parents were residents of California but who have left the state. When the minor reaches age 18, the exception continues for the year to enable the minor to
- 2. Minors who have been present in California for more than a year before the residence determination date, and entirely self-supporting for that period of time, are treated as adults for purposes of determining residence. 3. Dependent children and spouses of persons in active military service stationed in

California on the residence determination date. This exception applies only for the minimum time required for the student to obtain California residence and maintain that residence for a year. The exception is not affected by transfer of the military person directly to a post outside the 50 states and District of Columbia.

- 4. Military personnel in active service stationed in California on the residence determination date for purposes other than education at state-supported institutions of higher education. This exception applies only for the minimum time required for the student to obtain California residence and maintain that residence for a year.
- Certain credentialed, full-time employees of community college districts.
- 6. Full-time State University and Colleges employees and their children and spouses. This exception applies only for the minimum time required for the student to obtain California residence and maintain that residence for a year.
- Certain exchange students.
- Children of deceased public law enforcement or fire suppression employees, who were 8. California residents, and who were killed in the course of law enforcement or fire suppression duties.
- 9. A person in continuous full-time attendance at an institution who had resident classification on the effective date of Statutes 1972, Chapter 1100 (AB 666) shall not lose such classification as a result of adoption of the uniform student residency law on which this catalog statement is based, until the attainment of the degree for which currently enrolled. (Education Code Section 22862). It is anticipated at the time this is written that the new residence law will become effective in early March, 1973.

Students classified incorrectly as residents or incorrectly granted an exception from nonresident tuition are subject to reclassification as nonresidents and payment of nonresident tuition in arrears. Resident students who become nonresidents, and nonresident students qualifying for exceptions whose basis for so qualifying changes, must immediately notify the Office of Admissions and Records. Applications for a change in classification with respect to a previous term are not accepted.

The student is cautioned that this summation of rules regarding residence determination is by no means a complete explanation of their meaning. The student should also note that changes may have been made in the rate of nonresident tuition, in the statutes, and in the regulations between the time this catalog is published and the relevant residence determination date.

#### Advising

Provision is made during orientation week for each new student to obtain assistance from a faculty adviser in arranging a program. Each student should thereafter schedule a conference with his adviser at least once during each semester.

#### Student Responsibility for Catalog Information

Students are held individually responsible for the information contained in the catalog. Failure to read and comply with college regulations will not exempt a student from whatever penalties he may incur.

#### Grades

At the end of each semester or summer session in which a student is enrolled, a report of courses taken, showing units and grades earned, is sent to the student. Grades and grade points per unit used in reporting are as follows: Grade of A (outstanding achievement), 4 points; B (commendable), 3 points; C (satisfactory), 2 points; D (passing), 1 point; F (failure), 0 points; I (incomplete), counted as units attempted, 0 points; SP (satisfactory progress), not counted in the grade point average; W (withdrawal), not counted in grade point average; Cr (credit), signifying units earned, but not counted in the grade point average; NC (no credit) no credit earned and not counted in the grade point average.

#### Undergraduate Student Options on Grading

An undergraduate student may elect to be graded credit/no credit in particular courses, subject to the following conditions:

1. Courses graded credit/no credit (Cr/NC), whether taken at this or at another institution, may not be used to satisfy requirements for the student's major except for those courses identified in the course listing as graded "Cr/NC only"

2. No more than 24 units graded credit/no credit may be offered in satisfaction of the total units required in a bachelor's degree program, except that all units accepted as transfer credit from another institution at the time of the student's admission may be used. If 24 or more units graded credit/no credit are transferred, the student may offer no additional courses graded credit/no credit to satisfy total units required for a bachelor's degree. Excep-tions to this rule will be made if a student is required to take a course on a Cr/NC basis only.

3. If for any reason (change of major or transfer from another institution) courses graded credit/no credit are offered to satisfy requirements in the major, the student may be required by the major department to pass competency examinations at an acceptable level or take prescribed alternate courses before being allowed to continue in the major. 4. Selection of the grading basis (A through F or credit/no credit) is made at the time of registration for the course. Change of grading basis may be made by informing the Registrar

on or before the last date on which a student may withdraw from a class or change program. 5. A grade of "Credit" is awarded for work equivalent to A, B, C; "No Credit" is awarded for work equivalent to D or F.

#### Grades for Classified Graduate Students

Graduate courses graded on the Credit/No Credit basis are limited to courses 296, 297, 298, 299, and certain 200- and 300-numbered courses in the School of Education. No 100-numbered courses graded Credit/No Credit are acceptable on a master's degree program. No undergraduate courses graded Credit/No Credit may be assigned to the deficiencies and/or foreign language option(s) of a master's degree program. At least 70% of the units used to fulfill the minimum requirements on a master's degree program shall be graded on a A, B, C, D, F basis.

#### Grade Point Average

To compute the grade point average, one divides the total number of grade points earned by the number of units attempted. Units earned with a Cr. (Credit) are not included in the computation. The minimum GPA for a bachelor's degree is 2.0 (C); in other words the student must have earned at least twice as many grade points as units attempted.

#### Incomplete Grade

An Incomplete signifies that a portion of required course work has not been completed and evaluated in the prescribed time period due to unforeseen, but fully justified, reasons and that there is still a possibility of earning credit. It is the responsibility of the student to bring pertinent information to the instructor and to reach agreement on the means by which the remaining course requirements will be satisfied. A final grade is assigned when the work agreed upon has been completed and evaluated.

An "Incomplete" must be made up within one calendar year immediately following the end of the term on which it was assigned. This limitation prevails whether or not the student maintains continuous enrollment. Failure to complete the assigned work will result in an "Incomplete" being counted as equivalent to an "F" (or an "NC") for grade point average and progress point computation. An Incomplete cannot be removed by repeating the course.

A candidate for graduation with the baccalaureate degree whose record carries a grade of Incomplete will be graduated provided he is otherwise eligible for graduation. However, the Incomplete cannot be made up after the degree has been granted. If the student does not wish to be graduated with the grade of Incomplete on his record, he must cancel officially his application for graduation.

#### Satisfactory Progress Grade

The symbol SP (satisfactory progress) is used in connection with courses that extend beyond one academic term. The symbol indicates that work in progress has been evaluated as satisfactory to date but that the assignment of a precise grade must await the completion of additional course work. Cumulative enrollment in units attempted may not exceed the total number applicable to the student's educational objective. All work is to be completed within one calendar year of the date of first enrollment and a final grade will be assigned to all segments of the course on the basis of overall quality. Any extension of this time must receive prior authorization by the Dean of Undergraduate Studies (for undergraduate courses) or the Dean of Graduate Studies (for graduate courses).

#### Uncompleted Theses

A student who registers for Course 299, Thesis, but does not complete the thesis by the end of the semester or summer session in which he registers for it will, upon the recommendation of the Thesis Committee Chaiman, receive an SP (satisfactory progress) grade. This grade symbol, will remain on the student's record until the thesis is completed or up to one calendar year from the beginning of the semester or term of registration in the course, whichever occurs first. If, at the end of one year, the thesis is not completed the grade NC (no credit) will be recorded on the student's record, unless extension of time for completion, due to extenuating circumstances, has been recommended in advance by the Thesis Committee Chairman and the Department Chairman, and is approved by the Dean of Graduate Studies. A second registration in Course 299, Thesis, is expressly prohibited.

#### Courses

#### Numbering of Courses

Courses numbered 1 through 99 or by letters (A, B, C, etc.) are in the lower division (freshman and sophomore years); those numbered 100 through 199 are in the upper division (junior and senior years); and those numbered 200 through 299 are strictly graduate courses. Courses numbered 300 or over are graduate professional education courses. Courses numbered X-900-X-999 are those offered exclusively in the extension program to meet the professional needs of specific community groups. These courses are not acceptable on advanced degree programs.

#### Auditing

A student who does not wish to take a course for credit may, with the consent of the instructor, enroll as an auditor. An auditor must meet all admissions requirements and pay the same fees required of students taking the course for credit. No change from regular registration to audit, nor from audit to regular registration will be permitted during the semester. An auditor is not held for examinations and does not receive credit or a final grade in the course.

#### **Repeated** Course

A student who has received a grade of D or F, or incomplete in a course may repeat that course. While the original grade will remain on the transcript, only the results of the last attempt will be used in computation of grade point average, except in the case of an Incomplete which after one year will be counted as an F or NC.

#### Final Examinations and Credit

No final examination shall be given to individual students before the regular time. Any student who finds it impossible to take a final examination on the date scheduled must make arrangements with the instructor to have an incomplete grade reported and must take the deferred final examination within the time allowed for making up incomplete grades.

#### Credit for Upper Division Courses

Normally, only juniors, seniors, and graduate students enroll in upper division courses (numbered 100 and above). However, a freshman or sophomore who demonstrates to the satisfaction of the appropriate department that he is qualified may enroll in an upper division course if the instructor consents. He may get upper division credit for it if in addition he secures the approval of the chairman of the department and of the dean of the school or course approved and files the approval with the Evolution Office. college concerned, and files the approval with the Evaluations Office.

#### Community College Credit

A maximum of 70 semester units earned in a community college may be applied toward the degree, with the following limitations: (a) No upper division credit may be allowed for courses taken in a community college; (b) no credit may be allowed for professional courses in education taken in a community college, other than an introduction to education course.

#### Concurrent Master's Degree Credit

A senior who is within 12 units of completing requirements for the bachelor's degree and whose overall grade point average is 3.0 or above may petition the Graduate Council to take for concurrent master's degree credit 100-numbered courses listed in the Graduate Bulletin as acceptable for master's degree programs, and certain 200-numbered courses approved by the department, with the remaining requirements for the bachelor's degree. Petitions must be submitted before the end of the fourth week of classes (or the first week of summer term II) of the semester (or term) in which the concurrent credit is earned. The bachelor's degree must be completed at the end of the semester or term in which the concurrent credit is earned. The maximum number of units which may be earned as concurrent master's degree credit is determined by the difference between the number of units remaining for the bachelor's degree and 15. No more than 3 units in 200-numbered courses will be accepted towards the minimum unit requirements for the master's degree.

#### **Concurrent Postgraduate Credit**

A senior who is within seven units of completing requirements for the bachelor's degree and who has been admitted to teacher education may petition the Dean, School of Educa-tion, to take a maximum of 12 units of 100-numbered courses for concurrent postgraduate credit with remaining requirements for a bachelor's degree to apply toward the minimum unit postgraduate requirements for a teaching credential. The bachelor's degree must be completed at the end of the semester in which the concurrent postgraduate credit is earned. Extension courses are not acceptable for postgraduate credit.

# Credit for Extension Courses

The maximum amount of extension and correspondence credit which may be accepted toward the minimum requirements for the bachelor's degree is 24 semester units. Extension and correspondence credit do not count in satisfaction of the minimum residence requirement. A maximum of six units in extension courses at San Diego State may be accepted as part of the requirements for the master's degree, subject to limitations described in the

Extension courses offered by departments are of two kinds. The first includes regular courses listed in the General Catalog which are available for use by students in meeting college credit requirements of various kinds, and are usually at the upper division level. A second kind is offered by some departments at the X-900 level and serves to meet the needs of specific community groups. Courses at the X-900 level are designed to meet professional needs, and any credit toward degrees or credentials or other objectives is determined by the colleges and universities concerned. These courses will not be applicable towards graduation requirements at California State University, San Diego unless otherwise specified in the course description. Courses at the X-900 level are not acceptable on advanced degree pro-

#### Credit by Examination

Approval to receive credit-by-examination is granted at the discretion of the appropriate college authorities and under the following conditions:

(1) The student must be matriculated, in good standing (not on probation), be registered in at least one regular course (not Extension) at the time credit-by-examination is authorized, and pay for additional units if cost exceeds fees already paid. Application for credit by examination must be made within the time limits for filing a change of program as listed in the Academic Calendar each semester. In summer sessions the total units earned for courses and examinations can not exceed the limit authorized by the Education Code. (2) Concurrent approval of the chairman of the department concerned and the Dean of

Undergraduate Studies is required prior to taking the examination. Forms for approval may

(3) Credit-by-examination is restricted to regular undergraduate courses listed in the general catalog; does not include 200-numbered, 300-numbered, or Extension courses; cannot exceed 30 units as applicable to graduation; and does not count as residence credit.

(4) Credit-by-examination is not treated as part of the student's study load and, therefore, is not considered for Selective Service purposes or by the Veterans Administration in the application of their respective regulations; and is not always accepted as transfer credit

214-9 6 430

#### Credit for Advanced Placement Examinations

California State University, San Diego grants credit toward its undergraduate degrees for successful completion of examination of the Advance Placement Program of the College Entrance Examination Board. Students who present scores of three or better will be granted six semester units (nine quarter units) of college credit.

High school students who intend to participate in this program should make the necessary arrangements with their high schools and should indicate at the time they take the Advanced Placement Examinations that their test scores be sent to California State University, San Diego. To obtain credit and advanced placement, the student should contact the Office of the Dean of Undergraduate Studies.

Students may earn 3-10 semester units of credit toward their bachelor's degree for each Advanced Placement Examination satisfactorily passed while in high school. The chart below indicates the score necessary, the units earned and the course equivalents for each of the examinations offered.

Examination Score to American History 3, 4, 5 6 se		Credit allowed toward degree	CSUSD course equivalences*	Remarks

\* Credit may not be earned at CSUSD for courses which duplicate credit already allowed for examinations as listed under CSUSD Course equivalences.

## Credit for College Level Examination Program (CLEP)

California State University, San Diego will consider the granting of credit to those students who have attained a score at or above the 25th percentile on each test of the General Examinations of the College Level Examination Program. Scores should be forwarded to the Admissions Office for evaluation.

#### Credit for Military Service

The university is guided by the recommendations of the American Council on Education in granting undergraduate credit toward the bachelor's degree for military service. Postgraduate credit is not granted.

To obtain credit for military service, the student must be fully matriculated and enrolled in the college. The military form DD-214 must be filed with the Admissions Office if military credits are to be counted toward the bachelor's degree or used to shorten the time needed for the degree. This form, or equivalent records verifying active military service in the United States armed forces, should be submitted at the time of applying for admission to the university.

222-9 6 470

#### Student Classification

A matriculated student is one who has complied with all requirements for admission to the university and has received his official Notice of Admission. All students taking courses in any regular semester must be matriculated students. Only in summer sessions or in extension courses may a student who has not matriculated be accepted for enrollment.

Each student who enrolls in one or more summer session classes shall be classified as a summer session student. Each student who enrolls in one or more extension classes shall for his extension class work be classified as an extension class student. Such students need not be matriculated students as a prerequisite for enrollment in classes.

Freshman. A student who has earned a total of fewer than 30 semester units.

Sophomore. A student who has earned a total of 30 to 59 semester units, inclusive.

Junior. A student who has earned a total of 60 to 89 semester units, inclusive.

Senior. A student who has earned a total of 90 semester units or more.

Graduate. A student who has completed a four-year college course with an acceptable baccalaureate degree from an accredited institution. For information on classification of graduate students, see the Graduate Bulletin.

## Student Program and Records

#### Transcripts of Record

A student may obtain an official transcript of his record by filing an application at the Registrar's Office. A fee of \$1 is charged for all transcripts and must be paid in advance. One week should be allowed for the processing and mailing of the transcript. Transcripts from other schools or colleges become the property of this university and will not be released nor will copies be made.

#### Change of Program

California State University, San Diego provides for change of program beginning the first week of classes every term. Change of program includes: withdrawal from a class, adding a class, dropping a class, adding or reducing units of a class for which the student is already registered, or changing a section of the same class.

The student is responsible for every course on his official study list filed at registration. If a student does not attend a class for which he has registered by the end of the first week, the professor may give his place to another student; however, if this occurs, the student must still take the necessary formal drop action himself. Changes of program cannot be effected by nonattendance in class; nonattendance without consequent formal drop action will result in a failing grade.

Change of program is permitted without effect on record or grade and with no restriction or penalty beginning the first week of class and ending the thid week of classes.

Withdrawals from class after the third week and prior to the last three weeks of instruction are permissible only for serious and compelling reasons. Permission to withdraw during this period is granted only with approval of the instructor and the Department Chairman or Dean, and approvals are made in writing on prescribed forms. Withdrawals are not permitted during the final three weeks of instruction, except in cases

withdrawals are not permitted during the final three weeks of instruction, except in cases such as accident or serous illness where the cause of withdrawal is due to circumstances clearly beyond the student's control and the assignment of an incomplete is not practicable. Ordinarily, withdrawals in this category will involve total withdrawal from the campus, except that credit, or an incomplete, may be assigned for courses in which sufficient work has been completed to permit an evaluation to be made. Requests to withdraw under such circumstances are handled and filed as above, except that such requests also must be endorsed by the Vice President for Academic Affairs or his designee.

## Change of Major or Curriculum

At the time of admission to the university, each undergraduate student is assigned to a major field or curriculum, or is designated as an undeclared major. After registration, any student wishing to change his major or curriculum, must make application at the Evaluations Office.

Veterans using veteran benefits must obtain appropriate approval from the Veterans Administration for necessary changes in letters of eligibility.

# Withdrawal, Leave of Absence, Readmission, and Evaluation

Withdrawal. Students who wish to withdraw from the University must initiate action formally through the Registrar's Office. Failure to file will result in a failing grade in all courses. Under certain circumstances, complete withdrawal is possible up to 3 weeks preceding the last day of the semester; however, refunds are obtainable only for the first 14 days after the term begins. A student withdrawing during the refund period is no longer considered a continuing student and is required to apply for readmission.

A course will not appear on the permanent record if withdrawal occurs before the end of the third week of classes. For complete information about withdrawals after the first three weeks of the term, refer to change of program.

**Unofficial Withdrawal.** A student withdrawing unofficially from class or from the university will receive failing grades in all courses which he stops attending. An unofficial withdrawal is one in which a student stops attending classes without filing official withdrawal forms within the deadlines established for withdrawing.

Veterans unofficially withdrawing will have veteran's allowances immediately suspended and will be subject to full repayment of allowances received after date of unofficial withdrawal.

Withdrawal to Enter Military Service. Under certain conditions, a student withdrawing from the university to enter military service is entitled to apply for refund of materials and service fees or for partial credit (but not both). To qualify under this regulation, the student must (a) be a civilian who, because of his own initiative, receives orders to immediate extended active duty, or (b) be a civilian who receives orders to immediate extended active duty by government action, or (c) be a reservist called to immediate extended active duty. (Not applicable to other military personnel enrolled in the college.)

Entrance upon extended active military duty must be without unreasonable and unnecessary delay (normally within 30 days) after the date of withdrawal from the university to qualify the student for refund or partial credit. Verification of entry upon extended active duty is required and must be by written statement of the commanding officer or by official copy of orders. Application for withdrawal from the university may be made by the student in person, or by telephone or mail. Forms for withdrawal will also be sent to the student if requested by a person designated by the student as his representative in making the request. If the student is passing in courses at the time of withdrawal from the university, partial

If the student is passing in courses at the time of withdrawal from the difference, provide the student is passing in courses at the time of withdrawal from the difference, or pletion of the first six weeks of the semester, or two-thirds for the first 12 weeks. The university does not wish to influence the student in choosing between partial credit and refund of fees; however, it should be pointed out that partial credit in a course may not satisfy some specific requirement for which that course may be needed, and if the course is later repeated by the student the partial credit will be lost as "repeated" work.

Leave of Absence. Students are permitted to take a total of two semesters of approved leave of absence during their matriculation at California State University, San Diego. Students are not penalized for taking leaves, and retain their priority numbers without change. No fees are involved.

At least five weeks prior to registration period for the semester during which he wishes a leave, a student must file application for the leave at the Registrar's Office. Deadlines for filing may be obtained at that office. Leaves cannot be revoked once granted, and no student will be permitted to register for a semester for which he has filed application for leave.

Approval for leaves of absence will not be granted to students who have been admitted but will not have completed at least one semester before the leave of absence period, to students who are completing their final semester of undergraduate work, nor to students who are disqualified. To be eligible for leave an undergraduate must be eligible to return as an undergraduate; students qualifying for change in status from undergraduate to graduate are not eligible.

**Readmission.** A student who withdraws from the university must file application for readmission if a full semester elapses between his withdrawal and his return. A \$20 application fee for readmission is required if the applicant was not regularly enrolled in either of the two semesters immediately preceding the semester for which the application is submitted, or if the student was enrolled at another institution subsequent to the last attendance at California State University, San Diego.

**Evaluation.** An evaluation is a summary of college work completed and of requirements to be completed for a bachelor's degree or credential. To be eligible for an evaluation, a student must have completed at least 60 units of acceptable college work and be qualified

233-9 6 525

for full matriculation. Authorization for more than one evaluation during any one semester or one evaluation in nine weeks of summer session requires special permission.

A student who has earned 60 semester units or more, who has not received an evaluation, should apply at the Evaluations Office for an official evaluation. The evaluation is made on the regulations in effect at the time the student entered this university, except as otherwise provided in the California Administrative Code, Chapter 5, Section 40401, Election of Regulations. (Further information is given in the section on Graduation Requirements.)

After an interval of five years from the time an evaluation is made, courses in education to be applied toward a teaching credential are subject to re-evaluation.

#### **Credit and Study List Limits**

A unit or credit hour represents 50 minutes of lecture or recitation combined with two hours of preparation per week throughout one semester of 18 weeks. Two hours of activity (as in physical education) or three hours of laboratory (as in the sciences) are considered equivalent to one hour of lecture.

At registration time, no student will be permitted to enroll for more than 17<sup>1</sup>/<sub>2</sub> units. After registration he may add additional units if desired by means of the add-drop process, though if he is employed outside of college he is strongly advised to undertake a modest college program. Going to college is properly a full-time job. Normally a student can expect to spend in class and study a total of three hours per week for each unit of college work attempted. A normal 16-unit load therefore represents a 48-hour week.

# Scholastic Probation and Disgualification

#### **Undergraduate Students**

Progress toward the bachelor's degree is monitored in terms of progress points per unit attempted. Progress points are as follows: A, 4 progress points; B, 3; C, and Cr, 2; D, 1; F and NCr, 0 progress points. An undergraduate student will be placed on probation if, in any semester, he fails to earn twice as many progress points as units attempted during that semester. A student on probation who, in any semester or summer session, fails to earn twice as many progress points as units attempted, will be subject to disqualification and dismissal from the university.

#### Graduate Students

The regulations governing probation and disqualification of graduate students are determined by the Board of Trustees of the California State University and Colleges and are stated in Section 41300 of the Administrative Code as follows:

"Probation and disqualification of graduate students are subject to criteria established by each campus; provided, that criteria of probation and disqualification may not be less than those established for undergraduate students.

A student disqualified for scholarship deficiency may not enroll in any regular session of the university without permission from the appropriate university authority, and may be denied admission to the summer session."

A. Standards for Placing Graduate Students on Scholastic Probation

1. A graduate student will be placed on scholastic probation at the end of a semester if his grade point average on all work attempted at California State University, San Diego subsequent to his admission to the campus as an unclassified graduate student falls below 2.5.

2. A graduate student who is on probation during a given semester will be continued on probation at the end of that semester if (a) his overall graduate grade point average, including the semester in question, remains below 2.5 and (b) his grade point average on work taken during the semester is 3.0 or above. B. Standards for Removing Graduate Students from Scholastic Probation

A graduate student who is on probation during a given semester will be removed from scholastic probation at the end of any semester in which his overall graduate grade point average is 2.5 or higher.

C. Standards for Scholastic Disgualification of Graduate Students A graduate student may be disqualified from the University for scholastic reasons at the

end of any semester during which he is on probation if at the end of that semester (1) his overall grade point average, including the semester in question, is below 2.5 and (2) his grade point average for work taken during that semester is below 3.0

A graduate student disqualified from the University under the foregoing regulations, may be readmitted to the University by the Board of Admissions. Application for readmission must be made on forms available at the Office of Admissions.

Sections 41301 and 41302 of the California Administrative Code, Title 5, read as follows:

41301. Expulsion, Suspension and Probation of Students. Following procedures consonant with due process established for the campus of which he is a student, any student of a campus may be expelled, suspended, placed on probation or given a lesser sanction for one

or more of the following causes which must be campus related: (a) Cheating or plagiarism in connection with an academic program at a campus.

(b) Forgery, alteration or misuse of campus documents, records, or identification or knowingly furnishing false information to a campus.

Misrepresentation of oneself or of an organization to be an agent of a campus.

(d) Obstruction or disruption, on or off campus property, of the campus educational process, administrative process, or other campus function.

(e) Physical abuse on or off campus property of the person or property of any member of the campus community or of members of his family or the threat of such physical abuse.

(f) Theft of, or non-accidental damage to, campus property, or property in the possession

of, or owned by, a member of the campus community. Unauthorized entry into, unauthorized use of, or misuse of campus property.

On campus property, the sale or knowing possession of dangerous drugs, restricted

dangerous drugs, or narcotics as those terms are used in California statutes, except when lawfully prescribed pursuant to medical or dental care, or when lawfully permitted for the purpose of research, instruction or analysis.

(i) Knowing possession or use of explosives, dangerous chemicals or deadly weapons on eampus property or at a campus function without prior authorization of the campus president.

(j) Engaging in lewd, indecent, or obscene behavior on campus property or at a campus function.

(k) Abusive behavior directed toward, or hazing of a member of the campus community. Violation of any order of the campus president, notice of which had been given prior

to such violation and during the academic term in which the violation occurs, either by publication in the campus newspaper, or by posting on an official bulletin board designated for this purpose, and which order is not inconsistent with any of the other provisions of this Section.

(m) Soliciting or assisting another to do any act which would subject a student to expulsion, suspension or probation pursuant to this Section.

(n) For purposes of this Article, the following terms are defined:

(1) The term "member of the campus community" is defined as meaning Cali-fornia State University and Colleges Trustees, academic, non-academic and administrative personnel, students, and other persons while such other persons are on campus property or at a campus function. (2) The term "campus property" includes:

- (A) real or personal property in the possession of, or under the control of, the Board of Trustees of the California State University and Colleges, and
- all campus feeding, retail, or residence facilities whether operated by a (B) campus or by a campus auxiliary organization.

(3) The term "deadly weapons" includes any instrument or weapon of the kind commonly known as a blackjack, slung shot, billy, sandclub, sand bag, metal knuckles, any dirk, dagger, switchblade knife, pistol, revolver, or any other firearm, any knife having a blade longer than five inches, any razor with an unguarded blade, and any metal pipe or bar used or intended to be used as a club.

The term "behavior" includes conduct and expression . . (4)

(5) The term "hazing" means any method of initiation into a student organization or any pastime or amusement engaged in with regard to such an organization which causes, or is likely to cause, bodily danger, physical or emotional harm to any member of the campus community; but the term "hazing" does not include customary events or other similar contests or competitions.

41302. Expulsion, Suspension or Probation of Students; Fees and Notification. The President of the campus may place on probation, suspend, or expel a student for one or more of the causes enumerated in Section 41301. No fees or tuition paid by or for such student for the semester, quarter, or summer session in which he is suspended or expelled shall be refunded. If the student is readmitted before the close of the semester, quarter, or summer session in which he is suspended, no additional tuition or fees shall be required of the student on account of his suspension. In the event that a student who has not reached his twenty-first birthday is suspended or expelled, the President shall notify his parent or guardian of the action by registered mail to the last known address, return receipt requested . . . .

Standards and procedures of discipline at California State University, San Diego are determined by these regulations.

If a student believes that a professor's treatment of him is grossly unfair or that a professor's behavior is clearly unprofessional, he may bring his complaint to the proper university authorities and official reviewing bodies by following the *Procedures for Handling Student Grievances Against Members of the Faculty*, adopted by the Faculty Senate. A copy of the procedures may be obtained from the Dean of Students (AD 201).

# **Graduation Requirements**

#### for the Bachelor's Degree

To qualify for graduation with a bachelor's degree from San Diego State, the student must fulfill all of the following requirements.

#### 1. Competency Tests.

Competency: in mathematics and composition, as demonstrated by tests or by satisfactory completion of designated courses.

Mathematics competency may be demonstrated by satisfactory scores on the quantitative section of the ACT (American College Test), or SAT (Scholastic Aptitude Test), or CQT (College Qualification Tests). Cut off scores for determination of competence is the 15th percentile, based on national norms.

Students who fail to achieve a satisfactory score on a test will be permitted to retest on the COT.

In the event a student does not satisfy the requirement by examinations he may do so by successfully completing Mathematics 3, 10B, or 18, or higher numbered course.

The Writing Competency Test may be taken at the first scheduled date for the test following the student's completion of 45 units of college work. All students transferring to this university with 45 units or more of advanced standing credit may take this test before registration. Passing of this test or the retake, which includes the writing of an essay, or satisfactory completion of English W, or remedial programs prescribed for the student by the University Committee on English fulfills the requirement.

Candidates for the B.E. degree are exempt from this requirement, since special regulations, described under "Education" in the catalog section, Professional Curricula, apply to them.

#### 2. Units.

For the A.B., B.V.E., and B.M. degree, a total of 124 units satisfactorily completed (grade of D or better); for the B.S. in engineering, a total of 132; for all other B.S. degrees, the total is 128. Of the total, 36 units must be upper division for the B.S., 40 for the B.V.E., the B.M. and for the A.B. in applied arts and sciences, and 45 for the A.B. in liberal arts and sciences. Twenty-four units must be earned in residence at California State University, San Diego, 12 of which must be among the last 20 units (24 for the B.E.) applicable to the degree. For the A.B. in liberal arts and sciences, no more than 48 units in one department can apply to the degree. In the School of Business Administration, at least 52 units of the total must be in business and economics, at least 52 outside those areas.

#### 3. Major and Minor.

Every student must complete a departmental or interdisciplinary major and, if his major calls for it, a minor as well.

Major. A major is defined as a pattern of upper division courses, totaling not less than 24 units for the A.B., B.V.E., or B.M. degree and not less than 36 units for the B.S. degree. The maximum number of units for a major is determined by the university.

Courses in the major are exclusive of those courses used to meet the requirements in general education. Not more than 15 units in lower division prerequisite and related courses required by the department in preparation for the major may be used in general education. Such course or courses, however, may not be used as part of the minimum unit requirement in the student's minor.

A student may wish to major in two departments. If so, the requirements for both majors must be satisfied. Units for courses which could satisfy the requirements in both majors can be counted only once. Only one diploma will be granted but the transcript will note the completion of each major.

Minor. The minor normally consists of from 15 to 22 units, at least six units of which must be in upper division courses. Specific requirements and maximum number of units are determined by the university. Courses in the minor may not be counted toward the general education requirements.

250-9 6 610

#### 58 / Graduation Requirements

#### 4. Grades.

In all courses attempted, in all courses at this university (except extension), and in all courses in the major, the student must achieve an average grade of C (2.0).

#### 5. American Institutions.

This requirement may be satisfied by any one of the following pairs of courses:

Afro-American Studies 7A and 7B; History 8A and 8B; History 17A and 17B; History 172A and 172B; History 179A and 179B; History 184A and 184B; Mexican-American Studies 20A and 20B; Mexican-American Studies 41A and 41B; Political Science 1 and 2; Political Science 105 and 115; Political Science 105 and 117; Political Science 105 and 118; Political Science 115 and 117; Political Science 115 and 118

Alternatively, this requirement may be met by satisfactory completion of comprehensive examinations in each of the following areas: American history, institutions, and ideals; the United States Constitution; and California state and local government. The examinations are administered every semester and during Term I in the summer.

The requirement may also be met by satisfactory completion of a combination of courses and examinations. Relevant courses are:

#### American History

History 8A and 8B; 176A and 176B; 177A and 177B; 179A and 179B; 181A and 181B.

**U.S.** Constitution

History 8A; 17A; 172A; 177A and 177B; 179A; Political Science 2; 115; 139A and 139B.

**California Government** 

History 8B, 17B, 172B, 179B, 189B, Political Science 2, 115, 117, 118.

#### 6. General Education.

The requirement in General Education consists of 40 semester units as indicated below. Courses in the following categories may not be used to satisfy General Education Requirements: (a) Courses used in satisfaction of the major (only upper division courses are included in the major); (b) Courses used in satisfaction of the high (only upper division courses are included in the major); (b) Courses used in satisfaction of a minor (this includes lower and upper division courses); (c) Courses in excess of 15 units required in Preparation for the Major; and (d) no more than 6 units of Afro-American Studies or Mexican-American Studies or political science may be used to fulfill requirements in social sciences and American Institutions.

science may be used to fulfill requirements in social sciences and American Institutions. Students with majors in applied arts and sciences and in professional programs must select general education courses in accordance with the pattern described below. Students in liberal arts and sciences may wish to combine general education with the additional breadth requirements for liberal arts and sciences. A special pattern of courses to achieve that purpose is outlined immediately following the general education pattern.

A. At least 32 units in the Natural Sciences, Social Sciences, Humanities, and Basic Subjects, including the minimum required in each subject area as indicated below. 1. Natural Sciences. A minimum of 6 units to include:

a. A course of 2 units or more in any of the following departments:

Biology Botany Microbiology

Zoology

b. A course of 2 units or more in any of the following departments: Astronomy Chemistry Geography (limited to 1 and 3)

Physical Science

Physics

c. A 1 unit laboratory course, unless either of the preceding courses included a labora-

Geology

259-9 7 15

#### Graduation Requirements / 59

tory which met for three hours or more per week. Examples of 1 unit laboratory courses are Astronomy 9, Biology 2, Geology 3, and Physical Science 3.

- 2. Social Sciences. A minimum of 6 units to include: a. A 3 unit course in each of two of the following areas:
  - Anthropology
    - Economics (except 2)

    - Geography (except 1 and 3) \* Afro-American Studies (limited to 20 or 30)
    - \* Mexican-American Studies (limited to 10 or 50)
    - \* Political Science (except American Institutions)
    - Sociology (except 35 and 60)

3. Humanities. A minimum of 6 units to include: a. A 3 unit course in each of two of the following areas:

Classics

Humanities

Literature in English

Literature in a Foreign Language Philosophy (excluding logic) Religious Studies

4. Basic Subjects. A minimum of 6 units to include:

a. Course work in at least three of the following areas:

Written Communication in English **Oral** Communication

Logic

Mathematics or Statistics

Foreign Language (excluding courses in literature or civilization)

5. Electives. Additional units as necessary in the Natural Sciences, Social Sciences, Humanities, and Basic Subjects to achieve a total of 32 units in these subjects. Courses which satisfy the requirement in American Institutions may be counted in the 32 units total but may not apply to the 6-unit minimum in either the Social Sciences or the Humanities. Students at their discretion, may include within the 32 units any courses they have taken in the following areas:

Art Drama

History (limited to courses in ancient history, Asian civilization, and western civilization)

Music

Oceanography

Psychology (limited to introductory courses)

**Public** Administration Speech Communication (limited to courses in semantics and rhetorical theo-

B. Physical Activities. A minimum of two semesters of physical education activity courses, or equivalent monitored activities, or a combination of courses and monitored activities.

#### Required Activity Courses

To meet general education requirements, two semesters of activity courses or monitored activity are required as outlined above. All freshmen students must enroll in an activity course or monitored activity each semester. Two units are needed for general education and graduation, but no more than one activity course or monitored activity in any one semester may be counted toward this requirement. An activity course taken in the summer session may be counted in lieu of one taken during the fall or spring semester. Any combination of activity courses and monitored activity may be used.

#### Exemptions or Postponement

Veterans who have served a minimum of one continuous year in the United States armed forces are exempted from the general education requirement in physical education. Students over 25 years of age at the time of matriculation may also be exempted from the general education requirement in physical education upon approval by the Vice President for Academic Affairs or duly authorized representative. Students carrying fewer than 12 units during any semester may apply to the chairman of the Physical Education Department for a postponement of the physical education activity requirement. For reasons of health, the Director of Health Services may postpone the enrollment of a student in a physical education activity course. Permanent postponement from the activity requirement will not be made and a postponement does not eliminate the graduation requirement.

\* No more than 6 units of Afro-American studies or Mexican-American studies or political science may be used to fulfill requirements in Social Sciences and American Institutions.

#### Graduation Requirements / 61

#### 60 / Graduation Requirements

C. Electives to complete 40 units. Additional units as necessary in the subjects listed above, or in any other subject listed in this catalog, to achieve a total of 40 units in general education. Students are reminded, however, that courses taken in satisfaction of requirements for the major and minor may not be applied to general education, and not more than 15 units in preparation for the major may be applied to general education requirements.

#### Alternate General Education Program

Any student with a minimum grade point average of 3.25 at this institution, with a declared major, and with 15 units or more but not over 45 units of college work may submit to the Dean of Undergraduate Studies an alternate program, with supporting reasons, for fulfilling general education—breadth requirements, compatible with the requirements listed below. If approved, the proposed program will replace the standard provisions. A student with such an approved program may, at his option, elect to revert to the standard program in effect at the time of his graduation; any student who changes his major shall revert to the standard program or seek approval of a new proposal.

A. Natural Sciences, minimum of two courses

- B. Social Sciences, minimum of two courses
- Humanities, minimum of two courses C.
- D. Basic Subjects, minimum of two courses
- For a total of 32 units
- Electives, maximum of 8 units, to provide a total of 40 units
- F. Additional requirement, 5 upper division units, excluding courses in the area of the student's major and minor

Within the proposal, no courses in the student's major or minor may apply to the requirements, and not more than 6 units shall be applicable to preparation for the major.

# Breadth Requirements for Degrees in Liberal Arts and Sciences

In addition to the general education requirements listed above, students whose majors are offered in the Liberal Arts and Sciences curriculum are required to complete additional breadth requirements. They must follow the outline below. By choosing from this pattern, they may fulfill both general education and the additional breadth requirements for the degree in liberal arts and sciences.

A. Natural Science Either 1. Seven units Life science with laboratory Choose one: Microbiology 10 Biology 1 and 2 Zoology 8 **Biology** 4 Physical science with laboratory Choose one: Astronomy 1 and 9 Physical Science 1 Chemistry 1A Chemistry 2A Physical Science 2A and 3 Physics 4A Chemistry 10A Physics 2A and 3A Geology 2 and 3 Physics 5 Geology 4

Or

2. Nine units selected from Geography 1 or 3, or any courses in astronomy, biology, botany, chemistry, geology, microbiology, oceanography, physical science, physics, zoology. At least 3 units must be in a life science, and at least 3 units must be in a physical science; at least one course must be a laboratory course.

#### B. Mathematics and Foreign Language

Mathematics 18 or higher numbered mathematics course, or satisfactory performance on the placement examination of the Department of Mathematics.

Foreign Language—4 units (The requirement may be met by two years of one foreign language in high school.) Eight additional units in mathematics (course 21 or higher) or in foreign language.

(This requirement may be met by completion of a third and fourth year of a foreign language in high school.)

#### C. Social Sciences

1. At least two courses (minimum 3 units for each course) taken in two departments selected from anthropology, economics (except 2), geography (except 1 or 3),

267-9 7 55

political science, sociology (except 35 or 60), Afro-American Studies 20 or 30, and Mexican-American Studies 10 or 50. However, no more than 6 units of Afro-American studies or Mexican-American studies or political science may be used to fulfill the requirements in social sciences and American Institutions.

2. Electives in any of the above or in public administration.

#### **D.** Humanities and Fine Arts

Either

1. The Scope of Civilization History 4A-4B, or 9A-9B, or 104A-104B

and

Two courses taken in two departments selected from classics, humanities \*, literature, philosophy (except logic), or religious studies.

#### Or

2. The Scope of Civilization Comparative Literature 52A-52B, English 52A-52B, or

Humanities 59A-59B.

and, in a different department,

One additional course (minimum 3 units) in classics, humanities \*, literature, philosophy (except logic), or religious studies.

and

One additional course (minimum 3 units) in art, classics, humanities, literature, music, philosophy (except logic), or religious studies.

Or

3. Fifteen units in at least three of the following subjects: art, classics, history (other than courses used to satisfy American Institutions requirements), humanities \*, literature, music, philosophy (except logic), or religious studies. The fifteen units must be in departments other than departments offering the student's major and minor.

#### E. Other

1. English 5 or 6 or Mexican-American Studies 2B

- 2. Seven or nine units from any three of the following groups:
  - a. English 5 or 6 (may not be the same course used under E, 1, above), or English
  - b. Health Science and Safety 21,
  - c. Mathematics 155 or Philosophy 20, 121, 122,
  - d. Afro-American Studies 4 or Mexican-American Studies 2A or Speech Communication 3 or 4,
  - e. Psychology 1
  - f. Classics 50

3. Physical Education

- A minimum of two semesters of physical activity in courses or equivalent monitored activity, to be fulfilled by:
- a. Completing two 1 unit physical education activity courses over a period of at least two semesters, or
- b. Completing two satisfactory semesters of regular monitored physical activity for credit, or
- c. Combination of a and b to give the equivalent of two semesters of physical activity.

#### Required Activity Courses

To meet general education requirements, two semesters of activity courses or monitored activity are required as outlined above. All freshmen students must enroll in an activity course or monitored activity each semester. Two units are needed for general education and graduation, but no more than one activity course or monitored activity in any one semester may be counted toward this requirement. An activity course taken in the summer session may be counted in lieu of one taken during the fall or spring semester. Any combination of activity courses and monitored activity may be used.

#### Exemptions or Postponement

Veterans who have served a minimum of one continuous year in the United States armed forces are exempted from the general education requirement in physical education. Students over 25 years of age at the time of matriculation may also be exempted from the

\* Civilization courses taught in the various language departments are acceptable for humanities.

272-9 7 80

#### 62 / Graduation Requirements

general education requirement in physical education. Students carrying fewer than 12 units during any semester may apply to the chairman of the Physical Education Department for a postponement of the physical education activity requirement. For reasons of health, the Director of Health Services may postpone the enrollment of a student in a physical education activity course. Permanent postponement from the activity requirement will not be made and a postponement does not eliminate the graduation requirement.

# Application for Graduation

Graduation is not automatic on the completion of requirements. The student who intends to graduate must take the initiative. When he believes that he is eligible, he should file an application with the Evaluations Officer, Administration Building, not later than the end of the third week of classes in the fall if he wants to graduate in mid-year, and not later than the end of the eleventh week of classes in the fall if he wants to graduate in June or at the end of a summer session. The Class Schedule each semester specifies the exact date.

#### Election of Regulations for Graduation

A student remaining in continuous attendance in regular sessions and continuing on the same curriculum in any state university or college or in any of the California community colleges may, for purposes of meeting graduation requirements, elect to meet the graduation requirements in effect at California State University, San Diego either at the time of his entering the curriculum or at the time of his graduation therefrom, except that substitutions for discontinued courses may be authorized or required by the proper authorities.

#### Graduation with Honors and Distinction

With the approval of the faculty, graduation with honors is granted to those students in each graduating class who have achieved high grade point averages by the beginning of the fall semester for mid-year graduates and by the end of the fall semester for June and summer session graduates.

The grade point average is computed on work done at this institution, except that if the grade point average for work at other collegiate institutions is lower, those grades are included in the computation.

To be considered for computations relevant to honors or distinction, grades for removal of Incompletes and all other grade changes must be received in the Registrar's Office no later than the end of the fifth week of the semester in which the student plans to graduate and the student must file an application for graduation prior to the published deadline. After the degree is granted no changes can be made in the undergraduate record.

Upon recommendation of his major department and with the approval of the faculty, a student doing superior work in his major field may be graduated with distinction in that field.

#### Commencement

Commencement exercises are held once a year at the end of the spring semester for students who were graduated at mid-year, those graduating at the end of the spring semester, and students who expect to complete requirements for graduation in the summer session. The president of the university, by the authority of the Trustees and on recommendation of the faculty, awards the degrees.

#### Second Bachelor's Degree

If a student who has completed a bachelor's degree program from an accredited institution wishes to obtain a second bachelor's degree, he must obtain approval from the Dean of Undergraduate Studies. Such approval is granted only under exceptional circumstances. If approval is granted, the student must make a complete change in major and must fulfill all requirements for the degree as stipulated by this university, including completion of a minimum of 24 units subsequent to the awarding of the first degree.

#### American Studies Major

#### With the A.B. Degree In Liberal Arts and Sciences

The major in American Studies is offered by the College of Arts and Letters. Dr. Robert Redding, A.S. 216, is adviser for this major.

Preparation for the major. History 17A-17B, and English 53A-53B. (12 units).

Major. A minimum of 30 upper division units to include Humanities 180, History 179A-179B (may be used for group B), and two groups of 9 to 12 upper division units chosen from Group A, Group B, or Group C and approved by the adviser. The remainder of the courses needed to fulfill the 30 unit requirement may be taken in

courses listed in Groups A, B, C, and D, except that no more than 12 of the 30 units may be taken from any one group.

Group A: American Literature. English 130, 131, 133, 134, 135, 136, 138, 139, 198 (when relevant to American Studies).

Group B: American History. History 171A-171B, 172A-172B, 173A-173B, 174, 175A-175B, 175C, 176A-176B, 177A-177B, 178A-178B, 179A-179B, 180, (when relevant to American stud-

ITSC, 170A-170D, 177A-177D, 173A-173D, 173A-173D, 150, (when relevant to American studies), 181A-181B, 182A-182B, 183A-183B, 184A-184B, 185, 189A-189B.
 Group C: Social Sciences. Economics 111A-111B, 112, 135, 136, 138, 173, 174, 185, 189;
 Geography 121, 154, 155, 158, 159, 160, 170, 171, 173; Political Science 105, 115, 116, 119, 120, 123S, 124, 125, 126, 127A-127B, 130, 132, 138, 139A-139B, 171; Sociology 113, 114, 121, 124, 125, 136, 157; Journalism 117, 121; Mexican-American Studies 102, 105; Family Studies and Consumer Sciences 136; Women's Studies 140, 150A-150B, 180.
 Group D: Electrize Art 157. Music 151D. Philosophys 164, Apthemology, 171

Group D: Electives. Art 157; Music 151D; Philosophy 164; Anthropology 171.

Foreign Language Requirements. Choice of foreign language should be made in consultation with adviser.

#### Asian Studies Major

#### With the A.B. Degree in Liberal Arts and Sciences

The major in Asian Studies is offered by the College of Arts and Letters. Dr. Alvin Coox, Department of History, is the adviser for this major.

**Preparation for the major.** Six units in History 4A-4B, 9A-9B, or Philosophy 1A-1B; six units in Anthropology 1 and 2, Economics 1A-1B, Geography 1 and 2, or Political Science 1 and 3; and Humanities 59A-59B. (18 units.) Art 52A-52B and Comparative Literature 70A-70B are recommended.

Major. A minimum of 30 upper division units to include: From the Humanities not less than 12 units from at least two departments chosen from Art 152A, Comparative Literature 170, 190 through 196 (when relevant); History 180 (when relevant), 190A, 190B, 191A, 191B, 192, 193, 194, 195, 196A-196B, 197A-197B; Humanities 199 (when relevant); Philosophy 175, 195 (when relevant); Religious Studies 121A-121B, 126A-126B; and from the social sciences not less than 12 units from at least two departments chosen from Anthropology 175, 178, 186, 190, 191, 192; Economics 102, 115; Geography 131, 133, 134, 150; Political Science 183, 187, 191, Recommended: Business Administration 165.

Foreign language. Asian language recommended.

#### Child Development Major

#### With the B.S. Degree in Applied Arts and Sciences

The major in Child Development is offered by Family Studies and Consumer Sciences. Preparation for the major. Anthropology 2; Family Studies and Consumer Sciences 4 and 70; Family Studies and Consumer Sciences 35 or Social Welfare 30; Psychology 50; Sociology 1; Sociology 60 or Psychology 70. (21 units.)

Major. A minimum of 36 upper division units to include Biology 159; Family Studies and Consumer Sciences 135 and 171; Psychology 131 and 150; Sociology 140 or Psychology 145; and 18 units selected with the approval of the adviser, at least 12 and not more than 15 units of which must be in an area in which the student wishes to concentrate.

#### 284-9 7 140

#### **European Studies Major**

#### With the A.B. Degree in Liberal Arts and Sciences

This major is offered by the College of Arts and Letters. Dr. Ernest Wolf, Department of German-Russian, is adviser for this major.

Preparation for the major. Twenty-two units to include Art 50A or 50B; Economics 1A-1B, or Geography 1 and 2, or Political Science 1 and 3; History 4A-4B; and 12 units in Latin or one of the major European languages (French, German, Italian, Russian, Spanish) beyond the minimum of four units required in liberal arts and sciences.

Major. A minimum of 30 upper division units to be chosen with approval of the adviser and distributed as follows: six units in Humanities to include Humanities 150A-150B or 151A-151B; six units in a major European foreign language; nine units in economics, geography, history, or political science; six units in art, classics, comparative literature, music, or philosophy; three units of electives.

#### Humanities Minor (Emphasis in European Studies)

The minor is limited to students in secondary teacher education. Refer to the section of this catalog on the School of Education.

#### Humanities Curriculum

#### In Liberal Arts and Sciences

The Humanities curriculum is offered by the College of Arts and Letters. Dr. James Tidwell, Dean of the College of Arts and Letters, is the adviser for this major.

The intensive program in humanities provides a course of study which gives a comprehensive view of the development of contemporary civilization, with practice in critical thinking and careful expression. The program encourages extensive reading in history, literature, and philosophy, with oral and written discussion.

#### **Specific Requirements and Recommendations**

- I. A major in one of the departments of the College of Arts and Letters, consisting of 24 upper division units and the required introductory courses, plus a minor if required by the major department. Knowledge of one foreign language is required, as specified in the departmental major.
- II. Twelve or more upper division units in related fields, selected with approval of the faculty adviser for the curriculum. (May include courses in the minor, if appropriate.)
- III. The adviser will assist the student who undertakes this program to distribute his course work among the following areas:
  - (a) The origins of Western Civilization: Greek and Roman, Hebrew, Medieval.
  - (b) Western Civilization, 1500-1900; Continental, British, and American.
  - (c) Contemporary Civilization.
  - (d) Type courses concerned with more than one period; comparative study of Asian Civilization; linguistics and composition; theory.
- IV. Humanities 198, Integration in the Humanities (3 units).

The student will file with the Evaluations Office a master plan approved by the adviser for the humanities curriculum.

#### Jewish Studies Minor

The minor in Jewish Studies is offered by the College of Arts and Letters. Dr. Harry Ruja, Department of Philosophy, is adviser for this minor. It provides a balanced interdisciplinary study of Jewish contributions to world culture and history. It serves the needs of students who plan to (1) specialize in disciplines in which an understanding of Jewish contributions, is essential, or (2) follow careers in teaching, community service, foreign service, or the minis-

try. The minor in Jewish Studies consists of 15 to 17 units to include Humanities 30 and 31, or Literature 105 (English 105), 185, Hebrew 1 and 2; and 9 units selected from Comparative Literature 105 (English 105), 185, 186; Philosophy 135, 136; Religious Studies 100A and 115.

#### Latin American Studies Major

#### With the A.B. Degree in Liberal Arts and Sciences

The major in Latin American Studies is offered by the College of Arts and Letters. The adviser for Latin American Studies is Dr. Thomas M. Davies, Jr., Department of History. The major provides (1) a basis for a more effective understanding of the cultures and governments of the western hemisphere; and (2) a basic education and training for a business or professional career involving understanding of Latin America.

High school students preparing to enter this program should include in the high school

289-9 7 165
#### Interdisciplinary Programs / 71

#### 70 / Interdisciplinary Programs

course of study not less than three years of study in one foreign language, preferably Spanish or Portuguese. Proficiency in either of these languages is indispensable to a successful career in this area of study.

**Preparation for the major.** Portuguese 1, 2, 3, 4, 10, 11, or Spanish 1, 2, 3, 4, 10, and 11 with a minimum grade point average of 2.0 for all work attempted; twelve units selected from Anthropology 2, Economics 1A-1B, Geography 1, History 8A-8B, Political Science 1, 3, Spanish 41, 42. (28 units).

Major. A minimum of 36 upper division units selected from courses in anthropology, art, economics, geography, history, Mexican-American Studies, political science, Portuguese, and Spanish, with not less than twelve units in one field and nine in each of two other fields. At least 33 units must be in courses having Latin American content. The student will file with the Evaluations Office a master plan approved by the adviser for the Latin American Studies curriculum.

Courses acceptable for the Latin American Studies Major include: Anthropology 155, 157, 162, 163, 169-S, 180, 181, 182; Art 151A, 151B; Economics 114, 153, 195; Geography 123, 124, 198 (when relevant); History 160A-160B, 161A-161B, 162A-162B, 163A-163B, 164, 165A-165B, 167A-167B, 168, 180 (when relevant); Mexican-American Studies 100, 133, 135; Political Science 175, 184, 191, 194, 195; Portuguese 135, 185 (when relevant); Spanish 104A-104B, 106A-106B, 107, 108, 109, 170, 171, 172, 185 (when relevant); and 199 (when relevant) taken in one of the departments listed above.

#### **Russian Area Studies Major**

#### With the A.B. Degree in Liberal Arts and Sciences

The major in Russian area studies is offered by the College of Arts and Letters. Dr. Vytas Dukas, Department of German-Russian, is adviser for this major.

Preparation for the major. Russian 1, 2, 3, 4, or equivalent. (16 units.) Lower division prerequisites for the upper division courses to be taken in the major. (3–9 units.)

Major. A minimum of 30 upper division units to include nine units from at least two departments in the humanities selected from Comparative Literature 125, 126, History 147A-147B, Humanities 152, Humanities 153; nine units from at least two departments in the social sciences selected from Economics 102, Economics 118, Geography 126, Geography 127, Political Science 181, Political Science 186; six units in Russian selected from Russian 101A-101B, 102A-102B, 103, 104, 105A-105B, 110A-110B, 111; and six units of electives selected with the approval of the adviser.

#### Social Science Major

#### With the A.B. Degree in Liberal Arts and Sciences

The major in social science is offered by the College of Arts and Letters. Information may be obtained in LE 306A.

**Preparation for the major.** A six-unit sequence in each of three of the following fields: (1) anthropology, (2) economics, (3) geography, (4) history, (5) political science, and (6) sociology. (18 units). Courses recommended for these sequences are as follows: Anthropology 1 and 2, Economics 1A-1B, Geography 1 and 2, History 4A-4B or 8A-8B, Political Science 1 and 2, Sociology 1 and 10.

Major. Thirty upper division units in the fields listed above to include: 15 units in one; six units in each of two others; three more units in one of these or a fourth field.

Courses covering four fields must be completed. If the requirement for the fourth field is not satisfied by the three upper division units described above, then it may be satisfied by three units of lower division credit.

#### Social Science Major

#### With the A.B. Degree in Liberal Arts and Sciences

The adviser for this emphasis is Dr. Charles D. Smith, Department of History.

#### Emphasis in Africa and the Middle East

Preparation for the major. Anthropology 2; Economics 1A-1B; Geography 1; History 4A-4B or Political Science 1 or Humanities 57 or 58. Recommended: Comparative Literature 52A-52B and 80A (15–18 units).

52A-52B and 80A (15-16 units). Major. Thirty upper division units from the departments of anthropology, economics, geography, history, political science, and sociology, chosen with the consent of the adviser and including not less than 15 units in any one of the above departments except sociology. Required: Anthropology 185; Economics 119; Geography 125 or 130; History 156A-156B, 157 (six units) or 158A-158B; Political Science 188, 189, or 192. Additional recommended courses: Anthropology 185; Economics 119; Geography 125 or 130; History 157A-157B or 158A-158B; Political Science 188, 189, or 192. Additional recommended courses: Anthropology 152, 153, 154, 156, 164, 176, 184; Economics 189, 190, 192, 195; Geography 150; History 155A-155B, 183A-183B; Political Science 176, 191, 192; Sociology 104.

**Foreign language.** Arabic 1, 2, 103, 104; or French 1, 2, and 3; or German 1, 2, and 3; or Portuguese 1, 2, and 3. An equivalent level of competence in any other language judged appropriate by the Committee on Africa and the Middle East is acceptable. Competence will be determined by examination.

#### Social Science Major

#### With the A.B. Degree in Liberal Arts and Sciences

The adviser for this emphasis is Dr. Warren A. Johnson, Department of Geography.

#### **Emphasis in Environment**

**Preparation for the major.** Biology 1, 2; Chemistry 7A. A six-unit sequence in each of three of the following fields: (1) anthropology, (2) economics, (3) geography, (4) history, (5) political science, and (6) sociology. Courses recommended for these sequences are as follows: Anthropology 1 and 2, Economics 1A-1B, Geography 1 and 2, History 4A-4B or 8A-8B, Political Science 1 and 2, Sociology 1 and 10. (25 units). Additional recommended courses include: Chemistry 7B, Geology 2, 3, and 4.

Major. A minimum of 30 upper division units to include 12 units selected from: Economics 138 or 173; Geography 170, 199; Political Science 119 or 130; and 18 units selected from Anthropology 156, 158, 159, 179; Economics 100A, 100B, 105, 131, 189; Geography 154, 155, 156, 158, 159, 171, 173, 174, 175, 176; History 185; Political Science 116, 117, 118, 125; Sociology 140, 150, 157. Recommended: Biology 115 or 165.

#### Special Major

## With the A.B. Degree in Applied Arts and Sciences and in Liberal Arts and Sciences

The special major, consisting of three fields, instead of the usual major-minor pattern, offers a general type of education leading to objectives not otherwise provided in the regular programs of the college. Assistance in arranging the special major may be obtained at the Personnel Services Center in the Administration Building. The plan for the major must be cleared with the Evaluations Office for appropriate use of courses, approved by the department chairman in each of the three fields selected, and finally approved by the Dean of Undergraduate Studies. Forms are provided for this purpose.

**Preparation for the major.** A minimum of a year course in each of the three fields selected in the major must be completed in the lower division as foundation for upper division courses.

Major. A minimum of 36 upper division units chosen from three fields, with not more than 15 nor fewer than nine units from any one field. If two of the three fields selected are from majors offered only in liberal arts and sciences, the special major is governed by the regulations required by that program. If two of the three fields are selected from those not exclusively in the liberal arts and sciences program, the special major is governed by the regulations in applied arts and sciences. The three fields selected are subject to approval by the Dean of Undergraduate Studies.

# Graduate Division

in manuel

## **Graduate Division**

74

## Organization and Administration

All graduate work leading to advanced degrees is under the jurisdiction of the Graduate Division and responsibility for all graduate curricula is delegated to a Graduate Council under the chairmanship of the Dean of Graduate Studies who also serves as the administrativeofficer of the Graduate Division.

Under the provisions of Section 41001 of the Administrative Code (see the section of this catalog on Admissions), the Graduate Council, through the Graduate Office, admits all students to authorized graduate degree curricula, determines their eligibility to continue in such curricula, and, in the cases of unsatisfactory performance, requires students to withdraw from all graduate curricula.

The Graduate Council is the appropriate university authority for the administration of all matters related to graduate degree curricula, requirements for which are specified in Section 40504 of the Administrative Code.

#### Association Membership

California State University, San Diego is a member of the Western Association of Graduate Schools and the Council of Graduate Schools in the United States.

## Degrees Offered

All master's degrees are conferred by the Trustees of the California State University and Colleges upon recommendation of the faculty of California State University, San Diego. These degrees are designed to provide instruction for graduate students in the liberal arts and sciences, in applied fields, and in the professions, including the teaching profession. Joint doctorates are awarded by the Board of Regents of the University of California and

the Board of Trustees of the California State University and Colleges in the names of California State University, San Diego and the cooperating campus of the University of California.

#### Doctor of Philosophy

The Doctor of Philosophy degree in Chemistry is offered jointly with the University of California, San Diego.

The Doctor of Philosophy degree in Ecology is offered jointly with the University of California, Riverside.

The Doctor of Philosophy degree in Genetics is offered jointly with the University of California, Berkeley.

#### Master of Arts

The Master of Arts degree is offered in the following fields: American studies Health science Political science Anthropology History Psychology Industrial arts Art Asian studies Latin American studies Russian Biology Linguistics Social science Chemistry Mathematics Sociology Drama Music Spanish Economics Philosophy Education Physical education Speech Pathology English Physical sciences and Audiology French Physics Geography

Radio and Television Speech Communication

#### Master of Science

Counseling

The Master of Science degree is offered in the following fields: Criminal Justice Aerospace engineering Administration Astronomy Electrical engineering Biology **Business** administration Geology Home economics Chemistry Mass communications Civil engineering Mathematics **Computer Science** 

Mechanical engineering Microbiology Physics Psychology Radiological physics Social work Statistics

Master of Business Administration

Master of City Planning

Master of Public Administration

Master of Social Work

Admission Procedures

#### Matriculation

Any student, holding the baccalaureate degree and wishing to be admitted to California State University, San Diego for post-graduate study, must apply for admission to the univer-sity at the Admissions Office and comply with the regulations of the Admissions Office as stated in the section of this catalog on Admissions.

#### Unclassified Graduate Standing

Acceptable graduate students are admitted to the university by the Admissions Office with unclassified graduate standing. Admission to the university with unclassified graduate stand-ing does not constitute admission to graduate degree curricula in the Graduate Division.

## Classified Standing in the Graduate Division

A student who has been admitted to the university by the Admissions Office with unclassified graduate standing who desires to earn an advanced degree must file an application for admission to an authorized advanced degree curriculum and the Graduate Division. If the applicant meets the requirements of Section 41001 of the Administrative Code, he will be admitted to the graduate curriculum of his choice and to the Graduate Division with classified graduate standing. The Graduate Office notifies the Registrar to change the status of the student from unclassified to classified standing.

## Failure to Meet Admission Requirements

If the applicant fails to meet the requirements for classified graduate standing, he may remain in the university with unclassified graduate standing and enroll in any undergraduate course for which he has the necessary prerequisites, provided facilities and competent instructors are available.

Unclassified graduate students are not eligible to enroll in 200-numbered courses except with permission of the instructor and the Dean of Graduate Studies. All credit earned by an unclassified graduate student is subject to evaluation as to its acceptance in satisfaction of master's degree requirements.

Undergraduate students are not permitted to enroll in 200-numbered courses, except under special circumstances (see section "Concurrent Master's Degree Credit").

## Withdrawal and Reinstatement

A graduate student who has begun work on a graduate degree and has taken no courses within the last calendar year is considered to have withdrawn from the degree curriculum. If he wishes to resume his work, he must file an application for readmission to the Graduate Division. He will then be required to comply with regulations and requirements in effect

at the time his application for readmission is accepted. Any student who was not in attendance or on official approved leave of absence during the semester preceding the semester in which he wishes to enroll must apply for readmission to the university.

German

#### 76 / Graduate Division

Any graduate student whose performance is judged to be unsatisfactory by the Graduate Council may be required to withdraw from all graduate degree curricula offered by California State University, San Diego.

#### Advanced Degree Curricula

Requirements for the Doctor of Philosophy

The requirements for the Doctor of Philosophy degree are stated fully in the Graduate Bulletin.

#### **Requirements for Master's Degree**

The minimum requirements for the Master of Arts degree, the Master of Science degree, the Master of Business Administration degree, Master of City Planning degree, Master of Public Administration degree, and the Master of Social Work degree are established by the Board of Trustees of the California State University and Colleges. Students seeking to enter a curriculum in the Graduate Division leading to these degrees must comply with the admissions procedures described above, be advanced to candidacy, and meet the scholastic, professional and personal standards, including the passing of examinations, required in the Graduate Division.

The Master of Arts, Master of Science, and the Master of Public Administration degrees require 30 semester units of graduate work; the Master of Business Administration degree requires between 30 and 60 units (depending upon the student's background); the Master of City Planning and Master of Social Work degrees are two-year degrees and each require 56 units of graduate work. At least 30 units of work must be earned in residence at California State University, San Diego for the M.C.P. degree and at least 24 units for all other master's degrees. All acceptable credit must have been earned within seven years of the date when all requirements for the degree are completed. A grade point average of 3.0 (grade of B on a five point scale) or better must be earned in (1) all programmed 100-numbered courses required for the removal of undergraduate deficiencies, (2) all programmed courses including courses accepted for transfer, and (3) all 100-, 200-, or 300-numbered courses taken at California State University, San Diego concurrently with or subsequently to the earliest course listed on the official master's degree program.

#### **Graduate Bulletin**

Complete details on the operation and administration of these requirements, together with other administrative regulations on graduate study as determined by the Graduate Council, will be found in the Graduate Bulletin, which is available at the Graduate Office.

# Nondegree Curricula

**Preprofessional Programs** 

## **Preprofessional Programs**

### **Programs** Available

78

Preprofessional curricula, which usually require three or four years of collegiate work, are offered. Curricula outlines of preprofessional study, which are presented on the following pages, meet the typical requirements for admission to professional schools. Students expecting to complete their professional training at other institutions should modify the suggested outlines of study to meet the requirements of the professional schools of their choice. Curricula outlines are presented for predental, prelegal, and premedical programs. Students planning to enter other professional fields, such as agriculture, forestry, optometry, pharmacy, veterinary science, may obtain assistance from faculty advisers in arranging appropriate preprofessional courses of study.

## Predental Curriculum

The preprofessional programs described here may all be pursued in conjunction with a degree program. The recommended courses listed do not by themselves constitute a bachelor's degree, but they may serve to fulfill some graduation requirements. A student interested in the dental profession should inform himself regarding the entrance requirements of the specific dental college he hopes to attend and choose courses specified by that college. For additional guidance, the student is invited to consult the predental advisers on campus.

The curriculum for dental hygiene is essentially the same as for predentistry

Students ordinarily elect to concentrate in chemistry, biology and zoology with a major in one and a minor in another.

Many dental schools request that letters of recommendation for applicants be prepared by a predental council rather than by individual professors. Such a council exists on this campus and all western dental schools have been so informed. In order to obtain letters from the council, it is essential that each applicant provide the council with certain information. Obtain the form and instructions from the office of the Department of Biology. This form must be submitted to the Biology Department office by April 1 of the year during which

## Recommended Course of Study for Predental Curriculum

Freshman year: Biology 1 and 2, Chemistry 1A-1B, English 5, English 6 or other literature course, Health Science and Safety 21, Mathematics 3 and 4, physical education activities, and course, Health Science and Safety 21, Mathematics 3 and 4, physical education activities, and Speech Communication 3. Sophomore year: Biology 15, Chemistry 4 or 5, and 12, Mathemat-ics 21, physical education activities, Physics 1A-1B, or 2A-2B and 3A-3B, Psychology 1, social science (American history, institutions, and ideals, U.S. Constitution, California state and local government), and Zoology 60. Recommended for the junior year: Art 119A, Biology 140, 141, 156, Chemistry 112, Psychology 106, 107, and various general education courses.

## Prelegal Curriculum

See the first paragraph under Predental.

The following curriculum is designed to meet the requirements of standard American schools of law for a broad and liberal education, while at the same time providing desirable flexibility in the individual programs. There are two patterns of concentration which will usually be indicated for the prelegal student, either of which may be selected, in consultation with the adviser, to fit best the interests of the student. These are the major-minor pattern and the special major pattern. Subject to individual variation, the fields of economics, history, and political science should receive first consideration when choosing the pattern of concentration as being the most effective background for later professional study in law and for

## Recommended Course of Study for Prelegal Curriculum

Lower division: Business Administration 1A-1B, Economics 1A-1B, Political Science 1 and 2, and a year course in history. Upper division: In the junior and senior years the student will plan his course with the counsel of his adviser in terms of the field of law in which he plans to work, but keeping in mind the entrance requirements and examinations for admission to schools of law. The recommended list below should receive prime consideration by all prelegal students in the selection of courses, though it is to be thought of as flexible in

Recommended: Business Administration 126; Economics 131, 135, 170; History 152A-152B, 177A-177B; Political Science 111A-111B, 138, 139A. Additional: Economics 150, History

322-9 7 325

175C and 179, Political Science 139B.

In addition to the courses taken in the fields of concentration, upper division electives in English, philosophy, psychology, sociology, and speech communication are recommended. A mastery of English is essential. The approval of a prelegal adviser is required for all master plans. If the special major pattern of concentration is chosen, a copy of the master plan is to be filed with the Evaluations Office.

#### Premedical Curriculum

See the first paragraph under Predental.

The completion of entrance requirements for admission to medical colleges requires three years of undergraduate study. However, four years of undergraduate study is usually completed before admission. The premedical student is strongly advised to select a major in a department leading toward an A.B. degree in liberal arts and sciences. This is most readily accomplished by majoring in biology, chemistry, or zoology, although other departmental majors are acceptable. Specific requirements for these majors are described for each department.

High school students planning to enter medicine should include in the high school program the following subjects: elementary algebra, plane geometry, intermediate algebra, chemistry, physics, and two or three years of German or French.

## Recommended Course of Study for Premedical Curriculum

The following is a list of courses which will satisfy the entrance requirements of most medical colleges. These courses should be included in the program of the premedical student regardless of his selected major. The entrance requirements for medical colleges differ somewhat and specific requirements of the medical school to which the student wishes to apply should be obtained directly from that medical college. For additional information students should consult the premedical adviser on campus.

Lower division: Biology I and 2; Chemistry 1A-1B and 12, and 4 or 5; six units of English, to include English 5; 12 units of French or German; Physics 1A-1B, or 2A-2B and 3A-3B. Upper division: Biology 155, 156 or Zoology 103; Chemistry 112.

Strongly recommend: Biology 15, 101; Latin 1 and 2 or at least Classics 50; Mathematics 21, 22; Zoology 106.

#### Preparation for Other Professions

Programs leading to professional study in agriculture, architecture, forestry, optometry, pharmacy, theology, veterinary science, and other areas, may be planned for a student who may wish to take some undergraduate work in liberal arts at this university. Since these professional areas frequently require a complete four-year course of study at the institution granting the degree, preprofessional programs are not provided at California State University, San Diego. If the student wishes to take work at this university, he is advised to consult the catalog of the university to which he expects to transfer to determine requirements before arranging his program. Faculty advisers will assist the student in planning his course of study.

## Professional Curricula

School Of Business Administration School Of Education School Of Engineering School Of Social Work

## School of Business Administration

#### **Departmental Organization**

Five departments comprise the School of Business Administration: Accounting, Finance, Management, Marketing, and Information Systems. Each department offers its separate majors and minors.

#### Accreditation

The School is a member of the American Association of Collegiate Schools of Business.

## Bureau of Business and Economic Research

The Bureau of Business and Economic Research is an organized research activity serving the needs of the School. Its chief purpose is to facilitate research by faculty and students in the areas of economics and business. For further information, see "Research Bureaus" in the catalog section, Introducing San Diego State.

#### Courses In Business Administration

Courses in business administration are listed and described in the section of this catalog on Announcement of Courses.

#### The Master's Degree

The School of Business Administration offers the Master of Business Administration degree (a 30–60 unit program) and the Master of Science degree in business administration. Both degrees offer concentrations in ten areas. For further information, refer to the Graduate Bulletin and to the section in this catalog on the Graduate Division.

## Departmental Majors And Minors

The following listed majors and minors are offered by the five departments in the School of Business Administration.

#### DEPARTMENT OF ACCOUNTING Major in Accounting with the B.S. degree Minor in Accounting DEPARTMENT OF FINANCE Majors with the B.S. degree in the following: Finance Insurance

Real Estate Minors in the following: Finance Insurance Real Estate DEPARTMENT OF MARKETING Majors in Marketing with the B.S. degree

Minor in Marketing DEPARTMENT OF INFORMATION

SYSTEMS Major in Information Systems with the B.S. degree

Minor in Information Systems

## DEPARTMENT OF MANAGEMENT

Major in Management with the B.S. degree Minors in the following: Business Management Employee Relations Production and Operations Management

## **Graduation Requirements**

The student must complete the requirements listed below for the bachelor's degree. (Refer to the section of this catalog on Graduation Requirements for specific information.)

- 1. A minimum of 128 semester units for the B.S. degree. No less than 40 percent of these units must be in business and economics, and no less than 40 percent must be in courses outside of the areas of business administration and economics.
- At least 24 units earned in residence, half of which must be completed among the last 20 units counted toward the degree.
  A scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in this is a scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in the scholastic grade point scale point average of 2.0 (grade of C on a five-point scale point
- 3. A scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in (a) all units attempted, (b) all units in the major, and (c) all units attempted at this college.
- 4. At least 36 upper division units for the B.S. degree.
- 5. One Major.
- 6. Satisfactory completion of competency tests in mathematics, speech, and writing, or completion of approriate courses designated in lieu thereof.
- 7. All regulations established by the college.
- 8. American institutions, to include competence in American history, institutions, and ideals; U.S. Constitution; and California state and local government.
- 9. 40 units in general education exclusive of courses in the major.
- 10. Application for graduation.

#### The Major

Each major in business administration consists of a pattern of prescribed upper division courses. The minimum number of units required is stated in the description of each major. Also required as preparation for the major are the lower division prerequisite courses.

Some majors require additional courses in a prescribed pattern in areas other than the major. Business administration majors are not required to complete a minor for the degree.

For information on general education and other degree requirements, refer to the section of this catalog on Graduation Requirements.

Any student majoring in Business Administration must make sure that 40 per cent of the units counting toward graduation are taken outside of the fields of business and economics.

#### Majors

#### Accounting Major

#### With the B.S. Degree in Business Administration

**Preparation for the major**. Business Administration 1A-1B, 30A, 80, 83; Economics 1A-1B, Economics 2 or Mathematics 12, and Mathematics 20 (25 units). Students who expect to use any course in business administration or economics to meet general education requirements must complete compensating units in courses outside these areas.

Major. Thirty-nine upper division units to include Business Administration 100, 102, 106, 126, 132, 150, 190 and Economics 100A or 100B; and 12 units selected from the following: Business Administration 101, 107, 108, 112, 114, 115, 118, 119; Economics 135, 170; one course and only one course each from finance, information systems, management, and marketing.

In addition to units in general education and to upper division units in the major, nine upper division elective units outside of business administration and economics are required. Lower division courses satisfy this requirement when all nine units are in one foreign language.

#### **Finance Major**

#### With the B.S. Degree in Business Administration

**Preparation for the major.** Business Administration 1A-1B, 30A, 80, 83; Economics 1A-1B; Mathematics 20; and Economics 2 or Mathematics 12 (25 units). Students who expect to use any course in business administration or economics to meet general education requirements must complete compensating units in courses outside these areas.

Major. Forty upper division units to include Business Administration 100, 126, 127, 128A, 130, 132, 150, 190, Economics 100A, 100B, and 135, at least three units selected from Business Administration 129 and 197, and three units of electives selected from business administration and economics courses with consent of the adviser. Fifty-two units (12 of which must be upper division) must be taken outside business administration and economics.

#### School of Business Administration / 85

#### 84 / School of Business Administration

#### Information Systems Major

#### With the B.S. Degree in Business Administration

**Preparation for the major.** Business Administration 1A-1B, 30A, 80, 83, and 84; Economics 1A-1B; Economics 2 or Mathematics 12; Mathematics 20 (28 units). Students who expect to use Economics 1A to meet general education requirements must complete compensating units in courses outside business administration and economics.

Major. A minimum of 34 upper division units to include Business Administration 103, 126, 132, 135, 150, 184, 185, 186, 187, 188, and 190; six units of electives selected from Business Administration 128A, 131, 134, 140, 163, 182, 183, and 189.

General electives. In addition to the requirements for the major, the student must select 20 units to complete the required total; at least 9 of the 20 units must be in upper division courses outside of business administration or economics.

#### Insurance Major

#### With the B.S. Degree in Business Administration

**Preparation for the major.** Business Administration 1A-1B, 30A-30B, 80, 83; Economics 1A-1B; Economics 2 or Mathematics 12, and Mathematics 20 (28 units). Students who expect to use any course in business administration or economics to meet general education requirements must complete compensating units in courses outside these areas.

Major. Thirty-nine upper division units, to include Business Administration 120, 121, 124, 125, 126, 132, 150, and 190, and 15 units selected from Business Administration 106, 107, 128A, 128B, 131, 140, 170, 171, 172, 173, 174, 175, Economics 111, 131, 135, 142, 170, 171. Fifty-two units (twelve of which must be upper division) must be taken outside of business administration and economics.

#### Management Major

#### With the B.S. Degree in Business Administration

The major in management is a flexible program which allows the student to either obtain a broad background in the nature of organizations, their operation, structure, behavior and environment; or concentrate in one of the areas of Human Resources Administration, Production and Operations Management, or Management Science. Students must complete all three of the following requirements:

#### (1) Professional Curriculum Within the Major Field

Preparation for the major. Business Administration 1A-1B, 30A, 80, 83; Economics 1A-1B; Mathematics 12 and 20 (25 units).

Major. Business Administration 103, 126, 132, 134, 135, 140, 145, 149, 150, 190 or 191 (31 units).

#### (2) Areas of Concentration Within the Major Field

Select 18 units from one of the areas below. No units taken in the major above may be included in these 18 units.

(a) Business Management: (1) Decision techniques—six units from Business Administration 114, 127, 136, 138, 157, 185, 186, 187, 190 or 191, 192, or Economics 107, and (2) Organization behavior—six units from Business Administration 137, 142, 143, 163, Psychology 105, 121, 123, 125, or Sociology 120, 122, 132, or 148, and (3) Organizational Environment—six units from Business Administration 118, 129, 130, 131, 148, 151, 153, 156, 165, 197, Economics 150, 170, History 175A-175B, Sociology 101, 104.

(b) Human Resources Administration: (1) Six units of Business Administration 142 and 143, and (2) Six units of Business Administration 122, 137, Economics 150, 152, or 153, and (3) Six units from Psychology 105, 121, 133, 152, 175, 176, Sociology 120, 121.

(c) Production and Operations Management: (1) Six units of Business Administration 136 and either 137 or 138, and (2) Six units from Business Administration 114, 127, 142, 161, 162, 164, Economics 150, and (3) Six units from Business Administration 185, 186, 187, 190 or 191, 192, Economics 107, 141, 171.

(d) Management Science: (1) Six units of Business Administration 190 or 191, plus 192, and (2) Six units from Business Administration 114, 136, 138, 157, 185, 186, 187, and (3) Six units from Economics 107, 141, Mathematics 134, 135A-135B, 141, 143.

#### (3) Pattern Requirements Outside the Department of Economics and the School of Business Administration

A minimum of 16 units of pattern requirements must be taken. Courses taken to satisfy this requirement must be upper division courses except as listed below. All such courses are in addition to and may not be used to satisfy any requirements in general education nor may they be used to satisfy requirement in (1) and (2) above.

341-9 7 415

This requirement may be satisfied in any one of the following three ways:

(1) By taking a minimum of eight units in the areas of Life, Physical and Social Sciences as indicated in (a) below and a minimum of eight units in the areas of Humanities and Fine Arts as indicated in (b).

(a) Life science, physical science, and social science. A minimum of eight units, to be selected with the approval of the departmental adviser, from *one* department in the College of Sciences or the departments of Geography, Political Science, and Sociology. All upper division courses in the specified departments are suitable as well as the following lower division courses: Chemistry 1A-1B, 4 or 5; Mathematics 51 and 52; Physics 4A-4B-4C.

(b) Humanities and fine arts. A minimum of eight units, to be selected with the approval of the departmental adviser, from *one* department in the College of Arts and Letters (except Economics, Geography, Political Science, and Sociology) or the College of Professional Studies (except Aerospace Studies, Industrial Arts, and Physical Education). All upper division courses and the following lower division courses are suitable: Art 5, 50A-50B, 52A-52B, Speech Communication 4, 60, and 64. All courses in a foreign language are acceptable, but at least eight units must be taken in one language.

(2) A minor in a department outside of Business Administration and Economics consisting of at least 16 units (no more than six units of which may be lower division units).

(3) A pattern of courses outside Business Administration and Economics (at least 16 units) from a number of departments which fits the requirements of the individual student and is approved *in advance* by the student's adviser and filed with the Evaluations Office. (No more than six units may be in lower division units.)

#### Marketing Major

#### With the B.S. Degree in Business Administration

**Preparation for the major**. Business Administration 1A-1B, 30A, 80, 83; Economics 1A-1B; Mathematics 20; and either Economics 2 or Mathematics 12 (25 units). Students who expect to use any course in business administration or economics to meet general education requirements must complete compensating units in courses outside these areas.

Major. Thirty-seven upper division units to include Business Administration 126, 132, 149, 150, 151, 156, 157, 158, and 190; six units selected from Business Administration 152, 153, 154, 159, 160, 161, 162, 163, 164, 165; and six units selected from Business Administration 103, 134, 135, 140, 145, 185, 191 and 197. In addition to the upper division units in the major and in general education, 12 upper division elective units outside of business administration and economics are required.

#### Real Estate Major

#### With the B.S. Degree in Business Administration

Preparation for the major. Business Administration 1A-1B, 30A-30B, 80, 83, Economics 1A-1B, Economics 2 or Mathematics 12, and Mathematics 20 (28 units).

Students who expect to use Economics 1A to meet general education requirements must complete compensating units in courses outside business administration and economics.

Major. Thirty-nine upper division units to include Business Administration 126, 132, 140, 150, 170, 171, 172, 173, 174, and 190, Public Administration and Urban Studies 160; and six to seven units selected from Business Administration 100, 106, 107, 120, 121, 153, 175, Economics 135, 142. Fifty-two units (twelve of which must be upper division) and must be taken outside of business administration and economics.

#### Minors

These minors are for students whose majors are outside of business administration. They all require Business Administration 1A-1B.

Accounting: 15 units required of which 11 must be upper division, including Business Administration 100.

**Business management:** 19 units required, including Economics 1A-1B; nine units must be upper division, including Business Administration 132.

Employee relations: 19 units required, including Economics 1A-1B; nine units must be upper division, including Business Administration 132 and 140.

Finance: 16 units required, including Economics 1A-1B and 135, and Business Administration 132.

Information systems: 19 units required, including Business Administration 83, 84, 185, 186, 187; and Mathematics 20.

Insurance: 19 units required, including Business Administration 30A-30B; 120; 121 or 124; and three additional upper division units in business administration.

347-9 7 445

#### 86 / School of Business Administration

Marketing: 19 units required, including Economics 1A-1B, Business Administration 150, and six additional upper division units in business administration.

**Production and operations management:** 19 units required, including Economics 1A-1B, Business Administration 132 and 135, and three additional upper division units in business administration.

Real estate: 19 units required, including Business Administration 30A-30B, 170, and six additional upper division units in business administration.

#### **Business Major**

#### For the Standard Teaching Credential

#### **Specialization in Secondary Teaching**

All candidates for the Standard Secondary teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education. Students must complete the requirements of a major in one of the five departments within the School of Business Administration. In consultation with the Coordinator of Teacher Education in the School of Business Administration, undergraduate students shall develop programs which fulfill the State secondary credential requirements.

#### **Business Minor**

#### For the Standard Teaching Credential

A teaching minor in business is offered to students who are not majors in the School of Business Administration. The minor consists of 21 units, exclusive of course equivalents, to be selected in consultation with the Coordinator of Teacher Education in the School of Business Administration.

General Electives. In addition to the requirements for the major, the student must select 20 units to complete the required total; at least 9 of the 20 units must be in upper division courses outside of business administration or economics.

#### Accreditation

The School is a member of the Americian Association of Colleges for Teacher Education. It is fully accredited by the California State Board of Education and the National Council for the Accreditation of Teacher Education.

## Bureau of Educational Services and Research

The Bureau of Educational Services and Research is an organized service and research activity of the School of Education. Its chief purposes are to facilitate research by faculty and students in the area of education and to provide services to schools and colleges in the field of education. For further information, see "Research Bureaus" in the catalog section, Special Programs and Services.

#### Courses in Education

Courses in education are described in the section of this catalog on Courses and Curricula.

#### Degrees

#### Master's Degree

The Master of Arts degree in education with concentrations in 10 areas and a Master of Science degree in counseling are offered. For further information, refer to the Graduate Bulletin and to the section of this catalog on the Graduate Division.

#### **Bachelor's Degree**

Graduation Requirements. Requirements for graduation with a bachelor's degree are outlined in the section of this catalog on Graduation Requirements.

**Bachelor of Vocational Education Degree.** The bachelor of vocational education degree is currently offered to vocational teachers of California who are recommended by the Board of Examiners for Vocational Education.

#### Credentials

Anyone wishing to teach or provide other types of professional service in the public schools of California must hold a credential issued by the State Department of Education. Credentials which are currently available are listed below with an indication of the school service authorized by each. A student who completes the prescribed program at California State University, San Diego will be recommended by the university to the State Department of Education for the credential.

Assembly Bill 122 has changed the requirements for credentials markedly in the State of California. Programs to meet the requirements of the new credential law are being developed at the present time. Only students who are enrolled in a credential program which would enable them to complete that program by September 14, 1974 can qualify under the current credentialing regulations. Students who cannot complete credentialing requirements under the current law by September 14, 1974 must meet the requirements of Assembly Bill 122. Therefore, students are advised to check with the department in which they are interested in order to otain advice on their major and on the programs in professional education.

#### List of Credentials Credential

#### **School Service Authorized**

(1) A standard teaching

credential with specialization in:

- (a) Elementary teaching ......... Teach kindergarten and grades one through nine
- (b) Secondary teaching...... Teach major and minor in grades seven through twelve

The following applies to

both (a) and (b).

By completing specialized preparation, additional authorization may be earned in: (1) Specialization in Teaching of Exceptional Children, authoriz-

## Admission To Teacher Education

#### **Application for Admission**

Students who plan to earn a credential for elementary teaching should apply for admission to Teacher Education at the beginning of the junior year. For secondary teaching, applica-tion for admission should be made during the junior year. For other credentials, see the appropriate coordinator for details. Application for elementary, secondary and special educa-tion should be made at a special meeting held each semester. (For date and place of this meeting, refer to the calendar in this catalog.) No courses in credential meeting, refer to the calendar in this catalog.) No courses in credential programs may be taken until admission is granted; any exception to this rule must have the approval of the appropriate department coordinator.

#### Standards for Admission

The standards for admission to Teacher Education are different from those for admission to the university; therefore, admission to the university does not guarantee that the student will be admitted to Teacher Education. The committees on admission to Teacher Education will base their decision upon the following factors:

- 1. A satisfactory score on the college aptitude test taken at the university.
- 2. For those applying for elementary education, see competence in reading, including speed and comprehension, must be demonstrated through satisfactory performance on the Reading Comprehension Test (formerly referred to as the Fundamentals Test). (See the university calendar for dates of these tests, which should be taken prior to application for elementary education. 3.
- Satisfactory scores on The College Level Examination for secondary teaching. (See the university calendar for dates of these tests, which should not be taken prior to the
- 4. Satisfactory quality of speech and voice control.
- 5. Results of the university health examination given for teaching credential candidates. 6. Interviews with representatives of the Admissions Committee and, for secondary education only, with a representative of the department in which the student is a major. The Admissions Committee will base its evaluation upon the following factors established by the Board of Trustees: intelligence, scholarship, professional aptitude, personality and character, speech and language usage, many-sided interests and other
- 7. Satisfactory grade point averages on the first two years or more of a given curriculum and on all subsequent work taken for the credential. Minimum grade point averages

+ These programs are not offered at California State University, San Diego.

358-9 7 500

- a. Elementary teaching, 2.20
- b. Health and development credential, 2.20
- c. Secondary teaching, all subjects, 2.50, and major field, 2.75.
- d. Community college teaching, 2.50.
- For administration, supervision, and pupil personnel services credential candidates, a satisfactory grade point average (minimum 2.75) on all work applicable to that credential, exclusive of the work applied to the basic credential.
  For secondary teaching candidates, an official evaluation and program approved by
- the authorized departmental representative in the student's major field and by a representative in secondary education. For elementary teaching candidates, a planned program should be developed with an elementary education adviser. Students planning a combined special education-elementary, special education-secondary should also seek program advising with a special education adviser. Acceptance in Special Education is dependent upon acceptance also in the elementary or secondary programs.
- A transcript of all work completed at other institutions must be filed with the second-10. ary education department.

#### New Students Who Seek To Complete a Credential

Teachers with a provisional credential or partial fulfillment of requirements credential who are teaching and working concurrently toward a regular credential may have a program designed to fit their background. For an evaluation of college credit completed to date, make an arrangement for an evaluation through the Admissions Office of the School of Education.

#### **Advanced Standing in Teacher Education**

A student transferring into California State University, San Diego with advanced standing must complete a minimum of six units of professional education work in residence at this university before recommendation for a credential, regardless of extent of education work already completed elsewhere.

#### **Evaluation of Credits**

After an interval of five years, courses in education are re-evaluated and subject to reduction in credit, in light of such new requirements as may have been put into effect and changes in educational procedures. All courses taken either at this university or elsewhere must be approved by an official adviser in order to be credited toward meeting credential requirements or pattern requirements for a degree.

## **Teaching Credential**—Elementary

#### **General Requirements: Standard Credential**

To be recommended by California State University, San Diego for the Standard Teaching Credential with specialization in elementary teaching, an applicant shall have completed successfully a program including the following requirements:

I. Four years, or the equivalent, of college or university education with a baccalaureate or higher degree from an approved institution.

II. A fifth year of postgraduate education taken at the upper division or graduate level. (Under certain conditions, including the completion of a major and of the required undergraduate work in professional education, this fifth year may be postponed, and completed during the first seven years of teaching. Further details on this option are available in the office of the Coordinator of Elementary Education.) III. Forty-five semester hours in general education.

IV. One of the majors specified for elementary teaching. If the major is not in an academic subject, the completion of one or two minors is an additional requirement. For further information, see the Coordinator of Elementary Education.

V. The following professional courses in education are scheduled in blocks: Education 111, 112, 130, 131, 132, 101 or 202 (30-31 units). See advising brochure for further information. This sequence of professional courses may begin in the second semester of the junior year.

VI. The following courses (unless taken as part of the major, minor, or general education): Art 2A, Geography 1, 2, Health Science and Safety 150, Mathematics 10A, Music 2, Physical Education 53. All are prerequisite to admission to the professional education blocks. (See advising brochure).

#### **General Requirements: Partial Fulfillment Credential**

Under certain conditions, including the completion of a major and the required undergraduate work in professional education, the fifth year may be postponed, and completed during the first seven years of teaching. Further details on this option are available in the Office of Coordinator of Elementary Education.

#### School of Education / 91

#### 90 / School of Education

#### **Majors for Elementary Teaching**

Majors for elementary teaching available at this university are listed below. A description of each departmental major will be found in the section of this catalog on Courses and Curricula, under the heading of the department offering the major. Interdepartmental majors, not limited to a single department, are described below.

Students seeking the standard teaching credential in Elementary Education with majors other than those listed below should see the Coordinator of Elementary Education to clarify credential requirements.

List of Majors

Majors will be selected from the following list:

Art Chemistry English Fine Arts Fine Arts and Humanities Fine Arts and Social Studies French

German Mathematics Mexican-American Studies Physics Physical Science Social Science Spanish

## Description of Interdepartmental Majors for Elementary Teaching

#### Fine Arts Major

#### For Elementary Teaching

Preparation for the major. Art 1A and 2A; Music 2, 10A, 10B, 40; Drama 5 and 40; Speech Communication 3. (20 units)

Teaching Major. A minimum of 24 upper division units to include: Music 144, 145; either one course selected from Art 106A, 111A, 117A, 120A or three units from Music 170 through 188; six units selected from Art 110, 117A or 119A, 118A-118B, and 108 or 156A; nine units selected from Drama 110, 120, 122, 132, 140A, 142 (maximum 3 units), 152A, 160A, Telecommunications and Film 180.

Degree Requirements. Students in Teacher Education who complete this teaching major, including prerequisites, in the undergraduate program may offer it as a major for the A.B. degree in applied arts and sciences. A minor is not required with this major for the degree.

#### Fine Arts and Humanities Major For Elementary Teaching

Preparation for the major. Courses must be selected from the same two areas as those to be used for the upper division concentrations: Art 1A, 2A; or Music 2, 10A, 10B, 40; or Drama 5 and 40; plus six units in either English or Philosophy.

**Teaching Major.** A minimum of 24 upper division units to include nine units selected from one of the three following areas: Art 110, 118A-118B, 117A or 119A, 108 or 156A; Music 144, either 143 or 145, and three units selected from courses numbered 170 through 188; 144, either 143 or 145, and three units selected from courses humbered 170 through 188; Drama 110, 120, 122, 127, 132, 140A, 142A-142B, (maximum 3 units), 152A, 160A. Fifteen units in one of the following areas: Philosophy 101, 103, 123, 127, either 128 or 135; English 175 or 180, six units selected from 103, 121A, 121B, or from courses numbered 111 through 118, six units selected from courses numbered 122A through 149 (except 103, 121A, 121B)

Degree Requirements. Students in Teacher Education who complete this teaching major, including prerequisites, in the undergraduate program may offer it as a major for the A.B. degree in applied arts and sciences. A minor is not required with this major for the

#### Fine Arts and Social Sciences Major For Elementary Teaching

Preparation for the major. Courses must be selected from the same two areas as those to be used for the upper division concentrations: Art 1A, 2A; Music 2, 10A, 10B, 40; or Drama 5 and 40; six units in one of the following areas: anthropology, economics, geography, history, political science, psychology, or sociology.

Teaching Major. A minimum of 24 upper division units to include nine units selected from one of the three following areas: Art 110, 118A-118B, 117A or 119A, 108 or 156A; Music 144, either 143 or 145, and three units selected from courses numbered 170 through 188; Drama 110, 120, 122, 127, 132, 140A, 142A-142B (maximum 3 units), 152A, 160A. Fifteen units

371-9 7 565

Anthropology 100A, 100B, 101, 102, 104, 151, 152, 156, 163, and 165. Economics 100A, 100B, 102, 103A, 103B, 110, 111, 131, 135, 150, 170, 195, and 196. Geography. Six to nine units selected from Geography 120, 121, 122, 123, 124, 125, 126, 127, 129, 130, 131, 133, 134; six to nine units selected from Geography 100, 101, 105, 110, 150, 151, 152, 153, 155, 180, 181A, 181B, and 182.

History. Prerequisites: History 4A and 4B. History 131, 143A, 143B, 144A, 144B, 171A, 171B, 189A, 189B, 191A, and 191B.

Political Science. Twelve units from Political Science 105, 111A, 111B, 112, 116, 117, 120, 125, 130, 138, 170A, 170B; and three units from Political Science 180, 181, 183, 184, 185, 186, 187, 188, 189, 190, and 194.

Psychology 105, 109, 131, 145, 150. Sociology 110, 114, 122, 125, 136, 140.

Degree Requirements. Students in Teacher Education who complete this teaching major, including prerequisites, in the undergraduate program may offer it as a major for the A.B. degree in applied arts and sciences. A minor is not required with this major for the degree.

#### **Physical Sciences Major**

#### **For Elementary Teaching**

**Preparation for the major.** A minimum of 18 units to include: three units of astronomy; three units of geology; six units of chemistry; six units of physics; and must include prerequisites for the upper division courses selected for the major. Adequate preparation in mathematics is essential.

Teaching Major. A minimum of 24 upper division units in any two or more of the academic subject areas of the physical sciences and mathematics, selected with approval of the adviser in the physical sciences for teaching programs.

Degree Requirements. Students in Teacher Education who complete this teaching major, including prerequisites, in the undergraduate program may offer it as a physical science major with the A.B. degree in applied arts and sciences. A minor is not required for the degree.

#### Social Sciences Major

#### For Elementary Teaching

Preparation for the major. A six-unit sequence in one of the following fields: (1) anthropology, (2) economics, (3) geography, (4) history, (5) political science, (6) sociology; and six additional units in one or two of the remaining fields.

**Teaching Major.** A minimum of 24 upper division units to include 12 units from any one field named above; and six units from each of two additional fields named above.

Degree Requirements. Students in Teacher Education who complete this teaching major, including prerequisites, in the undergraduate program may offer it as a major for the A.B. degree in either applied arts and sciences or in liberal arts and sciences. A minor is not required with this degree.

## Standard Teaching Credential—Secondary

#### **General Requirements**

To be recommended by California State University, San Diego for the Standard Teaching Credential with specialization in secondary teaching, an applicant shall have completed successfully a program including the following requirements: I. Four years, or the equivalent, of college or university education with a baccalaureate or

higher degree from an approved institution.

II. A fifth year of postgraduate education taken at the upper division or graduate level. III. Forty-five semester units in general education. IV. One of the majors specified for secondary teaching.

V. One of the minors specified for secondary teaching, or specialized preparation to serve as (1) a librarian or a teacher of librarianship, or (2) a teacher of exceptional children. (When the major is in a nonacademic subject, the minor must be in an academic subject and must include at least twelve upper division or graduate units.)

VI. The following professional courses in education: Education 100, 110, 121, 180A-180B-180C-180D, and 252 (24 units). Also required is Health Science and Safety 151 (2 units).

#### **Majors for Secondary Teaching**

Candidates for the Standard Teaching Credential with specialization in secondary teaching must complete one major and one minor in addition to the required courses in professional education.

Majors for secondary teaching available at this college are listed below. A description of

#### School of Education / 93

#### 92 / School of Education

each departmental major will be found in the section of this catalog on Courses and Curricula, under the heading of the department offering the major. Interdepartmental majors, not limited to a single department, are described below. Although these teaching majors need not be completed until the end of the postgraduate year, most students will need to complete an undergraduate major applicable toward a bachelor's degree. Students in Teacher Education at the time of graduation who complete the teaching major

in the undergraduate program, including prerequisites, will normally meet the requirements for the corresponding major for a bachelor's degree. Any exceptions are noted in the description of the teaching major.

#### LIST OF MAJORS

Majors will be selected from the following list:

Art **Biological Sciences** Business Chemistry Drama Economics English French Geography German Health Science History Home Economics

Industrial Arts Mathematics Mexican-American Studies Music Journalism **Physical Education** Physics **Physical Science** Psychology Russian Social Sciences Spanish Speech Communication

## Description of Interdepartmental Majors For Secondary Teaching

#### Physical Sciences Major For Secondary Teaching

Preparation for the major. A minimum of 18 units to include: three units of astronomy; three units of geology; six units of chemistry; six units of physics; and must include prerequisites for the upper division courses selected for the major. Adequate preparation in mathematics is essential

Teaching Major. A minimum of 24 upper division units to include 15 units in one of the following areas: astronomy, chemistry, geology or physics. The remaining nine units must be completed in two or more of the following areas: astronomy, chemistry, geology, mathematics, physics or physical science. The adviser is a member of the faculty of the Department

Postgraduate Year. Six upper division or graduate units must be completed in one of the areas listed in the major in which a 15 unit concentration may be done with the approval

Degree Requirements. Students in Teacher Education using this teaching major for a bachelor's degree will be graduated with a major in physical science with the A.B. degree in applied arts and sciences. A minor is not required for the degree; however, a teaching minor, which may be completed in the undergraduate program, is required for the creden-

#### Social Sciences Major

#### For Secondary Teaching

Preparation for the major. A six-unit sequence in each of three of the following fields: (1) anthropology, (2) economics, (3) geography, (4) history, (5) political science, and (6) soci-ology. Courses recommended for these sequences are as follows: Anthropology 1 and 2, Economics 1A-1B, Geography 1 and 2, History 4A-4B or 8A-8B, Political Science 1 and 2, Sociology 1 and 10. (18 units.)

Teaching Major (Undergraduate). Thirty upper division units in the fields listed above to include: 15 units in one; six units in each of two others; three more units in one of these

Courses covering four fields must be completed. If the requirement for the fourth field is not satisfied by the three upper division units described above, then it may be satisfied by

The major must include six units in U.S. History in either the lower or upper division. Postgraduate Year. Six upper division or graduate units to be selected with approval of

382-9 7 620

#### an adviser for the social sciences major.

Degree Requirements. Students in Teacher Education who complete this teaching major, including prerequisites, in the undergraduate program may offer it as a major for the A.B. degree either in applied arts and sciences or in liberal arts and sciences. A minor is not required with this degree; however a teaching minor, which may be completed in the undergraduate program, is required for the credential.

## Minors for Secondary Teaching

Minors for secondary teaching available at this university are listed below. A description of each departmental minor will be found in the section of this catalog on Courses and Curricula, under the heading of the department offering the minor. An interdepartmental minor, not limited to a single department, is described below. Although these teaching minors need not be completed until the end of the postgraduate year, many students will need to complete an undergraduate minor applicable toward a bachelor's degree. Students in Teacher Education at the time of graduation who complete the teaching minor

in the undergraduate program will normally meet the requirements for the corresponding minor for a bachelor's degree. Any exceptions are noted in the description of the teaching minor, which will be found in the section of this catalog on Courses and Curricula, under the heading of the department offering the minor. Specialized preparation which may be substituted for a minor is described later in this section of the catalog under the title: Specialized Preparation.

Art Biology **Business** Chemistry Drama Economics English French Geography German Health Sciences History Home Economics Humanities 1. Emphasis in European Studies 2. Emphasis in Latin Industrial Arts Italian

Journalism Latin Mathematics Mexican-American Studies Music **Physical Education** Physical Education-Coaching Émphasis Physics Political Science Psychology Russian Spanish Specialization in (a) Librarianship
 (b) Teaching of Exceptional Children—Mentally Retarded or Deaf and Severely Hard of Hearing Speech Communication

Description of Interdepartmental Minors for Secondary Teaching

Humanities Minor For Secondary Teaching

#### **Emphasis in European Studies**

The interdepartmental minor in Humanities with emphasis in European Studies for secondary teaching consists of 24 units to include Geography 2, History 4A-4B, Humanities 150A-150B or 151A-151B; six units selected from Economics 110, History 101A-101B, 121A-121B, 131A-131B, 133A-133B, 135A-135B, 136A-136B, 137A-137B, and Political Science 185; and three units selected from Art 154A, 155A, 155B, 156A, 156B, Comparative Literature 125, 126, Education 104, Geography 126, Music 151A, 152A-152B.

Humanities Minor For Secondary Teaching

#### **Emphasis in Latin**

The interdepartmental minor in humanities, with emphasis in Latin, for secondary teaching consists of 15 units of Latin, six of which must be in upper division courses. Eight units must be selected from Comparative Literature 102A-102B, General Language 20, Humanities 40, Philosophy 101, or upper division Latin courses.

387-9 8 5

#### 94 / School of Education

## The Community College Instructor Credential

#### Specific Requirements

- An Associate degree in which the student can establish four years of occupational experience in a subject matter area plus 12 units in designated courses on the community college.
- 2. A Baccalaureate degree in which the student can establish two years of occupational experience and a major or minor in a subject matter area related to this occupational experience plus six units in designated courses on the community college.
- A Master's degree in a subject matter area designated in Title 5, Section 5, #52210 (subjects commonly taught at a community college).

#### **Baccalaureate Degree Candidates**

Education 157, 158 and 159 are offered to students who have been recommended by the following departments: Industrial Arts, Recreation, Business Administration, Family Studies and Consumer Sciences, Criminal Justice Administration, Health Science and Safety, Microbiology, Nursing, Public Administration and Urban Studies, Social Welfare, and Telecom-munications and Film. Students may also enroll if they presently hold a partial credential in an occupational area or obtain an endorsement by the Dean of Occupational Education in a California community college. Early consultation with the Community College Coordinator is recommended.

#### **Master's Degree Candidates**

No formal courses in education are required under the current interpretation of the Education Code. It is strongly suggested, however, that graduate students enroll in the professional courses in teacher education in order to enhance employment possibilities as most community colleges require some professional preparation and/or experience. Students desiring further information are urged to consult with the Community College Coordinator, Room 128, Education Building.

Most departments on the California State University, San Diego campus have developed programs permitting graduate students to obtain the Master's degree and enroll in the education courses concurrently in as little as one year of full-time study. The courses in education are typically offered in the summer session and after three o'clock in regular semesters.

The following courses are suggested to enhance employment in the community college. Education 201 The Community College (2)

Education 223 Educational Psychology: Community College (2)

Education 251 Instructional Methods and Materials Community College (2)

Education 316 Directed Teaching (4)

NOTE: Directed teaching can be accomplished only in a community college day assignment.

Teacher assistants or others now teaching in secondary school who cannot enroll in the student teaching sequence are urged to enroll in Education 209 Workshop in Community College Education (2-6).

#### Specialized Preparation Applicable to Standard Teaching Credentials with Specialization in Elementary and Secondary Teaching

#### School Librarianship

Specialized preparation to serve as a school librarian may be substituted for the minor in the Standard Teaching Credential in secondary teaching, when the major is in an academic subject matter area.

Although a minor is not required, candidates for the elementary specialization may fulfill the requirements for School Librarianship concurrently with the elementary certification. (See the Coordinator of Educational Technology and Librarianship for advising.)

Requirements consist of the following: Education 140, 145, 146, 147, 148, 275, 278 or 279; Education 183 (4 units) and a minimum of six units selected from Education 141, 149, 150,

#### Exceptional Children: Area of the Mentally Retarded

The program of specialized preparation to serve as a Teacher of Exceptional Children: Area of the Mentally Retarded, may be substituted for a minor for the Standard Teaching Credential in secondary teaching, when the major is in an academic subject matter area.

Although a minor is not required, candidates for the elementary specialization may fulfill the requirements for the area of Mentally Retarded concurrently with the elementary certification. (See the Coordinator of the Department of Special Education for advising.)

Requirements consist of the following: Education 167, 168 or 169, 171, 172, 173, 182, Psychology 109, Speech Pathology and Audiology 105, and two units of electives with approval of the adviser. (26 units.)

#### **Exceptional Children: Area of Educationally Handicapped**

The program of specialized preparation to serve as a Teacher of Exceptional Children: Area of Educationally Handicapped is an additional area of concentration which may accompany work in elementary and secondary teaching. The area includes preparation to teach pupils who by reason of marked learning or behavioral problems or a combination thereof, cannot receive the reasonable benefit of ordinary education. For further information, contact the Coordinator of Special Education.

#### Exceptional Children: Area of Deaf and

#### Severely Hard of Hearing

The program of specialized preparation to serve as a Teacher of Exceptional Children: Area of the Deaf and Severely Hard of Hearing may be substituted for a minor for the Standard Teaching Credential in secondary teaching, when the major is in an academic subject matter area.

Requirements consist of the following: Education 167, 179 and 185; Speech Pathology and Audiology 127 or Education 172; Speech Pathology and Audiology 102, 120, 123, 140, 141, 143, 150, 151, 152, 153, 156 and 256.

Although a teaching minor is not required, candidates for the elementary specialization may fulfill the requirements for certification in the area of Deaf and Severely Hard of Hearing concurrently with the elementary certification. (See Chairman, Department of Speech Pathology and Audiology for advising.)

## Standard Designated Services Credential

#### **Pupil Personnel Services Specialization**

A recent change in the regulations for the Standard Designated Services Credential with a specialization in Pupil Personnel Services now provides for the issuance of this credential with the satisfactory completion of the approved program at this institution.

The approved program designated for pupil counseling is the 36-unit Master of Science in Counseling degree program as formulated in the Graduate Bulletin provided that the program include within or in addition to the Master of Science program, Education 226 (Guidance Services in Public Education), Education 233 laboratory (a pre-practicum labora-tory related to the course Theory and Process of Counseling and Education 332 (Practicum in Counseling). For those without two years of full-time public school experience, Education 331 (Field Work in Counseling) for 3 units to include a minimum of 120 clock hours of pupil personnel service in a school setting will be required.

Transfer students who hold a master's degree and who desire to qualify for this approved program need to verify (1) a master's degree from an accredited institution, (2) course work in the master's program equivalent to courses in this approved program, and (3) satisfactory completion of a minimum of 12 units at San Diego State to include Education 332 (Practicum in Counseling)

This credential can be issued on partial fulfillment of requirements to applicants with two years of public or private school experience upon satisfactory completion of one-third (12) units of the program.

Applicants desiring the Standard Designated Services Credential with an endorsement authorizing service as school psychologist and/or school psychometrist need additional coursework to that required in the above program. These requirements are specified in a special bulletin available from the Coordinator of Counselor Education.

### Health Specialization

To be recommended by California State University, San Diego for the Standard Designated Services Credential with a specialization in Health, authorizing service as a school nurse, an applicant shall have completed successfully a program including the following requirements:

I. Possession of a valid certificate of public health nursing issued by the California State Board of Public Health. Registration as an R.N. in the State of California. (Waived for applications filed prior to September 1, 1970.)

II. Five years of college or university education, including a baccalaureate degree. III. The following professional courses: Education 111 or 113, 115 or 230, 167, 121P; Health Science and Safety 153; Nursing X-160; Nursing 125-126 or Health Science and Safety 160. (20 units.)

IV. One hundred and eighty clock hours of supervised field experience, or the authorized equivalent in terms of actual experience. (For details, see the Coordinator of the Health and Development program.)

401-9 8 75

#### 96 / School of Education

### Standard Supervision Credential

The Standard Supervision Credential authorizes the holder to serve as a supervisor, consultant, coordinator, or in an equivalent supervisorial or intermediate administrative position at all grade levels in all areas that his credential (basic) authorizes him to teach or serve. However, to serve as a *principal*, his college or university preparation must include a major in an academic subject area, or a diversified major as provided for by law.

NOTE: By State interpretation, department heads do not need to possess the Standard Supervision Credential.

To be recommended by California State University, San Diego for the Standard Supervi-sion Credential, an applicant shall have completed successfully a program including the following requirements:

I. Six years of college or university education including:

- (a) Two years of acceptable postgraduate education in an approved institution. (b) A master's degree requiring not less than five years of education earned in an approved institution.
- II. The possession of a valid basic credential.
- III. Five years of successful full-time classroom teaching experience.
- IV. Admission to the program for school supervision and administration. (For details, see
- the Coordinator of the Department of Educational Administration.) V. The following professional courses:
- (a) For the elementary school concentration, Standard Supervision Credential: Education 260, 261, 262, 240 or 263, 264A-B-C, and 266A-B-C.
- For the secondary school concentration, Standard Supervision Credential: Educa-tion 260, 261, 262, 250 or 263, 265A-B-C, and 267A-B-C. (b)
- For service as a supervisor of Pupil Personnel Services, Special Education, School Health Services, or Library Services special programs are provided. For details see the Coordinator of the Department of Educational Administration. (c)

### Standard Administration Credential

The Standard Administration Credential is required for service as superintendent or assistant, associate, or deputy superintendent. The rules and regulations of the State Board of Education prescribe either (a) a doctorate

or (b) an academic master's degree.

At the present time, San Diego State is not recommending for this credential. Courses required for this credential will be offered, for the present at least, on an irregular basis as demand for them occurs.

## Bachelor of Vocational Education Degree

This degree is available only to vocational teachers recommended by the Board of Examiners for Vocational Education. The requirements are the same as those for the A.B. in applied arts and sciences. The specific program to be followed is to be selected with the approval of the Dean of the School of Education after obtaining Board of Examiners approval.

## **School of Engineering**

#### Accreditation

The undergraduate curriculum in Engineering, with options in aerospace, civil, electrical and electronic, and mechanical engineering, is accredited by the Engineers' Council for Professional Development.

### Courses in Engineering

The School of Engineering offers courses at the undergraduate and graduate level. These individual courses are described in the section of this catalog on Announcement of Courses. At the undergraduate level, the School prescribes certain patterns of its courses, combined with those of other academic divisions of the college, as a program of 132 semester units leading to the degree, Bachelor of Science in Engineering. This program is described in detail below. At the graduate level, the School offers the Master of Science degree in specific major fields of engineering.

#### Graduate Program

The Master of Science degree is offered in aerospace, civil, electrical, and mechanical engineering. For further information, refer to the Graduate Bulletin and to the section in this catalog on the Graduate Division.

#### Undergraduate Program

The objective of the engineering program at California State University, San Diego is to provide the intellectual and physical environment best calculated to encourage students to develop their capacities toward a successful career in the profession of engineering. The graduate of this program is able to assume personal responsibility for the development and application of engineering knowledge with wisdom and judgment for the benefit of mankind. He is qualified to take the Engineer-in-Training examination as a first step to professional registration, to enter industry at the junior engineer level, or to continue his formal education at the graduate level. Because the engineer's work is predominantly intellectual and varied, and not of a routine mental or physical character, this program places emphasis upon the mastery or a strong core of subject matter in the physical sciences, mathematics, and the engineering sciences of broad applicability. Woven throughout the pattern is a continuing study of the socio-humanistic facets of our civilization, because the engineering graduate must expect to find his best expression as a leader of men, conscious of the social and economic implications of his decisions. Although the profession of engineering presents in practice a variety of specialties, the

undergraduate student confines his attention during the first two years of the four-year program to a common pattern of course work in fundamentals. During his junior and senior years he may give outlet to his interest in a broad field of engineering by electing course work in aerospace, civil, electrical and electronic, or mechanical engineering. Even here, during this upper division work, the student is involved with his fellows in the study of a common core of the engineering sciences; these courses, together with those elected in a specialty field, are taught with an emphasis upon universal application and cross-fertilization of thought.

## Requirements for the B.S. Degree in Engineering

### **Graduation Requirements**

- 1. A minimum of 132 semester units for the B.S. degree in engineering.
- 2. At least 24 units earned in residence, half of which must be completed among the last 20 units counted toward the degree.
- 3. A scholastic grade point average of 2.0 (grade of C on a five-point scale) or better in (a) all units attempted, (b) all units in the major, and (c) all units attempted at this university.
- 4. At least 36 upper division units. (However, a typical program usually consists of at least 53 upper division units.)
- 5. A major in engineering as prescribed by the School.
- 6. Satisfactory completion of competency tests in mathematics, speech, and writing, or completion of appropriate courses designated in lieu thereof. 7. All regulations established by the university.

4-84215

#### 98 / School of Engineering

- 8. American institutions, to include competence in American history, institutions, and ideals; U.S. Constitution; and California state and local government.
- 9. 40 units in general education courses in addition to the major, distributed as prescribed in the section of this catalog on Graduation Requirements.
- 10. Application for graduation.

#### Major in Engineering

The major consists of 53 upper division units in a prescribed pattern. The program of study for the first two years is the same for all students in the school; thereafter there is differentiation according to the student's selected field of specialization. The requirements are as follows:

#### Lower Division Requirements

Freshman Year

Spring semester Chem. 1B, Gen., or 1E, Chem. for Engrs Math. 51, Diff. and Integ. Calc Phys. 4A, Principles Engr. 1 or Engr. 20, Engr. Graphics Biology 1 or Botany 1 P.E. Activity	Units 3 4 4 2 3 1/2

Anal Engr. 50B, Engr. Mech. II Engr. 60, Electr. Circuits American Institutions Sp. Communication 3 P.E. Activity	No co co co co

NOTE: Community college students who anticipate transferring to this institution in engineering are urged to remain at the community college to complete the lower division requirements in chemistry, engineering, mathematics, and physics insofar as these courses are offered by the community college in question.

#### **Upper Division Requirements**

The program of study for the last two years embraces the fundamental engineering sciences and their application to specific problems in selected fields of engineering practice, together with an opportunity for the student to approach an intellectual maturity in social, economic, ethic, and aesthetic thought.

The student must complete (1) the upper division requirements for all students; (2) the requirements of the selected field of specialization in accordance with an approved master plan filed during the first semester of the junior year; and (3) the remaining units of general education.

Recommended patterns in the four fields of specialization are shown below.

#### Aerospace Engineering

Each student with the option in Aerospace Engineering includes in his program a sequence of fundamental courses. In addition the student has the opportunity to satisfy his particular areas of interest by selecting a pattern of study indicated in the sequence below as "electives within major." This pattern may include typical aerospace engineering topics, such as aerospace vehicle design, performance, structural analysis, aerodynamics, and propulsion; some elective opportunity is also available in other disciplines at this university. Each student prepares his master plan of courses in consultation with his adviser, and submits it to the department chairman for final approval, usually early in the junior year.

#### **Civil Engineering**

All students in the Civil Engineering option pursue a common program of civil engineering fundamentals. In addition the student is provided with the opportunity to select a pattern of study to satisfy his areas of interest. This pattern of study is indicated in the sequence below as "electives within major" and may be selected from available courses in foundation, structural, environmental, transportation, or water resources engineering; computer programming; advanced surveying; engineering economics; and other areas. The student's choice of elective courses must be made in consultation with his adviser and documented by the filing of an approved master plan during the first semester of his junior year.

#### Electrical and Electronic Engineering

All students with the option in Electrical-Electronic Engineering include in their program a sequence of courses designed to develop an understanding of the basic principles, laws, and methodology of Electrical-Electronic Engineering. The student, through the proper selection of electives, has the opportunity to develop proficiency in his area of special interest. This pattern of study is indicated in the sequence below as "electives within major" and may be selected from available courses in communications, control systems, microwave circuits, digital systems and solid state electronics.

• Approved as part of the student's master plan. •• Or restricted elective.

## Mechanical Engineering

Mechanical Engineering option pursue a common program of mechani-cal engineering fundamentals. In addition the student is provided with the opportunity to select a pattern of study to satisfy his areas of interest. This pattern of study is indicated in the sequence below as "electives within major" and may be selected from available courses in controls, energy conversion, gas dynamics, heat transfer, machine design, materials, ther-modynamics, vibration, and other areas. The student's choice of elective courses must be made in consultation with his adviser and documented by the filing of an approved master plan during the first semester of his junior year.

\* Engineering 102 and 176 are required courses. 1 Core electives include: E108 or E110 or E118, E115, E116, and E187B. Core laboratory: E108L or E115L or E116L.

### Minor in Engineering

The minor in engineering, intended for students in other academic areas of the university, consists of 15 units in engineering, nine of which must be upper division. The courses must be approved by the dean of the School of Engineering.

\* Approved as part of student's master plan by the department chairman.

## School of Social Work

## Accreditation

The graduate program of the School is accredited by the Commission on Accreditation of the Council on Social Work Education.

## **Program and Objectives**

Program and Objectives The School of Social Work offers a two-year graduate curriculum leading to the Master of social Work degree under approval granted by the Trustees of the California State Univer-sity and Colleges in May, 1963. The School also offers a program of professional education which commences in the undergraduate curriculum and continues through one calendar year of graduate work, leading to the Master of Science in Social Work degree. The cur-riculum was approved in January, 1969, on an experimental basis for a four-year period effective in September, 1970, by the Accreditation Commission of the Council on Social Work Education. Only students completing the undergraduate major in social welfare at California State University, San Diego or its equivalent can be considered for this program. The objectives of the School of Social Work at California State University, San Diego are to equip students with the essential knowledge, philosophy and basic skills for their responsi-to entry into the profession of social work. In order to achieve these objectives, the School will assist students: to develop a philosophy which recognizes individual human welfare as the purpose and goal of social policy; to acquire attitudes which will permit the development and maintenance of professional relationships and professional standards; to develop the discipline and self-awareness essential to the professional social worker; to attain a level of competence necessary for beginning professional practice; and to accept responsibility for the continued development of their competence in the practice of social work. For detailed information regarding admission to the School and to its graduate curriculum,

For detailed information regarding admission to the School and to its graduate curriculum, see the Graduate Bulletin.

## Courses and Curricula

## **Courses and Curricula**

#### Course Numbering

Courses numbered from 1 to 99 are lower division (freshman or sophomore) courses; those numbered 100 to 199 are upper division (junior or senior) courses; those numbered 200 to 299 are graduate courses; those numbered 300 to 399 are professional education courses to be taken at the graduate level. Courses numbered X-900-X-999 are those courses offered exclusively in the extension program to meet the professional needs of specific community groups and are listed in the Extension Bulletin only. These courses are not acceptable on advanced degree programs.

#### The Unit or Credit Hour

In the listing of courses that follow, figures in parentheses indicate the unit value of the course. One unit or credit hour represents 50 minutes of recitation or lecture, together with the required preparation, or three hours of laboratory work or two hours of activities, each week for a semester.

## Prerequisites for Undergraduate Courses

Prerequisites for each course are stated in the course description.

The student should not register for any course for which he has not completed the indicated prerequisites. The one exception to this is that he may register for the course without having completed the stated prerequisites if he has secured the consent of the

## Prerequisites for Graduate Courses

Graduate level (200-numbered) courses require, as general prerequisites, graduate standing, and competence in the specified field as indicated by a substantial amount of upper division study in the field or in a closely related field. Unless otherwise specified in the course description, graduate level courses are open to classified graduate students with the permission of the instructor. Unclassified graduate students must obtain the permission of the instructor and the Dean of Graduate Studies before they may enroll in a graduate level course. Undergraduate students are not permitted to enroll in 200-numbered courses except under special circumstances (see section "Concurrent Master's Degree Credit"). Unauthorized enrollment of undergraduate students in 200-numbered courses may be cancelled or, if the course is completed before graduate standing is attained, only undergraduate credit will be earned for the course.

## Semester in Which Courses are Offered

In the listing of courses that follows, Roman numeral I indicates a course offered in the fall semester. Roman numeral II indicates a course offered in the spring semester. An "S"

indicates a course is offered in the summer. Following the course title are designations of credit and the semester in which course is

offered. Examples:

(3) I	units Offered in Cu
(3-3)	s. Offered in spring semester.
normally beginning in the fall semester.	its each semester. Year course

course beginning either semester.

Although the university fully expects to carry out the arrangements planned in the list of courses, it reserves the right to make changes. Classes in which the enrollment does not come up to the minimum number set by the Trustees of the State University and Colleges may

#### Common Courses

#### Experimental Topics Courses (99)

Any department, school, or college may offer courses under the number 99, Experimental Any department, school, of conege may oner courses under the number 59, Experimental Topics (2-4) under the following conditions: Each course must be approved by the Dean of the School or College concerned. Such a course may be offered no more than three years with the same title and content. Limit of nine units applicable on a bachelor's degree; of with the same title and content. Limit of nine units applicable on a bachelor's degree; of which no more than three units may be applicable to general education requirements. Such courses applicable to the minor or to preparation for the major only by special action of the 22-5 2 215

#### General College Courses (99 or 199)

General College 99 or 199 provides credit of up to six units (total) applicable to the bachelor's degree by supervised experience in an educationally significant community or university activity. Tutoring, volunteer work for a social service agency, registering or interviewing voters, and serving on an all-university academic committee are examples of such activities. To be eligible to enroll, a student must have completed 12 units of college work and must have a grade point average of C (2.0) or better. An interested student should, before registration, seek out a chairman of a faculty

committee or a faculty adviser for an on-campus organization which sponsors such activities and obtain his written consent to supervise his work and evaluate it for credit purposes. Units thus earned may not apply to a major or minor.

#### Honors Courses (166)

These courses are intended for students with superior scholastic records and aptitude. An interested student should direct his inquiries to the chairman of the department concerned.

#### Special Study (199)

These courses provide opportunity for individual study of a subject not offered in the regular curriculum. The student does this outside of the classroom. He should seek out an instructor under whose supervision he wishes to work, discuss the topic with him, and come to an understanding on the amount of time he is to devote to the topic, the credit he is to earn, and his mode of investigation and report. As with regular courses, the expectation is that the student will devote three hours per week to the subject for each unit of credit.

#### Aerospace Studies In the College of Professional Studies

#### Faculty

Professor: French (Chairman) Assistant Professors: Brandt, Conner

Offered by the Department A.F.R.O.T.C. curriculum.

Minor in Aerospace Studies

## A.F.R.O.T.C. Curriculum

The department offers a two-year Air Force Reserve Officers' Training Corps program designed to develop officers who have broad understanding and high growth potential. Cadets participate in dialogues, problem solving, and other planning activities designed to develop leaders and managers. All coursework is done on campus with the exception of the Field Training Unit conducted at an active Air Force base and the Flying Instruction Program conducted at a local civilian flying school. Summer training is required of all students, other than veterans, prior to enrollment in on-campus courses.

Upon completion of the program and all requirements for a bachelor's degree, cadets are commissioned second lieutenants in the Air Force and serve a minimum of four years active duty. Graduates who are qualified may apply for pilot or navigator training immediately upon graduation. Other graduates go on active duty in a specialty consistent with their academic major and existing Air Force needs. Graduates may request a delay from entry on active duty to continue their education in graduate programs. Graduates may apply for Air Force sponsored graduate study after entry on active duty.

## Applying for the Program

Any student or prospective student may take the Air Force Officer Qualifying Test and the physical examination during the year preceding entry into the program.

When selected, applicants attend a six-weeks field training course at an Air Force base in the summer prior to their last two years of college. No further summer training is required. (Note: Veterans who are granted credit for prior military service may enter the program as juniors and attend a four-week field training between their junior and senior year.) Field training emphasizes military orientation for the junior officer and aircraft and aircrew familiarization. Cadets receive physical training and participate in competitive sports. They are trained in the use of weapons, drill and ceremonies, and observe selected Air Force units perform everyday operations of the Air Force.

28-5 2 245

Afro-American Studies / 107

#### 106 / Afro-American Studies

### Flight Instruction and Pay

The Flight Instruction Program (FIP) is offered to qualified senior cadets who have elected to enter pilot training when reporting for active duty. The cost of the flight training is paid by the Air Force. Instuction is divided between class work taught on the campus and

flying training conducted by a civilian contractor in the area. Cadet retainer pay of \$100 per month is given for twenty months of the program. Cadets receive approximately \$35 during the Field Training Unit and are reimbursed for the cost of travel to and from the unit.

#### Aerospace Studies Minor

The minor consists of a minimum of 15 units in aerospace studies.

#### **Upper Division Courses**

131A-131B. Growth and Development of Aerospace Power (3-3)

Three lectures and one hour of leadership laboratory.

Semester I: The nature of war; development of air power; and Air Force doctrine. Semester II: Astronautics and space operations; United States space programs. 133. Field Training Unit (3)

Required for advanced cadets; military orientation and flight familiarization. Credit granted through the Extension Division on basis of individual student application. Gredit approval of the Aerospace Studies Department Chairman.

141A-141B. The Professional Officer (3-3)

Three lectures and one hour of leadership laboratory.

Prerequisites: Air Science 131A and 131B.

Semester I: The professional officer; the Military Justice System; leadership theory and practice. Semester II: Management principles and functions; problem solving; briefing for

commissioned service 151. Flight Instruction (2) 1

Available only to qualified senior AFROTC students.

Ground school is provided by the Aerospace Studies Department. Flight instruction is given by a contracted civilian flying school. Students may qualify for the FAA private pilot certificate.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of Aerospace Studies Department chairman.

#### Afro-American Studies Administered under the direction of the Dean of **Undergraduate Studies**

#### Faculty

Professors: Brown (Director), Chambers Associate Professor: Meadows Assistant Professors: Foster, Gilkesson, Nash, Oakes, Thomas Lecturers: Bryant, Gissendanner, Waymon

Offered by Afro-American Studies

Major in Afro-American Studies with the A.B. degree in liberal arts and sciences.

#### Afro-American Studies Major

## With the A.B. Degree in Liberal Arts and Sciences

All candidates for the degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A double major is strongly recommended for students majoring in Afro-American studies. A minor is not required with this major.

Preparation for the major. Afro-American Studies 20, 30, 32 and 50. (12 units.)

Major. A minimum of 24 upper division units to include Afro-American Studies 120 (six units) and 12 units selected from one of the following areas and 6 units from the remaining Area I. Afro-American Studies 130, 131, 140 and 151.

Area II. Afro-American Studies 143, 160, 161, 170 and 180.

Area III. Afro-American Studies 142, 170, 171 and 172.

31-5 2 260

Foreign language requirement. Twelve units in a foreign language or demonstration of equivalent knowledge in a reading examination administered by the foreign language department concerned.

#### Lower Division Course

M. Fundamentals of Computation (0) I

Basic mathematical concepts. A review in arithmetic and its basic operations. Topics include set notation, first degree equations in one unknown, factoring, graphs and systems of linear equations

1A. Written Communication for the Afro-American (3) I, II

Precise and expository writing based on selections by noted Black personalities in essays, short stories and selections from longer works.

1B. Intensive Writing (3) I, II

Practice of composition skills utilizing an analytical and critical approach to the ideals and philosophies of Black American writers.

2A. Composition and Reading (3) I

Practice of composition skills utilizing analytical and critical writings and readings, as exemplified by various non-fictional works of scholarly Black personalities.

4. Communications (3) I, II

Practice in speaking, critical listening, reasoning and organizing. Theory and techniques of communication used to evaluate the effect they have on the lives of Blacks and others.

Introduction to basic mathematical concepts such as properties of real numbers, linear and quadratic equations, polynomials, fractions, exponents and logarithmic functions.

7A-7B. Afro-American History (3-3) I, II

American history from a Black perspective. (Satisfies American Institutions requirements.)

8. Afro-American Music (3) I, II Musical contributions of Black Americans from African Music to today. Musical styles, events, significant contributors, and the role of socio-cultural variables in the development of the music. In addition to African Music, the blues, spirituals-gospel, jazz and art music will be studied.

20. Economics and Management in Urban Development (3) I, II

Principles of economics and management and their application to urban development. May be used for General Education requirement in social sciences.

30. Ethnicity and Social Competence (3) I, II An exploration into the concept of Ethnicity as a positive mental health model for Afro-Americans in the process of identity formation and coping strategies. May be used for General Education requirement in social sciences.

31. Cultural Patterns and Identity (3) I, II An analysis of institutions in society and their socializing effect upon Afro-Americans, and the cultural parameters that guide behavior.

32. Afro-American Life Styles (3) I, II

Afro-American Life Styles in the past, present, and future. Examination of contemporary problems, their roots and their effects on the Twentieth Century America.

50. Psychology of Blackness (3) I, II

Facts, principles, and concepts which are basic to understanding human behavior. An analysis of the psychological motivations and behavioral responses of and toward Afro-Americans.

60. Afro-American Literature (3) I, II

Modern and contemporary writing of Black-American authors. The socio-political impact the literature has had upon the Afro-American culture.

86. Statistics and Research (3) I

Prerequisite: Afro-American Studies 5. Fundamentals of research and statistics as used for writing reports, papers, books.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

35-5 2 280

2B. Composition and Literature (3) I, II Outstanding works of fictional writings by Black authors.

5. Intermediate Computation (3) I, II

#### 108 / Afro-American Studies

**Upper Division Courses** 120. Integrative Schemes in Organizational Management (3) I, II Two lectures and three hours of laboratory. Prerequisite: Afro-American Studies 20. An investigation of relevant approaches to administration and organization management with respect as to how to facilitate skills for the analysis, development, and management of urban programs. May be repeated with new content. Maximum credit six units. 130. Black Child Development (3) I, II Attitudes, needs and problems of the Afro-American child with emphasis upon new approaches and insights into the development of positive changes for the child's growth and 131. The Black Family (3) I, II Structure and functions of the Black Family in contemporary American Society. 140. Communications and Community Action (3) I, II Prerequisite: Afro-American Studies 4 (field assignments are a major part of this course). Application of the basic theories of communication through field projects. Study of the communication problems that exist between socio-political groups and the media. 142. Rhetoric of Black America (3) II Prerequisite: Three units in Afro-American history or communications. Rhetoric of Black Americans from David Walker to the present, the role rhetoric has played in the history of Black people and an analysis of the Black audience in terms of the 143. The Structure of Black English (3) I, II The history and structure of Black English. Its similarities to and differences from standard English dialects: Implications for educational policy. 145. Social Psychology (3) I, II Examination of social problems which Blacks encounter and the ways in which they approach solving them. 151. Black Consumer Psychology (3) I, II Prerequisite: Afro-American Studies 50. Attitude values and decision making of Black people as consumers. Laws and techniques of manipulating consumers. 160. Black Images in Western Literature (3) I, II Study of how the image of the Black has been portrayed in Western (white) literature and the attitudes and images of non-Black writers towards Blacks. 161. Afro-American Literature (3) I, II Prerequisite: Afro-American Studies 60. Contemporary writings of Afro-Americans. Analysis of themes, techniques, etc. of Afro-American fiction, poetry and drama. 170. Comparative History: Afro-American and African Heritage (3) I, II Conceptual framework of African history and a comparative study of Afro-American institutions. 171. The Black Man in the Twentieth Century (3) I, II History of social movements and institutions from 1890 to present. 172. Black Protest Before Civil War (3) I, II Anti-slavery movement and the resistances of Afro-Americans to the institution of slavery and the culmination of the movement in the fighting of the Civil War. 180. Twentieth Century Afro-American Jazz (3) I, II Historical development of jazz from its beginnings to present, based on the ability to identify people, discuss musical styles and events, and to relate these factors to the life of the 181. Urban Music Education (3) I, II Teaching the "Culturally different" music student. Investigation of cultural and environment conditions that might influence the teaching of music to the "culturally

199. Special Study (1-3) I, II

Individual study. Maximum credit six units.

Prerequisite: Consent of instructor.

#### Anthropology In the College of Arts and Letters

#### Faculty

**Emeritus:** Rogers

Professors: Anderson, Ezell, Goldkind, Whitney Associate Professors: Himes, Leach, Lippold, Shutler (chairman), Staniford, Watson Assistant Professors: Dubbs, Greenfeld, Moore, Pendleton, Rohrl, Sonek, Wagner, Young

#### Offered by the Department

Master of Arts degree in anthropology.

Major in anthropology with the A.B. degree in liberal arts and sciences. Minor in anthropology.

#### Anthropology Major

#### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major Anthropology 1, 2 (six units)

Major. A minimum of 24 upper division units in Anthropology to include: Anthropology 101, 102, 103, 104, 167, and nine units of electives selected from Anthropology with approval of the adviser. (Anthropology 100A and 100B may not be counted in the upper division requirements for graduation.)

#### Anthropology Minor

The minor consists of a minimum of 15 units in anthropology, nine of which must be in upper division courses (except for Anthropology 100A-100B).

#### **Lower Division Courses**

1. Physical and Cultural Origins of Man (3) I, II Man's place in nature; fossil evidences of early man; theories of human development; racial variability; the growth and development of man's culture; the rise of civilization. Not open to students with credit in Anthropology 100A. (Formerly numbered Anthropology 1A and 1B).

2. Introduction to Cultural Anthropology (3) I, II

May be taken before Anthropology 1.

Man's relationship to his environment; types of preliterate society; systems of social organization, politics, economics, religion, and language. Not open to students with credit in Anthropology 100B. (Formerly numbered and entitled: Anthropology 1C, Introduction to Ethnology.)

4. Archaeological Field Methods (3) I, II

May be taken before Anthropology 1.

One lecture and six hours of laboratory.

Application of the methods and techniques of archeology through excavation, laboratory analysis, and preparation of reports.

#### 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

#### 100A-100B. Principles of Anthropology (3-3)

Anthropology 100A: Human evolution as a biocultural process from the perspectives of human paleontology and prehistory. Anthropology 100B: Systems of cultural cognition, family organization, government, and religion in non-Western societies, comparison with analogous Western institutions. Anthropology 100A is not open to students with credit in Anthropology 1. Anthropology 100B is not open to students with credit in 2. Anthropology 100A-100B may not be used to fulfill minimal upper division requirements in the anthropology major or minor or the special major.

42-5 2 315

#### 109

Anthropology / 111

#### 110 / Anthropology

#### 101. Physical Anthropology (3) I

Prerequisite: Anthropology 1 or 100A. Recommended for majors only.

Primate comparative anatomy and human paleontology. Physical measurement of the living subject and skeletal specimens. The statistical treatment of data in physical anthropology. Applications of physical anthropology in industry and medico-legal problems. (Formerly numbered Anthropology 102.)

102. Principles of Archaeology (3) II

Prerequisite: Anthropology 2 or 100B. Recommended for majors only. The historic background and basic techniques of archaeological excavation. Methods of site excavation with particular emphasis on California and the Southwest. Principles of culture dynamics utilized in archaeological interpretation. (Formerly numbered Anthropology 103.)

103. Principles of Cultural Anthropology (3) II Prerequisite: Athropology 2 or 100B. Recommended for majors only. Primary emphasis on the principles and fundamentals guiding the study of cultural anthropology and its various topics of interest. An overview of the more recent trends within the field will be presented.

104. Principles of Anthropological Linguistics (3) I Prerequisite: Anthropology 1 or 2 or 100A or 100B. Recommended for majors only. The structural nature of language. How languages differ, change and influence each other. The language families of the world. The significance of language for human social life in a variety of cultures. (Formerly numbered anthropology 120.)

115. Primatology (3) I

Prerequisite: Anthropology 1 or 100A.

Description, taxonomy, and comparative anatomy of the anthropoid apes, monkeys, and lesser primates. Primate behavior as a basis for the reconstruction of prehistoric human behavior. Extensive use of the primate collections of the San Diego Zoo.

116. Human Paleontology (3) II

Prerequisite: Anthropology 1 or 100A. Comparative anatomy of fossil man and other primates; evolutionary relationships and cultural associations. (Formerly numbered Anthropology 101.)

122. Language in Culture (3) II

The full range of anthropological interests in the study of lanaguage, and of linguistic interests in the socio-cultural context of language. Designed for students in language and other departments as well as in anthropology.

124. Descriptive Linguistics (3) II

Prerequisite: Anthropology 104

Principles and techniques of descriptive linguistics. Problems and methods in the phonetic transcription and analysis of unwritten, non-Indo-European languages. Emphasis on articulatory phonetics, field techniques, and work with informants.

147. Prehistory of South America (3) I. II

Prerequisite: Anthropology 102.

Development of native South American cultures from initial occupation to the 16th century. Emphasis on major historical trends, particularly of the Andean area.

148. Cultures of Europe (3) I, II

Prerequisite: Anthropology 2 or 100B. The study of society and culture in contemporary Europe, utilizing current ethnographic materials. The relationship of such studies to European culture growth and to the definition of European sociocultural regions.

149. Kinship and Social Organization (3) I

Prerequisite: Anthropology 2 or 100B.

Comparison of kinship systems and the structure of social relationships throughout the world. The methodological orientations and theories relating to social organization with emphasis on non-Western societies.

150. Ethnological Field Methods (3) I

Prerequisite: Anthropology 152.

The problems and techniques of obtaining data in ethnological and social anthropological field work; preparation, gaining and maintaining rapport, evaluating participant-observation. A review of literature followed by work with informants. data,

151S. Ethnographic Field Research Project (6) S

A six-week course. No other course may be taken concurrently.

Supervised collection of ethnographic data in the field and in a subculture or culture that is foreign to the students.

46-5 2 335

152. World Ethnography (3) I, II

Prerequisite: Anthropology 2 or 100B.

The cultural patterns of representative aboriginal peoples. Industries, arts, social organization and supernaturalism considered with a view to environmental adjustment, historical development and functional interrelation. Ethnological theories reviewed and applied in interpreting illustrative aboriginal societies.

153. Primitive Religion (3) II

Prerequisite: Anthropology 2 or 100B. Beliefs and ritual of primitive man. Magic and religion. Forms of animism and polytheism. Primitive mentality and the supernatural.

154. Social Anthropology (3) II

Prerequisite: Anthropology 152.

The development of social anthropology as a distinct subfield of cultural anthropology. Readings and analysis of functionalism as theory and methodology in the explanation of social and cultural processes.

155. Peasant Society and Culture (3) II

Prerequisite: Anthropology 2 or 100B.

The social organization and culture of present-day small agricultural communities with emphasis on changes brought about by modernization.

156. Cultural Change and Processes (3) I

Prerequisite: Anthropology 2 or 100B. The individual and the culture pattern: The acquisition of culture, innovation and invention, direction of cultural development, diffusion and interpenetration of cultures. Illustrations from contemporary and historic peoples: Indians of the Southwest, Eskimos, aboriginal groups of Australia, Africa and Oceania.

157. Mesoamerican Ethnohistory (3) II

Prerequisite: Anthropology 1 or 2 or 100A or 100B.

Aboriginal pre- and post-Conquest civilization of Mexico with emphasis on the developments, changes, and characteristics of aboriginal, mestizo, and creole society in Colonial Mesoamerica; stress on appropriate texts and codices.

158. Economic Anthropology (3) II

Prerequisite: Anthropology

Social relationships and cultural values inherent in the economies of primitive and peasant societies. Cross-cultural comparisons made of various means by which goods and services are acquired and distributed in non-Western, non-market-industrial societies.

159. Cultural Ecology (3) I

Prerequisite: Anthropology 2.

Examination and comparison of the relationships which exist between the natural environment and the socio-cultural processes in non-literate and peasant communities.

160. Primitive Technology (3) I

Prerequisite: Nine units of anthropology.

Techniques of tool manufacture, subsistence, shelter, clothing and arts and crafts of non-industrial peoples.

161. The California Indian (3) I

Prerequisite: Anthropology 2.

Native California Indian cultures with stress on the Indian groups of Southern California. The industries, arts, social organization, folklore and religion will be considered as revealed through the study of living peoples and archaeological evidences.

162. Cultures of South America (3) II

Prerequisite: Anthropology 1 or 2 or 100A or 100B.

Indian cultures in terms of origins, migration, relation to habitat, cultural variation and relevance to contemporary trends. Development of Inca civilization, the effects of the Spanish conquest and its aftermath.

163. Contemporary Latin American Cultures (3) I

Prerequisite: Anthropology 2.

A social anthropological approach to the structure and dynamics of contemporary conditions and problems, especially as revealed in studies of particular communities. Included are such topics as ethnic and regional differences within national societies, population change, social consequences of economic changes, changing stratification systems, values, institutional change.

164. Urban Anthropology (3) I

Prerequisite: Anthropology 2 or 100B.

Cultural roles of urban centers and processes of urbanization in non-Western, non-industrial, societies of past and present. Urban influence on traditional peasant and primitive peoples of Africa, Asia, and Latin America.

50-5 2 355

#### 112 / Anthropology

Anthropology / 113

165. Culture and Personality (3) I, II

Prerequisite: Anthropology 2 or 100B. The relationship of individual personality to culture in a variety of cultures. A consideration of various theories and studies in the social and personality sciences.

166. Honors Course (1-3) I, II

Refer to Honors Program.

167. History of Anthropological Theory (3) II

Prerequisite: Anthropology 1 or 2 or 100A or 100B. The development of theories which lie behind the modern sciences of ethnology and archaeology. Applications of the theory of culture to field methods and interpretation of findings

168. Evaluative Procedures in Culture and Personality (3) II

Prerequisite: Anthropology 165.

Methods of eliciting and evaluating cross-cultural information about patterns of behavior. Such field methods as the interview and participant observation will be reviewed and evaluated.

169-S. Backgrounds of Mexican Civilization (3) S

Mexico's archaeological past and its bearing on historic and recent peoples and cultures. Conflicts between Aztec and Mayan cultures and western civilization. The relationship of Mexican civilization to other Latin American cultures.

170. Archaeology of North America (3) I

Prerequisite: Anthropology 1 or 100A.

Origin of the American Indian and survey of the main prehistoric cultures of the North American continent

171. Ethnology of North America (3) II

Prerequisite: Anthropology 2 or 100B.

Native cultures and the role of environmental and historical factors in North America. 172A. Southwestern Prehistory (3) I

Prerequisite: Anthropology 1 or 100A.

Prehistoric Indian cultures in the American Southwest; ecological adaptations and outside

cultural influences.

172B. Southwestern Ethnology (3) II

Prerequisite: Anthropology 2 or 100B. Indian cultures of the American Southwest in historic times; ecological adaptations, responses to white contact, adaptations to modern American life.

173. Advanced Archaeological Field Methods (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Anthropology 4.

Advanced projects in excavation and stabilization of ruins, archaeological surveys, laboratory analysis and preparation of reports.

174. Prehistoric Archaeology of Europe (3) II

Prerequisite: Anthropology 1 and 2 or 100A and 100B.

The Stone Age, Bronze Age, and Iron Age cultures of Europe, North Africa, and the Middle East. Industries, habitations, and art of peoples antecedent to recorded history. Methods of investigation used in reconstructing prehistoric civilizations.

175. Cultures of Southeast Asia (3) II

Prerequisite: Anthropology 2 or 100B.

Prehistory, races and cultures of Indonesia, Philippines and nearby mainland Southeast Asia. Includes both primitive and peasant societies and reviews them with respect to environmental, historical and social factors.

176. Early Near and Middle Eastern Civilizations (3) I

Prerequisite: Anthropology 1 or 100A.

Anthropological foundations of historic primary civilizations of the Near and Middle East in their early phases of development as revealed by archaeological and other sources. 178. Cultures of Oceania (3) II

Prerequisites: Anthropology 2 or 100B.

The aboriginal cultures and people of Melanesia, Australia, Micronesia, and Polynesia in pre-historic, historic, and modern times.

179. Applied Anthropology (3) II

Prerequisites: Anthropology 154 and 156, and consent of instructor.

The application of anthropological concepts to the solution of practical problems of culture change in industry, corporate organization and community development.

180. Preclassic Cultures of Mesoamerica (3) II

Prerequisite: Anthropology 1 or 100A

The development of civilization in Pre-Columbian Mexico and Central America antecedent to the Tolteca, Classic Maya, and related cultures.

181. Classic Pre-Columbian Civilizations of Middle America (3) I

Prerequisite: Anthropology 1 or 100A. Aboriginal Mexican and Central American civilizations through the Age of Exploration and Conquest. Aztecs, Mixtecs, Zapotecs, Mayas, and related cultures.

182. Post-Conquest Cultures of Middle America (3) II

Prerequisite: Anthropology 2 or 100B. Aboriginal and mixed cultures of Mexico and Central America in Colonial and recent epochs. Aftermath of Conquest and exploitation.

183. Archaic Hellenic, Aegean, and Italian Cultures (3) II

Prerequisite: Anthropology 1 or 100A.

Anthropological foundations of primary civilizations of Greece, the Aegean, and Italy, in their prehistoric phases of development as revealed by archaeological and other sources. 184. Archaeology of Sub-Saharan Africa (3) I

Prerequisites: Anthropology 1 or 100A.

A chronological review of the major archaeological cultures in Sub-Saharan Africa. The archaeological evidence for the evolution of man and his culture in Africa will be presented in a conjunctive approach.

185. Cultures of Sub-Saharan Africa (3) I

Prerequisite: Anthropology 2 or 100B.

Indigenous peoples and cultures of Africa south of the Sahara. A comparison of cultural traditions, social organization, and modern trends in newly emergent nations of the area. 186. Cultures of India (3) II

Prerequisite: Anthropology 2 or 100B. Indigenous peoples and cultures of India and contiguous areas of South Asia. The development of cultural traditions; social organization; and modern trends.

187. Political Anthropology (3) II

Prerequisite: Anthropology 2 or 100B.

Political processes, institutions, and ideologies in primitive and peasant societies.

188A-188B. Archaeological Laboratory Methods (3-3) I, II

Two lectures and three hours of laboratory.

Prerequisites: Anthropology 173. Anthropology 188A is a prerequisite to 188B.

Semester I: Application of palynology, paleontology and technologies. Semester II: Practical applications of materials from 188A. Individual laboratory research project required.

189. Topics in Arctic Archaeology (3) I

Prerequisites: Anthropology 1 and 102.

Discussion of selected areas, periods or problems in the context of broad considerations of prehistoric cultural development and human ecology throughout the Arctic and subarctic regions of North America.

190. Archaeology of East Asia (3) II

Prerequisite: Anthropology 1.

A chronological review of prehistoric cultural development and human ecology in East Asia.

191. Chinese Society (3) II

Prerequisite: Anthropology 2.

Culture and social organization of Chinese people. Traditional China, overseas Chinese, contemporary Taiwan and Hong Kong, recent social change in Mainland China. 192. Japanese Society (3) I, II

Prerequisite: Anthropology 2.

Culture and social organization of Japanese people. Traditional Japanese economic, social, political and religious institutions. Korea, Okinawa and overseas Japanese. Recent industrial and urban changes in modern Japan.

196. Topics in Anthropology (3) I, II

Prerequisite: Nine units of upper division anthropology.

A senior level undergraduate proseminar, topic to be announced in the class schedule. Maximum credit six units.

#### 114 / Anthropology

#### 197. Investigation and Report (3) I. II

Prerequisites: Grade point average of 3.0 in the anthropology major and consent of instructor.

Analysis of special topics in anthropology and preparation of reports on the results of the study. Course is intended for advanced majors only who plan to continue in advanced degree programs.

199. Special Study (1-3) I, II

Individual Study. Six units maximum credit. Prerequisite: Consent of Instructor.

#### **Graduate Courses**

**200.** Seminar (3) An intensive study in advanced anthropology, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

201. Seminar in Physical Anthropology (3) Prerequisites: Anthropology 1 or 100A and 12 upper division units in anthropology. History and theory in physical anthropology stressing the significant literature on such topics as functional anatomy, human paleontology, population genetics, and primatology.

202. Seminar in Archaeology (3) Prerequisites: Anthropology 1 or 100A and 12 upper division units in anthropology. History and theory in archaeological data collection, analysis, and interpretation.

203. Seminar in Ethnology (3) Prerequisites: Anthropology 2 or 100B and 12 upper division units in anthropology. History and theory in ethnology stressing the significant literature on such topics as cross-cultural comparison, structural-functional analysis and description, personality and culture, and socio-cultural change.

204. Seminar in Linguistics (3) Prerequisites: Anthropology 104 or 122 and 12 upper division units in anthropology. History and theory of linguistics stressing the significant literature on such topics as

cultural cognition, descriptive linguistics, lexicostatistics, and transformational analysis. Seminar in Regional Anthropology (3)

Prerequisites: Twelve units of upper division credit in anthropology. Study of a major world region such as Africa, the Arctic, East Asia, Europe, Latin America, the Middle East, North America, Oceania, or South Asia. Maximum credit six units applicable on a master's degree.

221. Seminar in Topical Anthropology (3) Prerequisites: Twelve units of upper division credit in anthropology. Study of a major subdiscipline such as Political Anthropology, Economic Anthropology, Social Anthropology, Psychological Anthropology, Cultural Ecology, Applied Anthropology, Race and Variation, or Environmental Archaeology. Maximum credit six units applicable on a master's degree

222. Historical Linguistics (3

Prerequisites: Anthropology 104 and 124.

Principles and techniques of historical linguistics, with concentration on the dynamics of linguistic change, comparative linguistics, and historical reconstruction as applied to non-Indo-European languages.

233. Social Structure (3)

Prerequisite: Twelve units of upper division credit in anthropology.

A structural and functional approach to the social organization of a wide range of cultures. An examination of theories and generalizations regarding the stability and integration of a wide variety of human societies.

255. Culture and Society in the Nahua Area (3)

Prerequisites: Anthropology 1 or 2 and 12 units of upper division credit in anthropology. A course designed to permit concentrated studies of the area and those related to it, based on archaeology, aboriginal records, colonial accounts, and modern studies; and to permit various approaches to such studies. 256. Cultures and Societies in Southern Meso-America and Central America (3)

Prerequisites: Anthropology 1 or 2 and 12 units of upper division credit in anthropology. Concentrated studies of ancient civilization in areas of higher development, based on archaeology, aboriginal records, Colonial accounts, and recent studies; and to permit various approaches to such studies.

257. Classical Nahuatl (3)

Prerequisites: Anthropology 1 or 2 and 12 units of upper division credit in anthropology including Anthropology 157, or 180, or 181; reading knowledge of Spanish recommended. Nahuatl language study and analysis for translation of 16th-17th century texts, use of

ancient and modern grammatical works and vocabularies; reading of manuscripts; relationship of the language to appropriate aspects of Nahua culture.

258. Ethnoscience (3)

Prerequisities: Twelve units of upper division credit in anthropology

Analysis and comparison of native categories, classifications, and bodies of systematic knowledge as demonstrated in preliterate and literate societies.

267. Contemporary Theory in Cultural Anthropology (3)

Prerequisite: Twelve units of upper division credit in anthropology.

Contemporary theoretical developments in cultural anthropology: an examination of proposed conceptual frameworks, methodologies, hypotheses, and theories. An analysis of recent literature, with evaluation oriented toward significance for research.

286. South Asian Society (3)

Prerequisite: Anthropology 186 or substantial background in upper division courses in the social sciences dealing with South Asia. The structure and dynamics of both rural and urban aspects of contemporary South Asian

society and culture. Examination of their constituent elements and process, e.g., social organization, religion, acculturation, and rural-urban differences.

297. Research (3)

Prerequisite: Advancement to candidacy. Independent investigation in the general field of the thesis.

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study directed toward the preparation of a paper upon a specific problem. Six units maximum credit.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

## Arabic

#### in the College of Arts and Letters

Faculty

Assistant Professor: Jadon

Offered by the Department of Classical and Oriental Languages and Literatures Courses in Arabic.

Major or minor work in Arabic is not offered.

Lower Division Courses

#### 1. Elementary (4) I

Four lectures and one hour of laboratory. Pronunciation, oral and written drills, essentials of grammar, and introduction to basic texts.

2. Elementary (4) II

Four lectures and one hour of laboratory.

Prerequisite: Arabic 1.

Continuation of Arabic 1.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

103. Readings in Literary Arabic (4) I

Prerequisite: Arabic 2.

Application of principles of grammar and readings on advanced level in literary Arabic. 104. Readings in Literary Arabic (4) II Prerequisite: Arabic 103. Continuation of Arabic 103.

68-5 2 445

Arabic / 115

#### In the College of Professional Studies

For purposes of exhibition and reference, the department reserves the right to retain for a limited period some of each student's work produced in class.

#### Faculty

Emeritus: Andrews, Jackson, Ruocco

Professors: Bigelow, Dirks, Fisch, Higgins, Hopkins, Lingren (Chairman), Longenecker, Swiggett, Tanzer, Wallace

Associate Professors: Baker, K., Baxter, R., Berg, Bowne, Covington, Hunter, Miller, A., Orth, Rogers, J.

Assistant Professors: Austin, Childress, Frick, Groover, Hodge, Moaney, Papworth, Perczel, Peterson, T., Ray

Offered by the Department

Master of Arts degree in art.

Major in art with the A.B. degree in liberal arts and sciences.

Major in art with the A.B. degree in applied arts and sciences.

Minor in art.

Teaching major in art, with specialization in both elementary and secondary teaching. Teaching majors in fine arts, fine arts and humanities, and fine arts and social sciences, requiring a concentration in art, are also offered. See "School of Education" in the catalog section Professional Schools: Courses and Curricula.

Teaching minor in art, with specialization in secondary teaching.

#### Art Major

#### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must con ete the graduation requirements listed on page 85 of this catalog.

This major in art may be planned with an emphasis in studio arts or art history. A minor is not required with this major in art.

#### Emphasis in Studio Arts

Preparation for the major. Art 1A, 1B, 2A, 2B, 5, 15A, 16A, 17A, 50A, 50B; Philosophy 1A. (33 units.)

Major. A minimum of 24 upper division units in art to include Art 100A, 115A, 116A, 156A, 190; Philosophy 141; and six units selected with the approval of the adviser from: Art 106A-106B, 112A-112B, 116B, 117A-117B, 117C, 118A-118B, 120A-120B, 153, 154, 155A, 155B,

#### **Emphasis in Art History**

Preparation for the major. Anthropology 1; Art 50A-50B, 52A-52B; French or German or Italian or a reading knowledge of either language (15 units).

Major. A minimum of 24 upper division units selected from Art 151A, 151B, 153, 154A, 154B, 155A, 155B, 156A, and 157 or 158; and three units of electives selected with the approval of the department from anthropology, art, history or philosophy.

#### Art Major

#### With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

The major in art may be planned with an emphasis on art education, crafts, environmental design, graphic communication, painting and printmaking or sculpture. The programs in environmental design and in graphic communication have a preprofessional orientation environmental design and in graphic communication have a preprotessional orientation supplemented by a strong liberal arts background. Environmental design can lead to interior design or city planning. Graphic communication prepares the student for the areas of environmental graphics, art direction, visual design for the contemporary media of advertising, fashion illustration or editorial illustration. The areas of painting and printmaking, and sculpture prepare students for professional attitudes toward the fine arts and the continuance of their educational experience in graduate schools with the goal of teaching at institutions of higher learning. The preprofessional program in art education prepares the student for teaching in either elementary or secondary schools. The crafts program can be developed to specialize in ceramics, furniture or industrial design, jewelry,

A minor is not required with this major. However, in graphic communication an English minor is recommended.

76-5 2 485

#### **Emphasis in Crafts**

Preparation for the major. Art 1A, 1B, 2A, 2B, 50A, 50B, 61, and six units of art electives. (27 units.)

Major. A minimum of 24 upper division units in art to include nine units selected from three of the following areas: Fiber, metal, clay, wood; three units of extended work in one of the selected areas; six units of art electives; and six units of art history. Twelve units of advanced work in one area are strongly recommended.

#### **Emphasis in Graphic Communication**

Preparation for the major. Art 1A, 1B, 2A, 2B, 14A, 50A, 50B; and six units selected from Art 7, 14B, 15A, 16A, 18A. (27 units.)

Major. A minimum of 24 upper division units in art to include Art 114A, 114B-114C, 156A; three additional units of art history; and nine units selected from Art 107, 114D, 191A, 191B, 193A-193B, 194A-194B, 196A-196B, and 197.

#### **Emphasis in Environmental Design**

Preparation for the major. Art 1A, 1B, 2A, 2B, 8, 33A-33B, 50A, 50B, 95A, 95B; and three units selected from Art 13, 17A, 19A, 61. (36 units.) Recommended: Art 14A, 18A, 80A; Industrial Arts 21; Family Studies and Consumer Sciences 19, 45

Major. A minimum of 24 upper division units in art selected from Group I or Group II in consultation with an adviser:

Group I. Art 135A-135B, 156A, 195A, 195C, 195D and six units selected from Art 113A, 133. 135C, 160, 186, 187, 188, 191A, 195B, 195E.

Group II. Art 156A, 160, 186, 187, 188, 195B and six units selected from Art 117A, 133, 135A-135B, 195A, 195C, 195D.

#### **Emphasis in Painting and Printmaking**

Preparation for the major. Art 1A, 1B, 2A, 2B, 50A, 50B; and nine units selected from Art 15A-15B, 16A, 16B, 18A, 18B. (27 units.)

Major. A minimum of 24 upper division units in art to include Art 156A; three additional units of art history; and 18 units selected in consultation with the adviser from Art 100A, 100B, 106A-106B, 112A-112B, 115A-115B-115C-115D, 116A-116B, 116C-116D, 118A-118B, 120A-120B, 126A, 126B, 126D-126E, 136A, 136B, 136C-136D.

#### **Emphasis in Sculpture**

Preparation for the major. Art 1A, 1B, 2A, 2B, 17A-17B, 50A, 50B; and three units selected from Art 13, 15A, 16A, 19A, 61, 70, 80A. (27 units.)

Major. A minimum of 24 upper division units to include Art 117A or 127, 117B, 117C, 156A, 198; three additional units of art history; and six units selected from 100A, 113A, 115A, 116A, 170A.

#### **Emphasis in Art Education**

This emphasis is available only to students who have been admitted to and continue in Teacher Education to time of graduation.

#### **Elementary Teaching**

Preparation for the major. Art 1A, 1B, 2A, 2B, 50A, 50B, 61; and six units of art electives. (27 units.)

Major. A minimum of 24 upper division units in art to include 15 units selected from one emphasis area in consultation with the art education adviser; Art 105 or 175; 156A, and three units of art history.

#### Secondary Teaching

Preparation for the major. Art 1A, 1B, 2A, 2B, 50A, 50B, 61; and six units of electives. (27 units.

Major. A minimum of 24 upper division units in art to include Art 156A; three units of art history; and eighteen units from Group I or Group II in consultation with the art education adviser.

Group I. Fifteen units of one major emphasis area, including Art 175 and three units of one other major emphasis area. (18 units.)

Group II. Six units of drawing and painting; six units of crafts or sculpture; and three units of graphic communication or environmental design; and Art 175. (18 units.)

#### Alternate Program For Advanced Degree Preparation

Students planning to pursue an advanced degree may elect a 63-unit (27 units lower division, 36 upper division), alternate degree program in Applied Arts and Sciences. This program involves the completion of the requirements for one of the emphasis areas listed above and 12 additional units of art planned in consultation with the adviser in the student's area of emphasis.

81-5 2 510

#### 118 / Art

#### Art Minor

The minor in art consists of a minimum of 15 units in art, six units of which must be in upper division courses.

#### Art Major

#### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

#### Specialization in Elementary Teaching

Requirements are the same as the requirements for the degree with an emphasis in art education for elementary teaching as outlined above.

#### Specialization in Secondary Teaching

Requirements are the same as the requirements for the degree with an emphasis in art education for secondary teaching as outlined above. In addition, students must complete, in their postgraduate year, a minimum of six units of upper division or graduate art electives including Art 222.

#### Art Minor

#### For the Standard Teaching Credential

#### Specialization in Secondary Teaching

The teaching minor in art for secondary teaching consists of the following: In the lower division, Art 1A, 1B, 2A, 2B, 50A, 50B; and in the upper division twelve units in one emphasis area including Art 156A. (30 units.)

Lower Division Courses 1A. Drawing and Composition (3) I. II

Six hours.

The ordering of two-dimensional space through drawing.

1B. Drawing and Composition (3) I. II

Six hours. Prerequisite: Art 1A.

Drawing of mechanical and natural forms by the use of line and value. Emphasis on proportion and structure. Some quick sketching, gesture and contour drawing, 2A. Design and Aesthetics (3) I. II

Six hours.

Fundamentals of space and color design. Basic course used as a prerequisite for advanced work.

2B. Design and Aesthetics (3) I, II

Six hours.

Prerequisite: Art 2A.

Continuation of Art 2A. Original work in creative design including projects in three dimensions. 5. Art Orientation (3) I

An illustrated lecture course dealing with aesthetic meaning and a survey of the history of western art. Designed to increase the understanding and appreciation of art. 7. Graphic Imagery (3)

Six hours.

Prerequisite: Art 2A.

The organization concepts of design applied to experimental photographic and technical reproductive media, and environmental graphics. 8. The House and Its Environment (3) I, II

Architecture, interior design, landscape and city planning for forming man's physical and aesthetic environment.

13. Furniture Design (3) I, II

Six hours.

Prerequisite: Art 2A. Recommended: Industrial Arts 5.

Study of the principles of design through the making of furniture.

14A. Beginning Graphic Communication (3) I, II Six hours.

Prerequisites: Art 1A and 2B.

Creative projects exploring the inter-relation of fundamental art principles and design using phonetic symbols and typography.

88-5 2 545

14B. Intermediate Graphic Communication (3) I. II Six hours. Prerequisite: Art 14A. Typographic and design concepts applied to layout for contemporary media. 15A-15B. Life Drawing (3-3) I. II Six hours. Prerequisite: Art 1B. Art 15A is prerequisite to 15B. Drawing from the nude model. 16A. Painting (3) I, II Six hours. Prerequisite: Art 1B. Pictorial composition and techniques of painting. 16B. Oil Painting (3) I, II Six hours. Prerequisite: Art 16A. Landscape and more advanced composition in color. 17A-17B. Sculpture (3-3) I, II Six hours. Prerequisite: Art 2B. Recommended: Industrial Arts 5. Art 17A is prerequisite to 17B. Three dimensional design using varied materials. 18A-18B. Watercolor Painting (3-3) I, II Six hours. Prerequisites: Art 1A and 1B. Art 18A is prerequisite to 18B. Composition of still-life and landscape in watercolor. 19A. Ceramics (3) I, II Six hours. Prerequisite: Art 2A. Design and construction of hand-build ceramic forms. 19B. Ceramics (3) I, II Six hours. Prerequisite: Art 19A Continuation of Art 19A. Introduction to use of the potter's wheel and application of glaze for surface enrichment. 27. Life Modeling—Sculpture (3) I, II Prerequisite: Art 17A. Creative experimentation with sculptural forms from the human figure. 33A-33B. Visual Presentation (3-3) I, II Six hours. Prerequisites: Art 1B, 2A; 33A is prerequisite to 33B, and Art 18A recommended. Methods, materials, and tools of the professional environmental designer stressing art principles. (Formerly numbered Art 133A and 133B.) 50A. Appreciation and History of Art (3) I, II Art development in painting, sculpture, architecture, and handicrafts from the dawn of art to the Renaissance. Illustrated. 50B. Appreciation and History of Art (3) I, II The period from the Renaissance through the modern school treated in the same manner as in 50A. 52A. Japanese Art (3) II A study of the arts of Japan. 52B. Chinese Art (3) I A study of the arts of China. 61. Design in Crafts (3) I, II Six hours. Prerequisite: Art 2A. Visual and structural form in crafts. 70. Beginning Jewelry Design (3) I, II Six hours. Prerequisites: Art 2B and 61. Design and fashioning of jewelry. 80A-80B. Weaving (3-3) I, II Six hours. Prerequisite: Art 61. Art 80A is prerequisite to 80B. Structure and design of woven fabrics.

90-5 2 555

Art / 119

120 / Art 94A-94B. Fashion Imagery (3-3) I, II 113A-113B. Advanced Furniture Design (3-3) I, II Six hours Prerequisite: Art 2A. Art 94A is prerequisite to 94B. Total credit in Art 13, 113A, 113B, 113C, and 113D limited to nine units. Six hours. Design of original contemporary costumes and the drawing of the fashion image. Prerequisite: Art 13. Recommended: Industrial Arts 5. Art 113A is prerequisite to 113B. 95A. The Contemporary House (3) I, II Principles of design through the making of furniture. 113C-113D. Advanced Furniture Design (3-3) I, II Total credit in Art 13, 113A, 113B, 113C, and 113D limited to nine units. Six hours. Six hours. Prerequisites: Art 1A, 2A, and 8. Elementary problems in neighborhood planning, house design, interior design and Prerequisite: Art 113B. Art 113C is prerequisite to 113D. landscaping. Advanced individual design; exploration of materials, process and function. 95B. Interior Design (3) I, II 114A. Graphic Communication (3) I, II Six hours. Six hours. Prerequisite: Art 33A. Prerequisite: Art 14B. Elementary functional and aesthetic studies in interior space and form. Relationships of Investigation of design concepts relating to advertising. light, color, texture, shape and volume. 114B-114C. Advanced Graphic Communication (3-3) I, II 99. Experimental Topics (2-4) Six hours. Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units Prerequisites: Art 114A. Art 114B is prerequisite to 114C. The relation of art structure and the aspects of visual communication. applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements. 114D. Problems in Graphic Communication (3) I, II **Upper Division Courses** Six hours. 100A. Advanced Drawing (3) I. II Prerequisite: Art 114C. Refinement of personally developed design concepts for visual communication with emphasis on individually directed solutions. The development of a portfolio of professional Six hours. Prerequisites: Art 15A and 16A. Drawing with color wherein an objective attitude is taken toward the qualitative aspect quality. Maximum of six units selected from 114 series applicable on a master's degree. of visual subject matter. Objects are studied and represented as visual stimuli rather than 115A-115B-115C-115D. Life Drawing and Painting (3-3-3-3) I, II as stereotypes. Six hours. 100B. Advanced Drawing (3) I, II Prerequisites: Art 15A and 16A. Art 115A is prerequisite to 115B; 115B to 115C; 115C to Six hours 115D. Prerequisite: Art 100A. Drawing and painting from nude and costumed models. Drawing with color wherein objects are represented in such a manner as to include 116A-116B. Advanced Painting (3-3) I. II kinaesthetic responses. Aesthetic organization of materials is stressed. Six hours. 105. Classroom Environmental Design (3) I, II Prerequisite: Art 16A or 16B. Art 116A is prerequisite to 116B. Six hours. Pictorial composition. Development of an understanding for aesthetic environmental concepts as related to the 116C-116D. Advanced painting (3-3) I, II classroom. Six hours. 106A-106B. Printmaking (3-3) I, II Prerequisite: Art 116B. Art 116C is prerequisite to 116D. Six hours The influence of art media and picture plane on aesthetic organization in representational Prerequisite: Art 15A; 106A is prerequisite to 106B. Woodcut, wood engraving, gesso cut painting and linoleum. 117A-117B. Advanced Sculpture (3-3) I. II 107. Contemporary Environmental Graphics (3) I. II Six hours. Six hours. Prerequisites: Art 2B and 17A or 17B. Art 117A is prerequisite to 117B. Prerequisites: Arts 2A. Art 2B and 14A are recommended. Creative design in diverse materials. Maximum of six units selected from 117 series Study of creative design for contemporary architectural and motivational graphics. applicable on a master's degree. 108. The House and Its Environment (3) I, II 117C. Advanced Sculpture (3) I, II Architecture, interior design, landscape and city planning for forming man's physical and aesthetic environment, its simplicities and complexities. Not open to students with credit in Six hours. Prerequisite: Art 117B. Art 8 The influence of art media and tools on aesthetic organization in sculpture in relief and 110. Advanced Crafts in the Elementary Schools (3) I, II in the round. Six hours. 118A-118B. Advanced Watercolor Painting (3-3) I, II Prerequisite: Art 2A. An advanced design-craft course in which the activities, materials and tools employed are Six hours. Prerequisite: Art 18B. Art 118A is prerequisite to 118B. appropriate for the elementary grades. Not open to students with credit in Art 61. Composition of still life and landscape in watercolor. 111A-111B. Industrial Design (3-3) I, II 119A. Ceramics (3) I. II Six hours. Six hours. Prerequisites: Art 1A and 2B. Art 111A is prerequisite to 111B. Design of objects for manufacture with reference to their use, materials, and in accordance Prerequisite: Art 19B. with factory practices and machine techniques. Practice in the techniques of presentation, Basic methods of forming, decorating, glazing and firing pottery forms with emphasis on the use of the potter's wheel. working drawings, rendering and perspective and scale models. 119B. Ceramics (3) I, II 112A-112B. Design and Composition (3-3) I. II Six hours. Six hours. Prerequisite: Art 119A. Prerequisites: Art 1A, 1B, 2B, and 16A. Art 112A is prerequisite to 112B. Continuation of Art 119A. Further development of knowledge, skills and philosophy of Structure in picture making. The controlled use of line, value, color, and texture to organize the effect of depth, movement, volume, etc., in the recognizable image. Oil ceramics through individual creative projects. 119C. Ceramics (3) I, II technique. Six hours. Prerequisite: Art 119B. Continuation of Art 119B with advanced creative projects.

122 / Art

Art / 123 151A. Pre-Columbian Art of Middle and South America (3) Irregular Prerequisites: Art 50A and 50B. South and Middle American art and architecture from earliest time to the arrival of Spaniards. 151B. Colonial Art of Latin America (3) Irregular Prerequisites: Art 50A and 50B. The art and architecture of Latin America from the colonial period to the present. Field trips included. 152A. The Art of India and Southeast Asia (3) Irregular Prerequisites: Art 50A and 50B. History of the art, architecture, and sculpture of India and Southeast Asia. 152B. The Art of Persia and the Islamic World (3) Irregular Prerequisites: Art 50A and 50B. History of the art, architecture, sculpture and minor arts of Persia and the Islamic World. 153. Ancient Art (3) I Prerequisites: Art 50A and 50B. Development of painting, sculpture, architecture and crafts from prehistoric times to the fall of Rome. 154A. Medieval Art (3) II Prerequisites: Art 50A and 50B. Development of painting, sculpture and architecture from the time of Constantine through the Gothic period. (Formerly numbered Art 154.) 154B. Coptic and Byzantine Art (3) Irregular Prerequisites: Art 50A and 50B. The art of the Eastern Church from the reign of Justinian to the Russian Revolution. 155A. Renaissance Art in Italy (3) Irregular Prerequisites: Art 50A and 50B. Architecture, painting and sculpture of the Renaissance period in Italy. 155B. Northern Renaissance Art (3) Irregular Prerequisites: Art 50A and 50B. Architecture, sculpture, and painting north of the Alps during the Renaissance period. 155C. Baroque and Rococo Art (3) Irregular Prerequisites: Art 50A and 50B. Architecture, sculpture, and painting of the Baroque and Rococo periods. (Formerly numbered Art 155B. 156A. History of Modern Art (3) I, II Prerequisites: Art 50A and 50B. Development of painting, sculpture, and architecture from the French Revolution to the 20th century. Field trips included. 156B. Contemporary Art (3) Irregular Prerequisite: Art 156A. Current movements in sculpture, painting, graphics, and architecture. 157. The History of American Art (3) Irregular Prerequisites: Art 50A and 50B. Development of painting, sculpture, and architecture from Colonial times to the present. 158. Art of Primitive Peoples (3) Irregular Prerequisites: Art 50A and 50B. Arts of primitive peoples of Africa, South Seas, and the North American Indians and their influence upon the art of the twentieth century. 160. The History of Architecture (3) Irregular Prerequisites: Art 50A and 50B, or Art 5. Architecture from primitive times to the present. 161A-161B-161C-161D. Design in Enamels (3-3-3-3) I, II Six hours. Prerequisite: Art 61; Art 161A is prerequisite to 161B, 161B to 161C, 161C to 161D. Design and production of vitreous enamels. Maximum credit six units applicable on a master's degree. 164. History of Costume (3) Irregular Prerequisites: Art 50A and 50B. The historic origins of costume traced through aesthetic, social and political influences dominant during each period. 166. Honors Course (1-3) I, II Refer to Honors Program.

108-5 3 5

#### 124 / Art

170A. Beginning Jewelry Design (3) I, II Six hours. Prerequisites: Art 2B and 61. Design and fashioning of jewelry. Not open to students with credit in Art 70. 170B. Jewelry and Metalwork (3) I, II Six hours Prerequisites: Art 70 or 170A. Design and production of jewelry and hollow ware. 170C-170D. Jewelry and Metalwork (3-3) I, II Six hours. Prerequisite: Art 170C is prerequisite to 170D. Advanced individual problems in jewelry. 175. Problems in Art for Teachers (3) I, II Six hours. Art principles and materials as related to teaching situations. 180A-180B. Advanced Weaving (3-3) I, II Six hours. Total credit in Art 80A, 80B, 180A, 180B, 180C, and 180D limited to nine units. Prerequisites: Art 80A and 80B. Art 180A is prerequisite to 180B. Advanced problems in fabric design and weave construction including tapestry and rug weaving techniques. 180C-180D. Advanced Weaving (3-3) I, II Six hours. Total credit in Art 80A, 80B, 180A, 180B, 180C, and 180D limited to nine units. Prerequisite: Art 180B. Art 180C is prerequisite to 180D. Advanced individual problems in weaving. 181. Non Woven Textile Construction (3) I, II Six hours. Prerequisites: Art 2B and 61. Textile structures with an emphasis on non loom techniques. 182. Textile Design (3) Six hours. Prerequisites: Art 2B and 61. Application of design for the textile surface, using a broad variety of media and processes appropriate for both the individual designer and commercial reproduction. Media include stencil, block, silkscreen, batik, and tie-dye. Maximum credit six units. 186. Synergetic Environments (3) Two lectures and four hours of laboratory. Prerequisite: Art 195B. Synthesis of materials, space, sound and light using exploratory methods in full scale projects. 187. Environmental Prototypes (3) Two lectures and four hours of laboratory. Prerequisite: Art 195B. Research and development of creative architectural concepts with emphasis in space enclosure systems and cybernetics. 188. Environmental Theory (3) Prerequisite: Art 8 or 108. Survey of alternative solutions to the problem of design of the physical environment. 190. Principles and Elements of Visual Aesthetic Organization (3) Three hours. Prerequisites: Senior standing and Art 5. Visual aesthetic materials and the psychological principles involved in aesthetic organization 191A. Gallery Exhibition Design (3) I, II Six hours. Prerequisite: Fifteen units of art. Fundamental art elements and principles applied to the theories and techniques of gallery exhibition design. 191B. Gallery Exhibition Design (3) I, II Six hours. Prerequisite: Art 191A. Advanced problems in the theories and techniques of gallery exhibition design.

193A-193B. Drawing and Illustration for Graphic Communication (3-3) I Six hours. Prerequisites: Art 1B, 2A, 115A. Art 193A is prerequisite to 193B. The disciplines of realistic descriptive illustration including problems in imaginative, aesthetically refined painterly illustration. Media to include gouache, watercolor, scratch board, mixed media, and pen and ink. 194A-194B. Advanced Fashion Imagery (3-3) I, II Six hours. Prerequisite: Art 94B is recommended. Art 194A is prerequisite to 194B. Emphasis on developing individual drawing concepts and creative techniques in fashion illustration. Creation of fashion drawings and fashion advertising layouts. Development of a professional portfolio. 195A. Residential Interior Design (3) I. II Six hours. Prerequisites: Art 95A and 95B Survey, analysis and conceptual design methods of residential interiors stressing materials, equipment, components and structural detailing. 195B. Environmental Design (3) I. II Six hours. Prerequisite: Art 195A. Survey, analysis and design synthesis of problems of more complexity, through interiors, to landscape, to architectural planning, and finally concern for city design. 195C. Professional Methods of Interior Design (3) I, II Six hours. Prerequisite: Art 195A. Techniques and analyses of specification writing, estimating, contractual agreements, budget studies and supervision of professional interior design projects. 195D. Contract Interior Design (3) I, II Six hours. Prerequisite: Art 195C. Projects in non-residential architectural interiors involving space planning, systems analysis, specification writing, equipment and materials appropriate to commercial functions. 195E. Interior Design Practicum (3) Nine hours of laboratory. Prerequisite: Credit or concurrent enrollment in Art 195C. Field experience with local professional interior designers in client relationships, business procedures, supervision of subcontracted work and installation, and execution of contracts. 196A-196B. Visual Communication Media (3-3) I, II Six hours. Prerequisite: Art 114A. Art 196A is prerequisite to 196B. Experimental, creative and practical exploration of contemporary communication as related to magazine and editorial layout. Production of a student designed limited edition. 197. Advanced Graphic Imagery (3) I, II Six hours. Prerequisite: Art 7. Investigation of experimental photographic and technical reproductive media. Maximum credit six units. No more than three units applicable on a master's degree. 198A. Senior Project (3) I, II Prerequisite: Consent of the instructor. Investigation in art. Formal presentation of project. (Formerly numbered Art 198.) 198B. Senior Investigation and Report in Art History (3) I. II Prerequisites: Six units in upper division art, and consent of the instructor. Individual research into areas of art history not covered by regular courses. 199. Special Study (1-3) I, II Individual study. Six units maximum credit. Prerequisite: Consent of instructor. **Graduate Courses** 206A-206B. Printmaking (1-3) Advanced creative work in selected printmaking media based upon the analysis of the history and philosophies of printmaking from its inception through contemporary concepts. Maximum credit six units applicable on a master's degree.

Art / 125

126 / Art

#### 214. Graphic Communication (1-3)

Prerequisite: Art 114D

Advanced individual study in graphic design. Maximum credit six units applicable on a master's degree.

216A-216B. Painting (1-3) Prerequisites: Art 112A, 112B, 116A, and 116B

Aesthetic organization of selected visual subject matter in the medium of colors in oils. Maximum credit six units applicable on a master's degree.

217A-217B. Sculpture (1-3)

Prerequisites: Art 117A, 117B, 117C, 117D.

Aesthetic organization of selected subject matter in the media of sculpture. Maximum credit six units applicable on a master's degree.

219A-219B. Crafts (1-3)

Prerequisites: Six units completed in upper division courses in sculpture or ceramics or printmaking or a combination of these courses.

Advanced creative work in selected craft media. Maximum credit six units applicable on a master's degree.

221. Advanced Clay and Glaze Technology in Ceramic Design (3)

Six hours. Prerequisite: Art 119B.

Experimentation with the use of ceramic material and techniques as an integral part of the design process. Maximum credit six units applicable on a master's degree.

222. Art Education Colloquium (3)

Prerequisite: Fifteen units of upper division art.

Historic and current art education philosophies.

270. Seminar in Jewelry and Metalwork (3)

Prerequisite: Art 170A.

Problems in the design and execution of works in precious metals. Projects will be determined by the individual student in conference with the instructor. Maximum credit six units applicable on a master's degree.

280. Seminar in Textile Design (3)

Prerequisite: Art 180A.

Problems in textile design and technology. Projects will be determined by the individual student in consultation with the instructor. Maximum credit six units applicable on a master's degree.

290. Bibliography and Research Methods (2)

Introduction to research methods and materials, compiling of a specialized bibliography, preparatory to writing a master's thesis.

291. Seminar in Creative Art (3)

Independent research in specified areas including the presentation of a paper with its oral defense. Each course may be taken to a maximum of six units. No more than six units of 291 are

applicable to a master's degree. A. Seminar in Painting B. Seminar in Sculpture

C. Seminar in Printmaking

D. Seminar in Ceramics

E. Seminar in Crafts

Seminar in Graphic Communication

G. Seminar in Environmental Design

292A. Seminar in Ancient Art (3)

Prerequisites: Art 50A and 50B.

Studies in problems of the development of art styles or important artists within broad limits of ancient art.

292B. Seminar in Medieval Art (3)

Prerequisites: Art 50A and 50B.

Studies in problems of the development of art styles or important artists within broad limits of medieval art.

292C. Seminar in Renaissance Art (3)

Prerequisites: Art 50A and 50B.

Studies in problems of the development of art styles or important artists within broad limits of renaissance art.

#### Astronomy / 127

292D. Seminar in Baroque and Rococo Art (3)

Prerequisites: Art 50A and 50B.

Studies in problems of the development of art styles or important artists within broad limits of baroque and rococo art.

292E. Seminar in Modern Art (3)

Prerequisites: Art 50A, 50B and 156A.

Studies in problems of the development of art styles of important artists within broad limits of modern art.

292F. Seminar in Primitive Art (3)

Prerequisite: Art 158.

Studies in problems of the development of art styles or important artists within broad limits of primitive art.

294A-294B. Seminar in the Principles of Design in the Space Arts (3-3)

Prerequisite: A semester course in art appreciation.

An intensive study of the activity of creative expression and aesthetic appreciation in the area of visual experience. The aesthetic analysis of original works of art.

295. Creative Environmental Design (1-3)

Prerequisite: Six units of upper division work in interior design, architecture or city planning.

Creative work in interior design, architecture and civic design. Maximum credit six units applicable on a master's degree.

298. Special Study (1-3)

Individual study. Six units maximum credit.

Prerequisite: Consent of the staff; to be arranged with department chairman and the instructor.

299. Thesis or Project (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

#### Astronomy In the College of Sciences

Faculty

Emeritus: Huffer, Smith, C. Professors: Daub, Nelson, B. (Chairman), Schopp Associate Professor: Young Assistant Professors: Angione, Talbert

#### Offered by the Department

Master of Science degree in astronomy. Major in astronomy with the A.B. degree in liberal arts and sciences. Major in astronomy with the A.B. degree in applied arts and sciences. Minor in astronomy.

#### Astronomy Major

#### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete graduation requirements listed on page 57 of this catalog.

Preparation for the major. Astronomy 1, 9; and Physics 4A-4B-4C (16 units).

Major. A minimum of 24 upper division units to include Astronomy 104A-104B, 112A-112B; and Physics 100A-100B, 102A-102B. Recommended: Astronomy 170; Physics 103, 106, 110, 175, 190.

Minor in Mathematics. Students majoring in astronomy must complete a minor in mathematics to include Mathematics 50, 51, 52 and either 118A-118B, or 119 and three additional units of upper division mathematics. Recommended: Mathematics 135A, 135B, 170; Engineering 188.

127-5 3 100

#### 128 / Astronomy

#### Astronomy Major

#### With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements on page 57 of this catalog.

Preparation for the major. Astronomy 1, 9; Physics 4A-4B-4C (16 units).

Major. A minimum of 24 upper division units to include Astronomy 104A-104B, 112A-112B, 198A, 198B; and Physics 100A-100B, 102A. Recommended: Astronomy 170; Physics 102B, 103, 106, 110, 175, 190.

Minor in Mathematics. Students majoring in astronomy must complete a minor in mathematics, to include Mathematics 50, 51, 52, and either 118A-118B, or 119 and three additional units of upper division mathematics. Recommended: Mathematics 7, 135A, 135B, Engineering 188.

#### Astronomy Minor

The minor in astronomy consists of a minimum of 15 units in astronomy, nine of which must be upper division.

#### Lower Division Courses

1. Descriptive Astronomy (3) I, II

Methods of astronomy and of the physical nature of members of the solar system, our galaxy and other galaxies. Telescopes will be used for occasional observations. Not open to students with credit in Astronomy 50.

9. Practice in Observing (1) I, II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Astronomy 1 or 50.

A course designed to supplement Astronomy 1. The course will include constellation study, use of astronomical co-ordinates, and descriptive observations of celestial objects with telescope.

12. Elementary Navigation (3) I Three hours of laboratory.

Recommended prerequisites: Astronomy 1 and 9.

Compass corrections, time, line of position, use of celestial co-ordinates, tables such as H.O. 214 for the solution of astronomical triangles, etc.

30A-30B. Survey of Literature in Astronomy (1-1) I, II

Prerequisite: Astronomy 1.

Readings in current developments in astronomy.

50. Physics of the Solar System (3) I

Prerequisites: Credit or concurrent registration in Mathematics 50 and Physics 4A.

A mathematical treatment of the structure and composition of the Solar System. The physical nature of the sun, planets, satellites, comets, and meteors. Not open to students with credit in Astronomy 1.

51. Physics of the Stellar System (3) II Prerequisites: Mathematics 50 and Physics 4A.

Application of mathematical and physical principles to stellar astronomy and the universe. 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

103. Astronomical Optics (3) II

Two lectures and three hours of laboratory

Prerequisites: Astronomy 50, or Physics 4C, or Physics 2B and 3B.

Theory and applications of optical instruments used in astronomy. In the laboratory the students are required to complete an approved project in optical instrumentation.

104A-104B. Advanced Astronomy (3-3)

Prerequisites: Astronomy 1 and 9 and credit or concurrent registration in both Mathematics 51 and Physics 4C.

Problems in practical astronomy, such as atmospheric refraction, proper motion, photographic and photoelectric photometry, solar system astrophysics, and stellar dynamics. 105. Historic Development of Astronomy (3) I

A study of the more important problems and astronomical concepts in the light of their historical development. Particular attention is given to the biography and contributions of the more important astronomers, such as Galileo, Kepler, Newton, Herschel, Bessel, etc. 112A-112B. Astrophysics (3-3)

Prerequisites: Physics 4C and Astronomy 1. Astronomy 112A is prerequisite to 112B.

An application of modern physics to a study of the sun and the stellar system. A large part of this course will deal with the application of spectroscopy to the study of celestial objects.

150. Introduction to Variable Stars and Peculiar Stars (3) II

Prerequisite: Astronomy 104A or 112A.

A study of variable stars: classification, periods, relation to other stars, methods of observation, and results; also a study of stars with unusual features in their spectra.

166. Honors Course (1-3) I, II

Refer to Honors Program.

170. Astrophysical Spectroscopy (3)

Prerequisite: Mathematics 52 and credit or concurrent registration in Astronomy 112A. Theory of atomic spectra and atomic structure leading to interpretation of astronomical spectra. Optics of spectrograph design; line identification, spectral classification, radial velocity measurement, and line profile analysis.

180. Celestial Mechanics (3) I, II

Prerequisite: Mathematics 52.

The problem of two bodies based on the solutions of differential equations using Newtonian mechanics. Potential theory; geometrical interpretation of perturbations; calculation of planetary positions.

196. Advanced Topics in Astronomy (2 or 3) I, II

Prerequisite: Consent of instructor. Selected topics in theoretical astronomy or astrophysics. May be repeated with new

material for a total of six units, upon approval of instructor.

198A. Senior Project (1) I

One lecture-discussion period.

Prerequisite: An acceptable master plan for graduation within one year.

Consists of the selection and design of individual projects; oral and written progress reports.

198B. Senior Project (2) II

Six hours of laboratory.

Prerequisite: Astronomy 198A.

Laboratory work, progress reports, oral and written reports.

199. Special Study (1-3) I, II Individual study. Six units maximum credit.

Prerequisites: Three units in astronomy and consent of instructor.

#### **Graduate Courses**

200. Seminar (2 or 3)

Prerequisite: Consent of instructor. An intensive study in advanced astronomy, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

210. Binary Stars (3)

Prerequisite: Astronomy 112B.

An intensive study of visual, spectroscopic, and eclipsing binaries, including the determination of orbits.

220. Galactic Structure (3)

Prerequisite: Astronomy 112B.

Types, movements and characteristics of stars in the galaxy and a similar study of extragalactic structure.

5-84215

#### 130 / Athletics

225. Extragalactic Structure (3)

Prerequisite: Astronomy 112B.

The individual and collective properties of normal and peculiar galaxies. Topics include classification, spectra, masses, luminosity distributions, distance indicators, clustering, and redshifts.

230. Stellar Interiors (3)

Prerequisite: Astronomy 112B.

Structure of the interior of stars including the details of the reactions by which energy is obtained and the evolution of stars.

240. Interstellar Matter (3)

Prerequisites: Mathematics 119, Astronomy 112B.

Interstellar absorption and polarization, theory of interstellar grains, physics of a low density gas in a dilute radiation field, nebulae, interstellar absorption lines, dynamics of the interstellar medium, and radio observations of the interstellar medium.

250. Stellar Atmospheres (3)

Prerequisite: Astronomy 112A.

Emission and absorption of radiation, continuous spectra, spectral lines, modal stellar atmosphere calculations, and non-L.T.E. problems.

280. Orbit Theory and Computation (3)

Prerequisite: Astronomy 180.

A study of the derivation of the methods of determining orbits of comets, asteroids, and planets. The computation of an orbit will be required.

297. Research (1-3)

Prerequisite: Classified graduate standing.

Research in one of the fields of astronomy. Maximum credit six units applicable on a master's degree.

298. Special Study (1-3) Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

## Athletics

#### In the College of Professional Studies

Faculty

Professor: Karr (Chairman) Associate Professors: Davis R., Hill Assistant Professors: Dietz, J., Dowhower, Gilbert, C., Hanifan, Templeton, Zampese

Instructor: Vezie

Offered by the Department

Courses in Athletics.

Major or minor work is not offered.

#### Lower Division Courses

99. Experimental Topics (2-4) I, II

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

166. Honors Course (1-3) I, II Refer to honors program.

180. Intercollegiate Sport Practicum (2-3)

Laboratory experience in field of interest, with emphasis on skill, rules, and organizational procedures for varsity team members. A sport may be taken only once for credit in Athletics 180 and/or 181. (Formerly numbered and entitled: Physical Education 180, Theory and Practice of Intercollegiate Sports.) Subject fields of 180 are as follows:

Offered in the Fall A Basketball (3) B Cross Country (2) C Football (3)

Offered in the Spring H Baseball (3) Golf (2) J Rowing (2)

D Gymnastics (3) E Swimming (2) F Water Polo (2) G Wrestling (3)

N Soccer (2)

181. Competitive Sport Practicum (2-3)

Laboratory experience in field of interest, with emphasis on skill, rules, and organizational procedures for athletic coaching minors. A sport may be taken only once for credit in Athletics 180 and/or 181.

Subject fields of 181 are as follows:

Offered in the Fall A Basketball (3) B Cross Country (2) C Football (3) D Gymnastics (3) E Swimming (2) F Water Polo (2) G Wrestling (3) N Soccer (2) 199. Special Study (1-3) I, II Individual study. Six units maximum credit.

Prerequisite: Consent of instructor.

I Golf (2) J Rowing (2) K Tennis (2) L Track (3) M Volleyball (2)

H Baseball (3)

K Tennis (2)

M Volleyball (2)

Offered in the Spring

L Track (3)

Biology In the College of Sciences

#### Faculty

Professors: Baer, Brandt, Brookes, Collier, B., Cooper, Cox, G., Farris, Flittner, Ford, Hazen, Johnson, McBlair, Miller, Neel, Parsons, Ratty, Rinehart, Shepard, Sloan (Chairman), Taylor, K.

Associate Professors: Awbrey, Clark, M. E., Daugherty, Diehl, Ebert, Kleinbergs, Paolini, Sanders, Schapiro, Thwaites

Assistant Professors: Barnett, Coulombe, Davis, C., Futch, Hays, R., Hurlbert, Zedler, J., Zedler, P.

Offered by the Department

Doctor of Philosophy degree in genetics and in ecology.

Master of Arts degree in biology.

Master of Science degree in biology.

Major in biology with the A.B. degree in liberal arts and sciences.

Major in biology with the A.B. degree in applied arts and sciences.

Major in biology with the B.S. degree in applied arts and sciences.

Minor in biology.

Curricula which prepare for the fields of dentistry, conservation, fisheries, marine biology, medicine, veterinary medicine, and wildlife.

Teaching major in the biological sciences, with specialization in secondary teaching, requiring an undergraduate major in one of the biological sciences.

Teaching minor in biology, with specialization in both elementary and secondary teaching.

#### **Biology Major**

#### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. Students must choose French, German, or Russian to meet the foreign language requirement for graduation.

A minor is not required with this major.

Preparation for the major. Biology 1, 2, and 15; Chemistry 1A-1B and 11 or 12; Mathematics 21 and 22; Physics 1A-1B or 2A-2B and 3A-3B. (35 units.)

Major. A minimum of 24 upper division units to include Biology 101, 110, and 155 (to be taken in the junior year); an advanced course in the biological sciences for which Biology 101, 110 or 155 is prerequisite; Biology 190, 191 or 195; and electives from natural science selected with the approval of the adviser.

149-5 3 210

Biology / 131

Biology / 133

#### 132 / Biology

#### **Biology Major**

#### With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. In addition students must complete twelve units of a single foreign language (chosen from French 1, 2, and 3 or 8A-8B; or German 1, 2, and 3 or 8A–8B; or Russian 1, 2, and 3 or 8A–8B), or equivalent knowledge demonstrated by a test of reading knowledge administered by the foreign language department concerned in consultation with the Department of Biology.

A minor is not required with this major.

Preparation for the major. Biology 1, 2, and 15; Chemistry 1A-1B and 11 or 12; Mathematics 21 and 22; Physics 1A-1B or 2A-2B and 3A-3B or Physics 4A-4B-4C. (35-39) units.)

Major. A minimum of 24 upper division units to include Biology 101, 110, and 155 (to be taken in the junior year); an advanced course in the biological sciences for which Biology 101, 110 or 155 is prerequisite; Biology 190, 191 or 195; and electives from natural science selected with the approval of the adviser.

#### **Biology Major**

#### With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Biology 1, 2, and 15; Chemistry 1A-1B and 11 or 12; Mathematics 21 and 22; Physics 1A-1B or 2A-2B and 3A-3B or Physics 4A-4B-4C. (35-39) units.

Major. A minimum of 36 upper division units to include Biology 101, 110, and 155 (to be taken in the junior year); an advanced course in the biological sciences for which Biology 101, 110 or 155 is prerequisite; Biology 190, 191 or 195; and electives from natural science selected with the approval of the adviser.

#### **Biology** Minor

The minor in biology consists of a minimum of 16 units in biological sciences to include Biology 1 and 2, and nine upper division units in biological sciences selected with approval of the biology adviser.

#### **Biological Sciences Major**

For the Standard Teaching Credential

#### Specialization in Secondary Teaching

The teaching major for secondary teaching requires an undergraduate major in one of the biological sciences: biology, botany, microbiology, or zoology. All elective courses in the major must have prior approval by one of the biological sciences advisers for teaching programs in the biological sciences.

Postgraduate year. A minimum of six units from courses acceptable for graduate credit on a master's degree program in the biological sciences or the teaching minor.

#### **Biology Minor**

153-5 3 230

#### For the Standard Teaching Credential

#### Specialization in Elementary Teaching

The minor in biology for elementary teaching consists of Chemistry 1A-1B or 2A-2B plus at least 20 units in the biological sciences to include Biology 1 and 2. Electives in the biological sciences must be chosen in consultation with the departmental adviser for teaching programs.

#### Specialization in Secondary Teaching

The minor in biology for secondary teaching consists of Chemistry 1A-1B, and 11 or 12. plus at least 20 units in the biological sciences to include, in the lower division, Biology 1, 2, and 15; In the upper division, Biology 101, 110, and 155. Lower Division Courses

#### 1. General Biology (3) I, II

Prerequisites: None; concurrent registration in Biology 2 recommended.

A beginning course in biology stressing processes common to living organisms.

2. General Biology Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Biology 1.

A laboratory course in biology stressing processes common to living organisms.

4. Natural History of Plants and Animals (3) I, II

Two lectures and three hours of laboratory.

Prerequisite: Biology 1. An introduction to plants and animals in relation to their environments and to one another, with emphasis on local forms and their habitats.

9. Human Physiology (5) I, II

Three lectures and six hours of laboratory.

Prerequisites: Zoology 8 or 60; Chemistry 2A and 2B.

Functions of the human body; emphasis on the circulatory, muscular, and nervous systems. Not open for credit to students with credit for Biology 140.

15. Introduction to Quantitative Biology (3) I, II

Two lectures and three hours of laboratory.

Prerequisites: Biology 1, 2, and Mathematics 21

Methods and experience in defining and solving quantitative problems in biology, including the design of experiments, and parametric and nonparametric statistical techniques.

25. Introduction to Heredity (3) I, II

Hereditary mechanisms and consideration of the social implications of recent and expected developments in the field of heredity.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

101. Cellular Physiology (4) I, II

Two lectures and six hours of laboratory. Prerequisites: Biology 1, 2, and 15; Chemistry 1A, 1B, and 11 or 12; Physics 2A, 2B, 3A, 3B or 4A-4B-4C.

Physiological processes at the cellular level.

109. Regional Field Studies in Biology (1-3)

One- to three-week periods during vacations and summer sessions.

Prerequisites: At least 12 units in the biological sciences, including Biology 1 and 2, and consent of intructor. Application for collecting permit must be made at least six weeks before class begins at Bureau of Marine Sciences (AS 111).

Extended field studies of the flora, fauna, and biotic communities of major natural regions of western North America. May be repeated with new content to a maximum of six units.

110. Ecology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Biology 1, 2, and 15; and Chemistry 1A and 1B.

Relationships between organisms and the environment; field study in local marine, fresh water, mountain, chaparral, and desert habitats.

111. Aquatic Biology (4) I, II

Two lectures and six hours of laboratory. Prerequisites: Biology 1, 2, 15 and 110; and Chemistry 1A and 1B. Biological, chemical and physical considerations of inland waters.

112. Fisheries Biology (3) II

Two lectures and three hours of laboratory.

Prerequisite: Biology 110.

Fisheries of commercial importance. The dynamics of exploited populations.

113. Biological Oceanography (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Biology 110, Zoology 50, Chemistry 1B, Physics 2. Application for collecting permit must be made at least six weeks before class begins at Bureau of Marine Sciences (AS 111).

Ecological concepts as applied to pelagic and benthic marine organisms and their environment. Field and laboratory experience in oceanographic techniques, particularly the coastal environment.

#### 134 / Biology

114. Advanced Ecology (3) I, II

Two lectures and three hours of laboratory.

Prerequisite: Biology 110.

The ecology of individuals, populations, or communities. May be repeated with new content. Maximum credit six units applicable on a master's degree.

115. Conservation of Wildlife (3) I, II

Prerequisite: Biology 1.

Plant and animal resources with emphasis on their conservation and intelligent use.

121. Systems Ecology (5) I, II

Four lectures and three hours of laboratory.

Prerequisites: Biology 110 and consent of instructor.

Provides a foundation in the theory and techniques necessary for a systems approach to ecology, including computer programming and topics in applied mathematics useful in systems analysis.

122. Environmental Measurement (3) I, II

Two lectures and three hours of laboratory.

Prerequisites: Biology 110 and consent of instructor.

The utilization of electronic equipment to record ecological data under field conditions, including field power supplies, effects of fluctuations in environmental conditions, types of sensors, amplifiers and data recorders, and the interfacing of components.

123. Simulation of Ecological Systems (4) I, II

Two lectures and six hours of laboratory

Prerequisites: Biology 121 and consent of instructor.

Properties of different types of models, Monte Carlo methods, the design of simulated experiments, ways of evaluating models, the use of simulation studies as a means of guiding research. The computer will be extensively used.

140. Principles of Human Physiology (3) I, II

Prerequisite: Biology 1 or Zoology 8

Principles of human physiology. Body maintenance and nerve and muscle physiology. Not open to students with credit in Biology 9. (Formerly numbered Biology 22.)

141. Human Physiology Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Biology 140.

Laboratory work in human physiology. Not open to students with credit in Biology 9. (Formerly numbered Biology 23.)

142A-142B. Comparative Animal Physiology (4-4) I, II

Two lectures and six hours of laboratory

Prerequisites: Biology 101 and consent of instructor. Application for collecting permit for 142A must be made at least six weeks before class begins at Bureau of Marine Sciences (AS 111)

Semester I: Feeding and digestion, blood and circulation, nutrition, respiration and metabolism, excretion and osmoregulation. Semester II: Receptor, effector, and integrative systems. In both semesters, consideration of function ranges from molecular to organismal levels. All major phyla are considered. Individual laboratory research. (Formerly numbered Biology 142.)

144. Comparative Endocrinology (3) I, II Prerequisites: Biology 101, Botany 130, Microbiology 105, or Zoology 140. Recommended: Chemistry 115A-115B or 116A-116B; Biology 142B.

Endocrine mechanisms at cellular, organismic, and population levels in plants and animals. 144L. Comparative Endocrinology Laboratory (2) II

Six hours of laboratory.

Prerequisite: credit or concurrent enrollment in Biology 144.

Standard and recent experiments with endocrine systems in vertebrate and invertebrate animals; analysis of mechanisms of hormone action; the role of pheromones in behavioral responses; the effects of auxins on plant growth.

148. Photophysiology (3) II

Prerequisite: Biology 101.

Bioluminescence and the physiological effects of visible and ultraviolet radiations on plants and animals.

148L. Photophysiology Laboratory (1) II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Biology 148.

The generation, measurement and control of visible and ultraviolet radiations, and the measurement and analysis of selected biological effects of these radiations.

150. Radiation Biology (3) I, II Prerequisites: Biology 1 or equivalent and Physics 2A-2B, 3A-3B. Recommended: Chemistry 1A-1B, Biology 101, and Physics 121. Principles underlying radiological reactions of ionizing radiations. Effects of ionizing radiations at the biochemical, cell, organ, and organism levels. 150L. Radiation Biology Laboratory (2) I, II Six hours of laboratory. Prerequisite: Credit or concurrent registration in Biology 150. The laboratory determination of the effects of ionizing radiation on biological systems. 151. Radioisotope Techniques in Biology (3) I, II One lecture and six hours of laboratory. Prerequisites: Biology 1, 2, and 15; Chemistry 1A and 1B; Physics 2A, 2B, 3A and 3B. Recommended: Chemistry 4 or 5, and Biology 101. The principles and application of radioisotopes in biology. Radionuclide measurement, safe handling, tracer and radioautography techniques. 155. Genetics (4) I, II Two lectures and six hours of laboratory. Prerequisites: Biology 1, 2, and 15. Principles of plant and animal genetics, with experiments and demonstrations illustrating the mechanisms of heredity. 156. Developmental Biology (4) I, II Two lectures and six hours of laboratory. Prerequisites: Biology 155 and Chemistry 11 or 12. Recommended: Biology 101. Analysis of development with emphasis on embryonic differentiation. 157. Cytogenetics (4) I Two lectures and six hours of laboratory. Prerequisites: Biology 155. The physical basis of heredity. Study of the chromosomes and chromosome behavior in relation to problems in heredity and evolution. 158. Human Genetics (4) I, II Two lectures and six hours of laboratory. Prerequisite: Biology 155. Genetics as related to human biology, with consideration of the applied fields of medical genetics, genetic counseling, and population studies. 159. Human Heredity (3) I, II Prerequisite: Biology Selected principles of human inheritance with emphasis on relationships to other fields of human studies. Not open to students with credit in Biology 155 or 158. 160. Experimental Evolution (3) 1 Two lectures and three hours of laboratory. Prerequisite: Biology 155. The theories of evolution and speciation and the methods of study of modern problems. 161. History of Biology (3) I, II Prerequisite: A college course in biology. Lectures and reports tracing biological scientific development, with emphasis on the

influence of personalities and trends of the times. Not more than three units in the history of biology may be counted for graduate credit.

162. Source Material in the History of Biology (3)

Prerequisite: Biology 161.

A study of original papers of significance to the history of biology. Not more than three units in the history of biology may be counted for graduate credit.

163. Microbial Genetics (4) I, II

Two lectures and six hours of laboratory.

Prerequisite: Biology 155.

The design, methods and execution of research in microbial genetics.

165. Biology of Natural Populations (3) I, II

Prerequisite: A college course in Biology.

The relation of modern concepts of genetics, ecology and physiology to natural populations with emphasis on the problems of human populations. Not open to majors in the biological sciences.

166. Honors Course (1-3) I, II Refer to Honors Program.

169-5 3 310

Biology / 137

#### 136 / Biology

167A-167B. Biology for Teachers (4-4)

Two lectures and six hours of laboratory.

Prerequisites: Biology 1 and 2. Advanced study of biological principles including classification, physiology, morphology, and evolution. Designed primarily for those electing a biology minor for elementary or secondary teaching curricula. Not open to students majoring in the biological sciences.

169. Population Genetics (3) II

Two lectures and three hours of laboratory.

Prerequisites: Biology 15 and 155, Mathematics 22 or 50.

Discontinuous and continuous variation in natural populations.

170. Contemporary Problems in Biology (1) S

A series of six weekly lectures on varied aspects of biology by scientists engaged in research. Reading and reports required of students enrolled for credit. These lectures are open to the public. May be repeated for a total of 3 units.

171. Mutagenesis (3)

Prerequisite: Biology 155.

Basic principles and applications of mutation induction, expression, and detection at all levels of biological organization. Emphasis on mutation induction by chemicals and ionizing radiations

172. Behavioral Genetics (3) I. II

Prerequisite: Biology 155.

The genetic involvement of single and multiple gene systems in animal behavior.

175. Statistical Methods in Biology (3) I Two lectures and three hours of laboratory.

Prerequisite: Biology 101, 110 or 155.

Application of statistical techniques to biological data. Not open to students with credit for another upper division course in statistics except with written approval of the chairman of the department offering the student's major to be filed with the Evaluations Office.

181. Advanced Cellular Physiology (3) I, II

Prerequisite: Biology 101.

Current topics in cellular physiology.

182. Immunochemistry (3) I, II Prerequisite: Biology 101 or Microbiology 103.

Structure and function of the immunoglobulins and the chemical and physical nature of the antigen-antibody reaction.

182L. Immunochemistry Laboratory (1) I, II

Prerequisite: Credit or concurrent enrollment in Biology 182.

The characterization of the immunoglobulins and the measurement of the antigen-antibody reaction.

190. Senior Investigation and Report in Physiology (2) I, II

Prerequisites: Biology 101, senior standing and consent of instructor.

Investigation and reports on current physiological literature.

191. Senior Investigation and Report in Ecology (2) I, II Prerequisites: Biology 110, senior standing and consent of instructor.

Investigation and reports on current ecological literature.

195. Senior Investigation and Report in Genetics (2) I. II

Prerequisites: Biology 155, senior standing and consent of instructor.

Investigation and reports on current genetic literature.

198. Methods of Investigation (2) I, II

One hour of discussion and three hours of laboratory

Prerequisites: Junior standing and a major in the Division of the Life Sciences.

Individual and original investigations in biology; class reports. Four units maximum credit

for Biology 198 or a combination of this course with Microbiology or Zoology 198. 199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisites: Fifteen units in biological sciences with grades of A or B and consent of instructor.

173-5 3 330

Prerequisites: Biology 101 and consent of instructor. Maximum credit four units applicable on a master's degree. 220. Seminar in Developmental Biology (2) Prerequisite: Biology 156. May be repeated with new content. Maximum credit four units applicable on a master's degree. 221. Developmental Genetics (3) Prerequisites: Biology 101 and Biology 156. Regulation of genetic information in developing systems. 222. Morphogenesis (3) Prerequisites: Biology 101 and Biology 156. Regulation of pattern formation in developing systems; cell migration, cell division, cell death, dependent differentiation. 230. Speciation (3) Prerequisites: Biology 110 and 155; or Biology 160.

graduate adviser.

200. Seminar (2 or 3)

Prerequisite: Consent of instructor.

210. Seminar in Cellular Physiology (2)

Maximum credit six units applicable on a master's degree.

Concepts and principles of the origin of species.

(Same course as Psychology 231)

240. Seminar in Terrestrial Ecology (2)

241. Seminar in Aquatic Ecology (2)

242. Population and Community Ecology (3)

Two lectures and three hours of laboratory.

Two lectures and three hours of laboratory.

applicable on a master's degree.

Prerequisite: Biology 110.

Prerequisite: Biology 110.

Prerequisite: Biology 110.

243. Physiological Ecology (3)

231. Seminar in Ethology and Comparative Psychology (3)

content. Maximum credit four units applicable on a master's degree.

dynamics of ecological systems at the population and community level.

Prerequisites: Biology 110 and consent of instructor. The comparative physiological characteristics of natural plant and animal populations in relation to their habitats and environments. 244. Physical Aspects of Ecology (3) Prerequisite: Biology 110.

Two lectures and three hours of laboratory.

which energy and matter are exchanged between organisms and the environment; the significance of the physical environment in ecological processes.

245. Aquatic Ecology (3) Prerequisites: Biology 110 and consent of instructor. Application for collecting permit must be made at least six weeks before class begins at Bureau of Marine Sciences (AS 111).

Ecological concepts as applied to benthic and pelagic population and communities in fresh

water and marine environments. 246. Behavioral Ecology (3)

Two lectures and three hours of laboratory.

Prerequisites: Biology 110 and consent of instructor. Recommended: Zoology 170 or Psychology 141

Behavioral mechanisms relating animals to their physical and biotic environment.

Two lectures and three hours of laboratory.

Analysis and measurement of physical factors of the environment and of the processes by

**Graduate Courses** 

An intensive study in advanced biology, topic to be announced in the class schedule.

Prerequisite: Biology 110 or Psychology 114 or 117, or Zoology 170, and consent of the

Current problems in ethology and comparative animal behavior. Maximum credit six units

Ecological concepts as applied to the terrestrial environment. May be repeated with new

Ecological concepts as applied to the fresh water and marine environment. May be

Formulation, analysis, and experimental testing of the theories of the structure and

repeated with new content. Maximum credit four units applicable on a master's degree.

#### 138 / Botany

250. Biogeography (3) Prerequisite: Biology 110 or 160. Concepts and principles of the distributional history of plant and animal groups, and the origins and dispersal of modern faunas and floras 260. Seminar in General Physiology (2) Prerequisite: Biology 101 or Botany 107. May be repeated with new content. Maximum credit four units applicable on a master's degree. 261. Seminar in Environmental Radiation (2) Prerequisites: Biology 150 and Biology 151. The sources, characteristics, distribution, measurement, and fate of radioactive contaminants in the biosphere and interactions with the biota. Maximum credit four units applicable on a master's degree. 262. Cytoplasmic Inheritance (3) Prerequisites: Biology 101, 155, and consent of instructor. Literature and techniques related to research in non-Mendelian genetics. 263. Seminar in Comparative Physiology (2) Prerequisites: Biology 142A or 142B and consent of instructor. Comparative aspects of function at the molecular through organismal levels. Maximum credit four units applicable on a master's degree. 264. Methods in Physiology (2) Six hours of laboratory. Prerequisite: Biology 101. Current methods employed on physiological measurements. Maximum credit four units applicable on a master's degree. 265. Molecular Biophysics (3) Prerequisites: Biology 101, Mathematics 21 and 22. The description and analysis of biological processes and systems in terms of the properties of molecules and of basic principles. 270. Seminar in Genetics (2) Prerequisite: Biology 155. Maximum credit four units applicable on a master's degree. 276. Physiological Genetics (3) Prerequisites: Biology 155 or 158; Chemistry 12. Recommended: Chemistry 115A-115B. Biochemical aspects of genetics of microbial and human systems. 290. Bibliography (1) Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis. 291. Investigation and Report (3) Analysis and research techniques in biology. 297. Research (1-3) Research in one of the fields of biology. Maximum credit six units applicable on a master's degree. 298. Special Study (1-3) Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit. 299. Thesis or Project (3) Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

#### Botany In the College of Sciences

Faculty

**Emeritus: Harvey** Professors: Gallup, Wedberg Associate Professors: Alexander (Chairman), Preston, Rayle Assistant Professors: Carmichael, Johnson

#### Offered by the Department

Master of Arts degree in biology with an emphasis in botany. Major in botany with the A.B. degree in liberal arts and sciences.

182-5 3 375

Major in botany with the B.S. degree in applied arts and sciences. Minor in botany. Teaching major in the biological sciences, with specialization in secondary teaching, requiring an undergraduate major in one of the biological sciences. **Botany Major** With the A.B. Degree in Liberal Arts and Sciences All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. It is recommended that students choose French, German, or Russian to meet the foreign language requirement for graduation. A minor is not required with this major.

Preparation for the major. Biology 1, 2, and 15; Chemistry 1A-1B, and 11 or 12; Mathematics 21 or 40; and Physics 1A-1B or 2A-2B and 3A-3B. (32 units.)

Major. A minimum of 24 upper division units to include Biology 101, 110, and 155; Botany 100 or 101 or 102 or 103, and 190A–190B. Botany 114, 130, and 140 and Microbiology 101 are recommended.

#### **Botany Major**

#### With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Biology 1, 2, and 15; Chemistry 1A-1B, and 11 or 12; Mathematics 21 or 40; and Physics 1A-1B or 2A-2B and 3A-3B. (32 units.) Recommended: German or French or Spanish; Geology 1A-1B or 2 and 3.

Major. A minimum of 36 upper division units in the biological sciences to include Biology 101, 110, and 155; Botany 100 or 101 or 102 or 103, 114, and 190A-190B; Microbiology 101; and nine units of electives. Botany 130 and 140 are recommended as electives.

#### **Botany Minor**

The minor in botany consists of a minimum of 15 units in botany, six units of which must be in upper division courses.

#### **Biological Sciences Major**

For the Standard Teaching Credential

#### Specialization in Secondary Teaching

The teaching major for secondary teaching requires an undergraduate major in one of the biological sciences: biology, botany, microbiology, or zoology. All elective courses in the major must have prior approval by the departmental adviser for biological sciences teaching programs.

Postgraduate Year. A minimum of six units from courses acceptable for graduate credit on a master's degree program in the biological sciences. Courses must have approval of the adviser for biology teaching programs. (Six units of graduate course work toward completion of a minor may be substituted for this requirement.)

#### **Lower Division Courses**

1. Plants and Man (3) I, II Basic structure and function of plants with emphasis on the interrelationships of plants and man

#### 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

100. General Botany (4) I, II Two lectures and six hours of laboratory. Prerequisite: Biology 1 and 2. Primarily for majors in the biological sciences. Structure, physiology, reproduction and evolution of the major plant groups. 101. Phycology (4) I, II Two lectures and six hours of laboratory.

Prerequisites: Biology 1 and 2.

Morphology and phylogenetic relationships of the algae.

186-5 3 395

#### 140 / Botany

102. Mycology (4) I, II Two lectures and six hours of laboratory. Prerequisites: Biology 1 and 2. The structure, food relations, and classification of fungi. 103. Vascular Plants (4) I, II Two lectures and six hours of laboratory. Prerequisites: Biology 1 and 2. Structure, development and phylogenetic relationships of the Bryophytes and vascular plants. 112. Cultivated Trees and Shrubs (3) I One lecture and six hours of laboratory and field work. Prerequisites: Biology 1 and 2. Botany 114 is recommended. Identification of the common cultivated trees and shrubs of the San Diego region. Trips to local parks and private gardens. 114. Systematic Botany (4) II Two lectures and six hours of laboratory. Prerequisites: Biology 1 and 2; and either 110 or 155. Botany 103 recommended. Kinds, relationships, systematic arrangement, and geographical distribution of vascular plants; collection and identification. 118. Plant Study of the California Deserts (3) Formerly X-119. Offered in Extension only One lecture and six hours laboratory. Field trips arranged. Flowering plants of the desert region. Field Botany (4) S
 Two lectures and six hours of laboratory.
 Prerequisite: A course in college biological science or consent of instructor. Local native vegetation with emphasis on ecological units within floristic areas. Primarily for students not majoring in the College of Sciences. 126. Plant Pathology (4) I Two lectures and six hours of laboratory. Prerequisites: Biology 1 and 2. Botany 102 recommended. A practical course dealing with the principles of disease in plants, control measures, and quarantine procedures. Emphasis is placed on the determination and control measures of those pathogenic organisms which affect crops, trees and shrubs and nursery stock. 130. Plant Physiology (4) I, II Two lectures and six hours of laboratory Prerequisites: Biology 1, 2, 15, 101; and Chemistry 1A and 1B. The activities of plants, including food manufacture, absorption, conduction, transportation, respiration, growth and movement. 132. Plant Metabolism (3) Prerequisite: Botany 130 or Biology 101. An examination of metabolic pathways in plants and their regulation and control. 133. Experimental Plant Metabolism (2) Six hours of laboratory. Prerequisite: Credit or concurrent registration in Botany 132 and consent of instructor. Experimental approaches to the study of plant metabolism and development. 140. Plant Anatomy (4) II Two lectures and six hours of laboratory. Prerequisites: Biology 1 and 2. Botany 100 recommended. The arrangement of structural elements within plant organs, with emphasis on cell and tissue types. 162. Agricultural Botany (2) I Field trips to be arranged. Prerequisites: Biology I and 2. Botany 100 or Zoology 121 recommended. California crop plants, their general identification, cultural methods, and regional distribution. 166. Honors Course (1-3) I, II Refer to Honors Program. 172. Palynology (3) I One lecture and six hours of laboratory. Prerequisite: A course in college biological science. Principles and methods of pollen and spore diagnosis, with reference to use in taxonomy,

paleontology, anthropology, and medicine.

Botany / 141

190B. Senior Investigation and Report (2) II One discussion period and five additional hours to be arranged. Individual investigation, progress reports, oral and written final reports. 199. Special Study (1-3) I, II Individual study. Six units maximum credit. Prerequisites: Fifteen units in botany with grades of A or B and consent of instructor. **Graduate Courses** Prerequisite: Consent of instructor. An intensive study in advanced botany, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree. 201. Seminar in Phycology (2) Recent developments in phycology. Maximum credit four units applicable on a master's 202. Seminar in Mycology (2) Current problems in the taxonomy, morphology or physiology of the fungi. Maximum credit four units applicable on a master's degree. 203. Seminar in Vascular Plants (2) Problems in the evolution of the vascular plants. Maximum credit four units applicable on 214. Seminar in Systematic Botany (2) Current problems in the systematics of vascular plants. Maximum credit four units applicable on a master's degree. 226. Seminar in Plant Pathology (2) Advanced topics in the biology of plant pathogens. Maximum credit four units applicable 230. Seminar in Plant Physiology (2) Current investigations in one of the areas in plant physiology. Maximum credit four units applicable on a master's degree. 240. Seminar in Plant Anatomy (2) Study of recent advances in the anatomy of vascular plants. Maximum credit four units applicable on a master's degree. 272. Seminar in Palynology (2) Study of recent advances in palynology. Maximum credit four units applicable on a Research in one of the fields of botany. Maximum credit six units applicable on a master's degree. Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit. Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree. 193-5 3 430
#### **Business Administration / 143**

# **Business Administration** In The School of Business Administration

A member of the American Association of Collegiate **Schools of Business** 

#### Faculty

### Accounting Department

Emeritus: Brown, E. P., Wright

Professors: Brodshatzer, Dodds, Ferrel, Harned, Meier (Chairman), Odmark, Snudden Associate Professors: Bailey, Lightner, Williamson Assistant Professors: Meigs, Toole

#### **Finance Department**

Professors: Hippaka, Hungate (Dean), Nye, Reints (Chairman), Reznikoff, Wijnholds Associate Professors: Block, Fisher, H., Hutchins, Neuberger, Vandenberg Assistant Professors: Cowan, Fisher, R., Potter, Schmier, Shutt, Smith, C.

#### Information Systems Department

Emeritus: Gibson

Professors: Archer, Crawford (Associate Dean), Langenbach (Chairman) LeBarron, Pemberton, Straub Associate Professor: Spaulding

Assistant Professors: Chrysler, Harriff, Mahoney, Sponseller, Stenvall, Tilaro Instructor: Wright

Lecturers: Crownover, Richardson, Wight

#### Management Department

#### **Emeritus:** Torbert

Professors: Atchison, Belasco, Belcher, Galbraith, Hampton, Mitton, Peters, Pierson, Srbich Associate Professors: Ghorpade, Sherrard (Chairman) Assistant Professors: Balke, Boschken, Trippi

#### **Marketing Department**

Emeritus: De Julien

Professors: Barber (Asst. Dean for Graduate Studies), Darley (Chairman), Hale, Lindgren, Sharkey, Wotruba

Associate Professors: Akers, Haas, McFall

Assistant Professors: Brooks, Settle, Soldner, Vanier

# Offered by the School of Business Administration

Master of Science degree in business administration, Master of Business Administration. (Described in the Graduate Bulletin. Also refer to the section in this catalog on the Graduate Division.)

Majors with the B.S. degree in business administration in the following fields: accounting, finance, information systems, insurance, management, marketing, real estate. (Described in the section on the School of Business Administration.)

Minors in the following fields: accounting, business management, employee relations, finance, information systems, insurance, marketing, production and operations, management, real estate. (Described in the section on the School of Business Administration.)

Teaching major in business with specialization in secondary teaching. (Described in the section on the School of Business Administration.)

Teaching minor in business with specialization in secondary teaching. (Described in the section on the School of Business Administration.)

# Lower Division Courses

1A-1B (4) or 1A-1B (2-2). Accounting Fundamentals. I, II

Three hours of lecture and laboratory per two units of credit.

Prerequisite: Business Administration 1A is prerequisite to 1B.

Organizing, recording, and communicating economic information relating to the business entity 30A. Business Law (3) I, II

Introduction to legal institutions; nature and sources of law; the judicial system; legal concepts and cases involving contracts, agency, and sales.

Legal concepts and cases to be selected from business organization, negotiable instruments, property, security devices, creditors' rights and bankruptcy, trade regulation, and labor law. Students preparing for public accounting should take Business Administration 118 instead of 30B.

40. The Business Enterprise (3) I, II

Not open to students who are majors or minors in any department of the School of Business Administration.

The business enterprise and its function in society; interrelations of ownership, entrepreneurship, and administration; interactions within the firm and within and among industries.

71. Beginning Typewriting (2)

Four hours. Fundamentals of typewriting. Development of personal-use skills. Not open to students with credit for high school typewriting.

72. Advanced Typewriting (2)

Four hours.

Application of typewriting skills in solution of typical business problems. 73. Computational Machines Laboratory (1) I, II

Two hours of laboratory.

Laboratory course in figuring and calculating machine principles and operation. 74. Communicative Machines Laboratory (2) I, II

Four hours of laboratory.

Prerequisite: Business Administration 71.

Laboratory course in communication and duplicating machine principles and operation. 75A-75B. Shorthand (3-3)

Five hours of lecture and activity.

Prerequisite: Business Administration 72; 75A is prerequisite to 75B.

Gregg shorthand theory; dictation and transcription.

76. Advanced Shorthand (3)

Prerequisites: Business Administration 75A and 75B.

Development of speed in writing and transcription.

80. Written Communications in Business (3) I, II Prerequisite: English 5 or 6.

Principles of effective writing applied to business and industrial situations and to the organization and presentation of reports.

83. Information Processing and Computer Programming (3) I, II

Introduction to concepts of information processing and computer programming.

84. Systems Programming (3) I, II

Prerequisite: Business Administration 83.

The theory and techniques of data manipulation, utilizing a problem-oriented language. 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

#### 100. Intermediate Accounting (4) I, II

Prerequisite: Business Administration 1B.

Theories and principles underlying financial statements and determination of income of partnerships and corporations.

101. Specialized Accounting Problems (4) I, II

Prerequisite: Business Administration 100.

Problems involved in partnerships, consignments, consolidations, receiverships, foreign exchange, fund accounting, and other specialized areas.

102. Managerial Cost Accounting (4) I, II

Prerequisite: Business Administration 1B.

Management use of accounting data for planning and control; theories and practices of cost accounting, standard cost systems, distribution analysis, and capital budgeting.

103. Accounting for Managers (4) I, II

Prerequisite: Credit or concurrent registration in Business Administration 132.

Managerial accounting and financial accounting for non-accountants. Not open to students with credit in Business Administration 100 or 102.

#### 144 / Business Administration

106. Income Tax Accounting (4) I, II

Prerequisites: Business Administration 1A and 1B.

Theory and procedures in the preparation of federal and California income tax returns for individuals, partnerships and corporations.

107. Advanced Income Tax Accounting (2) I, II

Prerequisite: Business Administration 106.

Theories of taxation as related to personal holding companies, corporate distributions, liquidation and capital changes; fiduciary return preparation; brief survey of gift, estate and social security taxes.

108. Governmental Accounting (2) I, II

Prerequisite: Business Administration 100.

Principles of fund accounting useful in state and local governmental units, hospitals, colleges, and universities. Comparisons with commercial accounting emphasized. Includes study of budgetary accounting, appropriations, encumbrances, internal checks and auditing procedures

112. Auditing (4) I, II Prerequisites: Business Administration 101 and 102.

General principles and concepts of auditing; consideration of the design of accounting systems; duties, ethics, and responsibilities of the auditor; procedures for verification of financial statements; auditor's reports.

114. Accounting Systems (3) I, II Prerequisites: Business Administration 100 and 102.

General system theory and system terminology. New mathematical and statistical techniques for solving special system problems. Planning, controlling, and reporting procedures will be developed for accounting systems employing the use of digital computers.

115. Accounting Theory (3) I, II

Prerequisites: Business Administration 100 and 102 and one other upper division course in accounting.

Critique of contemporary accounting theory; recommendation for improvement of financial accounting; research in accounting theory.

118. Advanced Business Law (3) I, II

Prerequisites: Business Administration 30A and a major in accounting with at least 9 units in upper division accounting.

Legal concepts and cases involving business organization, negotiable instruments, property, security devices, creditors' rights, bankruptcy, insurance, wills, trusts, estates, and suretyship. Special emphasis on problem-solving techniques. Not open to students with credit in Business Administration 30B.

119. Advanced Accounting Problems (3) I, II

Prerequisite: Business Administration 112.

An intensive review of the accounting principles and procedures covered in the accounting theory and accounting practice sections of the uniform C.P.A. examination prepared by the American Institute of Certified Public Accountants.

#### 120. General Insurance (3) I, II

History of insurance; economic and social implications; principles of insurance contracts; theory of risk; law of large numbers. Survey of all major insurance fields and policies including life, fire, marine, inland marine, casualty and surety bonding.

121. Property and Casualty Insurance (3) II

Prerequisite: Business Administration 120.

All standard forms of insurance except life; includes automobile, liability, workmen's compensation and disability, fire, marine, and inland marine. Legal interpretation of contract coverages; underwriting problems, marketing of insurance, government supervision and control.

122. Social Insurance (3) II

Prerequisites: Economics 1A and 1B.

Public assistance. Old age, survivors, disability, and hospitalization insurance; workmen's compensation; unemployment compensation and disability insurance. Administration, coverage, financing, and benefit provisions. Strength and weakness of existing systems.

124. Life Insurance Principles and Practices (3) II

Prerequisite: Business Administration 120.

Economic and social aspects of life insurance; nature of life insurance and annuity contracts; basic legal principles; theory of probabilities, premiums, reserves, and nonforfeiture values; company operational activities; agency development and management.

## **Business Administration / 145**

125. Estate Planning (3) I, II

Programming fundamentals with emphasis upon economic, actuarial, and legal principles, program coordination and integration with wills; guardianships; estate planning fundamentals; taxation; business life insurance. Analysis of life insurance selling as a career. 126. Fundamentals of Finance (3) I. II

Prerequisite: completion of lower division course requirements in major or minor.

Objectives of financial management. Financing the business enterprise. Internal financial management. Introduction to the cost of capital, valuation, dividend policy, leverage and the techniques of present value and its applications. Sources of capital. (Formerly numbered **Business Administration 127.**)

127. Planning of Capital Expenditures (3) I, II

Prerequisites: Business Administration 126 and credit or concurrent registration in 190. The capital expenditure decision process. Measuring and evaluating benefits and costs. The cost of capital and the evaluation process. Capital rationing problems. Risk and uncertainty in the decision process. Emphasis on quantitative and computer methods in the decision-making process.

128A. Investments (3) I, II

Prerequisite: Business Administration 126.

Investment principles and practices with emphasis upon problems of the small investor, such as tests of a good investment, sources of information, types of stocks and bonds, mechanics of purchase and sale, investment trusts, real estate mortgages, and the like. (Formerly numbered Business Administration 128)

128B. Security Analysis and Investment Strategies (3) I. II

Prerequisite: Business Administration 128A.

Theory and practice of security valuation and market behavior by advanced technical and fundamental analysis. Strategies for optimizing profit and minimizing risk in securities transactions. Institutional and personal portfolio management.

129. International Business Finance (3) I, II

Prerequisite: Business Administration 126.

The financing of international business transactions; international payments and their environment; international financial institutions.

130. Financial Analysis and Management (3) I, II

Prerequisites: Business Administration 127 and Economics 135.

Evaluation of conditions and trends in the money and capital markets. Utilization of financial data as related to the problems of business enterprises. Emphasis on decision-making and research in finance.

131. Law in a Business Society (3) I, II

Prerequisite: Business Administration 30A.

The nature of law as a process of resolving economic disputes and social conflicts. Analysis of the rationale in statutes, judicial decisions, and doctrine. The role of law in the development of business concepts.

132. Fundamentals of Management (3) I, II

Prerequisite: Completion of lower division courses required in the major or minor. What a manager does, how he selects objectives, organizes essential activities, plans, directs and controls operations; fundamentals which guide a manager's decisions.

134. The Social Environment of Business (3) I, II

Prerequisite: Senior standing.

An interdisciplinary study of American business enterprise in its cultural environment. The foundations of business; historical modifications; present relationship between business and society. The moral and ethical responsibilities of business and the businessman.

135. Fundamentals of Production and Operations Management (3) I, II

Two lectures and three hours of laboratory.

Prerequisite: Business Administration 132.

Role of the operations function in the organization. Study of production and operations organizations. Systems analysis, facilities planning, competitive bidding, methods and scheduling and control models.

136. Quality Control (3) I, II

Prerequisites: Business Administration 135 and 190.

Techniques for planning and controlling quality of produced and purchased items; emphasis on statistical and quantitative methods particularly applicable to quality, reliability, and maintainability.

137. Systems and Methods Analysis (3) I, II

Two lectures and three hours of laboratory.

Prerequisite: Business Administration 135.

Examination of systems approach as applied to methods analysis and work measurement. Modeling, analysis, synthesis, and management of systems. Analysis of case studies.

# 146 / Business Administration

138. Production and Inventory Control (3) Prerequisites: Business Administration 135 and 190. Objectives and problems of production and inventory control systems. Methodology for the control of production-inventory systems where demand is assumed known over the planning horizon, and systems where demand is assumed known only statistically. 140. Employee Relations (3) I, II Prerequisite; Business Administration 132. Problems of business and industry in dealing with employees, special attention to company and public policy, staffing, employee development, labor relations and employee motivation. Comparisons of current practices to underlying problems and theories. 141. Employee Relations Laboratory (1) I, II Three hours of laboratory. Prerequisite: Credit or concurrent registration in Business Administration 140 or Political Science 144, or consent of instructor. Investigation of employee relations practices and policies. Practice in interviewing, role playing, or in conducting field studies and related personnel research. 142. Wage and Salary Administration (3) I, II Prerequisite: Business Administration 140. Major problems in the determination and control of compensation from employment. Comparison of underlying theory to current practice. 143. Problems in Employee Relations (3) II Prerequisite: Business Administration 140. The employee relations function. Analysis of current practices as effective solutions to problems in this area. Guided research into the nature of employment relations. 145. Human Factors in Management (3) I, II Prerequisite: Business Administration 132 or Public Administration 144. Organizations as social systems; power and authority; communication, motivation and leadership; impacts of technology on management and workers, resistance to change; human needs and the imperatives of management. 148. Management Decision Games (3) I, II Prerequisites: Business Administration 126, 132, 150, and 190 or 191. Integrated managerial decision making within a dynamic environment through the use of business games. 149. Business Policy (3) I, II Prerequisites: Senior standing and consent of instructor. Formulation and administration of policy; integration of the various specialties in business; development of over-all management viewpoint. 150. Marketing Principles (3) I, II Prerequisite: Completion of all lower division course requirements for the major or minor. Marketing functions, activities of producers, wholesalers, retailers and other middlemen;

chanels of distribution; integration of marketing activities; price policies; government 151. Marketing Management (3) I, II

Prerequisites: Business Administration 156 and 157.

The managerial aspects of marketing. The development of marketing strategy and plans with the aid of social science concepts. Integrates the specific elements of the marketing function.

152. Retailing Principles (3) I, II

Prerequisite: Business Administration 150.

Study of retail stores, emphasizing the problems of store managers and merchandising executives; store location, organization, personnel, sales promotion, buying and handling of merchandise, inventory, turnover, and control methods. Problems of profitable operation

153. Advertising Principles (3) I, II

Prerequisite: Business Administration 150.

Advertising as a sales promotional tool in marketing activities; consumer, market and product analysis; advertising media; preparation of advertisements; measurement of advertising effectiveness; economic and legal aspects of advertising; public relations;

154. Marketing Problems (3) I, II

Prerequisite: Business Administration 150.

Complex cases in marketing involving analysis of business situations. 156. Consumer Behavior (3) I, II

Prerequisite: Business Administration 150.

Examination of the nature of markets and of the factors influencing market development and change. Study of the individual consumer's behavior in relation to the selling-buying

157. Marketing Research (3) I, II

Prerequisites: Business Administration 150 and 190. Formal research techniques and analysis for marketing decisions; principles of decision making.

158. Marketing Research Laboratory (1)

Three hours of laboratory.

Prerequisites: Business Administration 157.

Applications of market research techniques to selected topics. Uses and limitations of various methods of analysis. Orientation and use of computer center is included.

159. Analysis of Marketing Information (3) I, II Prerequisites: Business Administration 150 and 190.

The analysis and interpretation of marketing and business information. Decision-making procedures used in conjunction with marketing information.

160. Advertising Management (3)

Prerequisites: Business Administration 153 and 156. The management of the advertising and sales promotion function.

161. Traffic Management (3) I

Prerequisites: Economics 1A and 1B or 103A and 103B

Organization and functions of a traffic department, routing policy on shipments, freight rates and classifications, receiving and shipping, loss and damage claims, warehousing, packing and loading, documentation, export and import shipments, government regulations.

Study of industrial products and services and how they are marketed; classifications of industrial products and customers; buying procedures; applications of marketing research; analysis of industrial product planning; industrial channels of distribution; industrial promotion applications and pricing practices.

163. Sales Management (3) I, II

Prerequisites: Business Administration 150.

Consideration of the structure of sales organization; sales policies; selection, training, compensation, evaluation and control of the sales force; sales analysis; sales quotas; sales costs and budgets; markets and product research and analysis; coordination of personal selling with other forms of sales effort.

164. Purchasing and Buying (3) I, II

Prerequisites: Business Administration 132 and 150.

Policies for purchasing raw materials, parts, supplies and finished goods for manufacturing operations, for commercial uses, and for wholesale and retail resale. Buying procedures, inventory control, vendor relations, legal problems, quality control, financing,

165. International Marketing (3) II

Prerequisite: Business Administration 150.

Bases and promotion of marketing; foreign marketing; organizations and methods; technical and financial features of international markets; selection of organization and trade channels. Determinants and principles of foreign marketing policies.

166. Honors Course (1-3) I, II

Refer to Honors Program.

170. Real Estate Principles and Practices (3) I, II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Functions and regulation of the real estate market; transfers of property; including escrows, mortgages, deeds, title insurance; appraisal techniques; financing methods; leases; subdivision development; property management.

171. Law of Real Property (3) I, II

Prerequisites: Business Administration 30A, 30B, and 170.

Legal theory and practice of estates in land; landlord and tenant relationships; land transactions; mortgages and trust deeds; easements; land use; ownership rights in land; environmental law.

172. Property Investment and Management (3) I, II

Prerequisite: Business Administration 170.

The rental markets, property management programs, collection procedures, lease forms, tenant and owner relations, rental techniques, maintenance and rehabilitation procedures, and investment property analysis.

162. Industrial Marketing (3) I, II

# Prerequisites: Business Administration 132 and 150.

**Business Administration / 147** 

#### **Business Administration / 149**

#### 148 / Business Administration

## 173. Real Estate Finance (3) I, II

Prerequisites: Economics 1A, 1B, (or 103A, 103B), Business Administration 30A, 30B, and 170

Methods of financing real estate; sources of real estate credit; loan servicing; governmental financial agencies; acquisition and sale of mortgages and trust deeds.

174. Real Estate Appraisal Theory (3) I, II

Prerequisites: Business Administration 170.

Introduction to theories, functions, and purposes of appraisals of residential and income properties: Methods of valuation, techniques of market data analysis, rehabilitation estimates.

175. Real Estate Appraisal Problems (3) II

Prerequisite: Business Administration 174.

Implementation of advanced value theory and appraisal technique in the solution of valuation problems involving condemnation, and industrial, commercial, land, and special purpose properties.

180. Workshop in Business Education (2) S

Developments in business education areas such as (A) bookkeeping, (B) distributive and basic business education, (C) secretarial, and (D) typewriting. Opportunity provided for work on individual problems. May be repeated with new subject matter to a total of eight units.

## 182. Consumer Income Management (3) I, II

Functions and responsibilities of consumers; problems of choice-making; planning expenditures for housing, household operation, insurance and investments. Economics of installment buying, borrowing procedures, control of frauds, legislation affecting consumers.

183. Executive Secretarial Management (3) Prerequisites: Business Administration 72, 74, and 75B.

Executive secretarial responsibilities and functions, including a review for the Certified Professional Secretary Examination.

184. Information Systems Management (3) I, II

Prerequisite: Business Administration 83; Economics 2 or Mathematics 12.

Administrative theories as they apply to typical information systems; interrelationship of personnel, equipment, and services; emphasis on quantitative and qualitative aspects of information systems.

185. Automated Management Information Systems (3) I, II

Prerequisites: Business Administration 84; Economics 2 or Mathematics 12.

Concepts and techniques for the design, development, and implementation of EDP-based management information systems to improve decision making.

186. Information Storage and Retrieval Systems (3) I, II

Prerequisite: Business Administration 185.

Systems for abstracting, storing, and retrieving information with automated equipment. (Formerly numbered Business Administration 187.)

187. Advanced Programming Techniques (3) I, II

Prerequisite: Business Administration 185.

Software packages utilized in EDP systems in business. (Formerly numbered Business Administration 188.)

188. Data Processing Practicum (3) I, II

Prerequisites: Business Administration 186, 187, 190.

Fundamentals of systems flow charting and computer programming; computer applications to typical automated data processing problems. (Formerly numbered Business Administration 186.)

189. Scope and Function of Business Education (3) I

Philosophy, scope, and functions of business education; analysis and development of curricula; instructional foundations of basic business subjects. 190. Quantitative Analysis for Business (3) I, II

Prerequisites: Mathematics 20; Mathematics 12 or Economics 2.

Quantitative methods applied to business decision making.

191. Quantitative Methods (3)

Prerequisites: Mathematics 20; Mathematics 12 or Economics 2.

A study of various management science techniques such as simulation, transportation and simpler linear programming and queuing theory.

192. Advanced Quantitative Methods (3)

Prerequisite: Business Administration 191.

The derivation and application of management science techniques to management decision making. Simulation of static and dynamic models. Development of advanced linear and nonlinear programs.

197. Business Forecasting (3) I, II

Prerequisites: Business Administration 126, 150, and 190 or 191.

Business fluctuations; forecasting, and related problems confronting the business firm; forecasting techniques; specific forecasts. The use of forecasts in the firm.

198. Investigation and Report (1-3) I, II

Prerequisites: Senior standing and consent of instructor.

May be repeated to a maximum of six units.

A comprehensive and an original study of a problem connected with business under the direction of one or more members of the business administration staff.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor.

#### **Graduate Courses**

Classified graduate standing is a prerequisite for all 200-numbered courses. 200. Financial Accounting (3)

Basic concepts and principles of financial accountings; accounting as a data processing system; measuremment of business income; financial statements.

201A. Organization Theory (3)

The business organization viewed as a system. Development of organization theory, functions and structure of organizations, control and adaptation, interaction of systems levels and organizational values.

201B. Behavior in Organizations (3)

Prerequisite: Business Administration 201A.

Nature of the human resource in organizations. Analysis of organizational systems and managerial actions to direct and control human behavior.

202A-202B. Quantitative Methods (3-3)

In 202A: Measures of central tendency and variation, sampling and various statistical tests such as analysis of variance, F, t, and X<sup>2</sup> tests. Simple and multiple correlation. In 202B: The design of statistical experiments and various operations research techniques such as simulation, linear programming, queuing theory, and Markov chain analysis.

#### 203. Marketing (3)

The marketing activities of a firm in relation to management and society. Application of economic theory to marketing institutions and functions. Not open to students with credit for Business Administration 150 or its equivalent.

#### 204. Law for Business Executives (3)

Development significance, and interrelationships of law and business. Analysis of essential aspects of law pertaining to business including materials from the law of contracts, sales, agency, business organizations, property, negotiable instruments, secured transactions. Effects of government regulation of labor and business.

#### 205. Financial Principles and Policies (3)

Prerequisite: Business Administration 200.

Finance and financial institutions as they relate to the firm and the flow of funds. Emphasis upon the supply of and demand for capital; principles and tools of business finance; money and capital markets.

206. Managerial Economics (3)

Prerequisite: Economics 203.

Role of economic theory in management analysis and decisions. Study of demand, cost, and supply theories from a business viewpoint.

207. Research and Reporting (3)

Prerequisite: Business Administration 202B.

Principles of research design and data accumulation. The analysis and effective presentation of data related to business and industry.

208. Managerial Accounting (3)

Prerequisite: Business Administration 200.

Accounting in relation to the decision making process; various cost systems; relevancy of various cost concepts; direct costing, flexible budgets, distribution costing; break-even analysis; capital budgeting; and other techniques of management planning and control.

#### 150 / Business Administration

209 Computer Programming and Systems Analysis (3) Prerequisite: B.A. 202A.

Fundamentals of computers, problem-oriented computer language, flow-charting logic and techniques, analysis of the synthesis of computer-based systems. 210. Theory and Analysis of Financial Statements (3)

Prerequisite: Business Administration 200.

The theories, principles, and concepts underlying financial statements, measurement and presentation of enterprise resources, equities, and income in accordance with generally accepted accounting principles; consideration of price level problems.

211. Advanced Accounting (3)

Prerequisite: Business Administration 210.

Principles and concepts as related to the measurement, determination, and presentation of resources, equities, and income of parent and affiliated companies; concepts of fund accounting; specialized reporting for partnership formation, income distribution, and liquidation.

212. Income Tax Accounting (3)

Prerequisite: Business Administration 200.

Provisions of the federal tax law, including preparation of returns for individuals, partnerships, corporations, estates, trusts; procedures for reporting deficiency assessments, refunds, and other administrative practices.

213. Auditing (3) Prerequisite: Business Administration 211.

Critical analysis of the application of auditing principles in verification of financial statements; review of AICPA and SEC bulletins and regulations; consideration of professional ethics, audit standards, procedures, sampling techniques, and report writing; trends and developments in auditing profession.

214. Seminar in Accounting Information Systems (3)

Prerequisites: Business Administration 202B and 208.

Systems design and related controls. Emphasis on mathematics, statistics, and computers

in planning and reporting.

215. Seminar in Managerial Accounting (3)

Prerequisite: Business Administration 208.

Managerial cost accounting concepts and procedures, including budgetary planning, cost control, advisory functions, measurement of divisional profitability, product pricing, and

219. Seminar in Accounting Theory (3)

Prerequisite: Business Administration 211.

Historical development of accounting principles and theory; problems in valuation, income determination, and statement presentation. 220. Legal Aspects of Labor-Management Relations (3)

Legal aspects of union organizational activities, representation proceedings, unfair labor practices, collective bargaining and contracts, grievances and arbitration, strikes, picketing, 221. Insurance Principles and Practices (3)

Nature and extent of personal, business, and social risk. Risk handling techniques; insurance principles and practices; basic contracts analysis; insurance underwriting and rating; insurance problems and trends; personal and business risk management.

223. Seminar in Business Finance (3)

Prerequisite: Business Administration 205.

Application of principles of finance to current problems in financial management, with emphasis on planning and development of tools for use in decision making. Consideration of case materials, study of the literature, and development of individual student reports.

224. Seminar in Investments (3)

Prerequisite: Business Administration 205.

Examination of firms from an investment point of view; historical and current developments affecting investment values; sources of information; techniques of analysis; measurement of risks, returns, and investment values. 225. Seminar in Insurance (3)

Prerequisite: Business Administration 221.

Risk management in effective business operations. Programming of personal and business risk problems. Insurance institutions.

# **Business Administration / 151**

226. Seminar in Security Analysis and Portfolio Management (3)

Prerequisites: Business Administration 209 and 224.

Security valuation and price forecasting. Portfolio management theory. Risk management and reduction analysis. Establishment of performance objectives.

227. Seminar in Quantitative Analysis for Financial Decisions (3)

Prerequisites: Business Administration 202B, 205 and 209.

Quantitative techniques and the computer as employed to optimize financial decisions.

228. Seminar in International Business Finance (3)

Prerequisite: Business Administration 205.

International finance applied to the business firm.

229. Seminar in Financial Markets (3)

Prerequisite: Business Administration 205.

Analysis of money and capital markets. Emphasis on factors of influence and sources and uses of data. Survey of literature in the field.

230. Production and Operations Management (3)

Prerequisite: Business Administration 202B. Theory, concepts and decision analysis related to effective utilization of major factors of production in manufacturing and service industries. Utilizes the system approach to achieve unification of the production elements in terms of both analysis and synthesis. Not open to students who have credit for a basic course in production management.

231. Methods Engineering and Job Design (3)

Prerequisite: Business Administration 230.

Use of Industrial Engineering for Management Decisions-job simplification and motion economy; micromotion analysis, time standards and determination, performance rating, allowances, statistical work measurement, learning curves, formula construction, machine interference and the establishment of production times from standard data.

232. Ouality Control (3)

Prerequisite: Business Administration 230.

Statistical techniques for controlling quality, reliability and maintainability, types of control and limit charts.

233. Production and Inventory Control (3)

Prerequisite: Business Administration 230.

The design and analysis of single and multi-product control systems. Methods for the control of production-inventory systems where demand is assumed known either over the planning horizon or only statistically.

234. Seminar in Production and Operations Management (3)

Prerequisite: Business Administration 230.

Case studies of selected industries, emphasizing integration of the manufacturing and operations functions with the major goals of the organization.

236. Operations Research: Deterministic Models (3)

Prerequisites: Business Administration 202B and 209.

Decision-making under conditions of certainty. Applications of algebra (Boolean, ordinary, and matrix), analytic geometry, trigonometry, and calculus to business problems. The use of network analysis; linear, integer, and dynamic programming; sequencing and scheduling models, and sensitivity analysis in decision-making.

237. Operations Research: Probabilistic Models (3)

Prerequisites: Business Administration 202B and 209.

Decision-making under conditions of uncertainty. The application of queuing theory, Markov chains, conditional and joint probability, Bayes' formula, and gaming theory to decision making.

238. Computer Implemented Optimum-Seeking Methods (3)

Prerequisite: Business Administration 236.

Programming and simulation techniques for analysis of interlocking decision problems with the use of the computer. Derivation of man, machine, and system models. Design of steady state and dynamic stochastic models.

239. Seminar in Management Science (3)

Prerequisite: Business Administration 236.

Analysis by quantitive techniques for managerial planning and decision-making. Applications of operations research and other concepts to industrial situations. (Formerly numbered and entitled Business Administration 239B.)

# 152 / Business Administration

240. Seminar in Manpower Planning and Staffing (3)

Prerequisites: Business Administration 201B; or one of the following: Public Administration 241, Economics 250, Psychology 220, Sociology 220.

Theories and models of manpower planning; inventorying and forecasting of manpower needs and requirements; labor force analysis; recruitment; the staffing process; measurement tools and techniques.

241. Seminar in Union-Management Relations (3)

Prerequisites: BA 201-B, or any one of Public Administration 241, Economics 250, Psychology 220, Sociology 220.

Interaction of unions and business organizations with particular emphasis upon collective bargaining. Effects upon management and society. Trends in collective bargaining and in the organization of employees.

242. Seminar in Compensation (3)

Prerequisites: Business Administration 201-B, or any one of Public Administration 241, Economics 250, Psychology 220, Sociology 220.

The organizational process of compensating employees. Compensation theory from economics, psychology, and sociology. Compensation systems and their effects upon organizations and individuals.

243. Seminar in Organizational Development (3)

Prerequisites: BA 201-B, or any one of Public Administration 241, Economics 250, Psychology 220, Sociology 220,

The process of developing human resources and organizations. Theories of organizational development; tools and techniques, analysis of manpower and organizational development programs.

249. Seminar in Human Resources Administration (3)

Prerequisites: Business Administration 201B or any 6 units of courses in Human Resources Administration.

Analysis of issues and application of behavioral science theory in acquiring, developing, rewarding, and utilizing human resources. 250. Seminar in Marketing and the Economy (3)

Prerequisite: Business Administration 203.

Advertising, selling, sales promotion, and merchandising as they relate to society, business and the economy

251. Seminar in Marketing Theory (3) Prerequisite: Business Administration 203.

Marketing theory and contributions of economics and behavioral sciences to marketing thought.

252. Marketing Institutions (3)

Prerequisite: Business Administration 203.

Analysis of development of wholesaling and retailing and of growth, change, and efficiency of these institutions in the American and other economies.

253. Seminar in Marketing Price Policy (3)

Prerequisite: Business Administration 203.

Study of pricing strategy and price determination in business organizations. 254. Seminar in Sales Management (3)

Prerequisite: Business Administration 203.

Sales management and personal selling decisions and strategies in business organizations. 255. Seminar in International Marketing (3)

Prerequisite: Business Administration 203.

The impact of cultural, social, political, economic, and other environmental variables upon international marketing systems and the decision-making process of multinational marketing 256. Seminar in Consumer Behavior (3)

Prerequisite: Business Administration 203.

The study of consumer behavior in relation to marketing strategy and the changing environment of business. 257. Seminar in Industrial Marketing Management (3)

Prerequisite: Business Administration 203.

The management of marketing decisions and strategies peculiar to the industrial market. 258. Seminar in Industrial and Government Procurement Management (3) Prerequisites: Business Administration 201A and 203.

Procurement methods used in industry and government; internal departmental operations, interrelationships with other departments; supplier selection, pricing/cost analysis; contract negotiations, special characteristics of government procurement.

259. Market Analysis and Research (3)

Prerequisites: Business Administration 202B and 203.

Application of statistical and mathematical methods to market problems, consumer research, and product analysis.

260. Principles of Real Estate (3)

Functions and regulation of the real estate market, real estate finance, property management, real estate appraisal theory, specialized properties, urban development, and contemporary real estate problems. (Formerly numbered Business Administration 222.)

261. Seminar in Real Estate (3)

Prerequisite: Business Administration 260.

Current problems in real property. Regional land use planning. (Formerly numbered **Business Administration 226.** 

262. Seminar in Real Estate Investment (3)

Prerequisite: Business Administration 260.

Investment characteristics of real property. Analysis of real estate investment by institutions, corporations, individuals, and government. Measuring investment yield potential of industrial, commercial, and residential projects. Real estate investment and social policy.

263. Seminar in Real Estate Finance (3)

Prerequisite: Business Administration 260.

Theories and factors governing the financial functions of lenders, borrowers, governmental agencies, and collateral in financing real estate.

264. Seminar in Valuation of Real Property (3)

Prerequisite: Business Administration 260.

Valuation of real property by the cost, income, and market approaches to value. Evaluation of property taken in eminent domain proceedings, air rights, inverse condemnation, lease-hold interests.

270. Seminar in Business Education (3)

Study of some phase of business education, such as administration and supervision; distributive and basic business education; trends in and methods of teaching shorthand and typewriting.

273. Seminar in Advanced Computer Applications (3)

Prerequisites: Business Administration 202A and 209.

Analysis, design, and coding of application systems. Analysis of methods of using library routines and control and executive routines. (Formerly numbered Business Administration 274.)

274. Seminar in Information Storage and Retrieval (3)

Prerequisite: Business Administration 273.

Study of theory and techniques of information storage and retrieval, to include the study of optimization and randomization of data storage. (Formerly numbered Business Administration 273.)

278. Seminar in Management of Information Systems (3)

Prerequisite: Business Administration 274.

Advanced information systems. Emphasis on current managerial trends and developments and on individual student research.

279. Seminar in Data Systems Design (3)

Prerequisites: Business Administration 202B, 274.

Research in the analysis and design of data processing systems.

281. Behavioral Sciences for Management (3)

Prerequisite: Business Administration 201B.

Applications of findings from behavioral sciences to management problems and decisions. Study of organization cultures and subcultures. Impact of human behavior on the enterprise. 282. Group Processes and Leadership (3)

Prerequisite: Business Administration 201B.

Perceptions and processes in work groups. Experience in interpersonal networks, influence and rewards, stereotypes; managing differences and conflicts.

283. Origins and Nature of American Business Enterprise (3)

Prerequisite: Business Administration 201B.

Factors underlying the American system of business enterprise: modern corporations, the corporation man, technological change, the business community and politics, and other significant issues.

**Business Administration / 153** 

# 154 / Chemistry

#### 284. Policy Formulation (3)

Prerequisite: Advancement to candidacy and consent of instructor.

Building and maintaining enterprises in our society; determining objectives; developing policies and plans for achievement; measuring and controlling organizational activities; reappraising objectives and policies on the basis of new developments.

285. Seminar in Business Planning (3)

Prerequisites: Business Administration 201A, 203, 205, and nine units in Business Administration courses numbered 210 or above.

Strategic decision-making, long range forecasting, and corporate planning with major emphasis on product-market relationships.

286. Seminar in Comparative Management (3)

Prerequisite: Business Administration 201B.

Concepts, theories, techniques, and practices of management in various countries.

288. The Entrepreneur (3) Prerequisite: Business Administration 201B.

Examination of the entrepreneurial approach; concepts, theory and techniques of managerial innovation and implementation; analysis of entrepreneurial skills.

289. Seminar in Organization and Management (3)

Prerequisite: Business Administration 201B.

Analysis of problems in business and other organizations. Organization and decision theory and contemporary developments in management science are emphasized.

290. Directed Readings in Business Administration (3)

Prerequisite: Advancement to candidacy.

Preparation for the comprehensive examination for those students in the M.B.A. program under Plan B. 297. Research (3)

Prerequisite: Advancement to candidacy.

Research in one of the fields of Business Administration.

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# Chemistry In the College of Sciences

# The department is on the approved list of the American Chemical Society.

#### Faculty

Emeritus: Joseph, Rowe

Professors: Abbott, Grubbs, Harrington, Hellberg, Isensee, Jensen, Jones, Landis, Malik, Mathewson, O'Neal, Richardson, Ring, Robinson, Sharts, Spangler, Stewart, Wadsworth

Associate Professors: Bennett, Coffey, Malley, Roeder

Assistant Professor: Dahms

Offered by the Department

Doctor of Philosophy degree in chemistry.

Master of Arts degree in chemistry.

Master of Science degree in chemistry.

Major in chemistry with the B.S. degree in applied arts and sciences with the Certificate of the American Chemical Society. Major in chemistry with the A.B. degree in applied arts and sciences, with or without the

Certificate of the American Chemical Society. Major in chemistry with the A.B. degree in liberal arts and sciences.

Minor in chemistry.

Teaching major in chemistry, with specialization in both elementary and secondary teaching.

Teaching minor in chemistry, with specialization in both elementary and secondary teaching.

### **Chemistry Majors**

# In Applied Arts and the Sciences

Three majors in chemistry are offered in applied arts and sciences. A chemistry major is also offered in liberal arts and sciences.

The chemistry majors available in applied arts and sciences are as follows: (1) Chemistry major with the B.S. degree and Certificate of the American Chemical Society, a program designed to qualify graduates for many types of positions as chemists and for admission to graduate work in chemistry; (2) Chemistry major with the A.B. degree and Certificate of the American Chemical

Society, a program designed to prepare students for graduate work in chemistry; and (3) Related Professions major, a program available only to students who are taking a Pre-medical, Pre-dental, or Teacher Education curriculum.

## Certificate of the American Chemical Society

The Department of Chemistry is on the approved list of the American Chemical Society. Programs leading to a chemistry major with the B.S. degree or the A.B. degree are designed to meet the standards prescribed for the Certificate of the American Chemical Society. The program leading to the Related Professions major is not offered with the Certificate. Provision is made for students taking the chemistry major in liberal arts and sciences to obtain the A.B. degree with or without the Certificate.

#### Chemistry Major

#### With the B.S. Degree in Applied Arts and Sciences and Certificate of the American Chemical Society

The curriculum outlined below for the B.S. degree in applied arts and sciences is based upon the recommendations of the Committee for Professional Training of Chemists of the American Chemical Society. It qualifies graduates for many types of positions as chemists and provides the training required by most universities for admission to graduate work in chemistry.

A minor is not required with this major.

Preparation for the major. Chemistry 1A-1B, 5, 12, and 13; Physics 4A-4B-4C; and Mathematics 50, 51, and 52. (44 units.)

Major: A minimum of 36 upper division units to include Chemistry 110A-110B, 111, 112, 113, 116A, 127A, 155, one unit of 198, and 11 units of upper division electives in chemistry or in related subjects with approval of the department.

Foreign language requirement. German 8A or Russian 8A.

# Chemistry Major

# With the A.B. Degree in Applied Arts and Sciences

This plan is designed for only those students who desire the training in a premedical and This plan is designed for only those students who desire the training in a premedical and predental curriculum or for secondary school teaching. This plan cannot be taken by students who intend to become professional chemists or who intend to earn advanced degrees in chemistry or who plan to teach in junior colleges. Application for admission to the plan must be made to the department chairman upon achieving junior class standing. All transfer be made to the department chairman upon achieving junior class standing. All transfer students with upper division standing must apply before the second semester of work at San Diego State College. With an appropriate choice of electives, graduates can meet the requirements for admission to medical, dental, and pharmaceutical schools. With a fifth year of graduate work, requirements for the secondary teaching credential can be met.

Preparation for the major. Chemistry 1A-1B, 4 (or 5), 12 and 13; Physics 4A-4B; Mathematics 4, 40 (unless exempted by examination), 50, 51, and Biology 1, 2. (46 units.)

Major. A minimum of 24 upper division units in chemistry to include Chemistry 109A, B, C (or 110A-110B, 111), 112, 155 (or 150), and eight units of upper division electives in chemistry. Chemistry 127A is recommended for all teaching majors. Chemistry 115A-115B or 116A-116B is recommended for all pre-medical students.

Minor. A minor in biology or zoology is expected for pre-professional students. The minor required for a secondary school credential may be completed in the fifth year for teaching

Foreign language requirement. Recommended: German 8A or Russian 8A.

Refer to Catalog section on General Education requirements.
 Students eligible to take Mathematics 50 in their first semester should do so and substitute for Mathematics 4 and/or 40 two to five units of general electives.
 If this requirement is met by examination the appropriate number of units should be added to general electives.
 Premedical and Predental students will also take Biology 2 and decrease general elective units by 1.

# **Chemistry Major** With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 85 of this catalog. It is recommended that students choose

German to meet the foreign language requirement for graduation.

A minor is not required with this major.

This major is designed for students desiring emphasis on chemistry as part of a liberal arts and sciences education or as preparation for entering a related profession.

Preparation for the major. Chemistry 1A-1B, 4, and 12; Physics 1A-1B or 2A-2B and 3A-3B; and Mathematics 21 and 22. (33 units.)

Major. A minimum of 24 upper division units in Chemistry to include Chemistry 109A-109B, 109C, 112, 150; and eight units of upper division electives in chemistry.

# **Chemistry Minor**

The minor in chemistry consists of Chemistry 1A-1B, 4 or 5, 12, and six upper division units in chemistry (24 units).

#### Chemistry Major

#### For the Standard Teaching Credential

All candidates for a credential must complete all other requirements for the credential, as outlined in the section of this catalog on the School of Education.

The major in chemistry for the standard teaching credential, with specialization in either elementary or secondary teaching, requires an undergraduate major in chemistry. All courses for the teaching major must be approved by the chemistry adviser for teaching programs. In addition, candidates for the credential with a specialization in secondary teaching must complete, in the postgraduate year, a minimum of six units of graduate work in chemistry.

#### Chemistry Minor

#### For the Standard Teaching Credential

The minor in chemistry for the standard teaching credential, with specialization in either elementary or secondary teaching, consists of not less than 20 units in chemistry, six units of which must be in upper division courses. If the major for secondary teaching is non-academic, at least 12 upper division units of chemistry must be taken. All courses must be approved by the chemistry adviser for teaching programs.

#### Lower Division Courses

1A-1B. General Chemistry (5-5) I, II

Three lectures and six hours of laboratory.

Prerequisites: High school chemistry and two years of college preparatory mathematics. Recommended: High school physics and two years additional mathematics.

General principles of chemistry with emphasis on inorganic materials. Qualitative analysis is included in the second semester. Duplicate credit will not be allowed for the corresponding course in Chemistry 10A, 10B, or 1E. Students with credit for both Chemistry 1A and 2A will receive a total of 5 units of credit toward graduation.

1E. General Chemistry for Engineers (3) I, II

Two lectures and three hours of laboratory.

Prerequisite: Chemistry 1A.

A continuation of the study of the principles of chemistry with emphasis on the relationships to the field of engineering. Open only to engineering majors. Not open to students with credit in Chemistry 1B.

2A. Introductory General Chemistry (3) I. II

Two lectures and three hours of laboratory.

Elementary principles of chemistry. Not open to students with credit in Chemistry 1A. 2B. Elementary Organic Chemistry (3) I. II

Two lectures and three hours of laboratory.

Prerequisite: Chemistry 2A or 1A.

Introduction to the compounds of carbon including both aliphatic and aromatic substances. Not open to students with credit in Chemistry 1B or 1E.

#### 158 / Chemistry

3. Introductory Biochemistry (3) I, II Three lectures with demonstrations.

Prerequisites: Chemistry 2A-2B.

Fundamental principles of the chemistry of living processes. This course intended primarily for majors in home economics, nursing, and related fields.

4. Techniques of Analytical Chemistry (5)

Three lectures and six hours of laboratory.

Prerequisite: Chemistry 1B or 2B.

Fundamentals of gravimetric, volumetric and instrumental methods of chemical analysis. Not applicable to B.S. and A.B. degrees and Certificate of the American Chemical Society for chemistry majors. Not open to students with credit in Chemistry 5. 5. Analytical Chemistry (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Chemistry 1B; and credit or concurrent registration in Mathematics 22 or 50

Theory and practice of volumetric, gravimetric and electrical methods of analysis. Not open to students with credit in Chemistry 4. Duplicate credit will not be allowed for equivalent work in Chemistry 10A-10B. 7A-7B. Chemical Principles for the Environment (3-3) I, II

Two lectures and two hours of discussion.

Prerequisite: Chemistry 2B, 7A, 11, or 12 is prerequisite to 7B.

Semester I: Nuclear structure, atomic structure, chemical bonding, organic chemistry. Environment topics include nuclear power, thermal pollution, radiation hazards, ecosystems, ecosphere, energy balances, chemical pollution, biodegradation, water

Semester II: Natural products such as steroids, alkaloids, and terpenes; biochemistry; catalysis and enzymes; thermochemistry and metals. Environments topics include contraceptives, chemotherapy, marijuana, addicting drugs, pesticides, nerve gases, fluoridation, corrosion, metal pollutants, and food additives.

10A-10B. Chemical Principles and Techniques (Honors) (5-5)

Three lectures and six hours of laboratory

Prerequisites: An outstanding record in high school chemistry, physics, and mathematics, accompanied by superior achievement on the College Aptitude Test and the college Mathematics Placement Examinations.

The application of modern electronic theory to the study of general chemistry with emphasis in the laboratory on analytical methods. Qualitative and quantitative analysis is included. Chemistry 10A-10B takes the place of Chemistry 1A-1B and 5 for these students as prerequisites for further courses in chemistry.

11. Introductory Organic Chemistry (4) I, II Three lectures and three hours of laboratory.

Prerequisite: Chemistry 1B.

Aliphatic and aromatic compounds including reaction mechanisms. For students needing only one semester of organic chemistry. Not open to students with credit in Chemistry 12.

Three lectures and three hours of laboratory.

Prerequisite: Chemistry 1B.

Properties and synthesis of organic compounds including reaction mechanisms. First half of a year course.

Not open to students with credit in Chemistry 11.

13. Organic Chemistry Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: Open only to students enrolled concurrently in Chemistry 12. The theory and practice of laboratory operations.

22. Glass Blowing (1) I, II

Three hours of laboratory.

Prerequisite: Chemistry 1B.

Elementary training in the manipulation of glass.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

# **Upper Division Courses**

109A-109B. Fundamentals of Physical Chemistry (3-3)

Prerequisites for 109A: Chemistry 4, Mathematics 22, and Physics 2B and 3B. Not open to students with credit in Chemistry 110A.

Prerequisites for 109B: Chemistry 109A and credit or concurrent registration in Chemistry 150. Not open to students with credit in Chemistry 110B. Fundamental principles of theoretical chemistry. This course cannot apply to the A.B. and

certificate or B.S. major in chemistry.

109C. Fundamentals of Physical Chemistry Laboratory (2) II Six hours of laboratory.

Prerequisite: Concurrent registration or credit in Chemistry 109B. Not open to students with credit or concurrent registration in Chemistry 111. Physico-chemical experiments, errors of measurement and technical report writing.

110A-110B. Physical Chemistry (3-3) I. II

Prerequisites for 110A: Chemistry 5 and credit or concurrent registration in Physics 4C and Mathematics 52. Not open to students with credit in Chemistry 109A.

Prerequisites for Chemistry 110B: Chemistry 110A. Not open to students with credit in Chemistry 109B.

Theoretical principles of chemistry with emphasis on mathematical relations.

111. Physical Chemistry Laboratory (3) I, II

Nine hours of laboratory.

Prerequisite: Credit in Chemistry 110B or concurrent registration with consent of instructor. Not open to students with credit or concurrent registration in Chemistry 109C.

Physico-chemical apparatus and measurements, with emphasis on technical report writing.

112. Organic Chemistry (4) I, II Three lectures and three hours of laboratory.

Prerequisite: Chemistry 12.

A continuation of Chemistry 12. 113. Organic Chemistry Laboratory (1) I, II

Three hours of laboratory. Prerequisite: Open only to students enrolled concurrently in Chemistry 112. Theory and practice of laboratory operations.

114A-114B. Clinical Biochemistry (4-4)

Two lectures and six hours of laboratory.

Prerequisites: Chemistry 4 or 5 and 11 or 12. Principles of biochemistry and analytical methods applied to blood, urine, and other body fluids. This course cannot apply to the major in chemistry.

115A-115B. Fundamentals of Biochemistry (3-3) I, II

Prerequisites: Chemistry 4 or 5, and 11 or 12.

The chemistry of intermediary metabolism and its regulation. Not open to students with credit in Chemistry 116A-116B.

116A-116B. General Biochemistry (3-3) Prerequisites: Chemistry 109B or 110B, and 112.

The structure, function, metabolism, and thermodynamic relationships of chemical entities in living systems. Not open to students with credit in Chemistry 115A-115B.

117. Biochemistry Laboratory (2) I, II

Six hours of laboratory.

Prerequisite: Credit or concurrent registration in 115B or 116B.

The theory and practice of laboratory procedures used in the study of intermediary metabolism. Includes the purification of enzymes, radioactivity tracer techniques, and the isolation of cell components.

118. Advanced Physical Chemistry (3) II

Prerequisite: Chemistry 110B.

Mathematical tools essential to solving problems in chemical thermodynamics, statistical mechanics, chemical kinetics, quantum chemistry and molecular structure and spectroscopy, with applications.

127A. Inorganic Chemistry (3) I, II

Prerequisite: Credit or concurrent registration in Chemistry 109B or 110B.

The physical basis of the periodic system, complex inorganic compounds, and the nature of the chemical bond.

127B. Inorganic Chemistry (3) I, II

Prerequisite: Chemistry 127A.

An advanced systematic study of representative and transition elements and their compounds.

160 / Chemistry 131. Theoretical Organic Chemistry (3) I, II Prerequisites: Chemistry 109A or 110A and 112. The application of modern electronic theory to the physical and chemical properties of organic compounds. 135. CHEM Study (3) II One lecture and six hours of laboratory. Prerequisites: Chemistry 1B. New approach to the study of major concepts of chemistry. Based on lecture and laboratory materials prepared by the Chemical Education Materials Study Committee. Open only to secondary teacher candidates. 150. Analytical Chemistry (4) I, II Two lectures and six hours of laboratory. Prerequisites: Chemistry 4 or 5, 12, and 109A or 110A. Advanced theory and practice of quantitative analysis and an introduction to instrumental methods of analysis. 154. Organic Qualitative Analysis (3) I. II One lecture and six hours of laboratory. Prerequisites: Chemistry 112 and credit or concurrent registration in Chemistry 109A or 110A. The identification of organic compounds and mixtures. 155. Advanced Instrumental Methods (4) I. II Two lectures and six hours of laboratory. Prerequisites: Chemistry 5, 112, and credit or concurrent registration in 110B. Not open to students with credit for Chemistry 150. Advanced theory and practice of chemical instrumentation. 160A-160B. Principles of Chemical Engineering (3-3) (Same course as Engineering 160A-160B) Prerequisite: Credit or concurrent registration in Engineering 108 or Chemistry 109A or 110A. Industrial stoichiometry; fluid flow and heat transfer as applied to unit operations such as evaporation, distillation, extraction, filtration, gas-phase mass transfer, drying, and others. Problems, reports, and field trips. 166. Honors Course (1-3) I, II Refer to Honors Program. 170. Radiochemistry (3) I, II One lecture and six hours of laboratory. Prerequisite: Chemistry 4 or 5. Laboratory principles and techniques of radioactivity applied to the various fields of chemistry. Experimental methods used in tracer applications, activation analysis, chemical investigation of the actinides, study of nuclear reactions, and radiolysis. 180. Chemical Oceanography (3) II Three lectures and occasional field trips. Prerequisite: Credit or concurrent registration in Chemistry 109B or 110B. The application of the fundamentals of chemistry to the study of oceans. 191. Chemical Literature (1) Prerequisite: Upper division standing in chemistry. An introduction to the availability, scope and use of the chemical literature.

196. Selected Topics in Chemistry (1-3)

Prerequisite: Consent of instructor.

Selected topics in modern chemistry. May be repeated for additional credit with new subject matter for a total of six units.

198. Senior Project (1-3) I, II

Prerequisites: Three one-year courses in chemistry and senior standing.

An individual investigation and report on a problem. May be repeated to a maximum of six units.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor. Open only to students who have shown ability to do A or B work in chemistry.

#### **Graduate Courses**

200. Seminar (1 to 3)

An intensive study in advanced chemistry, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

210. Advanced Topics in Physical Chemistry (1-3) Prerequisite: Consent of instructor. Selected topics in physical chemistry. Maximum credit six units applicable to a master's degree. 211. Chemical Thermodynamics (3) Prerequisites: Mathematics 52 and Chemistry 110B. Chemical thermodynamics and an introduction to statistical thermodynamics. 212. Chemical Kinetics (3) Prerequisites: Mathematics 52 and Chemistry 110B. Theory of rate processes; applications of kinetics to the study of reaction mechanisms. 213. Quantum Chemistry (3) Prerequisites: Mathematics 52 and Chemistry 110B. Quantum mechanics of atomic and molecular systems; applications to chemical bonding theory **214.** Molecular Structure (3) Prerequisites: Mathematics 52 and Chemistry 110B. Theory and techniques used in the determination of molecular structure. 215. Chemical Statistical Mechanics (3) Prerequisite: Chemistry 211 Statistical mechanics as applied to chemical systems. 216. Physical Chemistry of Electrolytic Solutions (2) Prerequisite: Chemistry 211. Theory of ionic solutions: electrode potentials, activity coefficients, partial molal quantities, conductance and ion association. 220. Advanced Topics in Inorganic Chemistry (1-3) Prerequisite: Chemistry 127A. Selected topics in inorganic chemistry. Maximum credit six units applicable on a master's degree. 221. Mechanisms of Inorganic Reactions (3) Prerequisite: Chemistry 127A. Mechanisms in inorganic reactions with an emphasis on coordination chemistry. 222. Chemistry of the Nonmetals (3) Prerequisite: Chemistry 127A. An advanced systematic study of the nonmetallic elements and their compounds. 230. Advanced Topics in Organic Chemistry (1-3) Prerequisite: Chemistry 112. Selected topics in organic chemistry. Maximum credit six units applicable on a master's degree. 231. Mechanisms of Organic Reaction (3) Prerequisites: Chemistry 110B and 112. Reactivity and mechanism in organic reactions. 232. Advanced Organic Chemistry (3) Prerequisite: Chemistry 112. Applications and limitations of organic reactions from the viewpoint of synthesis. 250. Advanced Topics in Analytical Chemistry (1-3) Prerequisite: Chemistry 110B. Selected topics from the field of analytical chemistry. Maximum credit six units applicable on a master's degree. 260. Advanced Topics in Biochemistry (1-3) Prerequisite: Chemistry 116B. Selected topics in biochemistry. Maximum credit six units applicable on a master's degree. 261. Advanced Biochemical Techniques (2) Prerequisite: Chemistry 116A. Six hours of laboratory. Theory and practice of current research techniques in biochemical research. 262. Enzymology (2)

Prerequisite: Credit or concurrent registration in Chemistry 109B or 110B. Theory and techniques used in the study of the mechanism of action of enzymes.

6-84215

## 162 / Chinese

#### 270. Nuclear Chemistry (2)

Prerequisite: Chemistry 110B.

Theoretical applications of radioactivity to chemistry, radiation, chemistry, decay laws and processes, nuclear structure and reactions.

#### 290. Bibliography (1)

Exercise in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

- 291. Research Seminar (1)
- Prerequisite: Consent of department chairman.

Discussions on current research by students, faculty, and visiting scientists. Each student will make a presentation based on the current literature.

297. Research (1-3)

Prerequisite: Consent of instructor.

Research in one of the fields of chemistry. Maximum credit six units applicable on a master's degree.

#### 298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisite: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# Chinese

# In the College of Arts and Letters

#### Faculty

Assistant Professor: Woo.

Offered by the Department of Classical and Oriental Languages and Literatures Courses in Chinese.

Major or minor work in Chinese is not offered.

#### Lower Division Courses

Native speakers of Mandarin Chinese will not receive credit for taking lower division courses except with advance approval from the department.

1. Elementary (4)

Four lectures and one hour of laboratory.

Pronunciation, oral practice, readings on Chinese culture and civilization, minimum essentials of grammar.

2. Elementary (4) Four lectures and one hour of laboratory.

Prerequisite: Chinese 1.

Continuation of Chinese 1.

3. Intermediate (4)

Prerequisite: Chinese 2.

A practical application of the fundamental principles of grammar. Reading in Chinese of cultural material, short stories, novels or plays; oral practice; outside reading with oral and written reports.

4. Intermediate (4)

Prerequisite: Chinese 3.

Continuation of Chinese 3. Reading of selections from Chinese literature.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### Upper Division Courses

## 185. Topics in Chinese Studies (1-4)

Topics in Chinese language, literature, culture, and linguistics. May be repeated with new content. Maximum credit eight units.

199. Special Study (1-3) I, II

Individual study. Maximum credit six units. Prerequisite: Consent of instructor.

# Classical and Oriental Languages and Literatures

#### Faculty

Emeritus: Burnett

Professor: Warren

Associate Professors: Ingham, Schaber (Chairman)

Assistant Professors: Eisner, Gefter, Genovese, Woo, Yun Lecturer: Jadon

Offered by the Department

Major in Classics with the A.B. Degree in liberal arts and sciences.

Teaching major in Classics (concentration in Latin) with specialization in secondary teaching.

Minor in Classics.

Teaching minor in Humanities. (Refer to the section in this catalog on the School of Education.)

Teaching minor in Latin. (Refer to this section of the catalog under Latin.) Courses in Arabic. (Refer to this section of the catalog under Arabic.)

Courses in Chinese. (Refer to this section of the catalog under Chinese.) Courses in Classics. (Refer to this section of the catalog under Classics.)

Courses in Classics. (Refer to this section of the catalog under Greek.)

Courses in Hebrew. (Refer to this section of the catalog under Hebrew.)

Courses in Japanese. (Refer to the section of the catalog under Japanese.)

Courses in Latin. (Refer to the section of the catalog under Latin.)

(For other courses in translation see comparative literature, history, humanities and philosophy).

# Classics

# In the College of Arts and Letters

Faculty

Professor: Warren Associate Professors: Ingham, Schaber Assistant Professors: Eisner, Genovese

Offered by the Department of Classical and Oriental Languages and Literatures Major in Classics with the A.B. Degree in liberal arts and sciences.

Minor in Classics.

Teaching major in Classics (concentration in Latin) with specialization in secondary teaching.

#### Classics Major

#### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

À minor is not required with this major.

#### Concentration in One Language

Preparation for the major. Greek 1 and 2; or Latin 1 and 2 (10 units.) Major. Thirty or 33 upper division units to include Classics 102A-102B; History 111A-111B; Philosophy 101; 18 units of Greek or 15 units of Latin.

#### Concentration in Two Languages

Preparation for the major. Greek 1, 2, and Latin 1, 2 (20 units).

Major. Thirty-six upper division units to include Classics 102A-102B; History 111A-111B; Philosophy 101; 12 units of Greek; and 9 units of Latin.

#### Classics Minor

The minor in classics consists of a minimum of 18 units, of which nine units must be chosen from Classics, Greek or Latin; Art 153; History 111A, 111B; Philosophy 101. The student must have 12 units of Greek or of Latin; he may fulfill part of this requirement in high school.

#### 164 /Comparative Literature

# Classics Major (Concentration in Latin)

#### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major may be used by students in Teacher Education as an undergraduate major for the A.B. degree in liberal arts and sciences.

# **Specialization in Secondary Teaching**

Preparation for the major. Latin 1 and 2. (10 units.)

Teaching major (undergraduate). A minimum of 24 upper division units to include nine units from Classics, History 111A-111B, or Philosophy 101; and 15 units in Latin.

Postgraduate year. Six units of graduate courses in Classics, Latin, Greek, or in an undergraduate minor approved by the Department.

#### Lower Division Courses

(See also courses in Greek and Latin.)

20. Latin and Greek Word Derivation (3)

A general and elementary course in philology. A study of Latin and Greek stems of most frequent occurrence in English, and of the English words derived from them. Formerly numbered General Language 20.

40. Life in Ancient Greece and Rome (2)

Aspects of life in classical times as drawn from literary and artifactual sources.

50. Scientific Terminology (2) I

Etymological and grammatical analysis of scientific terminology of Greek and Latin derivation.

#### 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

102A-102B. Classical Literature (3-3)

Reading in translation of Greek and Latin masterpieces. Semester I: Prose and the epic; authors include Homer, Herodotus, Thucydides, Vergil, Apuleius. Semester II: Drama and the short poem; authors include Aeschylus, Sophocles, Euripides, Aristophanes, Sappho, Catullus, Ovid. Taught in English. (Formerly numbered Comparative Literature 102A-102B.)

140. Classical Civilization (3)

Greek and Roman civilization from Bronze Age to late Empire. Integration of the arts, crafts, literature, philosophy, culture, social practices, and ancillary studies. 185. Topics in Classical Studies (1-4)

Topics in classical languages, literatures, cultures, and linguistics. May be repeated with new content. Maximum credit eight units. 199. Special Study (1-3) I, II

Prerequisite: Consent of instructor. Individual study. Maximum credit six units.

# **Comparative Literature** In The College of Arts and Letters

#### Faculty

Faculty assigned to teach courses in comparative literature are drawn from departments in the College of Arts and Letters.

# Offered by Comparative Literature

Major in comparative literature with the A.B. degree in liberal arts and sciences. Minor in comparative literature.

# **Comparative Literature Major**

# With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. No more than 48 units in comparative literature and English courses can apply to the degree. A minor is not required with this major.

Preparation for the major. Any two lower division courses in Comparative Literature.

Major. A minimum of 24 upper division units to include eighteen units in comparative literature courses. With the approval of the adviser, six units in one of the following interest areas: (1) Foreign Language Literature. Recommended for students who expect to do graduate work in comparative literature. Courses may be taken in literature of any foreign language. (2) English Language Literature. Courses may be taken in American and British literature. (3) Comparative Studies. Courses may be taken in areas with a "studies" orientation such as Afro-American Studies, Mexican-American Studies, Urban Studies, Women's Studies, Jewish Studies and the like.

#### **Comparative Literature Minor**

The comparative literature minor consists of a minimum of 15 units in comparative literature, nine of which must be upper division. The comparative literature minor is not available to students majoring in English.

#### Lower Division Courses

Since all reading assigned for classes in comparative literature is in English, knowledge of a foreign language is not required.

52A-52B. World Literature (3-3) I. II

Selected works from various continents and cultures. Semester I: prior to 1500; Semester II: since 1500.

70A-70B. Introduction to Oriental Literature (3-3)

Major writings in translation, with emphasis each semester on the literature of one oriental country.

80A-80B. Third World Literature (3-3)

Modern literature from Third World cultures. Semester I: Literature from Africa, Asia, and Latin America. Semester II: Literature by ethnic minorities in the U.S.

90. Topics in Comparative Literature (3) I, II

An introduction to the subject matter of comparative studies in literature. Focus on a specific movement, theme, figure, genre, etc. May be repeated once with different material.

# **Upper Division Courses**

105. The Bible as Literature (3) I, II

Same course as English 105.

Prose and poetry of the King James version. (Formerly numbered Comparative Literature 115.)

120. Medieval Literature (3)

Representative selections from authors of the Middle Ages. (Formerly numbered and entitled: Comparative Literature 155, Literature of the Middle Ages.)

122. Continental Renaissance (3)

Representative selections from authors of the Renaissance period in continental Europe. (Formerly numbered Comparative Literature 156.)

124. Seventeenth and Eighteenth Century Continental Fiction (3)

Selected works by novelists and short story writers of continental Europe prior to 1800. 125. Nineteenth Century Continental Fiction (3)

Selected works by novelists and short story writers of continental Europe between 1800 and 1900. (Formerly numbered and entitled: Comparative Literature 101A, Modern Continental Fiction.)

126. Modern Continental Fiction (3)

Selected works by novelists and short story writers of continental Europe since 1900. (Formerly numbered Comparative Literature 101B.)

138. Introduction to Aesthetic Appreciation (1) I

(Same course as Humanities 138)

Major forms of expression and aesthetic experience in art, music, and literature, presented by an interdepartmental staff through lectures, demonstrations, and panel discussions.

145. Modern Latin American Literature (3) I, II

Reading selections from major Latin American authors.

150. The Epic (3)

Selected epic poems from world literature; emphasizes the Western epic tradition from Homer to the present.

151. Fiction (3)

A comparative approach to themes and forms in fiction (novel and short story). Focus of course to be set by instructor. May be repeated once with different content.

152. Drama (3)

Forms and themes in drama. Focus of course to be set by instructor. May be repeated once with different content. (Formerly numbered and entitled: Comparative Literature 152A-152B, World Drama.)

# 166 / Criminal Justice Administration

153. Poetry (3)

A comparative approach to themes and forms in poetry. Focus of course to be set by instructor. May be repeated once with different content.

160. Proseminar (3)

An intensive study of a topic to be selected by the instructor. May be repeated once with different content.

170. Studies in Modern Oriental Literature (3)

Types of recent literature in translation, with emphasis on the writing of one oriental country. May be repeated once for additional credit with new material.

175. Near Eastern Literature (3) I, II

Selections from the literature of the Near East: Persian, Arabic, Turkish, etc. Specific topic to be announced in class schedule. May be repeated with new content. Maximum credit six units.

180. Afro-American Literature (3)

Selected works by black authors in Africa, North and South America, and the Caribbean; intercontinental influences and the theme of black identity.

185. Yiddish Literature (3) I. II

Selected works from the Jewish communities of Central Europe.

186. Modern Jewish Literature (3) I, II

Selected works by Jewish authors from the last half of the nineteenth century to the present, with emphasis on the United States and Israel.

190. Literary Movements (3)

A movement or theme in world literature-such as symbolism, realism, existentialism, alienation, or revolution. May be repeated for a maximum of six units credit.

191. Literary Use of Legend (3)

Literary treatment of such legendary figures as Don Juan, Faust, and Ulysses, in a wide range of literature and genres.

192. Major Individual Authors (3)

In-depth study of the works of a major author, such as Sophocles, Dante, Cervantes, Goethe, Dostoyevsky or Proust. Maximum credit six units.

193. Literature and Other Disciplines (3)

Comparative study of relationship between literature and another field, such as art, music, philosophy, psychology, political science, or social science. Examples: novel and film, black literature and black music, theatre and politics. May be repeated with new content. Maximum credit six units.

194. Concepts in Comparative Studies (3)

Basic concepts in comparative studies in literature (e.g. influence, movement, figure, genre, etc.); their validity, usefulness and limitations. May be repeated once with different content.

195. Literary Uses of Languages (3)

Study of the functions of language in literary writings. May take the form of translation workshop, stylistic studies, etc. May be repeated once with different content.

196. Folk Literature (3) Studies in the ballad, bardic poetry, oral and popular literature and folklore. May be repeated once with different content.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor.

# Criminal Justice Administration In Public Administration and Urban Studies In the College of Professional Studies

Faculty

Faculty assigned to teach courses in criminal justice administration are drawn from public administration and urban studies.

Offered by Public Administration and Urban Studies

Major in criminal justice administration; with the B.S. degree in applied arts and sciences. Master of Science degree in criminal justice administration.

# Criminal Justice Administration Major

#### With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements on page 57 of this catalog. A minor is not required with this major.

Preparation for the major. Political Science 2, Sociology 1, Public Administration 90 and a lower division course in statistics. Students who plan to enter the criminal justice field (police, courts, corrections) are strongly advised to take a minimum of 21 units of lower-division work in criminal justice or criminology at an institution offering work in this field.

Major. A minimum of 36 upper division units to include Public Administration 140 and 197 or 198, Criminal Justice Administration 146; nine units selected from Criminal Justice Administration 116, Sociology 110, 113, 114, 125, 140, Mexican-American Studies 103, 104, Administration 110, Sociology 110, 113, 114, 125, 140, Mexican-American Studies 103, 104, Political Science 132, 135, 138, 139; and eighteen additional units selected from: any of the above courses not taken to satisfy the nine unit requirement, and Criminal Justice Administration 110, 111, 112, Public Administration 136, 141, 145, 148, 152, 161, 162, 199; Sociology 111, 112, 122, 146, 147, 148; Psychology 106, 145, 150, 152, 153; Mexican-American Studies 102, 105; Social Welfare 100, 180; Anthropology 150.

#### **Upper Division Courses**

110. Law Enforcement Administration (3)

Prerequisite: Sociology

Administrative relationships within the criminal justice process with special reference to problems of courts and police and probation agencies.

111. Administration of Juvenile Justice (3)

Prerequisite: Sociology 114 or Criminal Justice Administration 110 or 146.

Administration of programs for treatment of juvenile offenders by police, probation and courts.

112. The Administration of Criminal Law (3)

Prerequisite: Criminal Justice Administration 110 or 146 or Political Science 135 or 139A. Basic concepts of the criminal law; elements of crime and the administrative processes of law enforcement.

113. Selected Topics in Criminal Justice Administration (3)

Selected current topics in criminal justice administration.

116. Contemporary Correctional Administration (3) II

Prerequisite: Sociology 113 or 114.

The problems encountered in administering modern correctional institutions, forestry and road camps, detention homes, and jails. (Formerly numbered Sociology 116.)

117. Juvenile Deviance and The Administrative Process (3)

Prerequisite: Sociology 114, or Criminal Justice Administration 110 or 146.

The activity of those in the administrative system who process juvenile deviance.

146. Administration of Justice (3) I, II

Prerequisite: Public Administration 140 or Political Science 138 or 139A.

Fundamental problems in judicial administration in law enforcement, organization and management, and issues in judicial reform and in public safety.

188. Probation and Parole (3) I

Prerequisite: Criminal Justice Administration 116 or 146. Basic concepts, history, legislation, and practices used in work with juveniles and adults who have been placed on probation or parole; criteria of selection, methods of supervision, and elements of case reporting. (Formerly numbered Social Welfare 188.)

#### **Graduate Courses**

210. Seminar in the Administration of Criminal Justice (3) Prerequisite: Criminal Justice Administration 110 or 146.

Administrative problems of criminal justice systems.

211. Seminar in Correctional Group Method (3)

Prerequisite: Sociology 113 or 114 or Criminal Justice Administration 111 or 188. An exploration of current research and use of group methods in the correctional segment of the criminal justice system.

212. Seminar in the History of Correctional Reform (3)

Prerequisite: Criminal Justice Administration 111 or 188 or Sociology 113 or 114. The historical development of concepts and practices in the field of corrections with emphasis upon developments in the United States.

216. Seminar in Correctional Administration (3)

Prerequisite: Criminal Justice Administration 116.

Selected problems in the administration of correctional problems and institutions. Maximum credit six units applicable on a master's degree.

168 / Drama

# Drama In the College of Professional Studies

#### Faculty

Emeritus: Povenmire, Sellman Professors: Amble, Powell, Stephenson (Chairman) Associate Professors: Harvey, Howard, G. Assistant Professors: Annas, Lessley, McKerrow, Mossman, Owen

# Offered by the Department

Master of Arts degree in drama.

Major in drama with the A.B. degree in applied arts and sciences. Minor in drama.

Teaching major in drama with specialization in secondary teaching.

Teaching minor in drama with specialization in both elementary and secondary teaching.

# Drama Major

# With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

Preparation for the major. Drama 5, 30, 31, 40, and 50. (15 units.)

Note: Drama 10 and 20 should be taken as part of the general education requirements.

Major. A minimum of 24 upper division units in drama to include Drama 120, 127, 128, 132, 140A, 160A, 160B, and four units of electives in drama (except Drama 142 and 199) selected with the approval of the adviser. In addition to course requirements the student must participate in a total of five Major Theatre performances and three Studio or Experimental Theatre activities.

# **Emphasis in Design for Drama**

Preparation for the major. Drama 30 or 31, 40, 50. (12 units.)

Note: Drama 5 and 10 should be taken as part of the General Education requirements. Major. A minimum of 24 upper division units in drama to include Drama 127A, 140A, 140B, 145A, 148, 152A, 160A, 160B. In addition to course requirements the student must participate in a minimum of five Major Theatre performances and three Studio or Experimental Theater activities.

# **Emphasis in Design for Television**

Preparation for the major. Drama 40, 50, Telecommunications and Film 83. (15 units.) Major. A minimum of 24 upper division units to include Drama 101, 140A, 140B, 148, 152A or Telecommunications and Film 180, Telecommunications and Film 150, 156, and 162 or 184.

#### Drama Minor

The minor in drama consists of a minimum of 21 units in drama to include Drama 5, 30 or 31, 40, 50 and nine units of upper division electives in drama.

#### Drama Major

#### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major, with specialization in secondary teaching, may be used by students in Teacher Education as an undergraduate major for the A.B. degree in applied arts and sciences.

# Specialization in Secondary Teaching

Preparation for the major. Drama 30, 31, 40, 50, and Telecommunications and Film 1 or 70. (15 units.)

Note: Drama 5 and 10 should be taken as part of the General Education requirements. Teaching major (undergraduate). A minimum of 24 upper division units to include Drama 120, 127, 128, 132, 140A, 160A, 160B, and four units of electives in drama (except Drama 142 and 199) selected with the approval of the adviser.

Postgraduate Year. Six upper division or graduate units selected from the following: Drama 109, 121, 122, 131, 145A-145B, 148, 152A, or any 200-numbered course in drama with Drama Minor

#### For The Standard Teaching Credential

### **Specialization in Elementary Teaching**

The minor in drama for elementary teaching consists of not less than 21 units in drama to include Drama 5, 30 or 31, 40, 50, and nine units of upper division electives in drama.

# Specialization in Secondary Teaching

The minor in drama for secondary teaching consists of not less than 21 units in drama to include Drama 5, 30 or 31, 40, 50, and nine units of upper division electives in drama. **Lower Division Courses** 

5. Introduction to the Theatre (3) I, II Three lectures per week and fifteen hours of laboratory per semester.

A survey of theory and practice in the contemporary theatre, including its literary, critical, and technical aspects viewed against historical backgrounds.

8. Verse Choir (2) I, II

Three hours.

Participation in verse speaking chorus to develop quality, range of tone, and ability in dramatic visualization of poetry. Lectures and readings on the nature, artistic function and history of the Verse Choir. Maximum credit four units, including lower division and upper division courses 8 and 108.

10. Voice and Diction (3) I, II

Prerequisite: Drama 5.

Exercises and drills to improve the quality, flexibility and effectiveness of the speaking voice leading to good usage in standard American speech. Preparatory to further courses in drama.

#### 20. Dramatic Heritage (3) I

Three lectures and attendance at selected performances.

Survey of dramatic literature from classical to the modern period, including classical, medieval, Renaissance, Restoration, neo-classical, romantic, realistic and modern plays.

30. Elementary Acting (3) I, II

Prerequisite: Drama 5. Three lectures per week and 30 hours of laboratory per semester.

Development of the individual's ability to express thought and emotion through the effective use of the voice and body. These fundamental skills may be applied to stage, radio, and television acting.

31. Intermediate Acting (3) I, II

Three lecture-demonstrations per week and 30 hours of laboratory per semester.

Prerequisite: Drama 30.

Continuation of Drama 30, emphasizing the application of fundamental skills to the problems of emotion, timing, characterization, and ensemble acting.

32. Movement and Mime for the Theatre (3) I

Prerequisite: Drama 5.

Two lectures and three hours of laboratory.

Basic disciplines of locomotor and axial body movement for the stage director and actor; introduction to mime. The relationship between body expression and character portrayal.

40. Dramatic Production (3) I, II

Prerequisite: Drama 5.

Two lectures and three hours of laboratory.

Technical practices and organization of production for theatre and television. Practice in drafting and construction of scenery for the college productions.

47. Sound in the Theatre (2) I

One lecture and three hours of laboratory.

Techniques, theory, and procedures necessary to develop sound, music, and effects integrated into theatre production.

50. Elementary Stage Costume and Makeup (3) I

Prerequisite: Drama 5.

Two lecture-demonstrations and three hours of laboratory

Basic theories, techniques, and procedures of costume production and makeup application for stage, film, and television. Practical training in the construction of stage costumes and application of makeup for departmental productions.

55. Children's Theatre (3) I

Examination of existing philosophies and practices dealing with children's theatre presentations. Theory and technique of selecting and producing plays for children. Introduction to directing for children's theatre. Practical experience through participation in college-sponsored productions.

341-5 4 530

## 170 / Drama

#### 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

101. Management of Drama Activities (1) I, II

Planning, preparation, management and supervision of drama tournaments, festivals and other interscholastic and intrascholastic activities under the supervision of the drama staff. Maximum credit two units.

108. Advanced Verse Choir (2) I, II

Three hours.

Participation in verse speaking chorus to develop quality, range of tone, and ability in dramatic visualization of poetry. Lectures and reading on the nature, artistic function and history of the Verse Choir, with a written report or project. Maximum credit four units, including lower division and upper division courses, 8 and 108.

#### 109. Verse Choir Directing (2 or 3)

Organizing a given group as a Verse Choir, considering age, voice quality, background, selection and arrangement of material, and techniques of directing. Demonstration and practice of techniques to improve speech through the Verse Choir.

110. Creative Dramatics (3) I, II

Instruction and training in the principles and techniques of creative dramatization for work with children in the classroom and recreation. Emphasis on the development of the child emotionally and socially through dramatic improvisation.

115. Directing for Children's Theatre (3) II

Prerequisite: Drama 55.

Staging and technical problems relative to the production of plays for children; casting procedures, blocking and characterization principles, rehearsal and scenic techniques. Practical experience through college-sponsored productions.

120. Play Analysis (3) I, II

The structure and style of drama. Several short plays and one full-length play are read, discussed and analyzed. 121. Theatre Criticism (3) I

Prerequisites: Drama 5 and 120.

A consideration of the problems and practices of dramatic criticism as applied to theatrical production in the past and present.

122. Playwriting, the One-Act Play (3) I, II

Lectures, discussion and reading of one-act plays written by the students.

123. Playwriting, the Long Play (3) II Prerequisite: Drama 122.

Lectures and analytical discussions of full-length plays written by students. 124. Script Writing for the Musical Theatre (3) I

Prerequisite: Drama 122

Lectures, analytical discussions, and readings of one-act and full-length scripts written for the musical stage by students. 125. Original Dramatic Works: Production Laboratory (3) II

Nine hours of laboratory

Prerequisites: Drama 30, 31, and consent of instructor.

Staging of original one-act and full-length plays, in traditional and experimental productions, working in conjunction with the students in the playwriting and directing classes.

126. Theory of Production for the Musical Stage (3) I

Prerequisites: Drama 31 and consent of instructor. Theory and principles of production of modern musicals. 129A-129B. Children's Theatre Workshop (3-3)

Prerequisite: Drama 115.

Production of plays for child audiences, with emphasis on elementary and junior high levels. Practical experience through participation in college-sponsored productions, 130. Accents and Dialects for the Stage (3) II

Prerequisite: Drama 30.

Various accents and dialects most frequently occurring in stage productions. 131. Advanced Acting Theory (3) I, II

Prerequisite: Drama 30 or 31.

The theories and principles of acting.

132. Advanced Acting (3) I, II Prerequisite: Drama 31.

Problems in characterization: Acting styles of the great periods in theatre history.

137. High School Play Directing (2)

Two hours of laboratory

Prerequisites: Drama 40 and 127A. Theory and practice of selecting, directing, and producing dramatic presentations in high school, with emphasis upon low-budget and creative methods and techniques most practicable and effective in the high school drama program.

140A. Scenic Design (3) I

Prerequisite: Drama 40.

Techniques and procedures in the application of principles of design, color and perspective in the designing and painting of scenery for various types of productions for stage, television and cinema.

140B. Styles in Scenic Design (3) II

Prerequisite: Drama 140A.

History of scenic design and the application of contemporary styles to various types of dramatic production for stage, television and cinema.

142. Theatre Workshop (2) I, II S (3 or 6)

Two hours of activity per unit.

A laboratory to give the student a variety of experience in the theatre including acting, lighting, scenery, costumes and stage management. Maximum credit six units.

145A-145B. Stage Lighting (3-3) I, II

Two lectures and three hours of laboratory. Prerequisite: Drama 145A is prerequisite to 145B.

Light, color, lighting instruments, and control equipment, including the design and planning of lighting for plays.

148. Advanced Dramatic Production (3)

Two lectures and three hours of laboratory.

Prerequisite: Drama 40.

Scenery drafting and construction, with attention to the multiple-set play. Planning of scenery construction and rigging for stage and television productions.

151. Costume, Movement, and Manners (3) I

Prerequisite: Drama 50.

Interrelationship of period costumes on the movement and manners of the time and their application on the stage.

152A-152B. Costume History and Design for the Theatre (3-3) I, II Two lectures and three hours of laboratory.

Prerequisites: Drama 50. Drama 152A is prerequisite to 152B.

Chronological study of clothing and theatrical dress from earliest times to the present, with practical applications in terms of contemporary costume design for the theatre.

A. Egyptian through Cavalier periods. Elements and principles of costume design.

B. Restoration period to the present. Designing costumes for the whole play.

154. Costume Construction Techniques (3) I

Two lecture-demonstrations and three hours of laboratory.

Prerequisites: Drama 50, 140A, 152A-152B.

Period pattern drafting, draping, cutting, construction. Wig, millinery, armour, mask, accessory construction. Costume paint and dye techniques.

157. Stage Direction (3) I, II

Two lectures and three hours of laboratory; attendance of one-act plays and selected performance.

Prerequisites: Drama 30 or 31, 120, 132 and consent of instructor.

Planned for prospective directors of plays in schools, colleges, and community theatres. A comprehensive study of the various problems confronting a stage director. (Formerly numbered Drama 127A.)

158. Stage Direction: Scenes (2) I, II

One lecture and three hours of laboratory; attendance of one-act plays and selected performances.

Prerequisites: Drama 157 and consent of instructor.

Experience and group evaluation in directing scenes in acting classes. (Formerly numbered Drama 128.)

## 172 / Drama

159. Stage Direction: One-act Plays (3) I, II

One lecture and six hours of laboratory; attendance of one-act plays and selected performances.

Prerequisites: Drama 157 and consent of instructor. (May be substituted for Drama 158 as requirement in directing.)

Experience and group evaluation in directing one-act plays before departmental or public audiences. (Formerly numbered Drama 127B.)

160A-160B. History of the Theatre (3-3) I, II

The theatre from primitive times to the present. Special attention will be given to the theatre as a mirror of the social and cultural background of the various countries and periods in which it is studied. Drama 160B may be taken without 160A.

165. History of American Theatre (3) I, II

Prerequisites: Drama 160A or 160B, and consent of instructor. American theatre and drama from Colonial times to the present day. Readings of plays and primary documents. Social and cultural background.

166. Honors Course (1-3) I, II

Refer to Honors Program.

175. Theatre Management and Promotion (3) I, II

Two lectures and three hours of laboratory.

A practical and correlated study of the college and university theatre; principles of organization, programming, production, budgets, box office, and promotional procedures. 177. Management of Children's Theatre (3)

Prerequisite: Drama 115. History and objectives of theatre for the child audience in the United States and England. Survey of existing educational, community, and professional children's theatre programs. Managing theatre for children. Practical experience through participation in college-sponsored productions.

178. Directing the Period Play (3) II

Two lectures and three hours of laboratory. Prerequisite: Drama 127B.

Staging and directing problems related to the production of plays from the great periods in theatre history. Special attention to dramatic values, style, mood, creative directing and production approaches.

198. Selected Topics in Drama (1-3) I, II Prerequisite: Twelve units in Drama.

A specialized study of selected topics from the areas of drama. May be repeated with new content. Maximum credit six units.

199. Special Study (1-3) I, II

Individual Study. Six units maximum credit. Prerequisite: Consent of instructor.

## **Graduate Courses**

200. Research and Bibliography (3)

Basic reference works, scholarly and critical journals; introduction to bibliographical techniques; exercises and problems in methods and exposition of research as it relates to the various areas of speech. Recommended for first semester of graduate work, and prerequisite to advancement to candidacy.

235. Seminar in Children's Theatre (3)

Prerequisites: Drama 110 and 115.

Modern developments and trends in children's theatre in educational, civic, and professional programs in the United States and England. 237. Projects in Children's Theatre (3)

Prerequisites: Drama 110 and 115.

Special individual problems and projects related to all areas of dramatic production for children's theatre. 243. Seminar in Staging Practices for Theatre and Television (3)

An investigation of the recent developments of modern staging facilities. The application of technological advances and electro-mechanical devices to the scenic arts for theatre and

244. Seminar in Stage Direction (3)

Prerequisite: Drama 127A.

Projects in the aesthetic principles and the practices of stage direction with an emphasis on styles and historic periods. 245. Seminar in Lighting for Stage and Television (3)

Prerequisite: Drama 145A or 145B.

Projects concerned with the aesthetic and the technical problems of lighting in stage.

Economics / 173

246. Seminar in Design for Stage and Television (3)

The principles of design in the theatre with an emphasis on the historical development of theatrical costume or scenic environment. The investigation of recent tendencies in styles and their evolution. Each section may be taken once for credit.

A. Costume Design

Prerequisite: Drama 152A or 152B. B. Scenery Design

Prerequisites: Drama 140A, 140B, or 148.

247. Seminar in History of Theatre and Drama (3)

Prerequisites: Drama 120, 160A, and 160B.

A. British and Continental Theatre

**B.** American Theatre

248. Seminar in Dramatic Theory (3)

Prerequisites: Drama 120, 160A, 160B, and 200.

Problems in producing works of such playwrights as Ibsen, Strindberg, Chekhov, Shaw. May be repeated once with new content for a maximum of six units. Maximum credit six units applicable on a master's degree.

298. Special Study (1-3)

Individual study. Six units maximum credit. Prerequisite: Consent of staff; to be arranged with department chairman and instructor. 299. Thesis or Project (3)

Prerequisite: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# Economics

#### In the College of Arts and Letters

#### Faculty

Emeritus: Ryan

Professors: Anderson, Babilot, Barckley, Bridenstine, Flagg, Gifford, Jencks, Leasure, McClintic, Neuner (Chairman), Turner, M. S.

Associate Professors: Chadwick, Clement, Hardesty, Kartman, Madhavan, Nam, Poroy, Sebold, Venieris

Assistant Professors: Hambleton, Popp Lecturers: Ayanian, Conley, Stewart

Offered by the Department

Master of Arts degree in economics.

Major in economics with the A.B. degree in liberal arts and sciences.

Minor in economics.

Teaching major in economics, with specialization in secondary teaching.

Teaching minor in economics, with specialization in secondary teaching.

#### **Economics** Major

# With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

Two plans are provided for the major in economics: Plan A for those students expecting to pursue the study of economics beyond the A.B. degree; and Plan B for those students with a liberal arts interest, or for those who are interested in pre-legal education or a combined economics-business program.

#### Plan A

Preparation for the major. Economics 1A-1B and 2. (9 units.) Recommended courses in related fields: Mathematics 40 and 50.

Major. A minimum of 24 upper division units in economics to include Economics 104A-104B, 107, and 141. Economics 103A-103B may not be used to fulfill minimal upper division requirements.

Minor. A minor is not required with this major; however, the student is strongly advised to take a minor in mathematics. Recommended courses are Mathematics 40, 50, 51, 52, 121A-121B, 140A-140B, and 150A-150B.

#### Plan B

Plan B is a flexible program to meet the needs of several groups of students. Advisory

#### 174 / Economics

programs of study are available in the Economics Department office for the following groups: (a) pre-law majors; (b) a broad-ranging liberal arts interest; and (c) a combined economics and business interest.

Preparation for the major. Economics 1A-1B (or 103A-103B), and 2. Students planning careers in law or business are advised to take at least one semester of accounting.

Major. A minimum of 24 upper division units in economics to include Economics 100A-100B. Six of the 24 units may be in a related field to be selected with the approval of the departmental Academic Requirements Committee. (Economics 103A-103B may not be used to fulfill minimal upper division requirements in the major.)

Minor. A minor is not required with this major.

#### **Economics** Minor

The minor in economics consists of a minimum of 15 units in economics, nine of which must be upper division; Economics 103A-103B is not acceptable.

#### **Economics** Major

#### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major may be used by students in Teacher Education as an undergraduate major for the A.B. degree in liberal arts and sciences.

# Specialization in Secondary Teaching

Preparation for the major. Economics 1A-1B or 103A-103B, and 2. (9 units.)

Teaching Major (Undergraduate). A minimum of 24 upper division units in economics to include Economics 100A-100B. Economics 103A-103B may not be used to fulfill minimal upper division requirements in the major.

Postgraduate Year. Six units of graduate courses in economics to be selected with the approval of the department adviser.

#### **Economics** Minor

For the Standard Teaching Credential

# Specialization in Secondary Teaching

The minor in economics for secondary teaching consists of not less than 21 units to include Economics 1A-1B or 103A-103B and 15 upper division units in economics courses except 103A-103B selected with approval of the departmental adviser.

#### Lower Division Courses 1A. Principles of Economics (3) I, II

An introduction to principles of economic analysis, economic institutions, and issues of public policy. In this semester the emphasis is upon macro-analysis including national income analysis, money and banking, business cycles, and economic stabilization. Not open to students with credit in Economics 103A.

# 1B. Principles of Economics (3) I, II

Prerequisite: Economics 1A.

An introduction to principles of economic analysis, economic institutions, and issues of public policy. In this semester the emphasis is upon the direction of production, the allocation of resources, and the distribution of income, through the price system (micro-analysis); and international economics. Not open to students with credit in Economics 103B.

2. Statistical Methods (3) I, II

Prerequisite: Mathematics 3 or qualification on the Mathematics Placement Examination. Introduction to descriptive statistics, statistical inference, correlation, index numbers, and time series. Not open to students with credit for, or concurrent enrollment in, another course in statistics.

3. Current Topics in Economics (3) I

A non-technical course covering selected current policy issues and problems such as poverty, war and defense, educational economics, urban problems, and economics of racial

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

100A. Intermediate Economic Theory (3) I, II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Economic theory with special reference to the theory of the firm and the industry; value and distribution.

100B. Intermediate Economic Theory (3) I, II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Economic theory with special reference to national income analysis and the theory of investment.

101. History of Economic Thought (3) I, II

Prerequisites: Economics 1A and 1B or 103A and 103B.

The development of economics. Contributions of schools of thought and individual writers are examined with regard to their influence on economic theory and policy.

102. Comparative Economic Systems (3) I, II

Prerequisites: Economics 1A and 1B or 103A and 103B.

The economic aspects of laissez-faire and regulated capitalism, co-operatives, socialism, communism, nazism, fascism. Experience in Russia, Germany, United States, Great Britain. Criteria for evaluating economic systems. The individual and government in each system. Planning in a liberal capitalistic society.

103A. Economic Principles, Institutions, and Policies (3) I, II

Prerequisite: Six units in political science, history, or sociology. Income and employment theory and its applications. Not open to students with credit in Economics 1A. May not be used to fulfill minimal upper division requirements in the economics major or minor or special major.

103B. Economic Principles, Institutions, and Policies (3) I, II

Prerequisite: Economics 103A or 1A.

Price theory and its applications. Not open to students with credit in Economics 1B. May not be used to fulfill minimal upper division requirements in the economics major or minor or special major.

104A. Micro-Economic Analysis (3) I

Prerequisites: Economics 1A-1B (or 103A-103B) and Math 50.

Mathematical interpretation of micro-economic theory. Credit will not be given for both 100A and 104A.

104B. Macro-Economic Analysis (3) II

Prerequisites: Economics 1A-1B (or 103A-103B) and Math 50.

Mathematical interpretation of macro-economic theory. Credit will not be given for both 100B and 104B.

105. Welfare Economics (3) II

Prerequisites: Economics 1A and 1B, or 103A and 103B, and 100A.

Theories of individual and social well-being; economic and ethical bases of optimum welfare arrangements; individual values and social decision-making; tests of improvement; interdependence and externalities; public and private sectors; properties of social welfare functions.

107. Quantitative Economics (3) I, II

Prerequisites: Math 50 and Economics 1A-1B (or 103A-103B)

The quantitative approach to economic problems. The use of mathematics in economic analysis.

109. Advanced Economic Theory (3) II

Prerequisites: Economics 107, and either 100A-100B or 104A-104B.

Recent contributions to the advanced theory of the firm, consumer demand, employment and growth.

110. Economic History of Europe (3) I

Prerequisites: Economics 1A and 1B or 103A and 103B.

Economic development from the Middle Ages to the present. Particular attention is given to the impact of the Industrial Revolution on national economics, especially on England's commerce and industry

111A-111B. Economic History of the United States (3-3)

Prerequisites: Economics 1A and 1B or 103A and 103B.

American economic development and national legislation in the fields of agriculture, industry, and commerce. Semester I: 1600-1865. Semester II: 1865 to the present.

112. Capitalist Economy (3)

Prerequisite: three units in economics.

The relationship between the dominant economic and political institutions of capitalist organization and the major social problems of modern capitalism.

# 176 / Economics

114. Economic Problems of Latin America (3) I

Prerequisites: Economics 1A and 1B or 103A and 103B.

Economic development, institutions, and problems of Latin America.

115. Economic Problems of South and East Asia (3) I

Prerequisites: Economics 1A and 1B or 103A and 103B.

Economic development, institutions, and problems of China, India and Pakistan, Japan, and Southeast Asia.

118. The Economies of the Soviet Union and Eastern Europe (3) Prerequisites: Economics 1A and 1B, or 103A and 103B.

The development, institutions, and problems of the Soviet and East European economies. 119. Economic Problems of Africa and the Middle East. (3) II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Economic development, institutions, and problems of Africa and the Middle East.

131. Public Finance (3) I, II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Principles and practices of taxation and public expenditures. Economic effects of public spending, debts and taxation. Financing social security and other services. Fiscal policy and prosperity. Relation to inflation and deflation. Special emphasis on social problems involved. 132. Public Economics (3)

Prerequisites: Economics 100A or 131.

General equilibrium. Externalties of consumption and production, their impact on allocative efficiency. Theory of social wants and public goods supply. Theoretical treatment of individual and community preference ordering and decision-making. Proposals for improving the allocation of resources.

135. Money and Banking (3) I, II

Prerequisites: Economics 1A and 1B or 103A and 103B.

The elements of monetary theory. History and principles of banking with special reference to the banking system of the United States.

136. Policies for Macroeconomic Stabilization (3)

Prerequisite: Economics 1A or 103A.

Alternative policies for macroeconomic stabilization, including neo-Keynsian, Chicago, radical, and ecological views. Topics include GNP forecasting, dynamic models, monetary vs. fiscal tools, economic surplus, and zero GNP growth.

138. Urban and Regional Economics (3) I. II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Major influences affecting city location and growth; role of private and governmental institutions in influencing residential and other uses of land; major considerations in appraising, managing, financing, marketing, developing and taxation of urban property. Discussion of San Diego problems.

139. Location Theory (3)

Prerequisite: Economics 138.

The optimal location of economic activities. The effects of spatial distribution of resources and markets on the locational equilibrium of the firm.

141. Econometrics (3)

Prerequisites: Economics 2 and 107.

Measurement in economics. The construction and testing of simple economic hypotheses. Use of economic models involving multiple-regression analyis.

142. Business Cycles (3) I

Prerequisites: Economics 1A and 1B or 103A and 103B.

Fundamental factors in economic fluctuations. Examination of business cycle theories, and various policy proposals for economic stabilization. A consideration of current economic conditions and an examination of methods employed in preparing national economic

150. Labor Problems (3) I, II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Labor organizations and their policies, wages, strikes, unemployment, social insurance,

child labor, labor legislation, plans for industrial peace, and other labor problems. 152. Collective Bargaining (3) II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Structures of labor relations; management and union problems; public policy and collective bargaining; conditions of successful collective bargaining. 153. Comparative Labor Problems (3) I

Prerequisite: Economics 1A and 1B or 103A and 103B.

Comparative study of labor relations systems and labor movements in both advanced and developing nations. Individual study of a particular country of the student's choice.

Economics / 177

154. Economic Aspects of Human Resources (3) I, II

Prerequisites: Economics 1A and 1B, or 103A and 103B.

Analysis of health, education, and manpower within the context of government expenditure, economic growth, and the theory of human capital.

166. Honors Course (1-3) I, II

Refer to Honors Program.

167. Contemporary Issues (3) I, II

Prerequisites: Economics 100A and 100B.

Current policy issues and problems from an economic point of view. Maximum credit six units. An undergraduate seminar.

170. Government and Business (3) I, II Prerequisites: Economics 1A and 1B or 103A and 103B.

Governmental activities affecting business; the state as an entrepreneur and manager; governmental assistance to business; governmental regulation of business in its historical, legal and economic aspects, including recent developments in the United States and abroad; proposed policies.

171. Transportation Economics (3) I

Prerequisites: Economics 1A and 1B or 103A and 103B.

Economic impact of the availability and cost of transportation services. Organization, rate-making practices, financing and regulation of transportation agencies: air, surface, and water. Current issues of national transportation policy.

172. Public Utilities (3) II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Economics and regulation of utility enterprises. Growth, pricing, demand and cost behavior, financing, regulatory principles and techniques. Public power and other current policy issues.

173. Economics and Ecology (3) II

Prerequisites: Economics 1A and 1B, or 103A and 103B.

Relation of ecological problems to basic economic institutions. Examination of the apparent conflict between economic needs and ecological requirements. Economics of air, fresh water, ocean and land pollution, overpopulation and natural resource utilization. Investigation of possible solutions.

174. Economic Concentration and Monopoly Power (3) I

Prerequisites: Economics 1A and 1B or 103A and 103B.

The implications of economic concentration and monopoly. The evaluation of mergers, consolidations and other forms of monopoly power in terms of social and economic goals. Attempts to control monopoly power by antitrust laws, by policies regarding competitive practices and by other means.

# 175. Industry Studies (3) II

Prerequisites: Economics 1A and 1B or 103A and 103B.

Evaluation of the structure, conduct and performance of selected industries in terms of social and economic goals.

185. Poverty in the United States (3) II

Prerequisites: Economics 1A and 1B, or 103A and 103B.

Economic aspects of poverty and racial discrimination. Relation of poverty to the general economic structure and to macroeconomic conditions such as unemployment and inflation. Possible solutions.

189. Population and Economic Growth (3)

Prerequisites: Economics 1A-1B or 103A-103B.

Interrelationship between the components of population change (fertility, mortality, and migration) and economic growth in developed and underdeveloped areas.

190. International Economic Problems (3) Prerequisites: Economics 1A-1B or 103A-103B. Not open to students with credit in Economics 191 or 192.

International problems, economic communities, organizations, and other selected topics. (Formerly numbered Economics 192.)

191. International Trade Theory (3)

Prerequisites: Economics 100A-100B or 104A-104B.

The pure theory of international trade and commercial policy. (Formerly numbered Economics 190.)

192. International Monetary Theory and Policy (3)

Prerequisites: Economics 100B or 104B or 135.

Balance of payments, international capital movements and foreign exchange in relation to current theories and policies. (Formerly numbered Economics 191.)

# 178 / Economics

194. Capital and Growth Theory (3)

Prerequisites: Economics 100A-100B or 104A-104B.

Factors affecting the capital supply and the rate of growth of a developed economy.

195. Economics of Underdeveloped Areas (3) II

Prerequisites: Economics 1A and 1B or 103A and 103B.

The nature and causes of economic underdevelopment. Problems of and policies for the economic development of underdeveloped areas of the world. (Formerly numbered Economics 196.)

197. Research Design and Method (3) II

Prerequisites: Economics 2 and 107.

Instruction in the practical application of the various techniques of economic research to a range of problems typically encountered in the economics profession; sources and limitations of basic data, survey research, industry studies, economic forecasting, national impact studies, area and regional studies.

198. Investigation and Report (3) I, II

Open to economics majors only.

Independent study and investigation. Guidance in the collection, organization, and presentation of factual material. May be repeated for a maximum of six units; maximum

credit in 198 and 199 limited to six units. 199. Special Study (1-3) I, II

Individual study. Six units maximum credit. Prerequisite: Consent of Instructor.

# **Graduate Courses**

200A. Seminar in Advanced Economic Theory (3)

Prerequisites: Economics 104A and 104B, or 100A, 100B, and 107.

Theory of consumer and producer behavior. Determination of prices and resource allocation patterns in a market economy; partial and general equilibrium.

200B. Seminar in Advanced Economic Theory (3)

Prerequisites: Economics 104A and 104B, or 100A, 100B, and 107.

Theory of money, employment, and income determination. Alternative theories of consumption, investment, price level and rate of interest. Causes of instability in short and

201A-201B. Seminar in the Development of Economic Thought (3-3)

Prerequisites: Twelve units in economics.

A critical study of the development of economic thought.

202. Seminar in Comparative Economic Systems (3) Prerequisites: Economics 102 or 115 or 118.

Topics in comparative economic systems; the Soviet economy, the economy of communist China, and related subjects. 203. Economic Analysis (3)

Prerequisite: Classified graduate standing.

The theory of the firm in a market economy. Not open to students with credit in Economics 100A-100B; not applicable toward a master's degree in economics.

206. The Public Economy (3) Prerequisite: Economics 131 or Public Administration 162.

Determinants of the supply and demand for public goods; the social decision-making

processes in determining public goods; supply; financing public goods, taxes and expenditures; planned program budgeting and cost-benefit analysis. Not applicable toward

208. Development Planning (3)

Prerequisite: Economics 196.

Role of government in development. Choice of target and policy variables. Planning techniques and their application to the national development problems.

210. Seminar in Economic History (3)

Prerequisite: Economics 110 or 111A or 111B.

Individual study and group discussion on selected topics in economic history. 231. Seminar in Public Finance (3)

Prerequisite: Economics 131.

Advanced study of public finance problems and literature; research.

235. Seminar in Monetary Economics (3)

Prerequisite: Economics 135.

Analysis of theoretical issues associated with the demand for money, the money supply and process of money creation. Emphasis upon interaction of monetary and real factors in Education / 179

238. Seminar in Urban and Regional Economics (3)

Prerequisite: Economics 138.

Urban and regional economics; individual research and reports.

241. Seminar in Econometrics (3)

Prerequisite: Economics 141

The construction of large economic models. Identification, causal ordering and estimation. Simultaneous-equation techniques and other selected topics.

250. Seminar in Labor Economics (3)

Prerequisite: Economics 150 or 151 or 152.

Individual study and group discussion of selected topics in labor economics.

253. Comparative Labor Seminar (3)

Prerequisites: Economics 150 or 153.

Research in comparative labor problems, including problems of labor and social legislation, medical economics, poverty problems, labor force structural problems, and international labor movements.

272. Seminar in Utilities and Water Resources (3)

Prerequisite: Economics 172 or Economics 173.

Advanced study and group discussion of selected topics in utility economics and regulation, and the economics of water resource development.

274. Seminar in Economic Concentration and Monopoly Power (3)

Prerequisites: Economics 174 or both Economics 170 and 100A.

Selected topics in the field of economic concentration and monopoly.

290. Bibliography (1)

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's thesis.

292. Seminar in International Economics (3)

Prerequisite: Economics 190.

Resource allocation, income distribution, commercial policies, capital movements, balance of payments, and international monetary institutions. (Formerly numbered 295.)

295. Seminar in the Economics of Underdeveloped Countries (3)

Prerequisite: Economics 195.

Theories regarding underdevelopment and policies for development of economically underdeveloped countries.

297. Research (3)

Prerequisites: Classified graduate standing and consent of instructor.

Independent research project in an area of economics.

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# Education

In the School of Education

Member of the American Association of **Colleges for Teacher Education** 

#### Faculty

Emeritus: Alcorn, Apple, Bacon, Corbett, Hammack, E., Hammach, I., Hunter, Kinder, Linley, Madden, White, Yarborough

Professors: Anderson, E. L., Anderson, P. S., Baker, Ballantine, Blanc (Acting Associate Dean), Briggs, Bruce, Brydegaard, Charles, Crum, Cummins, Erickson, Fishburn, Fisher, J.S., Friedrich, Fulkerson, Gast, Gates, Gega, Gray, Groff, Halfaker, Hill, W., Holt, Huls, Inskeep, Kendall, LaPray, Lienert, LuPone, Malcolm, Miller, Mitchell, Nardelli, Person, Petteys, Platz, Prouty, Rixman, Ross, Rowland, Schrupp, Servey, Singer, Smith, H., Smith, R. D., Stautland, Stough, Strand, Tossas, Trimmer, Wetherill, Wilding.

Associate Professors: Anthony, Becklund, Bee, Burian, Burnside, Carnevale, Chamley, Clark, Cleveland, Doorlag, Duckworth, Elliott, Fearn, Forbing, Ford, Goodson, Hawley, Holman, Kaatz, McCabe, McClard, McCoy, McLevie, Meek (Acting Dean), Melton, Mooers, Moreno, Nagel, Pehrson, Retson, Sanner, Shaw, Steckbauer, Strom, Walsh, Warburton, Yesselman

Assistant Professors: Altamura, Becker, Berg, Birch, Botkin, Bradley, Cochran, Curry,

Education / 181

#### 180 / Education

Harrison, Hill, P., Klann, Manjos, McAllister, McFarlane, Morris, J., Morris, W., Murphy, Reel, Richman, Thompson, G., Treadway, Weir

Lecturers: Anderson, T., Barnier, Berry, Dawson, Evans, Fisher, W., Hammons, Harris, Jones, Loar, Lyons, McNary, Naas, Rezek, Robershaw, Sanchez, Schmock, Taylor, Thompson, C., Walt

# Offered by the School of Education

Master of Arts degree in education with concentrations in ten areas and a Master of Science degree in counseling. (Described in the Graduate Bulletin. Also refer to the section in this catalog on the School of Education.)

B.V.E. degree. (Described in the section on the School of Education.)

Teaching credentials in all areas. Refer to the section on the School of Education. Minor in Library Science.

#### **Library Science Minor**

The minor in library science consists of a minimum of 15 units in Education in the area of Educational Technology and Librarianship, six units of which must be in upper division

#### Lower Division Courses

A. Review of Arithmetic (0) I, II

H. Review of Handwriting (0) I, II

R. Review of Reading (0) I, II

S. Review of Spelling (0) I, II

Noncredit courses designed to increase competence in the skill subjects. For students who do not qualify on the respective sections of the Fundamentals Test required of all applicants to elementary teacher education.

99. Experimental Topics (2-4)

Refer to catalog statement on Experimental Topics on page 105.

Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

# **Upper Division Courses**

#### Social Foundation

100. The Secondary School (4) I, II

Prerequisite: To be taken concurrently with Education 180B. American Education in its social and historical setting. The secondary school curriculum,

and philosophies, issues, and social forces that influence the school. Not open to students with credit in Education 101 or 102. 101. History and Philosophy of Education (2) I, II, S

Historical backgrounds and underlying philosophies upon which the public school system has been established. Meaning of education, educational aims and values, and democracy and education. Not open to students with credit in Education 100.

102. Secondary Education (3) Irregular An introduction to understanding the development of secondary education and its present status as a social institution. Not open to students with credit in Education 100. 104. European Education and Cultural Change (3) II

Tradition and change in contemporary European education with special reference to England, France, Germany, and the U.S.S.R.

105. Education for Minority Youth (3) I, II, S

Specific behavior patterns of minority youth and their effect upon the school learning process.

# **Psychological Foundations**

110. Psychological Foundations of Education for Secondary Teachers (5) I, II Five lectures and instructional media laboratory.

Prerequisites: Admission to Teacher Education and education program approved by the Coordinator of Secondary Education. To be taken concurrently with Education 180A and

The nature of growth and development, principles and theories of learning, guidance practices, test and measurements. Not open to students with credit in Education 112 or 113.

111. The Learner in the Elementary School (3) I, II, Summer

Prerequisites: Psychology 1 and admission to Elementary Education.

Intellectual, emotional, social, and physical development during childhood and early adolescence, including basic principles of child guidance and counseling. Directed observation required.

112. The Learning Process in the Elementary School (3) I, II, Summer Prerequisite: Education 111.

Psychological principles for effective classroom teaching; techniques of measurement and evaluation for the diagnosis and improvement of learning.

113. Growth and Development of the Adolescent (3) Irregular

Adolescent physiological, psychological, social, and emotional development, including principles of mental hygiene and guidance. Field work with adolescent groups in the community is required. Not open to students with credit in Education 110.

114. Interpretation of Early Childhood Behavior (3) Irregular in Summer

For kindergarten-primary teachers treating the analysis and interpretation of early childhood behavior. Emphasis on understanding and interpreting the causative factors in typical behavior of children to parents, social workers, teachers, and others concerned with the guidance of kindergarten-primary children.

115. Guidance in Elementary Education (3) I, II, Irregular A study of the basic principles of guidance and their function in the educational process as applied in the elementary school.

116A-116B-116C. Child Study Laboratory I, II Prerequisite: 116A is prerequisite to 116B, and 116B to 116C.

Development of background and procedures for child study and their application to field situations. Field work required. For teachers in service. Offered only in Extension.

117. Teacher Effectiveness Training (2 or 3)

Prerequisites: Psychology 1 and credit or concurrent registration in student teaching. Skill training in modifying undesirable behavior of individuals or groups, resolving conflicts, solving problems, and fostering improved thinking through group discussion.

118. Supervision of Child Welfare and Attendance (3) Irregular

Content includes laws relating to children, guidance principles, social casework, agency relationships, conference techniques, home visitation methods, employment supervision, attendance work, child accounting, familiarity with testing techniques.

137. Reading Difficulties (3) I, S

Two lectures and two hours of laboratory.

Prerequisites: Education 112 and 131A or 122.

Reading difficulties, their causes, prevention, and correction. Remedial practices in reading useful to the classroom teacher, school counselor, and reading specialist.

151. Measurement and Evaluation in Elementary Education (3) I, II, S

Should follow Education 112 for elementary credential candidates.

The use of intelligence and achievement tests in the diagnosis and improvement of learning; construction of objective examinations; problems of evaluation in education; the elements of statistical techniques.

152. Measurement and Evaluation in Secondary Education (3) Irregular

Problems of evaluation in secondary education, construction of examinations, elements of statistics, selection and interpretation of standardized measures. Not open to students with credit in Education 120.

153. Quantitative Methods in Educational Research (3) I, II

Basic tests of statistical significance with special reference to the interpretation of educational data.

#### Methods-Secondary

120. The Teaching Process (3) I, II

To develop teacher competency at the secondary level in professional and community relationships; in general methods and materials; in planning for teaching; and in evaluating learning activities.

121. Methods and Materials of Instruction: Major (2) Minor (2) except Education 121E (3) and Education 121Q (3)

Lecture courses, except that Education 121K and 121N meet for one lecture and three hours of laboratory.

Professional courses in specific teaching fields usually taken concurrently with directed teaching. Each course emphasizes the application of best practices with reference to each subject area named.

Subject fields for section 121 are as follows:

#### Offered in the Fall Semester

A. Methods in Art

- Methods in English **B**.
- Methods in Home Economics C.
- Methods in Industrial Arts D.
- Methods in Foreign Languages E.
- Methods in Mathematics

**Offered in the Spring Semester** 

- Methods in Art
- Methods in English B.
- Methods in Home Economics
- Methods in Industrial Arts D.
- E. Methods in Foreign Languages
- F. Methods in Mathematics

#### Education / 183

#### 182 / Education

- Methods in Physical Science Methods in Speech Communication
- Methods in Social Science M
- Methods in Life Science
- 0. Methods in Drama
- Q. Methods in Business Skills
- R. Methods in Choral Music
- Methods in Instrumental Music S.
- Methods in Physical Science K. M. Methods in Social Science
- Methods in Life Science
- Methods in General Science
- R. Methods in Choral Music Methods in Instrumental Music
- **Offered** Irregularly
- Methods in Health Education H. Methods in Phys. Ed. (Men)
- Methods in Phys. Ed. (Women)

# 122. Reading in Secondary Education (3) Irregular

The nature of the reading program, development of techniques and skills, vocabulary development, reading in the content fields, the differentiated attack, measurement, diagnosis, and remediation.

123. Organization and Operation of the Reading Laboratory (3) I, II Lectures and laboratory to eight hours per week.

Prerequisite: Education 122.

Problems and techniques in organizing and operating the reading laboratory in secondary schools and colleges; current research and laboratory experiences.

126. Workshop in Secondary Education (3 or 6) Irregular

Designed to meet the needs of individuals or groups of teachers who wish to develop or continue the study of some problem with the consultation of the university staff and the San Diego County Curriculum Staff. May be repeated with new content. Maximum credit six units

128A. Principles of Adult Education (2)

History, philosophy, objectives, and administration of adult education.

128B. Methods and Materials in Adult Education (2)

Identification, selection, and utilization of teaching methods, techniques and materials appropriate for adults.

128C. Psychological Foundations of Adult Education (2)

Educational psychology and developmental problems of adults.

128D. Human Relations and Counseling in Adult Education (2)

Prerequisite: Possession of a valid teaching credential.

Principles, procedures, and issues appropriate to human relations and counseling in adult education.

128E. Workshop in Adult Education (1-3)

Prerequisite: Possession of a valid teaching credential.

Designed to meet the needs of individuals or groups of adult educators who wish to study special problems in adult education.

157. Occupational Education in the Community College (4)

Three lectures and three hours of laboratory in a community college.

Prerequisite: Two years of occupational experience in a community college subject-matter area

Principles, practice, scope, and functions of occupational education in the community college. Methods and materials of instruction, curricular development, and evaluation.

158. Occupational Student (4)

Three lectures and three hours of laboratory in a community college. Prerequisite: Education 157.

The learning process and individual differences, behavioral characteristics of youth, race and ethnic relations in the community college.

159. Directed Teaching (2 or 4)

Prerequisite: Education 157 or 158.

Systematic observation, participation, and teaching under supervision in a occupational area in a community college.

# Methods-Elementary

130. First Elementary Education Practicum (2) I II, (3) S

Four hours of activity for 130A; four hours of activity for 130B; six or more hours of activity and educational technology laboratory for 130C.

Prerequisite: Concurrent registration in Education 111, or consent of Coordinator of Elementary Education.

Curriculum, principles, methods, and materials of instruction (including educational technology), and participation in elementary education, in the areas listed A through C below. A. Arithmetic

Language Arts

C. Student Teaching (not offered in the summer)

416-5 5 265

421-5 5 290

131. Second Elementary Education Practicum (2) I, II, S, except 131D (3) or 131E (4) Four hours of activity for 131A; four hours of activity for 131B; six or more hours of activity for 131C or 131D or 131E; and instructional educational technology laboratory

Prerequisite: Education 111 and 130; concurrent registration in Education 112 or consent of Coordinator of Elementary Education.

Curriculum, principles, methods, and materials of instruction, including instructional educational technology and participation in elementary education, in the areas listed in A through E below.

A. Reading

#### **B.** Social Studies

offered in the summer) 132. Third Elementary Education Practicum (2) I, II, S, except 132D (4) or 132E (5)

Four hours of activity for 132A, for 132B, and for 132C; ten or more hours of activity for 132D or 132E

Prerequisites: Education 112 and 131.

Curriculum, principles, methods, and materials of instruction, including instructional media, and participation in elementary education, in the areas listed in A through E below. D or E. Student Teaching (not

offered in the summer)

C. D. or E. Student Teaching (not

C. Music

133. Children's Literature in Elementary Education (3) Irregular

A survey of children's literature; the selection and use of material in the elementary classroom.

134. Laboratory in Elementary Education (3) S

A general course in observation and theory, including a study of arithmetic, reading, language, music, science, social studies, art, spelling. Students in this course will observe in the summer demonstration school and discuss with the staff the teaching procedures.

135. Workshop in Elementary Education (3 or 6) Irregular

To meet the needs of individual or groups of teachers who desire to study selected problems in elementary education. The observation of classroom teaching will be provided for members in attendance. Interested persons should correspond with the Coordinator of Elementary Education, California State University, San Diego. May be repeated with new content. Maximum credit six units.

136. Modern Foreign Languages in Elementary Education (3) Irregular

Prerequisites: French or German or Spanish: (1964-1965) courses 1, 2, 10, 11, or equivalents; (1965-1966) courses 1, 2, 3, 10, 11, or equivalents; (1966-1967) courses 1, 2, 3, 4, 10, 11, or equivalents.

Methods of teaching modern foreign languages in the elementary school, emphasizing the audio lingual approach. Students will produce materials and learn to use tapes, film strips, records, films, language laboratories, and written materials.

138A. Curriculum in Elementary Education (3) Irregular

Formerly Education 138.

Emphasis upon the selection and development of content, teaching methods, and materials as they relate to social needs; evaluation procedures; psychological principles, and the nature of the learner.

138B. Social Studies Unit Construction in Elementary Education (3) Irregular

Prerequisite: Education 131B.

Selecting and organizing content, analyzing materials, and developing instructional units in elementary social studies for classroom use.

139. Kindergarten-Primary Practicum (3) I, II, S

The theory of early childhood education and the materials and teaching techniques used in the kindergarten. This course must be taken concurrently with Education 132C when the student teaching assignment is in the kindergarten.

#### **Educational Technology and Librarianship**

140. Educational Technology (3) I, II, S

Two lectures and three hours of laboratory.

Applications of educational technology to instruction and learning. Individualization through the use of media. Includes film, TV, simulation, programmed instruction, computers and multi-media.

141. Production of Instructional Materials (3) I, II, S

Two lectures and three hours of laboratory. Planning and preparing instructional materials for classroom use. Independent study centers, transparencies, film, charts, lettering aids, learning games.

A. Science B. Art

# 184 / Education

143-S. Workshop in Educational Television (6) S

(Same course as Telecommunications and Film 172.)

Open to teachers and students interested in instruction by television.

The procedures and theories of television production as it pertains to closed circuit and instructional use of television. The selection and utilization of program content and the method of presenting material through the television medium will be discussed and demonstrated.

144. Instructional Materials Design (3) I, II, S

Prerequisite: Education 110 or 112

Systematic approach to instructional design. Review of research and theory in materials design and programmed instruction. Development and validation of programmed materials in various formats.

145. School Library Media Programs (3) I, II

Backgrounds of media centers in education. Objectives, standards, and activities involved in planning, organizing, administering, and integrating the school library media program with the instructional program of the school. (Formerly numbered and entitled: Educational Technology and Librarianship 136, School Library Administration.)

146. Basic Reference Materials (3) I, II

General reference books, bibliographies, and source materials with an emphasis on their use in the school library media center. (Formerly numbered Educational Technology and Librarianship 110.)

147. Selection of Instructional Materials (3) I. II

Prerequisite: Education 145.

Selection criteria and development of written policy statements. Annotations, reviewing media, standard catalogs, and bibliographies. (Formerly numbered Ecucational Technology and Librarianship 118.

148. Cataloging and Classification (3) I, II

Two lectures and three hours of laboratory

Prerequisite: Education 145.

A practical approach to organizing instructional materials in school library media centers. Descriptive cataloging, classification, and choice of subject headings. Basic knowldge of typing helpful. (Formerly numbered and entitled Educational Technology and Librarianship 119, Technical Processes.)

149. History of Books and Libraries (3) II

Books and libraries from earliest times to the present; their influence upon our schools and culture. (Formerly numbered Educational Technology and Librarianship 184.)

150. Workshop in Educational Technology and Librarianship (1-3)

Selected problems in educational technology and librarianship. Maximum credit six units. (Formerly numbered Educational Technology and Librarianship 191.)

**Honors** Course

166. Honors Course (1-3) I, II Refer to the honors program.

# **Exceptional Children**

161. Measurement and Evaluation in Special Education (4) II Three lectures and 3 hours of laboratory.

Prerequisites: Education 120; 151 or 152; and Psychology 105.

Consideration of representative tests and evaluation procedures appropriate to the several areas of exceptionality; problems in psycho-educational diagnosis and appraisal; assembling and utilizing test results for the educational and/or rehabilitation program.

162. Emotionally Disturbed Children and Youth (3) I, S

Prerequisite: Education 167.

Nature, needs and problems of emotional deviates; survey of settings and roles of those who help, and ways they help.

163. Curriculum and Methods for Teaching Emotionally Disturbed Children and Youth Prerequisites: Education 162 or 167.

Selection, organization and presentation of curricular materials for emotionally disturbed children and youth. 164. Education of the Neurologically Handicapped (3) I

Prerequisites: Education 167 and Psychology 109.

Educational and psychological problems of brain-injured children and youth; identification procedures; educational programs, instructional methods, preparation of 167. Exceptional Children (3) I, II, S

Characteristics and adjustment problems of mental, physical, and emotional deviates.

168. Curriculum and Methods for Teaching Mentally Retarded Children in the Elementary School (3) II, S

Prerequisite: Psychology 109 or Education 167.

Selection, organization, and presentation of curricular materials for mentally retarded children at all levels of the public schools. Concentration will be on the elementary level. (Recommended for students with specialization in Elementary Teaching.)

169. Curriculum and Methods for Teaching Mentally Retarded Children in the Secondary School (3) I, S Prerequisite: Psychology 109 or Education 167.

Selection, organization, and presentation of curricular materials for mentally retarded children at all levels of the public schools. Concentration will be on the secondary level. (Recommended for students with specialization in Secondary Teaching.)

170. Workshop in Special Education (2-4) I, II, S

Curriculum and methods of teaching in an area of exceptionality; observation of demonstration class; development of materials of instruction. May be repeated once in a second area of exceptionality. Not more than six units may be used for any degree.

171. Practicum in Mental Retardation (2) I, II

One lecture and two hours of laboratory

Prerequisites: Admission to Special Education, and Psychology 109 or concurrent registration.

Supervised observation and participation in classroom and related school activities for mentally retarded. Course work includes discussion, analysis, and reports of observations. 172. Counseling Exceptional Children (3) I, S

Prerequisites: Education 110 or 112, and Education 167 or Psychology 109.

Educational, mental, social, and vocational counseling of exceptional individuals and their parents. Interrelationships of home, school, and community agencies.

173. Education of the Severely Mentally Retarded (3) II, S

Prerequisites: Education 167 and Psychology 109, and admission to Special Education.

Organization and planning of instructional activities; materials and equipment; utilization of resources, records, and reports; and classroom management of those under 50 IO and those with neurological impairments.

179. Curriculum and Instruction for Teaching the Deaf (3) II

Prerequisite: concurrent registration in Education 185.

General elementary curriculum principles, methods and materials of instruction in teaching elementary subjects to deaf children including reading. Twenty-six hours observation in programs for the deaf.

# Student Teaching

180A-180B. Directed Participation, Secondary (1-1) I, II

Prerequisite: To be taken concurrently with Education 100 and Education 110. A comprehensive orientation to a secondary school with directed observation and participation in the classroom.

180C-180D. Directed Teaching Secondary (3-3) I, II

Prerequisites: Admission to teacher education and concurrent registration in Education 252 is required for Education 180C. Education 180C is prerequisite to 180D.

Systematic observation, participation, and teaching under supervision in a junior or senior high school. A weekly seminar or conference is required. Education 180D is also offered in the summer.

181A. Directed Teaching, Elementary (1) I, II

181B. Directed Teaching, Elementary (2) I, II

181C. Directed Teaching, Elementary (3) I, II

Prerequisites: Admission to teacher education and education program approved by the Coordinator of Elementary Education. Any grade below C is unacceptable for a credential.

Systematic observation, participation and teaching under supervision in elementary schools. During each semester of student teaching a weekly conference period is required as indicated in the time schedule.

182. Directed Teaching-Mentally Retarded (4) I, II

Application to take the course should be made during the preceding semester.

Extensive daily participation or teaching in public schools and preparation for the teaching of exceptional children in the area of the mentally retarded.

#### 186 / Education

183. Directed Teaching-Educational Technology and Librarianship (2-4) I, II

Prerequisites: Admission to teacher education and concurrent completion of a teaching minor in library science.

Systematic observation and participation in library and audiovisual service under supervision in a school library and/or teaching materials center. A weekly seminar or conference is required.

184. Directed Teaching-Speech Correction (4) I, II

Application to take the course should be made during the preceding semester.

Extensive daily participation or teaching in public schools and preparation for the teaching of exceptional children in the area of speech correction.

185. Directed Teaching—Hearing Impaired (4) Application to take the course should be made during the preceding semester.

Extensive daily participation or teaching in public schools and preparation for the teaching of exceptional children in the area of hearing impaired.

# **Conference and Special Courses**

190. Conference on the Teaching of Mathematics (1) S

May be taken three times for credit.

Lectures, discussions, and demonstrations on problems in teaching of mathematics in the elementary and secondary schools. Designed for teachers, supervisors, and administrators interested in current developments in this area.

# 191. Guidance Conference (1) S

Prerequisite: Consent of the director of the conference. Course may be taken three times for credit.

A series of lecture and discussion sessions centering on current problems in counseling and guidance. Designed to serve the needs of any person desiring to keep informed of developments in this area.

192. Audiovisual Conference (1) S

May be taken three times for credit. Course does not fulfill credential requirement. A series of lectures, discussions and demonstrations, centering on problems in the use of audiovisual instructional materials. Designed for teachers, administrators, audiovisual representatives, and others interested in current developments in this area.

197. Problems in Education (Credit to be arranged) Extension

Prerequisite: Consent of instructor.

Class study of specially selected problems in education. Does not apply to pattern requirements for credentials. Offered only in extension.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor. Open only to senior and graduate students in education who have shown ability to work independently.

#### **Graduate Courses**

Students with undergraduate standing are not admitted to 200-numbered courses in Education. For other requirements refer to the statement of prerequisites for graduate courses at the beginning of Part Four of this bulletin.

In addition to these general requirements, 12 units of professional education are prerequisite for enrollment in all graduate courses, except Education 201, 223, and 251, which require special clearance from the Coordinator of Community College Programs; and courses in Counselor Education.

#### Sociological Foundations

201. The Community College (2)

Overview of philosophy, history, aims, scope, function, outcomes, principles and problems of the community college. Relation of the community college to elementary and secondary schools and to four-year colleges. Fieldwork, including observation is required.

202. Social Foundations (2 or 3)

Prerequisite: Education 131C.

Sociological, historical, and philosophical foundations of American education and their influences on present-day educational practices.

204. Comparative Education (3)

The contemporary educational ideas and practices of various countries of the world and their impact upon our culture and education.

205. History of Education (3)

Prerequisite: Education 100 or 101

Advanced study of the history of education with emphasis on educational practices as related to present-day problems.

441-5 5 390

206. Philosophy of Education (3)

Prerequisite: Education 100 or 101.

Advanced study of philosophical backgrounds of educational thought; a study of comparative philosophies, and an analysis of selected current trends and problems.

207. Educational Sociology (3)

Prerequisite: Education 100 or 101.

A study of the social, economic, political and moral setting in which present-day American education functions.

208. Workshop in Community Influences on Learning and Curriculum Planning (3 or 6) Prerequisite: Teaching experience.

Advanced study of community influences on learning and child growth and development, and of group techniques; implications for curriculum planning. Provides opportunity for work on individual problems of the participants.

209. Workshop in Community College Education (2-6)

Prerequisite: Teaching or administrative experience in a community college.

To provide community college faculty members with opportunities to explore ways to improve curriculum and instruction in the community college.

#### Procedures of Investigation and Research

211. Procedures of Investigation and Report (3)

Research methods in education. Location, selection, and analysis of professional literature. Methods of investigation, data analysis, and reporting. Required of all applicants for advanced degrees in education. (Formerly Education 290A-290B.)

212. Educational Research Design (3)

Prerequisite: Education 211.

Principles and methods of planning and conducting systematic investigations of educational problems-including historical, descriptive, and experimental methods of research. Practice in the definition of problems, formulation of hypotheses, construction of samples, control of variables, and interpretation of results.

213. Advanced Quantitative Methods in Educational Research (3) Prerequisite: Education 153.

Application of correlation and tests of significance, including nonparametric and multivariate techniques, to research designs in such areas as curriculum, human development, student learning, counseling, and administration.

#### **Educational Psychology**

220. Advanced Educational Psychology (3)

Prerequisite: Education 110 or 112.

Advanced study of the research and its application to learning and human growth.

221. Seminar in Educational Measurement (3)

Prerequisite, one of the following: Education 120, 151, 152.

Problems in educational testing. Emphasis upon construction, administration, and validation of teacher-made tests.

223. Educational Psychology: Community College (2)

Fieldwork required. Prerequisite: Credit for or concurrent registration in Education 201.

The nature of the community college student; the learning process including contributions of audiovisual materials. The functions of student personnel services in the community college.

246. Advanced Diagnosis in Reading (3)

Prerequisites: Psychology 204 and Education 137, or consent of instructor.

Principles and techniques of individual and group diagnosis of reading difficulties. Experience in administration and interpretation of individual and group instruments in diagnosis.

247. Advanced Diagnosis and Treatment of Learning Difficulties (3)

Prerequisites: A teaching credential and Education 151 or 152.

Principles and techniques of diagnosis and treatment of difficulties in learning the school subjects. Supervised experience in working with individual pupils and their parents.

**Counselor** Education

# 224. Administration of Pupil Personnel Services (3)

Prerequisite: Education 230.

The organization and administration of school guidance services, including the use of community resources and a study of laws relating to children and child welfare.

#### Education / 189

#### 188 / Education

225A-225B. Determinants of Human Behavior (3-3)

Implications of theory and research in behavioral sciences for the understanding of human behavior. Education 225A deals with personality theories and psychological determinants of behavior; 225B with social and cultural determinants.

226. Guidance Services in Public Education (3)

Prerequisite: Education 110, or Education 111 and 112.

Historical, philosophical, and legal bases of the pupil personnel services; staff roles and relationships in a variety of organizational patterns.

229. Workshop in Counseling (3)

Prerequisite: Consent of instructor of workshop.

Application of principles and procedures to specific situations for improvement of counseling services. Individual problems emphasized.

231. Theory and Process of Appraisal (4)

Three lectures and three hours of laboratory.

Measurement theory and procedures, including interpretation of test results. Not open to students with credit in Education 237. Offered during summer sessions only in combination with Education 232 as Education 237.

232. Theory and Process of Vocational Choice (4)

Three lectures and three hours of laboratory and/or field work.

Vocational choice theory, occupational and educational materials used in career planning, Not open to students with credit in Education 237. Offered during summer sessions only in combination with Education 231 as Education 237.

233. Theory and Process of Counseling (4)

Prerequisites: Education 225A and 231

Counseling process theories, approaches to and techniques for counseling, and research concerning counseling effectiveness. Supervised practice in counseling, and research counseling, and writing counseling reports. Not open to students with credit in Education 238 or Psychology 152 or Psychology 233. Offered during summer sessions only in combination with Education 234 as Education 238.

234. Theory and Process of Group Counseling (4)

Three lectures and three hours of laboratory.

Prerequisites: Education 225B and 233.

Group process and individual growth, theories of group interaction, sensitivity training and group leadership techniques. Not open to students with credit in Education 238. Offered during summer sessions only in combination with Education 233 as Education 231.

235A. Introduction to the Rehabilitation Process (2)

One lecture and three hours of laboratory.

Prerequisite: Admission to Counselor Education.

Background and legislation related to vocational rehabilitation: overview of client services and role and function of the rehabilitation counselor as a professional person. Orientation to community rehabilitation agencies.

235B. Medical Aspects of Disability (2)

One lecture and three hours of laboratory.

Prerequisite: Education 235A.

Orientation to medicine and illness in relation to work capacity and work outlook. Focus on major diseases and impairments resulting in vocational disability. Lecture and clinical seminars.

235C. Psychological Aspects of Disability (2)

One lecture and three hours of laboratory.

Prerequisite: Education 235B.

Analysis of the psychological component to illness and disease. Focus on functional disorders and vocational implications. Lecture and clinical seminars. (Formerly numbered Education 235A.)

235D. Placement of the Disabled (2)

One lecture and three hours of laboratory.

Prerequisite: Education 235C.

Determination of employment needs of disabled clients, case study method. Followthrough to placement. Continuous survey of employment needs and opportunities in the wider community. (Formerly numbered Education 235C.)

237. Appraisal and Vocational Choice (6)

Five lectures and three hours of laboratory.

Measurement theory, interpretation of test results, vocational choice theory, occupational and educational information in career planning. Not open to students with credit in Education 231 or 232. Application to take the course must be made early during the preceding semester. Offered only during summer sessions.

#### 238. Counseling: Individual and Group (6)

Five lectures and three hours of laboratory.

Counseling theory and techniques, individual and group. Not open to students with credit in Education 233 or 234. Application to take the course must be made early during the preceding semester. Offered only during summer sessions.

239A-239B. Professional Seminar in Guidance (3-3)

Prerequisites: Education 211; six units from Education 231, 232, 233, and 234 or equivalent. Study of selected areas in counseling and guidance culminating in a written project with emphasis on research and on counseling as a profession.

#### **Elementary Education**

240. Curriculum Construction and Evaluation in Elementary Education (3)

Prerequisite: Credit or concurrent registration in Education 211.

Advanced study of the research in curriculum development, construction, and evaluation.

241. Seminar in Arithmetic in Elementary Education (3)

Prerequisite: Credit or concurrent registration in Education 211.

A study of research and practice in the methods of teaching and in the curriculum of elementary and junior high school arithmetic.

242. Seminar in Reading in Elementary Education (3)

Prerequisite: Credit or concurrent registration in Education 211

Advanced study of trends in reading instruction. Topics include developmental sequences in reading skills and abilities, reading in the content fields, individual differences, and interests. Students will develop individual projects or problems.

243A. Seminar in Social Studies in Elementary Education (3)

Prerequisite: Credit or concurrent registration in Education 211.

Problems in teaching social studies in the elementary school with emphasis on the study of the scientific research in the field. (Formerly numbered Education 243.

243B. Seminar in Elementary Social Studies Curriculum Development (3)

Prerequisite: Education 131B, and credit or concurrent registration in Education 211.

Current theories of instruction pertaining directly to elementary social studies teaching and curriculum development; critique of current social studies courses of study and guides; experience in elementary social studies curriculum planning at the classroom, school, and district levels.

244. Seminar in Language Arts in Elementary Education (3)

Prerequisite: Credit or concurrent registration in Education 211

Advanced study of problems in teaching language arts in the elementary school, including spelling, literature and written and oral communication. Emphasis will be on the study of scientific research in the field.

245. Seminar in Elementary Education (3)

Prerequisite: Credit or concurrent registration in Education 211.

A study of the methodology of research with particular reference to the basic research in the psychology and teaching of the elementary school subjects.

248. Seminar in Science in Elementary Education (3)

Prerequisite: Credit or concurrent registration in Education 211.

Advanced study of the problems of teaching science in the elementary school with emphasis on the literature of science education.

249A. Seminar in Art in Elmentary Education (3)

Prerequisite: Education 132B, credit or concurrent registration in Education 211.

Curriculum, materials, and techniques of instruction, including supervision.

249B. Seminar in Music in Elementary Education (3)

Prerequisite: Education 132C, credit or concurrent registration in Education 211. Methods, materials, and curriculum. For elementary classroom teachers.

#### Secondary Education

230. Guidance Problems in Secondary Education (3)

Prerequisites: Education 110 or equivalent, and student teaching or teaching experience. The theory and practice of guidance emphasizing advanced mental hygiene concepts needed by teachers and counselors.

250. Curricular Problems in Secondary Education (3)

Prerequisite: Student teaching or teaching experience.

Present status and development of the secondary school curriculum with emphasis upon curriculum construction and curriculum evaluation. Opportunities provided for study of problems submitted by students.

#### 190 / Education

251. Instructional Methods and Materials: Community College (2)

Prerequisites: Education 223 and concurrent registration in Education 316.

The teaching process at the community college level, including lesson planning, utilization of audiovisual and other instructional materials and procedures of evaluation.

252. Seminar for Student Teachers (3)

Prerequisites: Education 110 and 100. To be taken concurrently with Education 180C. Advanced study in the application of principles and research related to planning instruction, selecting and using materials, evaluating instruction and pupil progress, maintaining class morale; school law and finance for classroom teachers.

253. Supervision of Student Teaching (2)

Open to experienced teachers interested in the teacher education program.

Study of selection, orientation, induction, counseling and evaluation of credential candidates and student teachers; helping student teachers plan lessons, conduct classroom learning, analyze pupils' difficulties and achievement.

254. Advanced Problems in Secondary School Instruction (3)

Prerequisites: Teaching experience and consent of instructor.

An analysis of the scientific research and philosophical principles in secondary school instruction.

255A. Advanced Curriculum and Instruction in Mathematics (3)

Prerequisite: Education 121F and teaching experience.

Factors directing the changing mathematics curriculum; recent trends and current research in the teaching of secondary mathematics.

255B. Advanced Curriculum and Instruction in Social Science (3)

Prerequisite: Education 121M and teaching experience.

Theories of content selection; social pressures which affect curriculum design; current research in curriculum development; trends in teaching techniques and materials.

255C. Advanced Curriculum and Instruction in English Language and Composition (3) Prerequisites: English 191, 192, 193, Education 121B, and teaching experience. Problems in the teaching of English language structure and composition skills in secondary

schools; recent trends and current research. 255D. Advanced Curriculum and Instruction in Literature (3)

Prerequisites: Education 121B, 12 units of literature, and teaching experience.

Problems of selection, presentation, motivation, and evaluation in the teaching of literature in secondary schools, techniques of reading in the genres; recent trends and current research in the teaching of literature.

256. Recent Trends in Secondary Curriculum (3)

Prerequisites: 12 units in secondary education and consent of the instructor.

Current practices and trends in secondary schools. Extensive individual work on related problems of interest to members of the class.

257. Workshop in Intercultural Education (4)

Enrollment only by application to the Chairman of the Department of Education.

A co-operative workshop sponsored by the college and the San Diego City Schools to study trends in intercultural education in American schools, including units, curricular and instructional materials and techniques.

258. Research in Curricular Problems (1-3)

Admission by consent of the Coordinator of Secondary Education and instructor. Individual study by graduate students who have demonstrated exceptional ability and a need for such work.

**259.** Seminar in Secondary School Reading (3) Prerequisites: Education 122 and 211.

Sources of research on reading; reading and criticism of selected studies; identification of research trends and needs.

# **Educational Administration**

260. Principles of School Administration (3)

Federal, state and local school administrative relationships including the financial and legal structure at these three levels.

261. Education Leadership (3)

Prerequisites: Standard Teaching Credential and consent of instructor.

Concepts and techniques of leadership, analysis of the factors and practice in the procedures of group and individual leadership in four areas: (a) the community; (b) the teaching staff; (c) the student personnel; (d) the professional field of educational administration and supervision. (Formerly numbered Education 278.)

# 262. Legal and Financial Aspects of School District Policies (3)

Prerequisite: Standard Teaching Credential.

Relationship of the school district to attendance units. The legal basis for policy formation in the selection and retention of certified personnel, in the admission and assignment of pupils, in the instructional programs and in related budgetary considerations.

263. Curriculum Development and Evaluation (3)

Prerequisites: Standard Teaching Credential and consent of instructor.

Curriculum development in both elementary and secondary schools, with emphasis on interrelationships between these levels, responsibilities of curricular and supervisory personnel, and use of research.

264A-264B-264C. Seminar in Elementary School Administration and Supervision (2-2-2) Prerequisites: Education 260, 261, 262, 263, consent of instructor, and admission to Program of Educational Administration.

Analysis of theories and practices in the administration and supervision of the elementary school.

265A-265B-265C. Seminar in Secondary School Administration and Supervision (2-2-2)

Prerequisites: Education 260, 261, 262, 263, consent of instructor, and admission to Program of Educational Administration.

Analysis of theories and practices in the administration and supervision of the secondary school.

266A-266B-266C. Field Experience in Elementary School Administration and Supervision (1-1-1)

Prerequisite: Concurrent registration required in Education 264A, 264B, 264C.

Field experience in the elementary schools. Approval of local school district required in the semester prior to registration.

267A-267B-267C. Field Experience in Secondary School Administration and Supervision (1-1-1)

Prerequisite: Concurrent registration required in Education 265A, 265B, 265C.

Field experience in the secondary schools. Approval of local school district required in the semester prior to registration.

268. Seminar in School Administration and Supervision (3) Prerequisites: Standard Teaching Credential, Education 260, 261, 262, 263, consent of instructor, and admission to Program of Educational Administration.

School administration and supervision in a specialized field, such as the junior college, a subject field, or designated services. Field experience required. May be substituted for Education 264C or 265C.

280. Legal and Financial Aspects of School District Management (3)

Prerequisites: Standard Teaching Credential, Education 260, 261, 262, 263, and consent of instructor.

Principles and practices of law and finance as an aspect of school business administration, school plant planning and development, and the operation and maintenance of school facilities and services.

281. School-Community Relationships (3)

Prerequisites: Standard Teaching Credential, Education 260, 261, 262, 263, and consent of instructor.

Sociological aspects of school administration with particular emphasis on broad social policy, contemporary issues, community-school relationships, other social and service agencies of the community.

282. School District Personnel Management (3)

Prerequisites: Standard Teaching Credential, Education 260, 261, 262, 263, and consent of instructor.

Personnel relationships to include administrative relationships with the Board of Education and the school staff. Central office personnel procedures including recruitment, employment, placement, evaluation, promotional and training procedures.

283. District Curriculum Development, Evaluation and Improvement (3)

Prerequisites: Standard Teaching Credential, Education 260, 261, 262, 263, and consent of instructor.

School district curricular development from kindergarten through junior college, relationships of the superintendent and central administrative staff to regular staff and supervisory staff.

# 192 / Education

284. Advanced Seminar in School Administration and Supervision (3)

Prerequisites: Standard Teaching Credential, Education 280, 281, 282, 283, and consent of instructor.

An intensive study of a selected area in school administration and supervision. May be repeated with new content for additional credit to a maximum of nine units. Typical courses in this area are School Law, School Finance, School Supervision, Personnel Procedures,

286A-286B. Seminar in School Building Construction and Utilization (3-3)

Prerequisite: Possession of Standard Administration or Supervision Credential, or consent of instructor. Completion of or concurrent registration in Education 286A is prerequisite to 286B.

School building construction and utilization: the development of new facilities from the planning stage to complete utilization; remodeling.

**Special Education** 

222. The Gifted Child (3)

Prerequisites: Education 110, or 111 and 112.

The abilities and characteristics of the intellectually gifted or talented; related problems of curriculum, teaching, administration and guidance.

270. Seminar in Education of Exceptional Children (3)

Prerequisite: Education 167.

Principles, trends and research in the education of exceptional children.

271. Seminar in Emotionally Disturbed Children and Youth (3) Prerequisites: Education 162 or 163, and 270.

Advanced study of the theories, principles and practices in working with emotionally handicapped.

272. Seminar in Education of the Gifted (3)

Prerequisites: Education 222 and 270.

Review of studies and investigation in learning and adjustment of the gifted, including assessment, classification, curriculum provisions, and social and emotional adjustment.

273. Seminar in Education of the Mentally Retarded (3)

Prerequisites: Education 168 or 169 and 270.

Review of studies and investigation in learning and adjustment of retarded children including etiology, classification, diagnosis, and assessment.

#### **Educational Technology and Librarianship**

274. Seminar in Educational Technology (3) I

Prerequisite: Education 140.

Research reviewed and the findings related to current practices. Relationships of educational technology to educational philosophies and current issues. Recent trends evaluated.

275. Seminar in the Administration of Instructional Media Centers (3) I, II

Prerequisites: Education 140 and 145.

The relationship of school, district, and regional media centers to the educational program. Concepts of leadership and management, review of current practices and policies.

276. Seminar in Instructional Design (3) I, II

Prerequisite: Education 141.

Design and production of self-instructional sequences. Instructional materials design will be investigated. Student entry behavior, objectives, media characteristics and learning will be considered.

277. Reference Materials in Subject Areas (3)

Prerequisite: Education 146.

Reference materials in humanities, social sciences, and sciences with emphasis on their use in the school library media center.

278. Literature for Children (3)

Prerequisite: Education 147.

Literature and other library materials suited to the elementary school student. Standard, classic, and current books for children, aids and criteria for selection. (Formerly numbered Educational Technology and Librarianship 231.)

279. Literature for Adolescents (3)

Prerequisite: Education 147.

Literature and other library materials suited to the high school student. Standard, classic, and current books for the adolescent, aids and criteria for selection. (Formerly numbered Educational Technology and Librarianship 232.)

#### **Special Study and Research**

295A-295B. Seminar (3-3)

Prerequisites: Education 211 and advancement to candidacy for the Master of Arts degree in education.

An intensive study in selected areas of education culminating in a written project. Limited to students following Plan B for the Master of Arts degree in education.

298. Special Study (1-6)

Individual study. Six units maximum credit. Prerequisite: consent of staff; to be arranged with department chairman and instructor.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

#### Student Teaching and Internship

316. Directed Teaching: Community College (4)

Prerequisites: Admission to Teacher Education and approval of the community college program coordinator the preceding semester. Credit in Education 201 and 223 and concurrent registration in Education 251.

Systematic observation, participation, and teaching under supervision in a community college. Any grade below C is unacceptable for a credential. A weekly seminar or conference is required.

#### 330. Internship (2-6)

must be made early during the preceding semester. May be repeated with new content. Maximum credit six units applicable on a master's degree.

#### 331. Field Work in Counseling (2-6)

Application of concepts and procedures of counseling services in appropriate school of agency setting. Daily observation and practice. Weekly seminar sessions with college staff.

Application to take course must be made early during the preceding semester. May be repeated with new content. Maximum credit six units applicable on a master's degree.

#### 332. Practicum in Counseling (3)

Supervised experience in group and individual counseling and career planning. Application to take the course must be made early during the preceding semester. Maximum credit six units applicable on a master's degree.

333. Advanced Seminar and Practicum in Counseling (3-6)

Supervised experience in group and individual counseling and study of problems, issues, and research. Application to take the course must be made early during the preceding semester.

# 360. Internship in School Administration and supervision (3 to 6)

Prerequisites: Standard Teaching Credential and consent of instructor.

Internship for prospective school administrators in the public schools. Released time, permission of school district, and preregistration with Coordinator of Program of Educational Administration previous semester required.

371. Directed Internship—Mentally Retarded (4) Application to take the course should be made during the preceding semester. Extensive daily participation or teaching in public schools and preparation for the teaching of exceptional children in the area of the mentally retarded.

# 374. Directed Internship-Speech Correction (4)

Application to take the course should be made during the preceding semester.

Extensive daily participation or teaching in public schools and preparation for the teaching of exceptional children in the area of speech correction.

375. Directed Internship for the Instructional Media Specialist (2-6)

Supervised internship in an instructional media center. (Application must be made during preceding semester.)

# Engineering In the School of Engineering

The undergraduate curriculum in Engineering, with options in aerospace, civil, electrical and electronic, and mechanical engineering, is accredited by the Engineer's Council for Professional Development.

Faculty

Emeritus: Stone, H., Walling

Professors: Bauer, Bedore, Capp (Dean), Chan, Conly, Dharmarajan, Fitz, Johnson,

Supervised internship experience in counseling activities. Application to take the course

Engineering / 195

# 194 / Engineering

Learned, Lin, Lodge, Morgan, Murphy, Noorany, Quiett (Associate Dean), Rao, Shutts, Stone, S., Stratton

Associate Professors: Chang, Chou, Craig (Assistant Dean), Crooker, Eggleston, Hussain, Krishnamoorthy, Mann, McGhie, Narang, Ohnysty, Panos, Skaar

Assistant Professors: Andrews, Bakhru, Bilterman, Brown, Harris, Khalifa, Mansfield, McElmury, Stuart

Lecturer: Sharma

# Offered by the School of Engineering

Master of Science degree in aerospace, civil, electrical, and mechanical engineering. (Described in the Graduate Bulletin. Also refer to the section in this catalog on the Graduate Division.)

Major with the B.S. degree in engineering, with options in aerospace, civil, electrical and electronic, and mechanical engineering. (Described in this section on the School of Engineering.)

Minor in engineering. (Described in the section on the School of Engineering.)

#### Lower Division Courses

A. Introduction to Engineering (1)

A survey of the fields of engineering, designed to familiarize the student with the nature, the requirements, the responsibilities, and the opportunities of the profession.

1. Engineering Drawing (2) I, II

Six hours of laboratory.

Development of skills and techniques of drawing for engineers. Elementary orthographic and pictorial drawing theory. Introduction to basic theorems of descriptive geometry. Theories of size description.

2. Plane Surveying (3)

One lecture and six hours of laboratory.

Prerequisite: Mathematics 21 or 40.

Use, care, and adjustment of surveying equipment. Introduction to standard procedures, techniques of plane surveying, and plane table mapping.

10. Control of Man's Environment (3) I, II

Man's interaction with the land, water and air environment; environmental pollution; role of engineering in controlling man's environment.

20. Engineering Graphics (2) I, II

Six hours of laboratory.

Prerequisites: Credit or concurrent registration in Mathematics 40 or equivalent, and either Engineering 1 or qualification on the Engineering Graphics Placement Examination.

Graphic communication for engineers. Presentation and interpretation of engineering plans, using both standard projection systems and freehand sketching. Introduction to nomography; graphic presentation and analysis of data.

25. Engineering Materials (3) I, II

Prerequisite: Chemistry 1A.

Atomic and molecular structure of materials utilized in engineering. Analysis of the relationships between structure of materials and their mechanical, thermal, electrical, corrosion and radiation properties, together with examples of specific application to engineering problems.

30. Engineering Measurement Analysis (2) I, II

Prerequisite: Mathematics 40.

Methods of data presentation. Analysis and treatment of engineering data. Design of engineering experiments. Correlation and regression analysis. Practical applications are stressed.

40. Engineering Problem Analysis I (2) I, II

One lecture and three hours of laboratory.

Prerequisite: Mathematics 50.

Analysis of engineering problems and solutions using the digital computer. Fundamentals of programming and programming language commands.

50A. Engineering Mechanics I (3) I, II

Prerequisites: Physics 4A and credit or concurrent registration in Mathematics 51.

Static equilibrium of particles and rigid bodies; vector algebra and calculus; friction, virtual work; kinematics of a particle; kinetics of a particle; engineering applications.

50B. Engineering Mechanics II (3) I, II

Prerequisites: Engineering 50A and credit or concurrent registration in Mathematics 52. Kinetics of a particle; central force motion; systems of particles; work and energy; impulse and momentum; moments and products of inertia; Euler's equations of motion; vibration and time response; engineering applications.

## 60. Electric Circuits (3) I, II

Prerequisites: Physics 4B and Mathematics 51.

Circuit analysis by reduction methods, source transformations, loop and nodal analyses; alternating-current circuits, impedance, power and phasor diagrams.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

100. Electrical Energy Conversion (3) I, II Prerequisite: Engineering 60.

Magnetic circuits, transformers and polyphase AC networks. Fundamentals of electromechanical energy conversion; induction motors, synchronous machines and DC machines. Formerly Engineering 100B, Electrical Machinery.

100L. Electrical Energy Conversion Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Engineering 100.

Experimental study of DC, single and polyphase AC circuits, transformers, and machines. Formerly offered as an integral part of Engineering 100B.

101. Fundamentals of Engineering Electronics (3) I, II

Prerequisite: Engineering 60.

Application of diodes, transistors, electron tubes, and thyristors, in typical electronic circuits. Analysis and design of rectifiers and filters, and elementary amplifiers. Emphasis on their utilization in engineering equipment and systems.

101L. Engineering Electronics Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Engineering 101.

Experimental study of laboratory instruments, diodes, rectifier circuits, filters, silicon controlled rectifiers, tubes, transistors, and amplifiers.

102. Electric and Magnetic Fields (3) I, II

Prerequisites: Engineering 50B and 60.

Electrostatic and magnetostatic field theory using vector notation; Coulomb's Law, Gauss' Law and potential theory. Solutions to Poisson's and Laplace's equations; capacitance and inductance. Time-varying electric and magnetic fields; Maxwell's equations. (Formerly numbered Engineering 100C.)

103. Electronics, Instrumentation, and Electrical Energy Conversion (3) I, II Prerequisite: Engineering 60.

Theory and application of electron tubes, diodes, and transistors in typical electronic circuits. Instrumentation and electronic measuring devices. Fundamentals of electromechanical energy conversion including motors and transformers. Not open to students in electrical engineering option.

103L. Electrical Engineering Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: credit or concurrent registration in Engineering 103.

A laboratory course to include selected experiments in electrical circuits, electronics, and electrical machinery. (Formerly numbered Engineering 103.)

107. Metallic Materials and Processes (4) I, II

Three lectures and three hours of laboratory.

Prerequisites: Engineering 25 and Physics 4C.

Physical metallurgy and properties of metals. Influence of processing on the properties of metals. Design criteria for selection of materials. (Formerly numbered Engineering 106 and 109A.)

108. Thermodynamics (3) I, II

Prerequisite: Mathematics 52.

Development of the basic laws of thermodynamics from the macroscopic and microscopic viewpoints and their application to engineering systems.

108L. Thermal Science Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Engineering 108 or 110.

Laboratory studies of the basic concepts of thermal science. (Formerly offered as an integral part of Engineering 108.)

109. Nonmetallic Materials (3) I

Two lectures and three hours of laboratory.

Prerequisite: Engineering 107

Fundamentals of plastics, reinforced plastics, and ceramics. Analysis of effect of physical properties upon selection of a material for use in design.

110. Thermodynamics and Heat Transfer (3) I, II

Prerequisite: Mathematics 52.

First and second laws of thermodynamics; materials, heat conduction, convection, and radiation. Not acceptable for mechanical engineering majors.

111. Network Analysis (3) I, II

Prerequisites: Engineering 60 and Mathematics 52.

Loop and modal analysis using general network equations; network theorems; frequency and time response using poles and seros. Two-port parameters. (Formerly numbered Engineering 130.)

112. Advanced Network Analysis (3) I, II

Prerequisites: Engineering 111, and 187A or Mathematics 118A.

Transient analysis of circuits containing resistance, inductance, and capacitance with various input wave forms by means of the Laplace-transform method. (Formerly numbered and entitled Engineering 132, Time Domain Analysis of Linear Networks.)

113L. Analog Computation of Electrical Engineering Problems (1)

Three hours of laboratory.

Prerequisites: Engineering 101, 187A, and credit or concurrent registration in Engineering 112

Use of the analog computer in the solution of typical electrical engineering problems. 114. Analysis and Design of Electronic Circuits (3) I. II

Prerequisites: Engineering 101, 111, and 187A or Mathematics 118A.

A unified treatment of vacuum-tube and transistor voltage and power amplifiers utilizing graphical methods and equivalent circuits; feedback theory and tuned amplifiers. (Formerly numbered Engineering 134A.)

114L. Electronic Circuits Laboratory (1) I. II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Engineering 114.

Vacuum-tube and transistor dynamic characteristics; single stage and multistage amplifier circuits including feedback and tuned amplifiers. (Formerly numbered Engineering 135A.)

115. Fluid Mechanics (3) I, II

Prerequisites: Engineering 50B, and credit or concurrent registration in Engineering 187A. Fluid statics. Laminar and turbulent flow of liquids and gases in pipes, nozzles, and channels. Dimensional analysis and modeling. Drag forces on moving or immersed objects. 115L. Fluid Mechanics Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Engineering 115.

Flow measuring devices. Experimental applications of continuity, Bernoulli and momentum equations. Model studies. Pipe and channel flows. Flow visualization techniques. Operating characteristics of wind tunnel and water table.

116. Introduction to Solid Mechanics (3) I, II

Prerequisites: Engineering 25 and 50B; and credit or concurrent registration in Engineering 187A.

Mechanics of solid deformable bodies involving analytical methods for determining strength, stiffness, and stability of load-carrying members.

116L. Solid Mechanics Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Engineering 116.

Laboratory studies in solid mechanics. Experimental stress analysis. Experimental confirmation of theory.

118. Transfer and Rate Processes (3)

Prerequisite: Engineering 187A.

Fundamentals of rates of change in enthalpy and composition of matter; heat and mass transfer and chemical reaction rates.

120A. Structural Analysis I (4) I, II

Prerequisite: Engineering 116.

Principles of mechanics applied to analysis of beams, frames, trusses, and three-dimensional frameworks. Graphical methods, influence lines; deflections; introduction to statically indeterminate structures and moment distribution.

120B. Structural Analysis II (3) I

Prerequisite: Engineering 120A

Analysis of statically indeterminate structures by virtual work. Advanced treatment of slope deflection, moment distribution. Arch analysis, secondary stresses in trusses. Advanced treatment of influence lines.

121. Reinforced Concrete (3) II

Prerequisite: Engineering 120A.

Properties and characteristics of reinforced concrete; design of structural components. Introduction to plastic theory and limit design.

122. Soil Mechanics (3) I

Two lectures and three hours of laboratory.

Prerequisites: Geology 53, Engineering 116, and credit or concurrent registration in Engineering 115.

Mechanics of soils; physical and mechanical properties; soil classification, compaction, swelling, consolidation, and shear strength. Laboratory tests and related design problems. 123. Applied Hydraulics (3) I

Prerequisite: Engineering 115.

Application of principles of fluid mechanics in the fields of hydrology, water supply, hydraulic machinery, drainage, and waste disposal.

124. Foundation Engineering (3) II

Prerequisite: Engineering 122

Soil mechanics theories applied to the design of shallow and deep foundations; lateral pressure of soils; design of retaining walls.

125. Sanitary Engineering (3) II

Prerequisite: Engineering 123.

Unit processes used in water treatment and waste-water disposal; physical and chemical tests used in the analysis of water and waste-water.

126. Transportation Engineering (3) I

Two lectures and three hours of laboratory.

Prerequisite: Upper division standing in engineering or in any other area dealing with urban problems.

Function and design of different modes of transportation for moving people and goods; and corresponding terminal facilities.

127. Highway Engineering (3) I, II

Two lectures and three hours of laboratory.

Prerequisites: Engineering 128A and credit or concurrent registration in Engineering 123. Highway planning, economics, and administration; geometric design; traffic engineering; subgrade structure; bituminous and portland-cement concrete pavements.

128A. Surveying for Civil Engineers (3) II

Two lectures and three hours of laboratory.

Prerequisite: Engineering 30.

Principles of plane surveying. Measurement of horizontal distance, difference in elevation, and angles. Traverse surveys and computations. Horizontal and vertical curves. Principles of stadia. Topographic surveys. Earthwork.

128B. Advanced Surveying and Photogrammetry (3) I

Two lectures and three hours of laboratory.

Prerequisite: Engineering 128A.

Theory and application of precise control surveys; specialized survey operations. Principles of metrical photogrammetry as applied to engineering. Map compilation from aerial photographs.

129. Highway Materials (3) II

Two lectures and three hours of laboratory.

Prerequisite: Credit or registration in Engineering 127 or Engineering 122.

Selection, design, and control of mixes of various materials used in highway construction practice. Emphasis on strength and properties of plain concrete and asphalts.

133. Stochastic Signals (3) II

Prerequisite: Engineering 187A or Mathematics 118A.

Random signals, correlation functions, power spectral densities, the Gaussian process, narrow band processes. Applications to communication systems. (Formerly part of Engineering 196B.)

504-5 6 65

#### 134. Communication Circuits (3) I

Prerequisite: Engineering 114.

A continuation of Engineering 114, to include regulated power supplies, oscillators; theoretical analysis of amplitude, frequency, and phase modulation; modulator and detector circuits; switching circuits and transient response of amplifiers. (Formerly numbered and entitled Engineering 134B, Analysis and Design of Electronic Circuits.)

134L. Communications Circuits Laboratory (1) I

Three hours of laboratory

Prerequisite: Engineering 114L.

Regulated power supply systems; oscillator, modulator, detector, and switching circuits; superheterodyne receivers and television circuitry. (Formerly numbered and entitled Engineering 135B, Electronic Circuits Laboratory.)

135. Modulation Theory (3) I

Prerequisite: Engineering 112.

Theory and performance characteristics of modulation and demodulation; spectral characteristics and noise performance of carrier systems: amplitude, frequency and phase, pulse coded, and compound modulation. (Formerly numbered Engineering 185.)

137. Communication Networks (3) I

Prerequisites: Engineering 102, 111, and 187A or Mathematics 118A.

Theory and application of transmission lines, including analysis by matrix notation; use of Smith chart and other transmission line charts; impedance-matching with transmission line stubs and lumped constants; theory and design of constant-k, m-derived, and other types of filter networks.

139. Microwave Communications (3) II

Prerequisites: Engineering 114 and 137.

Applications of Maxwell's equations to wave propagation; skin effect, circuit impedance elements; vector potential, and other time-varying electrical phenomena; waveguides and resonators strip line circuits, electromagnetic radiation.

139L. Microwave Measurements Laboratory (1) II

Three hours of laboratory.

Prerequisites: credit or concurrent registration in Engineering 134L and 139.

Experimental study of frequency generation including klystrons, magnetrons and signal generators. Impedance, attenuation, phase, frequency, and power measurements; coaxial lines and waveguides; propagation in air, resonant cavities and antennas. (Formerly numbered Engineering 139B.)

140. Principles of Heat Transfer (3) I, II

Prerequisites: Engineering 108 or 110; and 187A. Heat transfer by conduction, convection, radiation, and combinations thereof; introduction to aerodynamic heating and heat transfer by phase change.

141. Internal Combustion Engines (3) II

Prerequisite: Engineering 148.

Analysis of idealized and real internal combustion engine cycles; combustion problems; performance of reciprocating and rotary types of internal combustion engines. Principles of reaction motors.

142. Elements of Energy Conversion (3) II

Prerequisite: Engineering 108.

Principles of physics and chemistry applied to the analysis of a broad spectrum of energy conversion devices from an engineering point of view.

143. Gas Dynamics (3) I

Prerequisites: Engineering 108 and 115.

Thermodynamics of high velocity compressible fluid flow. Shock regions; adiabatic and diabatic flow. Applications to the propulsive duct and discharge nozzles.

144. Thermal Environmental Engineering (3) II

Prerequisite: Engineering 140.

Psychrometrics. Mass transfer. Two-phase flow. Heat transfer. Thermoelectric refrigeration. Change of phase.

145. Mechanics of Machinery (3) I, II

Prerequisite: Engineering 40 and 50B.

An extension of the principles of statics and dynamics to mechanisms and to mechanical systems. Analysis of velocity and acceleration and the determination of static and dynamic forces. Evaluation of stability of systems.

146A. Elements of Machine Design (3) I, II

Prerequisite: Engineering 116.

Application of mechanics, physical properties of materials, and strength of materials to the design of machine elements.

# 146B. Advanced Machine Design (3) II

Prerequisite: Engineering 146A

Advanced topics in strength of materials including energy methods, stress concentrations, curved beams, and thick-walled cylinders. Applications to design of machine elements.

147A. Introduction to Mechanical Vibrations (3) I

Prerequisites: Engineering 50B, 116, and 187A.

Analysis of mechanical vibration; single- and multi-degree of freedom systems; free and forced vibrations; vibration isolation; vibration absorbers. Theory of vibration measuring instruments.

147B. Experimental Vibrations (3) II

Prerequisite: Engineering 147A.

Experimental problems utilizing vibration excitation equipment, recording systems, transducers, digital and analog computers.

148. Engineering Thermodynamics (4) I, II

Three lectures and three hours of laboratory.

Prerequisite: Engineering 115.

Further development of the laws of classical thermodynamics. Applications to energy conversion devices.

149. Advanced Thermodynamics (3) I

Prerequisite: Engineering 148.

Cyclic and analytical methods of thermodynamic analysis. Development of general thermodynamic equations and methods of solution. Introduction to microscopic thermodynamics with application to the study of transport properties.

150A. Low Speed Aerodynamics (3) I

Prerequisites: Credit or concurrent registration in Engineering 115 and 115L.

Subsonic flow, airfoil and wing theory, experimental characteristics of wing sections, high lift devices.

150B. High Speed Aerodynamics (3) II

Prerequisites: Engineering 143 or 150A. Supersonic flow, two- and three-dimensional compressible flow, wings in compressible flow, two- and three-dimensional method of characteristics, transonic flow.

151A-151B. Aerospace Structural Analysis (3-3) I, II

Prerequisites: Engineering 116 and credit or concurrent registration in Engineering 187B or Mathematics 118B. Engineering 151A is prerequisite to 151B.

Methods of structural analysis including both the static and dynamic aspects of problems encountered in the flight of aerospace vehicles.

152. Aircraft Propulsion Systems (3)

Prerequisite: Engineering 148 or 150A

Theory and performance characteristics of aircraft propulsion systems including reciprocating engines, turbo-jets, ram-jets, etc.

153A. Aerospace Flight Mechanics (3) II

Prerequisites: Engineering 50B, and 187A or Mathematics 118A. Aerodynamics and dynamics of ballistic missiles; guidance systems; orbits and space trajectories; effects of aerodynamics, mass, rotation and shape of the earth on ballistic and space trajectories. Computer programming and problem solutions will be emphasized. (Formerly numbered Engineering 153.)

153B. Intermediate Aerospace Flight Mechanics (3) I

Prerequisite: Engineering 153A.

A continuation of Engineering 153A to include orbit determination techniques, general and special perturbations, artificial satellites, rocket dynamics and transfer orbits, earth-moon trajectories, and interplanetary trajectories.

154. Experimental Aerodynamics (2) II

One lecture and three hours of laboratory.

Prerequisites: Credit or concurrent registration in Engineering 150A.

Operating characteristics of subsonic and supersonic wind tunnels. Aerodynamic characteristics of wings and bodies. Flow visualization techniques. Force, moment and pressure distribution measurement. Use of hot-wire anemometer and schlieren equipment.

155. Matrix Methods in Aerospace Structures (3)

Prerequisite: Engineering 151B.

Static and dynamic analysis of aerospace structures utilizing matrix methods. 156. Intermediate Dynamics (3)

Prerequisites: Engineering 50B, 60, and Engineering 187A or Mathematics 118A. Kinematics and kinetics of systems of particles and rigid bodies. Dynamic analysis procedures for studying mechanical, electrical, and electromechanical systems. Variational methods.

157. Intermediate Fluid Mechanics (3)

Prerequisites: Credit or concurrent registration in Engineering 115, and Engineering 187B or Mathematics 118B

Kinematics of fluid motion. Conservation of mass, momentum, and energy. Ideal and viscous flows and applications. Boundary-layer approximations.

158. Aircraft Design and Performance (3)

Prerequisite: Engineering 150B.

Aircraft design and evaluation including choice of airfoil and wing planform, aircraft fuselage design, control surfaces, power plants, and integration of the separate aircraft components.

159. Aircraft Stability and Control (3)

Prerequisites: Engineering 150A, 154, and credit or concurrent registration in Engineering 187B

Static stability and control, general equations of unsteady motion, stability derivatives, stability of uncontrolled motion, response of aircraft to actuation of controls. (Formerly numbered and entitled Engineering 190G, Engineering Applications.)

160A-160B. Principles of Chemical Engineering (3-3)

Same course as Chemistry 160A-160B

Prerequisite: Credit or concurrent registration in Engineering 108 or Chemistry 109A or 110A, or equivalent.

Industrial stoichiometry; fluid flow and heat transfer as applied to unit operations such as evaporation, distillation, extraction, filtration, gas-phase mass transfer, drying, and others. Problems, reports, and field trips

161. Creativity in Design (3) II

Methods to stimulate creativity in design. Investigation of hidden blocks to creative thought. Emphasis on placing students in a design situation requiring an inventive or creative solution.

162. Transistor Circuit Analysis (3) I, II

Prerequisite: Engineering 114.

Analysis and design of transistor voltage and power amplifier circuits by use of duality and matrix methods. Feedback amplifiers, audio amplifiers, video amplifiers, power supplies, and oscillators; transient analysis and noise considerations. (Formerly numbered Engineering 182.)

164. Semiconductor Devices (3) I

Formerly Engineering 192

Prerequisite: Engineering 114.

Tunnel diodes and backward diodes, breakdown diodes, multilayer diodes, varactor diodes, silicon controlled rectifiers and switches, unijunction transistors, field effect transistors, and hot electron devices.

166. Honors Course (1-3) I, II

Refer to Honors Program.

167. Control System Components (3) II

Prerequisites: Engineering 100, 101, and 111.

Position transducers, phase-sensitive demodulators, static magnetic and rotating amplifiers, and servo-motors. Derivation of component transfer functions. (Formerly numbered and entitled Engineering 131, Electromechanical Control Devices.)

167L. Control Systems Components Laboratory (1) II

Prerequisite: Credit or concurrent registration in Engineering 167.

Experimental determination of transfer functions for control system components. (Formerly a part of Engineering 131.)

168. Feedback Control Systems (3) I

Prerequisites: Engineering 112 and 114.

Analysis of regulatory systems including servomechanisms by the Laplace transform method. System performance and stability; Nyquist, Bode, and root-locus diagrams; elementary synthesis techniques. Practical components and examples of typical designs. (Formerly numbered Engineering 138A.)

169. Advanced Feedback Control Systems (3) II

Prerequisite: Engineering 168.

A continuation of Engineering 168 to include feedback compensation, advanced compensation techniques, signal flow theory, state-variable techniques, introduction to non-linear and sampled-data control systems.

168. Analysis of steady-state and transient response of uncompensated and compensated feedback control systems using transfer functions and frequency response techniques. (Formerly numbered Engineering 138B.)

170. Intermediate Engineering Problem Analysis (3) I, II

169L. Feedback Control Systems Laboratory (1)

Prerequisite: Engineering 40.

Advanced use of Fortran and other computer programming languages for engineering problem analysis.

173. Electronic Analog Systems (3)

Prerequisite: Engineering 114.

Modern analog computers using electronic and electro-mechanical elements. Operational amplifiers, integrators, summing devices and non-linear elements. (Formerly numbered Engineering 193.

174. Pulse and Digital Circuits (3) I, II

Prerequisite: Engineering 114.

Linear waveshaping, diode and transistor switching characteristics, clipping and clamping circuits, comparators, microcircuit logic elements, multivibrators, and field effect transistor switching characteristics and circuits. (Formerly numbered Engineering 194.)

175. Advanced Pulse and Digital Circuits (3) II

Prerequisite: Engineering 174.

Introduction to linear integrated circuits; linear voltage and current sweep circuits, blocking oscillators, negative resistance switching devices and circuits, analog-to-digital and digital-to-analog conversion techniques, digital storage devices and circuits.

176. Logic Design and Switching Circuits (3) I, II

Prerequisite: Engineering 101.

Switching algebra, Karnaugh map and Quine-McCluskey tabular methods of minimization; multiple output functions; coding and decoding; economical NAND and NOR element implementation; asynchronous sequential circuit analysis and design. (Formerly numbered Engineering 195.)

177. Advanced Logic Design and Switching Circuits (3) I, II

Prerequisite: Engineering 176.

Synchronous sequential circuit design: counters, shift registers, memory element properties, state assignment methods. Introduction to threshold logic.

177L. Switching Circuits Laboratory (1) II

Prerequisites: Engineering 174 and 176.

Experiments involving switching applications of diodes, bipolar transistors, field effect transistors, and integrated circuits. Implementation of logic design of combinational and sequential switching systems.

178. Computer Organization (3) I, II

Prerequisites: Engineering 40 or Mathematics 7, and Engineering 176.

Data and information structure, machine and assembly language programming, arithmetic and control units microprogramming, memory devices, input output devices, channels and operating systems concepts.

180. Principles of Engineering Economy (3) I, II

Prerequisite: Engineering 115.

Analysis of the costs of development and promotion, construction, operation, depreciation and depletion. Capital recovery, income, return and yield. Valuations and appraisals, cost analysis and financial analysis. Application to engineering problems.

181. Hydrodynamics (3)

Prerequisites: Engineering 50B or Physics 105, and Engineering 187A or Mathematics 118A or 119 or 124.

Kinematics, equations of continuity, energy, and momentum of perfect fluids. Introduction to conformal transformations. Three-dimensional and two-dimensional irrotational motion, with applications to physical problems. Vector notation will be used.

183. Simulation of Engineering Systems (3) I, II Two lectures and three hours of laboratory.

Prerequisites: Engineering 40 and 187A.

Analysis and design of engineering systems using modern analog and digital computers. Simulation of dynamic systems. Application to problems in mechanics, heat transfer, thermodynamics, and control systems.

184. Experimental Strain Measurements and Analysis (3)

Two lectures and three hours of laboratory.

Prerequisites: Engineering 60 and 116.

Laboratory methods for measuring deformation, strains, and forces. Emphasis on instrumentation.

186. Intermediate Solid Mechanics (3) II

Prerequisite: Engineering 116.

Shear center, curved flexural members, beams on elastic foundation, flat plates, torsion of non-circular sections, thick-walled cylinders, stress concentrations, energy methods.

187A-187B. Methods of Analysis (3-3) I, II

Prerequisite: Mathematics 52; Engineering 187A is a prerequisite for Engineering 187B. Solutions of advanced engineering problems in fluids, thermodynamics and electricity utilizing analytical methods, analogs, dimensional analysis and the theory of models.

188. Digital Solutions of Engineering Problems (3) I, II

Prerequisites: Engineering 40 or Mathematics 7, and Engineering 187A.

Digital solution of classes of engineering problems. Application of numerical methods with consideration of limitations imposed by computer and programming language characteristics.

189. Automatic Control Systems (3) II

Prerequisites: Engineering 50B, 100B, and 187A.

Not open to students filing an electrical engineering master plan.

Analysis of the output-input characteristics of linear, mechanical, electrical, hydraulic, and pneumatic control systems.

190A. Civil Engineering Structural Design (3) II

One lecture and six hours of laboratory.

Prerequisites: Engineering 120A and 122. Structural design in steel; structural connections; tension and compression members; beams; building code requirements applied to design of buildings of various structural materials including steel.

190C-190D. Mechanical Engineering Applications (2-2) I, II Six hours of laboratory

Prerequisites for 190C: Engineering 106, 108, and 116.

Prerequisites for 190D: Engineering 145, 146A, 148, and 190C.

Applications of engineering principles to design of machinery and energy conversion systems. Individuals student projects.

190G-190H. Aerospace Engineering Applications (2-2) I, II Six hours of laboratory

Prerequisites for 190G: Engineering 150B, 151A, and 154. Prerequisite for 190H: Engineering 190G.

Student projects in aerospace design.

191. Microwave Devices (3) II

Prerequiste: credit or concurrent registration in Engineering 139.

Varactor diodes and applications, microwave switches, limiters and phase shifters, detector and mixer diodes and circuits, avalanche transit-time devices, bulk-effect devices, microwave transistors and circuits.

192A. Air Environment (2) I, II

Effects of air pollution, sources of pollution, atmospheric chemistry, measurement and instrumentation, automobile development and emissions. 192B. Land Environment (2) I. II

Man's interaction with the land environment; extraction of natural resources; disposal of wastes; land development; seismic problems related to land usage. 192C. Water Environment (2) I, II

Man's interaction with the water environment; water quality criteria, water pollution and water reuse. Not open to students in civil engineering. 196A-196B. Advanced Engineering Topics (1-3, 1-3) I, II

Prerequisites: Minimum grade point average of 2.0 in engineering or approval of the Academic and Ethical Standards Committee of the School of Engineering. Modern developments in engineering. Six units maximum credit for any combination of

Engineering 196A, 196B, and 199. (Formerly numbered Engineering 196.) 199. Special Study (1-3) I, II

Prerequisites: Minimum grade point average of 2.0 in engineering or approval of the Academic and Ethical Standards Committee of the School of Engineering. Individual study. Six units maximum credit for any combination of Engineering 196 and

199

#### **Graduate Courses in Aerospace Engineering**

AE 200. Seminar (1-3)

Prerequisite: Consent of the graduate adviser and instructor.

Intensive study of selected topics in aerospace engineering, topic to be announced in class schedule. Maximum credit 6 units applicable on a master's degree.

AE 202. Aeroelasticity (3)

Prerequisites: Engineering Mechanics 201 and credit or concurrent registration in Engineering 187B or Mathematics 118B.

Aircraft and missile structures deformed under static and dynamic loads; aeroelastic instability, vibration modes, divergence, loss of control and alteration of lift distribution; introduction to flutter analysis.

AE 204. Flight Dynamics-Stability and Control (3)

Prerequisite: Credit or concurrent registration in Engineering Mechanics 201. Dynamic stability and control of aerospace vehicles. Stability derivatives, stability of

uncontrolled motion, response to actuation of controls, automatic stability and control. AE 205. Flight Dynamics-Theory of Flight Paths (3)

Prerequisite: Engineering 150B.

Analysis of trajectories of aircraft, missiles, satellites, and spacecraft subjected to uniform or central gravitational forces, aerodynamic forces, and thrust.

AE 211. Aerodynamic Noise (3)

Prerequisite: Engineering Mechanics 243.

Jet noise, sonic boom, boundary layer noise, and methods of suppression.

AE 222. Aerothermal Structural Analysis (3)

Prerequisite: Engineering Mechanics 221

Stress Analysis of structures at elevated temperatures.

AE 241. Hydrodynamic Stability (3)

Prerequisite: Engineering Mechanics 243.

Stability of boundary layers, superposed fluids, fluids with thermal gradients, hydromagnetic flow.

AE 242. Theory and Aerodynamics of Transonic Flight (3)

Prerequisite: Aerospace Engineering 243.

Application of engineering principles to the analysis of transonic flight.

AE 243. Supersonic Flow Theory (3)

Prerequisite: Engineering 150B.

Theory of flow at supersonic speeds. Linearized theory, three-dimensional wings in steady flight, slender-body theory, methods of characteristics.

AE 244. Hypersonic Flow Theory (3)

Prerequisite: Aerospace Engineering 243.

Two- and three-dimensional hypersonic flows. Hypersonic similarity parameter, hypersonic small-disturbance theory; Newtonian flow, shock-layer, and other methods for blunt bodies.

AE 245. Magnetofluidmechanics (3)

Prerequisite: Engineering Mechanics 243. Study of the effects of interaction of an electromagnetic field with an electrically conducting fluid. Stability, boundary layers, shock waves, and other applications.

AE 246. Rarefied and Real Gas Flows (3)

Prerequisite: Engineering 187B.

Kinetic theory, the Boltzmann equation, the hydrodynamic equations, Chapman-Enskog Theory. Real gases and chemical reactions. Approximations: applications to shock structure, ultrasonics, heat transfer, and hypersonics. Free molecule flow.

AE 250. Principles of Electromagnetic Propulsion (3)

Prerequisite: Engineering 187B.

Basic concepts of plasmas and magnetogasdynamics; developing magnetogasdynamic power plants.

AE 253. Seminar on Boundary Layer Topics (3)

Prerequisite: Engineering Mechanics 244. Boundary layer control, dissociation in boundary layers, ablation in boundary layers.

AE 296. Advanced Topics in Aerospace Engineering (2 or 3)

Advanced study in the field of aerospace engineering, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

AE 297. Research (1-3)

Prerequisite: Consent of graduate adviser.

Research in engineering. Maximum credit six units applicable on a master's degree.

#### **Graduate Courses in Civil Engineering**

CE 200. Seminar (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in advanced civil engineering, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

CE 201. Advanced Theory of Structures (3)

Prerequisites: Engineering 120B and Mathematics 118A.

Analysis of statically indeterminate structures based on principles of deflected structures. Approximate analysis of structures under lateral loads for rigid and shear wall structures.

CE 202. Design of Thin Shell Structures (3)

Prerequisite: Engineering 120B.

Analysis and design of typical civil engineering thin shell structures.

CE 203. Plastic Design in Steel (3)

Prerequisite: Engineering 120B.

Analysis and design of steel framed structures for ultimate load. Connections, secondary design problems, column stability, and repeated loading.

CE 205. Prestressed Concrete Structures (3) Prerequisite: Engineering 120A.

Fundamental concepts of prestressed concrete theory. Design applications to various types of structures.

CE 206. Matrix Analysis of Structures (3)

Prerequisite: Engineering 120A.

Development of matrix methods for the analysis of structural systems. Force methods, displacement methods. Application of the digital computer to structural analysis.

CE 207. Dynamics of Structures (3)

Prerequisite: Engineering 120A.

Dynamic disturbances, structures with variable degrees of freedom, free vibrations of slender elastic beams; continuous beams, rigid frames, floor systems. Energy methods in structural dynamics.

CE 208. Numerical Methods in Structural Engineering (3) Prerequisite: Engineering 120B.

Moments and deflections in beam systems; elastic and inelastic stability, columns and beams on elastic supports, vibration of structural systems. CE 209. Computer Analysis of Structures (3)

Prerequisites: Engineering 40 and 120B.

Fundamentals of matrix notation, equilibrium equations, compatibility relations, constitutive equations, joint releases. General alogrithm for writing computer programs for space structures, trusses and frames. Use of existing programs such as ICES/STRUDL, NASTRAN, etc., for solving structural problems.

CE 210. Finite Element Analysis of Structures (3)

Prerequisites: Engineering 40 and 120A.

General procedure, various types of finite elements; analysis and design of isotropic and orthotropic plates and shells, deep beams, and shear walls using finite element technique; use of digital computers for solutions. Application to civil engineering structures.

CE 220. Traffic Engineering (3)

Prerequisite: Engineering 127.

Traffic characteristics and studies. Control and regulation of street and highway traffic. Parking facilities, mass transportation, traffic engineering administration.

CE 221. Airport Engineering (3)

Prerequisite: Engineering 126

Problems in airport planning and design. Site selection, general airport layout; safety, economy a community compatibility. Functional design of buildings. Lighting, navigational aids, approach protection.

CE 222. Mass Transit Engineering (3) Prerequisite: Engineering 126.

Urban transportation and land use, characteristics of urban travel patterns, estimation of transit usage, planning of transit systems, economic problems of mass transportation. Case studies of existing and proposed systems.

CE 230. Open Channel Hydraulics (3)

Prerequisite: Engineering 123.

Open channel flow theory, analysis, and problems, including studies of critical flow, uniform flow, gradually varied and rapidly varied flow, all as applied to the design of channels, spillways, energy dissipators, and gravity pipelines.

Prerequisite: Engineering 123.

Measurement and interpretation of precipitation, evapotranspiration, stream flow and groundwater flow; hydrologic methodology and applications.

CE 232. Fluvial Hydraulics (3)

Prerequisite: Engineering 123.

Characteristics of rivers; mechanics of sediment transport; hydraulics and design of alluvial channels; channel stability; model studies.

CE 235. Water Quality Engineering (3)

Prerequisites: Engineering 123 and 125.

Development of water quality criteria. Survey of current methods of water treatment, wastewater treatment and water renovation. Economic considerations of water quality management.

CE 236. Water Quality Processes (3)

Two lectures and three hours of laboratory.

Prerequisite: Civil Engineering 235 or concurrent registration with consent of instructor. Theoretical and laboratory study of the chemical and microbiological processes which govern modern water and wastewater treatment.

CE 240. Advanced Soil Mechanics (3)

Prerequisite: Engineering 122.

Advanced theories of soil mechanics and their applications to design, including physicochemical behavior of soils, theories of compaction, consolidation, stress distribution, shear strength, settlement analyses, lateral pressures, and bearing capacity of soils.

CE 241. Advanced Foundation Engineering (3)

Prerequisite: Civil Engineering 240.

Advanced theories of soil bearing capacity and stress distribution in soils. Analysis and design of foundations and retaining walls. Shallow foundations, piles, piers and caissons. Design of foundations for dynamic loads. Dewatering and other field problems.

CE 242. Seepage and Earth Dams (3)

Prerequisite: Civil Engineering 240.

Principles governing the flow of water through soils and their application in the design of earth and rock fill dams. Stability analysis and design of earth dams.

CE 243. Experimental Soil Mechanics (2)

One lecture and three hours of laboratory.

Prerequisite: Credit or concurrent registration in Civil Engineering 240.

Techniques of laboratory testing for the determination of the engineering properties of soils. Applications in foundation engineering, earth dams, highways, airports and underwater soil engineering.

CE 244. Soil Structure Interaction (3)

Prerequisite: Credit or concurrent registration in Civil Engineering 240.

Analysis of stresses and deformations of structural elements supported by soil. Analysis of pile foundations subject to lateral, vertical and combined loads by numerical and finite element methods. Solutions of slabs and mat foundations.

CE 280. Seminar in Structural Engineering (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in structural engineering. Maximum credit six units applicable on a master's degree.

CE 281. Seminar in Transportation Engineering (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in transportation engineering. Maximum credit six units applicable on a master's degree.

CE 282. Seminar in Soil Mechanics and Foundation Engineering (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor. An intensive study in soil mechanics and foundation engineering. Maximum credit six units

applicable on a master's degree.

CE 285. Seminar in Construction Engineering (2 or 3) Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in construction engineering. Maximum credit six units applicable on a master's degree.

CE 296. Advanced Topics in Civil Engineering (2 or 3)

Advanced study in the field of civil engineering, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

CE 297. Research (1-3)

Prerequisite: Consent of graduate adviser.

Research in engineering. Maximum credit six units applicable on a master's degree.

**Graduate Courses in Electrical Engineering** 

EE 200. Seminar (1-3)

An intensive study in advanced electrical engineering, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

EE 201. Seminar in Electromagnetic Systems (1-3)

An intensive study in electromagnetic systems. Maximum credit six units applicable on a master's degree.

EE 202. Seminar in Electronic Design (1-3)

An intensive study in electronic design. Maximum credit six units applicable on a master's degree

EE 203. Seminar in Digital Systems (1-3)

An intensive study in digital systems. Maximum credit six units applicable on a master's degree.

EE 204. Seminar in Feedback Control Systems (1-3)

An intensive study in feedback control systems. Maximum credit six units applicable on a master's degree.

EE 205. Seminar in Communications Systems (1-3)

An intensive study in communication theory and systems. Maximum credit six units applicable on a master's degree.

EE 210. Linear System Analysis (3)

Prerequisites: Engineering 111 and credit or concurrent registration in Engineering 187B or Mathematics 118B.

Loop and nodal system equations based on topological considerations, four-terminal network theory using matrices. Fourier integral transform theory as applied to linear system analysis. Positive real functions and associated testing methods.

EE 211. Linear System Synthesis (3)

Prerequisite: Electrical Engineering 210.

Frequency-domain synthesis of driving point and transfer impedances in passive and active networks. Canonical forms and network equivalents. Time-domain synthesis and considerations of pulsed-data systems.

EE 212. Synthesis of Linear Active Networks (3)

Prerequisite: Electrical Engineering 211.

Synthesis of linear networks using active elements such as controlled sources, negative-impedance converters, gyrators and operational amplifiers.

EE 214. Computer-aided Network Analysis and Design (3)

Prerequisites: Electrical Engineering 210, Engineering 196B (Computer-aided Circuit Design), and Fortran Programming.

Elements of approximation theory, device modeling, topological analysis of networks, applications of general purpose computer programs, design of passive and active filters, circuit optimization and other related topics.

EE 216. Noise in Electrical Devices (3)

Prerequisite: Engineering 162.

Major types and origins of electrical noise and the effects of noise on system behavior. Emphasis on concepts of noise as a random process, as distinguished from systematic or periodic interference.

EE 220. Feedback Control Systems (3)

Prerequisite: Engineering 168.

Analysis and synthesis of feedback control systems using feedback compensation. Multiple-loop control systems; a-c feedback control systems; optimization.

EE 222. Sampled-Data Systems (3)

Prerequisite: Engineering 168.

Analysis and synthesis of sampled-data and digital control systems; techniques for the design of time optimal sampled-data control systems; z-transform calculus and difference equation synthesis techniques for determining stability and system response. (Formerly entitled: Non-Linear Systems.)

EE 225. State Space Analysis of Control Systems (3)

Prerequisite: Engineering 168.

State space representation of control systems, state transition flow graphs, methods of solution of the state equation, controllability and observability, and introduction to optimal control systems.

EE 231. Integrated Circuits (3)

Prerequisite: Engineering 174.

Fabrication methods, logic gates, multivibrators, medium-and large-scale integration techniques and devices. Linear integrated circuits and MOS technology. Emphasis on proper application of devices through knowledge of circuit operation and interpretation of manufacturers' specification sheets.

EE 232. Transistor Circuit Design (3)

Prerequisite: Engineering 162.

Field effect transistors and circuits; quantitative variable nature of transistor parameters; differential and chopper stabilized dc amplifiers; high efficiency switching mode power amplifiers, converters and inverters; noise, reliability considerations and high speed switching.

EE 234. Semiconductor RF Circuit Design (3)

Prerequisite: Engineering 134.

Wide band amplifiers, low level RF amplifiers and mixers, IF amplifiers, AGC, tuning and stability problems, unilateralization and mismatching techniques, harmonic oscillators, VHF power amplifiers including varactor multipliers.

EE 240. Radiation and Propagation (3)

Prerequisite: Engineering 139.

Impedance characteristics and radiation patterns of thin linear antenna elements; field intensity calculations. Tropospheric and ionospheric propagation: propagation anomalies.

EE 242. Microwave Networks (3)

Prerequisite: Engineering 139. Equivalent circuits for waveguide discontinuities developed on the basis of mode theory, linearity, reciprocity, and symmetry. Application of general network theory to wave guides, cavity resonators and antennas.

EE 246. Radar Systems (3)

Prerequisite: Engineering 139.

The radar equation; characteristics of CW, FM, MTI, pulse-doppler and tracking radar system; transmitters, antennas and receivers; detection of signals in noise, extraction of information; propagation effects; system engineering and design.

EE 250. Quantum Electronics (3)

Quantum mechanics for engineers concerned with its application to solid-state devices and optical communication systems.

EE 252. Optical Communications (3)

Prerequisite: Electrical Engineering 250.

Fundamentals of electro-optical technology from ultraviolet through infrared. Characteristics of thermal and laser radiation including generation, transmission, detection, data processing and display.

EE 263. Coding Theory (3)

Prerequisite: Engineering 133.

The theory of coding to combat noise over communication channels. Redundancy added to messages to assure arbitrarily small error rates at a given information rate. Discussion of channels and capacity. Block codes, cyclic codes, BCH codes, convolutional code. Formerly offered under Electrical Engineering 200.

EE 264. Digital Processing of Signals (3)

Prerequisite: Engineering 135.

Theory of digital signal processing. Emphasis on digital filters, discrete spectrum analysis, and windows. Fast Fourier transforms. Generalized linear filtering; Cepstral analysis and deltic loops. Formerly offered under Electrical Engineering 200.

EE 270. Microprogramming (3)

Prerequisite: Engineering 178.

Fundamentals of microprogramming and read only storage technology as related to the design of digital computers. Formerly offered under Electrical Engineering 200.

EE 271. Computer Input/Output Devices and Systems (3)

Prerequisite: Engineering 178.

Control programs, interrupt procedures, I/O programming techniques, interfaces, channels, magnetic recording techniques, I/O devices. Formerly offered under Electrical Engineering 200.

EE 276. Fault Tolerate Computing (3)

Prerequisite: Engineering 178.

Triple modular redundancy, standby sparing, quaded logic, parity and residue checking of computer systems and subsystems. Diagnostic programming and fault testing fundamentals. Formerly offered under Electrical Engineering 200.

EE 277. Topics in Logic Design (3)

Prerequisite: Engineering 177.

Threshold logic, adaptive logic networks, magnetic core logic synthesis, functional decomposition, Turing machines, negative radix arithmetic. Solution of logic design algorithms by digital computer. (Formerly numbered Electrical Engineering 230.)

EE 278. Electronic Digital Systems (3)

Prerequisite: Engineering 178.

Design of arithmetic, control and memory units. Detailed comparative analysis of the system organization and operation of several digital computers, with special attention to the interdependence of design decisions and their dependence upon the intended system application. (Formerly numbered Electrical Engineering 236.)

EE 296. Advanced Topics in Electrical Engineering (2 or 3)

Advanced study in the field of electrical engineering, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

EE 297. Research (1-3)

Prerequisite: Consent of graduate adviser.

Research in engineering. Maximum credit six units applicable on a master's degree.

# **Graduate Courses in Engineering Mechanics**

EM 200. Seminar (2 or 3)

Advanced study of, or within, one phase of engineering mechanics, such as elasticity, plasticity, rheology, and micromeritics; buckling, vibration, and stability phenomena; hydrodynamics and magnetohydrodynamics; incompressible, compressible, and non-newtonian flow. May be repeated with new content. Maximum credit six units applicable on a master's degree.

EM 201. Advanced Dynamics (3)

Prerequisites: Engineering 50B and 187A or Mathematics 118A. Kinematics and kinetics of systems of particles and rigid bodies with special reference to

engineering problems. Moving reference axes, generalized coordinates, Lagrangian equations, Hamilton's principle and variational methods.

EM 203. Theory of Vibrations (3)

Prerequisites: Engineering Mechanics 201 and credit or concurrent registration in Engineering 187B or Mathematics 118B.

Linear and non-linear periodic phenomena as applied to discrete systems and continuous media with application to physical problems.

EM 204. Theory of Nonlinear Vibrations (3)

Prerequisite: Engineering Mechanics 201.

Analysis of discrete systems with one or more degrees of freedom. Phase plane, harmonic balance, and other methods. Stability

EM 205. Theory of Random Vibrations (3) Prerequisite: Engineering Mechanics 203.

Random processes with applications to vibration of discrete and continuous systems. EM 210. Continuum Mechanics (3)

Prerequisite: Engineering 187B or Mathematics 118B.

Equations for the stress, deformation, and motion in a continuous medium; application in fluid and solid mechanics. EM 221. Theory of Elasticity (3)

Prerequisites: Engineering 116 and credit or concurrent registration in Engineering 187B or Mathematics 118B. Engineering 186 is recommended.

Analysis of stress and strain: Stress-strain relations; the equations of elasticity; uniqueness theorem; compatibility conditions; flexure and torsion. Vector and tensor notation will be

EM 222. Theory of Anisotropic Elasticity (3)

Prerequisite: Engineering Mechanics 221.

Generalized Hooke's law, transformation of elastic constants, laminated constitutive equations, laminated plates and shells, torsion of anisotropic bodies, design criteria for combined loading.

EM 223. Energy Methods in Mechanics (3)

Prerequisite: Engineering Mechanics 221. Variational energy principles applied to the dynamics of rigid bodies, analysis of elastic frames; theories of plates and shells, buckling, and vibrations.

EM 225. Theory of Plates (3) Prerequisite: Engineering Mechanics 221.

Bending and buckling theory of plates; application of small deflection and large deflection theories to plates with various boundary conditions; use of approximate methods and exact

#### EM 226. Theory of Shells (3)

Prerequisite: Engineering Mechanics 221.

Membrane and bending theory of shells of revolution and shells of arbitrary shape; exact and approximate methods of solution of shells subjected to axisymmetric and arbitrary loads.

EM 227. Theory of Elastic Stability (3) Prerequisite: Engineering Mechanics 221.

Stability of elastic systems. Differential equations of stability by summation of forces and movements, and by the variational method. Applications.

EM 233. Theory of Plasticity (3)

Prerequisite: Engineering Mechanics 221.

Inelastic stress-strain relations. Solutions to engineering problems with ideally-plastic, strain-hardening, and visco-elastic materials.

EM 243. Advanced Fluid Mechanics I (3)

Prerequisites: Engineering 115 and credit or concurrent registration in Engineering 187B or Mathematics 118B.

Fluid kinematics and kinetics. Conservation of mass, energy, and momentum, applied to Newtonian fluids. Navier-Stockes equations. Couette and Poiseuille flow. Potential flow. Introduction to turbulence and boundary layer theory. Vector and tensor notation will be used.

EM 244. Advanced Fluid Mechanics II (3)

Prerequisite: Engineering Mechanics 243.

A continuation of Engineering Mechanics 243. Further work in laminar and turbulent flow, and boundary layer theory. Diffusion. Applications to engineering problems.

EM 296. Advanced Topics in Engineering Mechanics (2 or 3)

Advanced study in the field of engineering mechanics, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

# EM 297. Research (1-3)

Prerequisite: Consent of graduate adviser. Research in engineering. Maximum credit six units applicable on a master's degree.

### **Graduate Courses in Mechanical Engineering**

#### ME 200. Seminar (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor. An intensive study in advanced mechanical engineering, topic to be announced in the class

schedule. Maximum credit six units applicable on a master's degree.

ME 201. Seminar in Thermodynamics and Fluid Flow (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in thermodynamics and fluid flow. Maximum credit six units applicable on a master's degree.

ME 202. Seminar in Cryogenics (2 or 3)

Prerequisites: Consent of the graduate adviser and instructor.

An intensive study in cryogenics. Maximum credit six units applicable on a master's degree

ME 203. Seminar in Engineering Materials (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in engineering materials. Maximum credit six units applicable on a master's degree.

ME 204. Seminar in Engineering Systems (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in engineering systems. Maximum credit six units applicable on a master's degree.

ME 205. Seminar in Operations Research in Engineering (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in operations research in engineering. Maximum credit six units applicable on a master's degree.

ME 206. Seminar in Nuclear Engineering (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in nuclear engineering. Maximum credit six units applicable on a master's degree.

ME 207. Seminar in Mechanical Design (2 or 3)

Prerequisite: Consent of the graduate adviser and instructor.

An intensive study in mechanical design. Maximum credit six units applicable on a master's degree.

ME 220A-220B. Mechanical Vibrations (3-3)

Prerequisites: Engineering 147B, 183, and 187B.

Topics in vibration relating to mechanical design such as non-linear vibrations, distributed mass systems, random vibrations, mobility analysis, isolater design.

ME 221. Stress Analysis (3) Prerequisites: Engineering 146B and 187B.

Topics in applied elasticity, advanced study of the resistance of materials and experimental stress analysis. Failure theories, energy methods, limit design, theory of plates and shells. Photoelasticity, brittle lacquers, strain gages, and analogs in determining static, dynamic and residual stress distributions.

ME 222A-222B. Synthesis of Machines (3-3)

Prerequisites: Engineering 183 and 187B.

Problems in mechanical design involving synthesis of mechanisms wherein displacement, velocity, acceleration and jerk are paramount considerations. ME 224. Fluid Power and Control Systems (3)

Prerequisite: Engineering 189.

Analysis of dynamic performance of physical systems such as pneumatic, hydraulic and hot-gas. Transient forces and valve instability. Servo characteristics.

ME 231. Advanced Science of Materials (3)

Prerequisite: Engineering 107.

Structure and physical properties of solids. Imperfections in materials and their effect on

various properties. Elasticity, plasticity, and fracture of metals related to atomic and crystal

ME 232. Physical Metallurgy for Engineers (3)

Prerequisites: Engineering 107 and 108.

Fundamentals of crystallography, imperfections, alloying and deformation. Composition, temperature, prior thermal and mechanical treatment on structure of metal; relationship of structure to mechanical properties.

ME 233. Mechanical Metallurgy for Engineers (3)

Prerequisites: Engineering 107 and 108.

Fundamentals of plastic deformation of crystalline solids; elementary theory of statics and dynamics of dislocations, deformation, fracture and metallurgical variables on mechanical properties; environment-failure interactions.

ME 234. High Temperature Materials (3)

Prerequisite: Engineering 107.

Behavior of metals, cermets, and nonmetallic materials at high temperatures. Effect of environment and service conditions on composition, structure, and physical properties. ME 246. Advanced Topics in Automatic Controls (3)

Prerequisites: Engineering 187A and 189.

Synthesis of linear control systems. Analysis of nonlinear systems by describing function and phase plane methods. Sampled data systems analysis; statistical design techniques and

ME 250. Analytical Thermodynamics (3)

Prerequisite: Engineering 187A.

Advanced concepts of macroscopic thermodynamics. Application of thermodynamics to special systems. ME 260. Conduction Heat Transfer (3) Prerequisites: Engineering 140 and 187B.

Conduction heat transfer, multidimensional conduction processes, transient analysis. ME 262. Convection Heat Transfer (3)

Prerequisite: Mechanical Engineering 274.

Convection heat transfer. Advanced theories of forced and free convection. ME 264. Radiation Heat Transfer (3)

Prerequisites: Engineering 140 and 187B. Radiation heat transfer. Solid body and gaseous radiation.

ME 267. Cryogenic Engineering (3)

Prerequisite: Engineering 148.

Analysis of low-temperature processes and equipment. Physical properties of structural and other materials used in producing, maintaining, and using low temperatures. ME 270. Gas Dynamics (3)

Prerequisites: Engineering 143 and 187B.

Further consideration of the flow of compressible fluids in conduits. Shock fronts, unsteady flow and real gases.

ME 274. Boundary Layers in Internal Flows (3) Prerequisites: Engineering 140 and 187B. Conservation laws applied to boundary layers in viscous, heat conducting fluids; analysis of the boundary layer equations; applications to internal flows. ME 276. Bearing Design and Lubrication (3) Prerequisite: Engineering 187B. Friction and wear of materials. Boundary and thick film lubrication. Design of incompressible and compressible fluid bearings; rolling-element bearings.

ME 280. Aircraft and Missile Propulsion (3)

Prerequisites: Engineering 142, 143, and 187B. Analysis of ideal gas turbine cycles. Principles of regeneration, reheat and intercooling. Thermodynamic analysis and performance of turbojet engines, ramjet engines and rocket motors. Rocket jet propellant systems. Dynamics of rocket propulsion free of gravity and air resistance.

ME 281. Propulsion Systems for Spacecraft (3)

Prerequisites: Engineering 148 and 187B. The physical and chemical laws that govern the performance, selection and design of non

air-breathing propulsion systems for space applications.

ME 284. Theory of Turbomachines (3)

Prerequisites: Engineering 143 or 150A. Application of the fundamental laws of fluid mechanics to the problems of energy transfer between fluid and rotor. Performance characteristics or turbomachines. Study of loss mechanisms.

ME 285. Direct Energy Conversion (3) Prerequisites: Engineering 149 or ME 250; and Engineering 187A. Application of physical and chemical laws to the analysis, design, and evaluation of various

direct energy conversion systems.

ME 296. Advanced Topics in Mechanical Engineering (2 or 3) Advanced study in the field of mechanical engineering, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

ME 297. Research (1-3)

Prerequisite: Consent of graduate adviser.

Research in engineering. Maximum credit six units applicable on a master's degree.

#### Graduate Courses in Engineering

E 290. Problem Analysis (3)

Prerequisite: Consent of graduate adviser. Review of methods for investigation and reporting of data. Consideration of problems in

preparation of project or thesis.

E 295. Seminar in Environmental Engineering (3) Prerequisite: Engineering 192A, 192B, or 192C.

Environmental problems including an intensive investigation of selected topics.

E 298. Special Study (1-3) Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Three units maximum credit.

E 299. Thesis or Project (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# English

# In the College of Arts and Letters

#### Faculty

Emeritus: Adams, Burnett, Gulick, Haskell, Johnson, F., Keeney, Kennedy, Marchand, Shouse, Theobald.

Professors: Baker, J., Benson, Dickinson, Gellens, Keller, Monteverde, Perkins, Phillips, Sanderlin, Sandstrom, Tozer (Director), Vanderbilt, Wanlass, Widmer

Associate Professors: Brashers, Chater, Davis, Henig, Ingham, Kehler, H., McLeod, Moramarco, Nelson, Nichols, Patterson, Redding, M., Redding, R., Santangelo, Savvas, Taylor

Assistant Professors: Adams, E., Aninger, Barry, Boe, Brown, Bumpus, Butler, Crane, DeMarinis, Farber, Forrey, Gervais, Hinkle, Karnath, Kehler, D., Kohler, Rogers, Rother, J., Rush, Sarfatt, Shojai, Stiehl, Sullivan, Taft, Thrane, Tunberg, Wall, Wheeler

Lecturers: Ellsberg, Johnson, McLevie, Rother, C.

# English / 213

# 212 / English

Offered by the Department

Master of Arts degree in English.

Major in English with the A.B. degree in liberal arts and sciences. Minor in English.

Teaching major in English, with specialization in both elementary and secondary teaching. Teaching minor in English, with specialization in both elementary and secondary teaching.

Courses in comparative literature. (Refer to this section of the catalog under comparative literature.)

#### **English Major**

#### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. No more than 48 units in English and comparative literature courses can apply to the degree. To satisfy the requirement in foreign language, students may not use courses in conversation.

A minor is not required with this major.

Preparation for the major. English 6, 51A-51B, 53A-53B; and three units of electives in English excluding 1X, 1Y, or 1Z. (18 units.)

Major. A minimum of 24 upper division units in English, selected with the approval of the adviser, to include (a) English 101 (b) at least nine units in one of the areas of study listed below and (c) at least three units in British Literature before 1800, three units in British Literature after 1800, and three units in American Literature. The same course may be used to satisfy requirements under both (b) and (c). No more than six units of courses in Comparative Literature may be included as part of the major in English.

Areas of Study:

British Literature before 1800: English 102, 103, 104, 111, 112, 113A, 113B, 121A, 122A, 122B, and Comparative Literature 120.

British Literature after 1800: English 114A, 114B, 115, 116, 117, 118, and 121B. American Literature: English 130, 131, 133, 134, 135, and 136.

Modern Literature: English 136, 137, 138, 134, 135, and 136. Literary Types, Theory, and Criticism: English 140, 142, 144, 150, 153, and Comparative Literature 124, 125, 126, 150, 152, and 153A-153B. Creative Writing: English 140, 142A-142B, 144, 149, 170, 171, 172 and 179.

NOTE: In addition to the courses listed above, appropriate sections of English 129, 138, 139, 149, 190, and 199 may be used to satisfy the requirements for the major if approved by the departmental adviser.

# **Selection of Courses**

Prospective majors of sophomore standing may, with the consent of the course instructor and subject to general college regulations (see "Credit for Upper Division Courses" in the section of the catalog on General Regulations), substitute six units of upper division electives for six units of lower division work. These courses must be in the same field as those which they replace, and must be approved by the departmental adviser. Students of junior or senior standing may substitute for any deficiencies in lower division

requirements in English (except English 6) an equivalent number of units of upper division courses selected with the approval of the departmental adviser.

#### English Minor

The minor in English consists of a minimum of 15 units in English, nine of which must be upper division. The English minor is not available to students majoring in comparative literature.

#### English Major

#### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

The major, with specialization in either elementary or secondary teaching, may be used by students in Teacher Education as an undergraduate major for the A.B. degree in liberal arts and sciences.

#### **Specialization in Elementary Teaching**

Preparation for the major. English 6, 51A-51B, 53A-53B; and three units of electives in English excluding 1X, 1Y, or 1Z. (18 units.)

Teaching Major. A minimum of 24 upper division units in English selected with the

approval of the adviser, to include (a) English 101; (b) at least one course from English 102, 103, 104, 111, 112, 113A, 113B, 121A, 122A, 122B, and Comparative Literature 120; (c) at least one course from English 114A, 114B, 115, 116, 117, 118 and 121B; (d) at least one course from English 130, 131, 133, 134, 135, and 136; (e) at least one course from English 175, Linguistics 180, 181; (f) at least three courses (which may include courses taken under b, c, d, and e above) in one of the seven areas of study listed above for the English Major with the A.B. degree in Liberal Arts and Sciences.

Education 133 is required in addition to the major.

# Specialization in Secondary Teaching

Preparation for the major. English 6, 51A-51B, 53A-53B; and three units of electives in English excluding 1X, 1Y, or 1Z. (18 units.)

Teaching Major. (Undergraduate). A minimum of 24 upper division units in English selected with the approval of the adviser, to include (a) English 101; (b) at least one course from English 102, 103, 104, 111, 112, 113A, 113B, 121A, 122A, 122B, and Comparative Literature 120; (c) at least one course from English 114A, 114B, 115, 116, 117, 118, and 121B; (d) at least one course from English 130, 131, 133, 134, 135, and 136; (e) at least one course from English 175, Linguistics 180, 181; (f) at least three courses (which may include courses taken under b, c, d, and e above) in one of the seven areas of study listed above for the

English Major with the A.B. degree in Liberal Arts and Sciences. In addition to the major, Education 122 and a second course selected from English 175, Linguistics 180, or 181 must be taken before graduation as requirements for the credential but not for the degree.

Postgraduate year. Six units of upper division or graduate courses in English.

#### English Minor

# For the Standard Teaching Credential

The minor in English for elementary teaching consists of 20 units in English, nine of which must be upper division. The minor in English for secondary teaching consists of 21 units, to include: six units from English 51A-51B, 53A-53B, 54, and 65; and six units selected from English 175, Linguistics 180, or 181; and nine units in literature courses (English 101–153). Education 122 is also required.

#### **Course Sequences**

All year courses in comparative literature and in English may be taken in either semester, and either semester may be taken singly for credit.

#### **Student Initiated Courses**

Students may petition for a course which falls within the competency of the English Department but which is not among the regular course offerings for the present or following semester. Petition forms may be obtained from the Department Secretary.

# **Undergraduate Proseminars**

Each semester, if adequate staffing permits, the Department may offer several of its courses as special, limited-enrollment proseminars. These proseminars are designed to give English majors (or any one who has the consent of the instructor) the opportunity as juniors and seniors to engage in advanced work in small discussion groups.

#### **English for Foreign Students**

Foreign students will be assigned to English 1X, 1Y, 1Z or to English 5 or 6 on the basis of their performance on the English examination for foreign students and an oral interview. 1X, 1Y, and 1Z do not satisfy the college general education requirements, but unit credit is granted for these courses.

#### Lower Division Courses

#### General

IX. Fundamentals of English for Foreign or Bilingual Students (3) I, II A first course in English grammar and composition with intensive practice in the Language Laboratory. Satisfactory completion of this course qualifies a student to take English 1Y or, at the discretion of the instructor, English 1Z, 5 or 6.

1Y. English for Foreign or Bilingual Students (3) I, II

Prerequisite: English 1X.

English grammar and composition. Satisfactory completion of this course qualifies a student to take English 1Z or, at the discretion of the instructor, English 5 or 6.
#### 214 / English

1Z. English for Foreign or Bilingual Students (3) I, II

Prerequisite: English 1Y.

English grammar and composition. A continuation of English 1Y for students who need additional instruction and writing practice. Satisfactory completion of this course qualifies a student to take English 5 or 6.

5. Composition and Reading (3) I, II

Formerly English 3.

Practice in composition based on the study of outstanding expository writing in contemporary affairs, the sciences, and the arts. Not open to students with credit for Mexican-American Studies 2B.

6. Composition and Literature (3) I. II

Formerly English 1.

Practice in composition, based on the study of representative works of imaginative literature. Introduction to one or more of the major literary genres: poetry, drama, and fiction.

### 54. Literary Theory and Criticism (3) I. II

Introduction to the various theories of literature and approaches to literary creation and criticism.

75. Intermediate Composition (3) I, II

Practice in formal composition, based on an analysis of the rhetorical structures of exposition, persuasion, and familiar writing, together with the study of outstanding writing in contemporary affairs, the sciences, the arts, and literature.

89. Studies in Literature (1-3) I, II

Representative literary works of a major author, period, genre, theme, or the like. May be repeated with new content. Maximum credit six units. (Formerly numbered and entitled: English 10, Individual Reading.)

#### 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### American Literature

53A-53B. American Literature (3-3) I. II

Semester I: Major American writers from the beginning to 1860. Semester II: American literature from 1860 to the present. (Formerly numbered English 50A-50B.)

## British Literature

51A-51B. English Literature (3-3) I. II

English literature from the Anglo-Saxon period to the present, with emphasis on the major works in the literary tradition. Semester I: Ends with the neoclassical period. Semester II: Begins with the Romanic writers. (Formerly numbered English 56A-56B.)

#### **Comparative Literature** (See page 164) **Creative Writing**

70. Creative Writing (3) I, II

Introduction to the theory and practice of writing in the major genres, with emphasis on basic concepts and techniques. (Formerly numbered and entitled: English 61, Sophomore Composition.)

71. Creative Writing: Selected Genres (3) I, II

Prerequisite: English 70.

Guidance and extensive practice in writing in one or more of the major genres: poetry, drama, fiction, or the essay. (Formerly numbered and entitled: English 62, Directed Writing.)

#### **Upper Division Courses** General

## 105. The Bible as Literature (3) I, II

Same course as Comparative Literature 105. Prose and poetry of the King James version. (Formerly numbered English 115.)

150. The History of Literary Criticism (3) I

Principles and practices of literary criticism from Greek times to the nineteenth century. (Formerly numbered English 195A.)

#### 153. Modern Criticism (3) II

The theory and practice of selected nineteenth and twentieth century critics, with emphasis on the distinctive features of their approaches to literature. (Formerly numbered and entitled: English 195B, Theory and Practice of Modern Criticism.)

166. Honors Course (1-3) I. II

Refer to Honors Program.

175. Advanced Composition (3) I, II

The theory and practice of expository writing, including the contributions of semantics, rhetoric, and logic. (Formerly numbered English 191.)

190. Selected Topics in English (2-3) I, II

Specialized study of a selected topic in literature. May be repeated with new content. Maximum credit six units.

#### 194. Individual Reading (1) I, II

Selected works by a major author. May be repeated with new content. Maximum credit two units. (Formerly numbered English 110.)

198. Comprehensive Reading and Survey (3) II

Prerequisite: Nine units of upper division work in English.

A study of major movements in English literature through a review of important writers and key works. Individual programs of readings to fill the needs of each student.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of Instructor.

#### American Literature

130. Early American Literature (3) I American Literature from its beginning to 1830. 131. The American Renaissance (3) I, II Major American writers and their works in the period 1830-1865. 133. American Realism and Naturalism (3) I, II American fiction from the Civil War to 1920. 134. Modern American Fiction (3) I, II American fiction from 1920 to the present. 135. Modern American Poetry (3) I, II

American poetry from 1865 to the present.

136. American Drama (3) I, II

Dramatic literature by American writers from its beginnings to the present.

138. Topics in American Studies (3) I, II

American Folklore, The Literature of Social Protest, The Intellectual History of American Literature, and the like. May be repeated once with new content and with the approval of their advisers, more than once by American Studies majors. Maximum credit six units applicable on a master's degree in American Studies.

139. Topics in American Literature (3) I, II

Emerson and Thoreau, Black Writers in America, The Literature of the American South, The Frontier and American Literature, and the like. May be repeated with new content. Maximum credit six units.

#### **British Literature**

101. Shakespeare (3) I, II An introduction to the writings of Shakespeare. (Formerly numbered English 117A-117B.)

102. Study of Shakespeare (3) II Prerequisite: English 101.

Advanced study of Shakespeare's achievement as a poet and playwright.

103. Chaucer (3) I, II

Chaucer's works, with emphasis on The Canterbury Tales and Troilus and Criseyde. (Formerly numbered English 151.)

104. Milton (3) II

Milton's writings, with emphasis on *Paradise Lost.* (Formerly numbered and entitled: English 120A, The Seventeenth Century: Milton.)

111. Renaissance Literature (3) I, II

English poetry and prose from 1485 to 1603. (Formerly numbered and entitled: English 116A, The Age of Elizabeth.)

112. Seventeenth Century Literature (3) II

English poetry and prose from 1603 to 1660. (Formerly numbered and entitled: English 120B, The Seventeenth Century: Metaphysical and Cavalier Poets.)

English / 215

English / 217

#### 216 / English

113A-113B. Restoration and Eighteenth Century Literature (3-3) I, II

English literature in the neo-classical era. Semester I: Dryden, Swift, Pope, and their contemporaries. Semester II: Writers of the middle and late eighteenth century. (Formerly numbered English 118A-118B.)

114A-114B. Nineteenth Century British Poetry (3-3) I, II

Semester I: The Romantic movement. Semester II: The Victorian period. (Formerly numbered and entitled, English 119A, English Romantic Poetry; English 119B, Victorian Poetry.)

115. Nineteenth Century British Prose (3) I, II

Non-fictional prose of the Romantic and Victorian periods. (Formerly numbered and entitled: English 126A, Romantic and Victorian Prose; and English 126B, Late Nineteenth Century British Prose.)

116. Modern British Poetry (3) I, II

British poetry since 1900.

117. Modern British Fiction (3) I, II British fiction since 1900.

118. Modern British Drama (3) I, II

British drama since 1890.

121A-121B. English Fiction (3-3) I, II

The development of English fiction from its beginnings to the end of the nineteenth century. Semester I: The eighteenth century. Semester II: The nineteenth century. (Formerly numbered and entitled: English 143A-143B, The English Novel.)

122A-122B. English Drama (3-3) I, II

English dramatic literature from its beginnings to the nineteenth century. Semester I: The period from the beginning to 1642. Semester II: The period following re-opening of the theatres in 1660.

129. Topics in English Literature (3) I, II

The Works of Spenser, The Metaphysical School of Poetry, The English Satirists, and Major Movements in Contemporary English Fiction, and the like. May be repeated with new content. Maximum credit six units.

#### **Comparative Literature** (See page 164) **Creative Writing**

140. Techniques of Poetry (3) I, II

A study of the critical and theoretical literature of poetry, from the creative writer's viewpoint, together with reading and discussion of appropriate examples. (Formerly numbered English 149.)

142A-142B. Techniques of Fiction (3-3) I, II A study of the critical and theoretical literature of fiction, from the creative writer's viewpoint, together with reading and discussion of appropriate examples. Semester I: Short Fiction; Semester II: The Novel. (Formerly numbered English 142.)

144. Techniques of Drama (3) I

A study of the critical and theoretical literature of drama, from the creative writer's viewpoint, together with reading and discussion of appropriate examples.

149. Topics in Techniques of Writing (3) I, II

A study of the critical and theoretical literature of literary technique or topic such as satire, science fiction, myth and fantasy, children's literature, the long poem, the literary anatomy, etc. May be repeated with different content. Maximum credit six units.

170. The Writing of Poetry (3) I, II

Prerequisite: English 70.

A writing workshop in poetry. May be repeated with new content. Maximum credit six units.

171. The Writing of Fiction (3) I, II Prerequisite: English 70.

A writing workshop in fiction. May be repeated with new content. Maximum credit six units.

172. The Writing of Non-Fiction (3) I

Prerequisite: English 70.

A writing workshop in non-fictional prose. May be repeated with new content. Maximum credit six units.

179. Senior Workshop in Creative Writing (3) I, II

An advanced workshop intended only for students who have an extensive background in creative writing. Different sections of the course may treat advanced poetry writing, advanced fiction writing, or other special topics.

233. American Literature (3)

Prerequisite: Twelve units of upper division work in English, with courses in American literature strongly recommended.

Selected works of an author, period, or subject in American literature. Maximum credit six units applicable on a Master's degree.

234. Literature of the Middle Ages (3)

Prerequisite: Twelve units of upper division work in English.

Selected works in the literature of the Middle Ages with emphasis on Middle English prose and poetry exclusive of Chaucer.

235. Renaissance Literature (3)

Prerequisite: Twelve units of upper division work in English. Selected works in the literature of the Renaissance.

236. Restoration and Eighteenth Century Literature (3)

Prerequisite: Twelve units of upper division work in English. Selected works in the literature of the late seventeenth and the eighteenth centuries.

237. Earlier Nineteenth Century Literature (3)

Prerequisite: Twelve units of upper division work in English. Selected works in the literature of the early nineteenth century.

238. Later Nineteenth Century Literature (3)

Prerequisite: Twelve units of upper division work in English. Selected works in the literature of the later nineteenth century. 239. Twentieth Century Literature (3)

Prerequisite: Twelve units of upper division work in English. Selected works in the literature of the twentieth century.

243. Poetry (3)

Prerequisite: Twelve units of upper division work in English. Poetry as a literary form.

244. Fiction (3)

Prerequisite: Twelve units of upper division work in English. Fiction as a literary form.

245. Drama (3)

Prerequisite: Twelve units of upper division work in English. The drama as a literary form.

260. Workshop in Creative Writing (3)

Prerequisite: Consent of instructor and departmental adviser.

Criticism and coaching in the larger forms. Maximum credit six units applicable on a master's degree.

279. Tutorial in Creative Writing (3)

Prerequisites: Twelve upper division units in English, including at least 6 units in creative writing.

Individual guidance for advanced writers who wish to work on special projects in creative writing.

290. Bibliography and Methods of Literary Research (3)

Prerequisite: Twelve units of upper division English.

Basic reference works, scholarly and critical journals; introduction to bibliographical techniques; exercises and problems in methods and exposition of research, including editorial procedures. Recommended for the first semester of graduate work. Prerequisite to graduate seminars.

291. Seminar: A Major Author (3)

Prerequisite: An appropriate upper division or graduate level background course, and English 290.

The critical study of a major author, such as Shakespeare, Dickens, Mark Twain. May be repeated with new content; maximum credit six units applicable on a master's degree.

292. Seminar: A Cultural Period (3)

Prerequisite: An appropriate upper division or graduate level background course, and English 290.

Advanced study, through its literature, of a cultural period such as the Renaissance, the Enlightenment, the Romantic revolution. May be repeated with new content; maximum credit six units applicable on a master's degree.

293. Seminar: A Literary Problem (3)

Prerequisite: English 290.

Advanced study of a literary problem, such as Regionalism in America, or European influences on American literature. May be repeated with new content; maximum credit six units applicable on a master's degree.

### Family Studies and Consumer Sciences / 219

## 218 / Family Studies and Consumer Sciences

294. Seminar: A Literary Type (3) Prerequisite: English 290.

Advanced study of a literary type, such as the Personal Essay, Epic, Tragedy. May be repeated with new content; maximum credit six units applicable on a master's degree. 298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

## Family Studies and Consumer Sciences In the College of Professional Studies

A member of the American Home Economics Association.

#### Faculty

Emeritus: Comin, Talboy

Professors: Cannon, Dorris, Thiel (Director), Thomas

Associate Professors: Anderson, Campbell, Gunning, Price, Somerville

Assistant Professors: Boggs, Breeden, Dickerson, Hambleton, Kwallek, Martin, K., Martin, M., Milne, Schupp, Wertz

Lecturers: Sorenson, Van Scoyoc, Warner, Wegener

### Offered by Family Studies and Consumer Sciences

Master of Science degree in home economics.

Major in home economics with the A.B. degree in applied arts and sciences.

Major in child development with the B.S. degree in applied arts and sciences. (Refer to the section of this catalog on Indisciplinary Programs.)

Minor in home economics.

Teaching major in home economics with specialization in secondary teaching. Teaching minor in home economics with specialization in secondary teaching,

## Home Economics Major

## With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

The major in home economics is available in two areas of emphasis: (1) General home economics and (2) Food and nutrition.

## **Emphasis in General Home Economics**

Preparation for the major. Family Studies and Consumer Sciences (Home Economics) 2, 3, 15, 40 and 45; Family Studies and Consumer Sciences (Family Studies and Child Development) 35 and 70; Anthropology 2; Art 2A; Biology 1; Chemistry 2A-2B; Economics 1A; Physics 5; and Sociology 1. (44 units.)

Major. A minimum of 24 upper division units to include Family Studies and Consumer Sciences (Foods and Nutrition) 100, Family Studies and Consumer Sciences (Home Economics) 115, 143, 151, 152; Family Studies and Consumer Sciences (Family Studies and Child Development) 135, 171; and three units selected from Family Studies and Consumer Sciences.

## **Emphasis in Food and Nutrition**

This program is planned for students interested in qualifying professionally in the field of dietetics, institutional food management or commercial home economics. A student who successfully completes this program and receives departmental recommendation is eligible to apply for a year of internship under auspices of the American Dietetic Association. Upon completion of an administrative food clinic, or dietetic internship, or a three-year apprenticeship under a qualified dietitian in a recognized hospital, a student is eligible for membership in the American Dietetic Association and recognition as a qualified dietitian. Additional food and nutrition careers include extensive service, teaching, business, health agencies and research.

Preparation for the major. Family Studies and Consumer Sciences (Home Economics) 2, 15, 40 and 45; Family Studies and Consumer Sciences (Foods and Nutrition) 3, 4; Family Studies and Consumer Sciences (Family Studies and Child Development) 70; three units of

618-5 6 635

biology; Business Administration 1A; Chemistry 2A-2B, 3; Economics 1A, Physics 5; Sociology 1; and Microbiology 10. (50 units.)

Major. A minimum of 36 upper division units to include Family Studies and Consumer Sciences (Foods and Nutrition) 100, 102, 103, 104, 105, 106 and 180, Family Studies and Consumer Sciences (General Home Economics) 151, 152, and 182; and six units selected with consent of the adviser from Business Administration.

## Home Economics Minor

The minor in home economics consists of a minimum of 18 units in family studies and consumer sciences, six of which must be upper division.

## Home Economics Major

## For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

#### **Specialization in Secondary Teaching**

Requirements are the same as for the degree with an emphasis in general home economics. In addition, in their postgraduate year students must complete six units in home economics selected with approval of the adviser.

#### Home Economics Minor

For the Standard Teaching Credential

#### Specialization in Secondary Teaching

For specialization in secondary teaching, the minor consists of 20 units of Family Studies and Consumer Sciences, six of which must be upper division. The courses must be approved by the adviser.

#### Lower Division Courses

1. Fundamentals of Home and Family Life (3) Irregular

General concepts of family relationships and effective use of family resources. General Education course open to men and women. Not open to Home Economics majors.

2. Orientation to Home Economics as a Profession (1) I

Introduction to the opportunities and requirements in various professional fields for home economists.

#### 99. Experimental Topics (2-4) I

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Foods and Nutrition**

3. Food Selection and Preparation (3) I, II

One lecture and six hours of laboratory.

The production, selection, composition, preservation, nutritive value and preparation of foods.

4. Fundamentals of Nutrition (3) I, II

Nutrition as applied to the stages of the normal life cycle.

14-S. Workshop for School Lunch Personnel (1) S

Open to school lunch personnel only.

- The following areas are included: A. Nutrition for School Lunches.
- B. Beginning Meal Planning.

C. Food Purchasing.

Sanitation and Safety. D.

Work Simplification and Personnel Management. E.

Advanced Menu Planning. F.

G. Record Keeping and Cost Analysis.

No area may be repeated for credit, but credit may be earned in two areas concurrently. Maximum credit seven units. May not be used as part of a major or minor in home economics or homemaking education.

#### **General Home Economics**

15. Clothing and Textiles (3) I, II

One lecture and six hours of laboratory. Commercial patterns and their adaptation; fitting and construction; selection and care of textiles.

#### 220 / Family Studies and Consumer Sciences

19. Textiles (3) I, II

One lecture and six hours of laboratory.

Fibers, yarn, fabric construction, and finishes as related to selection, use, and care.

23. Fabric Structure and Design Processes (3) Irregular

One lecture and six hours of laboratory.

Prerequisite: Art 2A.

A study of stitchery, knitting, crocheting, weaving, macramé, and textile decoration. 40. Family Income Management (3) I, II

Financial problems involved in the effective management of the family resources.

45. Fundamentals of Housing and Design (3) I, II One lecture and six hours of laboratory.

Prerequisite: Art 2A.

Historical and contemporary interiors. Architectural, constructural, and artistic factors of housing as related to family needs.

#### Family Studies and Child Development

35. Marriage and Family (3) I, II

Love, maturity, dating, compatibility, conflict as they relate to preparation for successful marriage and family living. Not open to students with credit in Social Welfare 30, or Sociology

70. Principles of Child Development and Guidance (3) I, II

Three lectures and one hour of observation.

Prerequisites: Psychology 1 and Sociology 1.

Growth and development of the child from conception through adolescence; his relationships with his family and peers; and implications for guidance.

Not open to students with credit in Psychology 106, or Education 111.

**Upper Division Courses** 

**Foods and Nutrition** 

100. Advanced Foods (3) I, II

One lecture and six hours of laboratory.

Prerequisites: Family Studies and Consumer Sciences 3 and Chemistry 2B.

Fundamentals and practices of scientific food preparation. Development of standards in food preparation, meal planning, and service.

101. Family Food Management (3) I

One lecture and six hours of laboratory.

Not open to home economics majors and minors.

Planning, organizing, preparing and serving attractive well balanced meals for different income levels, for various occasions.

102. Advanced Nutrition (3) I, II

One lecture and six hours of laboratory.

Prerequisites: Family Studies and Consumer Sciences 4A and Chemistry 2B. Fundamental principles of human nutrition; planning, calculating and evaluating dietaries to meet human requirements; animal feeding experiments.

103. Quantity Cookery (3) I

One lecture and six hours of laboratory.

Prerequisites: Family Studies and Consumer Sciences 100 and Business Administration 1A. Application of basic principles to quantity foods, including experiences in planning, Laboratory experience is provided in the campus cafeteria and in hospitals.

104. Institutional Food Organization and Management (3) II

One lecture and six hours of laboratory.

Prerequisites: Family Studies and Consumer Sciences 103.

Problems involved in the organization of food service units, problems of administration, cost of food service, specifications, operation and care of equipment for institutions, and routing of work. Special projects and field trips.

105. Experimental Foods (3) II

One lecture and six hours of laboratory.

Prerequisite: Family Studies and Consumer Sciences 100.

Physical and chemical tests applied to problems in processing and preparation of food. Studies relate to protein foods; batters, doughs and sugar cookery; emulsions, fats and oils; and developments in food preservation.

Family Studies and Consumer Sciences / 221

106. Diet Therapy (3) I

One lecture and six hours of laboratory.

Prerequisite: Family Studies and Consumer Sciences 102.

Planning and preparation of special diets and food requirements in pathological conditions.

108. Advanced Institution and Restaurant Management (3) Irregular

One lecture and six hours of laboratory.

Prerequisites: Family Studies and Consumer Sciences 103 and 104. Purchasing food and selecting and maintaining equipment based on the needs of various

types of food service and institutional layout.

109. Meal Management and Service (3) I, II

One lecture and six hours of laboratory.

Prerequisites: Family Studies and Consumer Sciences 3 and 4A.

Planning, organizing, preparing, and serving meals with consideration of nutritional needs and the time, energy, and money resources available.

180. Food Demonstration Techniques (3) I, II

One lecture and six hours of laboratory. Prerequisite: Nine units in Family Studies and Consumer Sciences courses.

Organizing materials and developing techniques for demonstrations; observation, evaluation and participation in professional demonstrations for photography, the classroom and mass media.

#### **General Home Economics**

115. Advanced Clothing (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Family Studies and Consumer Sciences 15.

Fitting and construction processes applied to wool, silk, and synthetics, emphasizing fundamental principles of handling.

116. Tailoring (3) I

One lecture and six hours of laboratory. Prerequisite: Family Studies and Consumer Sciences 115.

Principles of tailoring; planning and construction of coats and suits.

117. Fashion Analysis and Clothing Selection (3) I, II

Analysis of fashion as it relates to clothing selection. Emphasis on fashion trends, wardrobe planning, buying practices, and standards of quality.

118. Clothing Design: Flat Pattern (3) I, II

One lecture and six hours of laboratory. Prerequisites: Family Studies and Consumer Sciences 115. Problems involving principles and techniques of flat pattern construction. Development of basic sloper for purpose of interpreting new designs. Investigation of sources of inspiration and their relationship to significant trend in design.

119. Textile Analysis and Testing (3) II

One lecture and six hours of laboratory.

Prerequisites: Family Studies and Consumer Sciences 15 and Chemistry 2B. Analysis based on physical and chemical tests for quality differences due to variation in fibers, content, structure, and finishes and their suitability for specified uses.

120. Clothing and Human Behavior (3) II

Prerequisite: Consent of instructor.

Socio-economic influences on consumer clothing behavior patterns.

121. Clothing Design: Draping (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Family Studies and Consumer Sciences 15.

Experience in creative designing through fabric manipulation. Designer problems related to mass-production techniques.

122. Clothing Design: Historical Influences (3) I One lecture and six hours of laboratory.

Prerequisite: Family Studies and Consumer Sciences 115. Chronological analysis of men's and women's fashions providing inspiration for original creations in clothing design.

123. Fabric Structure and Design Processes (3)

One lecture and six hours of laboratory.

Prerequisite: Art 2A.

A study of stitchery, knitting, crocheting, weaving, macramé, and textile decoration.

## 222 / Family Studies and Consumer Sciences

140. Family Financial Problems and Practices (3) I

Prerequisite: Family Studies and Consumer Sciences 40. Financial problems and practices of families; decision-making with respect to market goods and services; consumer protection programs.

143. Household Equipment and Processes (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Physics 5 and Chemistry 2B.

Study and laboratory experience to acquaint students with current research findings in relation to equipment and household supplies. Emphasis placed upon characteristics and composition of household materials, use and care.

145. Family Housing (3) II

One lecture and six hours of laboratory.

Prerequisite: Family Studies and Consumer Sciences 45.

Advanced housing problems at various stages of the family life cycle and the different socio-economic levels.

### 150. Principles of Home Management (3) I, II

Open to both men and women, but not open to home economics majors.

Efficient management of the home, family cooperation, establishment of goals, and productive use of money, time, and energy. Not open to students with credit in Family Studies and Consumer Sciences 151.

151. Home Management Theory and Analysis (3) I, II Prerequisite: Family Studies and Consumer Sciences 40.

Management process and its relationship to the use of resources based upon the decisions, values, goals, and standards of the family. Adaptation of work simplification techniques for use in studies of activities in homes and home economics classes.

152. Home Management Laboratory (3) I, II

Five weeks' residence in a family-size unit.

Prerequisites: Family Studies and Consumer Sciences 40, 100, 151, and written request made to department chairman one year prior to enrollment. Application of theories and principles of all disciplines of home economics.

153. Supervised Field Work in Home Management (3) I, II

Prerequisites: Family Studies and Consumer Sciences 3, 40, 135, 151, 171 and consent of instructor.

Management and social problems as they relate to the home and family. Supervised field work with various community agencies and selected families.

160. Merchandise Analysis (3) Irregular

Contemporary problems of production and distribution of textiles and clothing.

181. Materials and Techniques for Teaching Home Economics (2) II

Prerequisite: Education 121C or concurrent registration.

Development and use of audio-visual and other instructional materials.

182. Educational Practices and Instructional Resources (3) I

Prerequisite: Fifteen units of Family Studies and Consumer Sciences.

Principles of learning as they relate to teaching home economics to adults. Organization of material; selection, use and evaluation of teaching techniques.

#### **Family Studies and Child Development**

135. Family Interaction (3) I, II

Prerequisite: Family Studies and Consumer Sciences 35.

Marriage adjustment and family interaction throughout the life cycle. 136. Family Study (3) I, II

Prerequisite: Family Studies and Consumer Sciences 35 and Sociology I.

Dynamics of family living; attitudes, practices, social and psychological interaction, and family life patterns in different cultures, social classes and ethnic groups. (Formerly Home Economics 135.)

170. Human Development: Infancy (3) I, II

Prerequisite: Family Studies and Consumer Sciences 70.

Physiological, psychological, social and cultural development and behavior of the human organism through age two.

171. Human Development: Early Childhood (3) I, II

Two lectures and three hours of laboratory.

Prerequisite: Family Studies and Consumer Sciences 70.

Development, behavior, and guidance of the preschool child. Observing, recording and interpreting behavior.

## Family Studies and Consumer Sciences / 223

175. The Nursery School Program (3) I

Two lectures and three hours of participation. Prerequisite: Family Studies and Consumer Sciences 171.

Types of programs for the nursery school with consideration of methods and materials evaluated in terms of needs of young children.

176. Creative Experiences for Young Children (3) II

Prerequisite: Family Studies and Consumer Sciences 175.

Exploration of spontaneous creativity at the preschool age; evaluation of materials best suited for use in art, music, dance, and language for the young child.

177. Administration and Supervision in Nursery Schools (3) Irregular

Prerequisites: Family Studies and Consumer Sciences 175 and 176 or teaching experience in a nursery school.

Problems of organization in conducting schools for young children; interrelationships of staff; personnel practices; communication with teaching staff, parents, and community; records and reports.

178. Methods and Materials in Parent Education (3) II

Prerequisite: Family Studies and Consumer Sciences 70 or Psychology 106.

An investigation of philosophy, curriculum instruction, current trends, and issues in the teaching of child guidance to parents.

179. Advanced Child Study (3) I, II

Prerequisites: Nine units in child development. Readings and interpretations of scientific literature which contribute to an understanding of child behavior. Physical, social, and psychological factors which determine the direction of human development.

166. Honors Course (1-3) I, II

Refer to the honors program.

190. Advanced Studies in Family Studies and Consumer Sciences (2-6) Irregular Prerequisite: Twelve upper division units in Family Studies and Consumer Sciences. Advanced study of selected topics. Maximum credit nine units.

No more than six units may be applied toward either the bachelor's or master's degree. 199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor.

## **Graduate Courses**

#### **Foods and Nutrition**

200. Seminar: Foods and Nutrition (3)

Prerequisites: Family Studies and Consumer Sciences 100 and 102.

An intensive study of research in technological advances in the fields of foods and nutrition, with emphasis on professional organizations and ethical procedures.

203. Advanced Readings in Food Technology (3)

Prerequisite: Family Studies and Consumer Sciences 100.

Reading and analysis of selected research in food technology.

204. Advanced Readings in Nutrition (3)

Prerequisite: Family Studies and Consumer Sciences 102.

Reading and analysis of selected research in nutrition.

205. Assay for Nutrients in Foodstuffs and Tissues (3)

Two lectures and three hours of laboratory.

Prerequisites: Family Studies and Consumer Sciences 100 and 102.

Determinations of energy values, organic nutrients, and minerals in foodstuffs and tissues by chemical, biological, and microbiological methods.

206. Physiological Bases of Diet Therapy (3)

Prerequisite: Family Studies and Consumer Sciences 106. Chemistry 115B or 116B is recommended.

The biochemical and/or physiological lesions in pathological states and the modifications of diet which should accompany medical treatment to prevent or alleviate patient symptoms.

207. Child Nutrition (3)

Two lectures and three hours of laboratory.

Prerequisite: Family Studies and Consumer Sciences 102.

Nutrition, health and biochemical growth in children. Conditions leading to malnutrition, the prevention and correction of same.

### 224 / Family Studies and Consumer Sciences

#### **General Home Economics**

215. Seminar: Clothing (3)

Prerequisites: Nine units in the area of clothing. Selected problems in the field of clothing.

216. Seminar: Textiles (3)

Prerequisites: Family Studies and Consumer Sciences 119 and consent of instructor. Current literature and experimental research in fiber and fabric technology related to consumer use.

219. History of Textiles and Clothing (3)

Prerequisite: Six units in art, anthropology, sociology, or psychology.

Textile and clothing development from ancient times to the present as related to socio-economic and political influences.

281. Seminar: Home Economics Education (3)

Prerequisites: Eighteen units in Family Studies and Consumer Sciences and consent of instructor.

The study and evaluation of home economics research and philosophical principles which have implications for the secondary homemaking teacher.

282. Current Development in Home Economics Education (3)

Prerequisites: Education 121C or the equivalent, and 18 units in Family Studies and Consumer Sciences.

Current issues and recent developments in home economics education with implications for secondary and post high school programs.

#### Family Studies and Child Development

231. Family Life Education (3)

Prerequisite: Three units in Family Relations.

Methods and materials in family life education for schools, colleges, churches, and social agencies.

234. Seminar: Marriage Adjustment (3)

Prerequisite: Family Studies and Consumer Sciences 135.

Individual study, seminar reports, and group discussion of selected topics in marriage adjustment.

240. Seminar in Family Economics (3)

Prerequisite: Upper division course in family finance.

Personal financial practices under changing conditions. Review of literature in family financial management.

### 251. Seminar in Home Management (3)

Prerequisite: Upper division course in home management and related areas.

Recent research in home management.

270. Seminar: Child Development and Guidance (3)

Prerequisite: Consent of instructor.

Emphasis on personality theories and on research and clinical findings relevant to a systematic study of human development and the guidance of children.

271. Advanced Readings in Human Development (3)

Prerequisites: Family Studies and Consumer Sciences 70 and 179. Analysis of selected research in human development.

#### 290. Bibliography and Methods of Research (3)

Prerequisite: Twelve upper division or graduate units in Family Studies and Consumer Sciences.

Reference materials, bibliography, investigation of current research in home economics, processes of thesis topic selection, and techniques of scholarly writing.

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with the director and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisite: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

#### In the College of Arts and Letters

Faculty

Emeritus: Brown, E. M.

Professors: Max, Messier, Piffard Associate Professors: Glasgow (Chairman), Hanchett, E., Nelson, H. Assistant Professors: Branan, Ghilbert, Palmer, Woodle Lecturer: Marcuse

Offered by the Department

Master of Arts degree in French.

Major in French with the A.B. degree in liberal arts and sciences.

Minor in French.

Teaching major in French with specialization in both elementary and secondary teaching. Teaching minor in French with specialization in both elementary and secondary teaching.

#### French Major

## With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

Students majoring in French must complete a minor in another field to be approved by the departmental adviser in French.

Preparation for the major. French 1, 2, 3, 4, 10, and 11. (20 units.) Recommended: History 4A-4B.

Major. A minimum of 24 upper division units in French to include French 101A-101B. 102A-102B, and 12 units in the period literature of the language.

#### French Minor

The minor consists of a minimum of 15 units in French, six of which must be upper division.

#### French Major

#### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major, with specialization in either elementary or secondary teaching, may be used by students in Teacher Education as an undergraduate major for the A.B. degree in liberal arts and sciences.

#### Specialization in Elementary Teaching

Preparation for the major. French 1, 2, 3, 4, 10, 11. (20 units.)

Teaching Major. Twenty-four upper division units to include French 101A, 101B, 102A, 102B, 140, 141, 150, and three upper division units of electives in French. Proficiency Examination: Before taking a student teaching assignment in the language, the

candidate for the credential must pass an oral examination in the language administered by the Department of French and Italian. The candidate must consult with the chairman of the Department of French and Italian for permission to take this examination.

#### Specialization in Secondary Teaching

## Preparation for the major. French 1, 2, 3, 4, 10, and 11. (20 units.)

Teaching Major (Undergraduate). A minimum of 24 upper division units in French to include French 101A, 101B, 102A, 102B, 140, 141, and six upper division units of French in the period literature of the language.

Postgraduate Year. Six units of graduate courses in French.

Proficiency Examinations: Before taking a student teaching assignment in the language. the candidate for the credential must pass proficiency examinations, oral and written, administered by the Department of French and Italian, in the language and its area civilization. (French 140–141 prepare for this latter examination in the area civilization.) The candidate must consult with the chairman of the Department of French and Italian for permission to take these examinations.

### 226 / French

#### French Minor

#### For the Standard Teaching Credential

#### **Specialization in Elementary Teaching**

The minor in French for elementary teaching consists of not less than 20 units in French, six units of which must be in upper division courses.

Proficiency Examination: Before taking a student teaching assignment in the language, the candidate for the credential must pass an oral examination in the language administered by the Department of French and Italian. The candidate must consult with the chairman of the Department of French and Italian for permission to take this examination.

#### Specialization in Secondary Teaching

The minor in French for secondary teaching consists of not less than 20 units in French, exclusive of course equivalents, to include in the lower division, French 1, 2, 3, 4, 10, and 11 (or equivalents); and in the upper division, French 101A, 101B, 102A, and 102B. Proficiency Examinations: Before taking a student teaching assignment in the language,

the candidate for the credential must pass proficiency examinations, oral and written, administered by the Department of French and Italian, in the language and its area civilization. (French 140-141 prepare for this latter examination in the area civilization.) The candidate must consult with the chairman of the Department of French and Italian for permission to take these examinations.

#### **High School Equivalents**

High school foreign language courses may be used for purposes of placement in college courses and may be counted toward meeting the foreign language requirement in various majors. These high school courses will not count as college credit toward graduation.

The first two years of high school French 2; and four years the equivalent of French 1; three years the equivalent of French 2; and four years the equivalent of French 3. The last year-course taken by a student in the high school language sequence may be repeated in college for graduation credit, not to exceed four units of repeated foreign language work.

## Lower Division Courses

Native speakers of French will not receive credit for taking lower division courses except with advance approval from the department.

All upper division courses in French are taught in French unless otherwise noted.

1. Elementary (4) I. II

Four lectures and one hour of laboratory.

Pronunciation, oral practice, readings on French culture and civilization, essentials of grammar. Not open to students who have completed three years of high school French.

2. Elementary (4) I, II

Four lectures and one hour of laboratory.

Prerequisite: French 1 or two years of high school French.

Continuation of French 1. Not open to students who have completed four years of high school French.

3. Intermediate (4) I, II

Prerequisite: French 2 or three years of high school French.

A practical application of the fundamental principles of grammar. Reading in French of cultural material, short stories, novels or plays; oral and written practice.

4. Intermediate (4) I. II

Prerequisite: French 3 or four years of high school French.

Continuation of French 3; outside reading with oral and written reports.

10. Conversation (2) I. II

Prerequisite: French 2 or three years of high school French.

Practice in the spoken language; practical vocabulary, conversation on assigned topics; simple dialogues and plays.

11. Conversation (2) I. II

Prerequisite: French 10 or French 3, or four years of high school French. Continuation of French 10.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

## **Upper Division Courses**

101A-101B. Advanced Oral and Written Composition (3-3) Prerequisites: French 4 and 11.

Translation into French from moderately difficult English prose. Outside reading of modern French prose, with written reports in French monthly. Readings and oral discussions in French of various facets of French life and culture.

Not open to students with credit in Humanities 43, 143. French culture from the Enlightenment to the present. Continuation of French 140. 144A-144B. Masterpieces of French Literature (3-3) French literary masterpieces from the Song of Roland to the present. Taught in English. (Formerly numbered Comparative Literature 140A-140B.) 148. Introduction to French Philology (3) Prerequisites: French 101A-101B. The elements of French phonology, morphology, and semantics, illustrated with textual extracts. 150. Advanced Phonetics and Diction (3) Irregular Prerequisites: French 4 and 11. For students and teachers of French wishing to perfect their pronunciation and diction. Correct formation of French sounds in isolation and combination. Class exercises, individual drill, and use of special discs and tape recording. 166. Honors Course (1-3) I, II Refer to Honors Program. 184. Topics in French Literature (3) Prerequisites: French 4 and 11. Study of movement, genre, theme, myth or individual author. May be repeated with new content. Maximum credit six units applicable on a major in French. Conducted in French or English. See class schedule.

199. Special Study (1-3) I, II

102A-102B. Survey of French Literature (3-3)

105. Nineteenth Century French Theatre (3)

Intensive study of nineteenth century plays.

Major novelists of the nineteenth century.

114. Twentieth Century French Novel (3)

Major novelists of twentieth century France.

115. Twentieth Century French Theatre (3)

Major dramatists of twentieth century France.

Not open to students with credit in Humanities 42, 142.

their social and political institutions, their arts and letters.

117. Renaissance and Baroque Literature (3)

107A-107B. Eighteenth Century French Literature (3-3)

111A-111B. Seventeenth Century French Literature (3-3)

110A-110B. Nineteenth Century French Novel (3-3)

Important movements, authors, and works in French literature from the Middle Ages to

Semester I: Major seventeenth century dramatists with emphasis on Croneille, Molière,

The French poetic tradition and its development from the Middle Ages to the present.

French culture from the earliest times to the Enlightenment, with emphasis on the people,

and Racine. Semester II: Major works of seventeenth century poets and prose writers.

Readings from the major writers of the Renaissance and Baroque periods.

Prerequisites: French 4 and 11.

112A-112B. French Poetry (3-3)

Prerequisites: French 4 and 11.

140. French Civilization (3)

141. French Civilization (3) Prerequisites: French 4 and 11

Individual study. Six units maximum credit. This course is intended only for students who are currently enrolled in or who already have credit for all upper division courses in French available in any given semester. Prerequisite: Consent of staff.

#### **Graduate Courses**

201. History of the French Language (3)

Prerequisite: Eighteen units of upper division French. The history of the French language from the beginnings through the sixteenth century. 202. Medieval French Literature (3)

Prerequisite: Eighteen units of upper division French and French 201.

Readings in the principal monuments, trends and genres of medieval French literature from the beginnings through François Villon.

203. Literature of the French Renaissance (3)

Prerequisites: Eighteen units of upper division French and French 201. Literature and thought of the 16th century as represented in the works of Rabelais, Montaigne, Ronsard, Du Bellay, etc.

220. Explication de Textes (3)

Prerequisite: Eighteen units of upper division French.

An introduction to the analytical French approach to the detailed study of literature. Demonstrations by instructor and students. This course aims to give teachers of French a greater mastery of French language and literature.

230. Methods of Literary Criticism (3)

Prerequisite: Eighteen units of upper division French.

Theory and practice of various traditional and modern critical approaches to specific literary texts.

250. Seminar in Seventeenth-Century Literature (3)

Prerequisite: Eighteen units of upper division French.

Directed research in the works of a representative author or in a genre or movement. Maximum credit six units applicable on a master's degree.

260. Seminar in Eighteenth-Century Literature (3)

Prerequisite: Eighteen units of upper division French.

Directed research in the works of a representative author, or in a genre or movement. Maximum credit of six units applicable on a master's degree.

270. Seminar in Nineteenth-Century Literature (3) Prerequisite: Eighteen units of upper division French. Directed research in the works of a representative author, or in a genre or movement. Maximum credit six units applicable on a master's degree.

280. Seminar in Twentieth-Century French Literature (3)

Prerequisite: Eighteen units of upper division French. Directed research in the works of a representative author, genre or movement. Maximum credit six units applicable on a master's degree.

284. Topics in French Literature (3)

Prerequisite: Eighteen units of upper division French.

Study of movement, genre, theme, myth or individual author. May be repeated with new content. Maximum credit six units applicable on a master's degree.

290. Research and Bibliography (3)

Prerequisite: Eighteen units of upper division French. Purposes and methods of research in the fields of the language and literature, the collection and collation of bibliographic material, and the proper presentation of the results of such investigation.

298. Special Study (1-3)

Prerequisite: Eighteen units of upper division French and consent of staff; to be arranged with department chairman and instructor.

Individual study. Maximum credit three units applicable on a master's degree. 299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

## General College

Students interested in enrolling in General College 99 or 199 should contact the faculty adviser of the on-campus association sponsoring the activity. These courses may not be used to satisfy course requirements for the major or minor. No combination of General College 99 and 199 in excess of six units may be counted for credit on a bachelor's degree program.

Supervised experience in college or community activities. Prerequisites: Twelve units of college credit and a minimum grade point average of 2.0. No combination of General College 99 and General College 199 in excess of six units may be counted for credit in a bachelor's degree program.

199. Selected Activities (1-3) Cr/N C

Supervised experience in college and/or community activities. Prerequisite: A minimum grade point average of 2.0. No combination of General College 99 and General College 199 in excess of six units may be counted for credit in a bachelor's degree program.

## Geography In the College of Arts and Letters

#### Faculty

Emeritus: Molitor, Post, Richardson, Storm

Professors: Eidemiller, Finch, Kiewiet de Jonge, Taylor, J., Wright, Yahr

Associate Professors: Blick (Chairman), Greenwood, Heiges, Johnson, W. A., Keen, O'Brien, Prvde, P., Quastler

Assistant Professors: Colombo, Ford, L., Fredrich, Griffin, Stutz

#### Offered by the Department

Master of Arts degree in geography.

Major in geography with the A.B. degree in liberal arts and sciences.

Minor in geography.

Teaching major in geography with specialization in secondary teaching.

Teaching minor in geography with specialization in both elementary and secondary teaching.

#### Geography Major

## With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete graduation requirements listed on page 57 of this catalog.

Students majoring in geography must complete a minor in another field to be approved by the major adviser.

Preparation for the major. Geography 1 and 2 (6 units). Four to six units selected from Geography 3, 4, 5, 7, 54, and 60 are strongly recommended.

Major. A minimum of 24 upper division units in geography to include three units from courses numbered 100-109, three units from courses numbered 110-111 or 150-159 or 170-179, three additional units from either of the above groups, three units from courses numbered 119-139, three units from 180, 182, 185 or 187, three units from 181A or 183, three units from 198 taken from three different instructors, and three units of electives.

#### Geography Minor

The minor consists of a minimum of 15 units in geography, nine of which must be upper division.

## Geography Major

## For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major may be used by students in Teacher Education as an undergraduate major for the A.B. degree in liberal arts and Sciences.

#### **Specialization in Secondary Teaching**

Preparation for the major. Geography 1 and 2 (6 units). Four to six units selected from Geography 3, 4, 5, 7, 54, and 60 are strongly recommended.

Teaching major. A minimum of 24 upper division units in geography to include nine units in courses numbered 100–111 and 150–179, six units in courses numbered 119–139, six units in courses numbered 180–189, and three units of electives.

**Postgraduate Year.** Six upper division or graduate units acceptable toward the credential, to be selected with the help of the departmental adviser.

Geography / 231

## 230 / Geography

#### Geography Minor

## For the Standard Teaching Credential

The minor in geography for the standard teaching credential with specialization in either elementary or secondary teaching consists of not less than 20 units in geography to include Geography 1 and 2, and a minimum of 9 units of upper division courses (12 units if major is a non-academic major) in geography. Additional geography electives must be taken to complete the minimum of 20 units.

#### Lower Division Courses

## 1. Introduction to Physical Geography (3) I, II

The nature of maps, weather and climates of the world; natural vegetation; land forms and their associated soils, with reference to their climatic relationships; the seas and their coasts. Related field observations.

## 2. Introduction to Cultural Geography (3)

Introduction to cultural geography, covering the elements of culture, such as technology, race, language, religion, political organization, methods of livelihood, settlement patterns and population, and the regional distribution of these elements over the earth. A maximum of six units will be allowed for Geography 2 and 112A or 112B.

3. Introduction to Meteorology (3) I, II

The composition, structure, and circulation of the atmosphere, including elementary theory of storms and other weather disturbances. May be followed by, or taken with, Geography 4.

4. Introduction to Meteorology Laboratory (1) I, II

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Geography 3.

Theory of meteorological instruments and observations. Practical exercise in surface and upper air observations, weather codes, and elementary weather map analysis.

5. Physical Geography Laboratory (1)

Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Geography 1.

Practical exercise and observation in map analysis, weather elements, climatic regions, and the earth's landform features. Designed to supplement Geography 1.

7. Man and the Environmental Problem (3)

Man's impact upon and interaction with the natural environment, including suggested alternatives to existing abuses. Not open to students with credit in Geography 170.

## 18. Basic Map and Aerial Photograph Reading (3)

Two lectures and three hours of laboratory.

The nature and use of maps and aerial photographs in geography.

54. Urban Geography (3)

Prerequisite: Geography 1 or 2.

The principles and concepts in urban geography, the origin and development of cities, urbanization, and urban problems. Not open to students with credit in Geography 154.

60. Economic Geography (3) I, II Prerequisite: Geography 1 or 2.

Man's economic activities over the earth's surface. Principles of agricultural production, extractive industries, manufacturing regions, industrial location, and transportation and trade.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

100A. Physical Climatology (3)

Prerequisite: Geography 3

Effects of latitude, altitude, mountains, ocean currents, wind systems, and various surfaces on the distribution of solar radiation, temperature, precipitation, and other climatic elements. Statistical reduction and interpretation of climatic data.

100B. Regional Climatology (3)

Prerequisite: Geography 3

The causes of climatic types as they occur throughout the world. Principles of several climatic classifications.

101. Climatic Physiography (3)

Prerequisites: Geography 1; and Geology 4, or Geology 2 and 3, or Geology 2 and Geography 5.

The origin and morphology of landforms with emphasis on the external forces.

102. Structural Physiography (3)

Prerequisites: Geography 1; and Geology 4, or Geology 2 and 3, or Geology 2 and Geography 5.

Origin and morphology of landforms with emphasis on internal forces.

103. Fluvial and Eolian Physiography (3)

Prerequisites: Geography 1; Geology 4, or Geology 2 and 3, or Geology 2 and Geography 5.

Flowing water and the wind as agents in shaping the land. Transportation of material by water and air, drainage basin characteristics, river channel shape and dimension, sand dunes, and loess.

104. Coastal and Submarine Physiography (3)

Prerequisites: Geography 1; and Geology 4, or Geology 2 and 3, or Geology 2 and Geography 5.

Marine physiographic processes and their effects on developing the landforms of coasts, continental shelves, and ocean floors.

105. Geography of Soils (3) II

Prerequisite: Geography 1.

The nature, properties and distribution of soils and their relationships to the influence of climates, landforms, and human activity.

106. Geography of Soils Laboratory (1) Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Geography 105.

Theories of soil genesis, edaphology and structure related to empirical phenomena through laboratory experimentation and observation. Best suited to concurrent enrollment in Geography 105.

107. Geography of Natural Vegetation (3)

Prerequisite: Geography 1.

The natural vegetation associations of the world, their distribution, classification and development, including relationship to human activities.

110. Historical Geography (3) II Prerequisite: Geography 1 or 2.

Transformation of the natural and cultural landscape with emphasis on the utilization and significance of resources. Exploration, migration, and settlement in relation to geographic phenomena.

111. Principles of Geographical Analysis (3)

Prerequisites: Geography 1 and 2. Major concepts and techniques of the field of geography.

112A-112B. Culture Worlds (3-3)

The evolution, distinguishing cultural characteristics, and physical features of the major cultural regions of the world, with emphasis on the role man has played in the alteration of the natural landscape. A maximum of six units will be allowed for Geography 2, and 112A or 112B.

119. Geography of San Diego County (3) II Saturday field trips to be arranged.

Prerequisites: Geography 1 and 2.

Analysis of the physical and cultural geographic aspects of San Diego County. Completion of Geography 100, 101, 105 will be helpful to students enrolling in this course. (Formerly numbered Geography 184.)

120. California (3) I, II

Prerequisite: Geography 1 or 2.

Systematic and regional analysis of the topography, climate, natural vegetation, and their relationships with the past and present activities of man and his use of the land; field trip. Offered in summer with a 10-day tour.

121. United States (3) I, II

Prerequisite: Geography 1 or 2.

The natural regions of the United States, their formation and economic and historical development.

122. Canada and Alaska (3) II

Prerequisite: Geography 1 or 2. The physical and historical bases of Canadian and Alaskan regionalism; the economic and strategic importance of these two areas.

## 232 / Geography

123. Middle America (3) II Prerequisite: Geography 1 or 2. The land and peoples of Mexico, Central America, and the islands of the Caribbean; a survey of the resources, economics, and trade of the region. 124. South America (3) I Prerequisite: Geography 1 or 2. The physical regions and human geography of South America, including the history of colonization and the exploitation of resources. 125. North Africa and the Near East (3) II Prerequisite: Geography 1 or 2. The geographic bases for the political heritage, economies and peoples of North Africa, including the Sahara, and the Near East. 126. Europe (3) I, II Prerequisite: Geography 1 or 2. Systematic analysis of the geographic bases of modern European life. Regional investigation of countries of Europe except the Soviet Union. 127. Soviet Union (3) I, II Prerequisite: Geography 1 or 2. Natural resources, agricultural production, industrial growth, and transportation. 129. Oceania (3) II Prerequisite: Geography 1 or 2. The physical geography, peoples, economies, and trade of Oceania, Australia, and New Zealand. 130. Central and Southern Africa (3) I Prerequisite: Geography 1 or 2. A regional geography of Africa south of the Sahara; the physical geographic base for the peoples and their economic activities. 131. Eastern Asia (3) I Prerequisite: Geography 1 or 2. The geographic bases for the political heritage, economies, and people of Eastern Asia. 133. Southeastern Asia (3) Prerequisite: Geography 1 or 2. The geographic bases for the political heritage, economies, and peoples of Southeastern Asia. 134. Southern Asia (3) Prerequisite: Geography 1 or 2. The geographic bases for the political heritage, economies, and peoples of Southern Asia. 150. Political Geography (3) I Geography as it relates to the strength of nations and international relations. 151. Economic Geography: Primary Production (3) I Prerequisite: Geography 1 or 2. The geography of agricultural production and the extractive industries in relation to world commerce. 152. Industrial Geography (3) II Prerequisite: Geography 1 or 2. Principles of industrial location, with emphasis on the distribution of the world's major manufacturing regions. 153. Location Analysis and Geographic Theory (3) Prerequisite: Geography 111. Spatial arrangement and interrelationships of resources, production, exchange and consumption of goods and services and a study of location theory in economic geography. 154. Geography of Cities (3) Prerequisite: Geography 2. Survey of the location, function and spread of cities; the spatial and functional arrangement of activities in cities, leading to an analysis of current urban problems: sprawl, city decline, metropolitan transportation. Not open to students with credit in Geography 54. 155. Urban Location and Settlement Geography (3) Prerequisite: Geography 54 or 154. Analysis of urban and other agglomerated settlements in terms of their spatial arrangement, principal functions, economic base, and supporting areas. 156. Internal Spatial Structure of Cities (3) Prerequisite: Geography 54 or 154. Geographic principles and characteristics concerning the internal structure and functioning of urban centers, including discussions of internal problems of our cities today. Field reconnaissance in the local urban "laboratory".

#### Geography / 233

157. Quantitative Methods of Urban Analysis (3)

Prerequisite: Geography 155 or 156 and 185.

Spatial models of urban activities and land use, population distribution and allocation, and computer applications in urban analysis, including computer methods of mapping and graphing.

158. Transportation Geography (3)

Prerequisite: Geography 1 or 2. The spatial distribution of transportation networks and commodity movement and their

relationship to the distribution of economic activity.

159. Urban Transportation Geography (3)

Prerequisite: Geography 54, 154, or 158. Urban transportation networks and their effects, past, present, and future on the economy and physical structure of the urban region.

160. Advanced Transportation Geography (3)

Prerequisite: Geography 158 or 159. Topics in the spatial analysis of transportation, e.g., spatial interaction patterns, diffusion process, models in spatial analysis.

166. Honors Course (1-3) I, II

Refer to Honors Program.

170. Conservation of Environmental Quality (3)

Prerequisite: Geography 1 or 2.

Quality of man's habitat in a changing human and natural environment; water, air and soil pollution, urban crowding, disappearance of open space, and decreasing opportunities for outdoor recreation. Not open to students with credit in Geography 7.

171. Conservation of Natural Resources (3) I, II

Prerequisite: Geography 1 or 2.

Nature and extent of mineral, soil, water, forest, and wildlife resources and their conservation, with particular emphasis on the United States against a general background of world resources. Conservation philosophies and practices and their geographic bases.

173. Geography as Human Ecology (3)

Prerequisite: Geography 7 or 170.

Human ecology related to resource geography.

174. Water Resources (3) II

Prerequisite: Geography 1 or 2; and 7, 170 or 171. Occurrence and utilization of water resources and the problems of water resource development.

175. Geography of Recreational Land Use (3)

Prerequisites: Geography 7, 170 or 171. Importance of location and environment in the use, management, and quality of recreation areas.

176. Geography of Marine Resources (3)

Prerequisites: Geography 1 or 2.

Economic geography of use of marine biotic and mineral resources.

180. Field Geography (3) II

Prerequisites: Senior or graduate standing and the completion of at least 12 units in geography, including Geography 1 and 2, and consent of instructor. Directed fieldwork in physical and cultural geography.

181A. Maps and Graphic Methods (3)

Two lectures and three hours of laboratory.

Prerequisite: Geography 1 or 2.

The art and science of creating graphs and maps as media for describing and analyzing geographic phenomena. Laboratory instruction and practice in cartographic techniques with emphasis on presenting quantitative data.

181B. Advanced Cartography (3)

Two lectures and three hours of laboratory.

Prerequisite: Geography 181A.

Advanced laboratory instruction and practice in cartographic techniques. **181C.** Automated Cartography (3) Two lectures and three hours of laboratory.

Prerequisite: Geography 180, 181A, 182, 183, 185, or 187.

Computerized methods in presenting for comprehension spatially variable information of a quantitative nature; examination of existing automated mapping systems.

## 234 / Geography

182. Use and Interpretation of Aerial Photographs (3) II

Two lectures and three hours of laboratory

Prerequisites: Geography 1 and consent of instructor.

Stereoscopic interpretation and cartographic representation of landforms, vegetation, and land use. Emphasis on practical exercises.

183. Map Investigation (3) I

Two lectures and three hours of laboratory.

Prerequisite: Geography 1 or 2.

Use of the map as an analytical tool in geography. History of developments in cartography. 184. Field Geography of the Arid Southwestern United States (3) II

Prerequisites: Geography 1 and 2.

An orientation to the Southwestern United States; emphasis upon field observation and interpretation of the cultural and physical landscape. A minimum of fifteen days will be spent in the field.

185. Quantitative Methods in Geographic Research (3)

Prerequisites: Two geography courses including one in upper division; Mathematics 12, and Mathematics 18 or a higher numbered course.

Use of quantitative methods in geographic research.

187. Remote Sensing of the Environment (3)

Two lectures and three hours of laboratory.

Prerequisites: Geography 1, 2, 182 and consent of instructor.

Multiband spectral reconnaissance of the environment. Emphasis on multispectral photography, infrared, microwave scanning systems and multifrequency radar systems and their uses in the study of cultural and bio-physical phenomena.

188. Advanced Remote Sensing of the Environment (3)

Prerequisites: Geography 187 and consent of instructor.

Current research in geographic remote sensing and related fields. Applications of remote sensing in the study of man's cultural and bio-physical environment. Practice in planning, design, execution and interpretation of remote sensing studies.

196. Geographic Internship (3)

Students will be assigned to various government agencies and industry and will work under the joint supervision of agency heads and the course instructor. Maximum credit six units. Three units may be applied to major in geography.

197. Investigation and Report (3) I, II

Prerequisites: Senior standing as a geography major or as a social science major with a concentration in geography, and departmental consent.

Analysis of special topics in geography; independent study and investigation; guidance in the collection, organization, and presentation of geographic data.

198. Directed Readings in Geographic Literature (1)

Prerequisites: credit or concurrent enrollment in the subject matter area in which the readings are to be undertaken, and consent of the instructor. Individually directed readings in geographic literature. May be repeated for a maximum

of three units, taken each time from a different instructor. 199. Special Study (1-3) I. II

Individual study. Six units maximum credit.

Prerequisites: At least 15 units of A or B work in Geography and consent of instructor.

## **Graduate Courses**

200A. Seminar in Advanced Physical Climatology (3)

Prerequisites: Geography 100A and approval of the departmental advisory committee. Characteristics of climatic elements for a selected area or climatic type, and a statistical analysis of the elements studied. Maximum credit six units applicable on a master's degree.

200B. Seminar in Advanced Regional Climatology (3) Prerequisites: Geography 100B and approval of the departmental advisory committee. Selected regions. An interpretation of regional variations of world climatic patterns. Maximum credit six units applicable on a master's degree.

205. Geographic Research and Techniques of Presentation (3)

Prerequisite: Approval of departmental graduate advisory committee. Seminar in the use of research materials in the different aspects of geography and the effective presentation of research findings in written and oral form. (Formerly numbered Geography 295.)

210. History of Geography (3)

Prerequisite: Approval of Graduate adviser.

The evolution of concepts concerning the nature, scope, and methodology of geography.

#### 220. Seminar in Regional Geography (3)

Prerequisite: Approval of departmental graduate advisory committee. Intensive study of a major world region, such as South America, Southeast Asia and Northern Europe. Maximum credit six units applicable on a master's degree.

250. Seminar in Systematic Geography (3) Prerequisite: Approval of departmental graduate advisory committee. Intensive study of an aspect of systematic geography, such as climatology, economic geography, and graphic presentation. Maximum credit six units applicable on a master's

degree.

251. Seminar in Physiography (3) Prerequisites: One course in physiography and consent of instructor.

Directed study and research on selected topics in physiography.

255. Seminar in Urban and Settlement Geography (3)

Prerequisite: Geography 155 or 156 and approval of the departmental advisory committee. Selected topics in urban geography. Field reconnaissance in the local urban "laboratory" is essential part of the research undertaken.

256. Seminar in Location of Urban Activities (3)

Prerequisites: Geography 156 and approval of the departmental advisory committee. Systematic analysis of the locations and linkages of activities in urban areas.

258. Seminar in Geography of Transportation (3)

Prerequisite: Geography 158.

Directed study and research on selected topics in transportation geography.

259. Seminar in Urban Transportation (3)

Prerequisite: Geography 159 and approval of the departmental advisory committee. Intensive study and research on topics in urban transportation geography. Emphasis on transport innovations and their impact on urban spatial patterns.

260. Seminar in Spatial Structure of Transport Systems (3)

Prerequisites: Geography 158 and approval of the departmental advisory committee. Transportation systems and networks, optimum route patterns and commodity flows. 270. Seminar in Theory of Resource Use (3)

Prerequisites: Geography 7 and three units of upper division geography, or 170, or 171, and the approval of the departmental advisory committee.

272. Seminar in Environmental Quality (3)

Prerequisites: Geography 7 and three units of upper division geography, or 170, and the approval of the departmental advisory committee.

275. Seminar in Recreational Geography (3)

Prerequisites: Geography 175 and consent of departmental advisory committee. Geography 7 or 170 and 171 are recommended.

#### 280. Techniques of Field Research (3)

Three lectures and three hours of laboratory.

Prerequisites: Geography 180 and approval of departmental graduate advisory committee. Detailed and reconnaissance field work including classification of natural and cultural features and preparation of geographical reports and maps based on field data. Maximum credit six units applicable on a master's degree.

#### 281. Seminar in Cartography (3)

Prerequisites: One course in cartography and approval of departmental advisory committee.

Use of the map in geographic analysis. Problems and recent trends in cartography. Maximum credit six units applicable on a master's degree.

285. Seminar in the Use of Quantitative Methods (3)

Prerequisites: Mathematics 18 or a higher numbered course in mathematics, Geography 185 or any upper division course in mathematics, Geography 185 or any upper division course in statistics, and approval of departmental advisory committee.

Application of quantitative methods to problems in human and physical geography. Maximum credit six units applicable on a master's degree.

288. Seminar in Remote Sensing of the Environment (3)

The use of remote sensing techniques in the study of man's cultural and bio-physical environment.

296. Geographic Internship (3)

Prerequisite: Approval of the departmental graduate advisory committee, and consent of the instructor.

Students will be assigned to various government agencies and industry and will work under the joint supervision of agency heads and the course instructor. Maximum credit six units; three units applicable on a master's degree.

## 236 / Geology

297. Research (1-3)

Research in one of the fields of geography. Maximum credit six units applicable on a master's degree.

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit 299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

## Geology In the College of Sciences

### Faculty

Emeritus: Brooks

Professors: Berry, Gastil, Krummenacher, McEuen, Peterson, G., Roberts, Thomas, B., Threet (Chairman)

Associate Professors: Frederiksen, Kern, Ptacek Assistant Professors: Abbott, Ganus, Walawender Lecturer: Bertine

#### Offered by the Department

Master of Science degree in geology.

Major in geology with the B.S. degree in applied arts and sciences. Minor in geology.

### Geology Major

## With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation

The major consists of basic requirements in the lower and upper division for all students plus the requirements in one of the following options: (a) General Geology, (b) Paleontology, (c) Geophysics, (d) Geochemistry, and (e) Engineering Geology.

## **Basic Requirements for all Students**

Preparation for the major. Geology 2 and 3, or 4; 5, 21, 24; Chemistry 1A-1B; and Biology 1 and 2 (30 units). Recommended: a foreign language and a course in mechanial drawing if not completed in high school.

Major. A minimum of 36 upper division units in approved courses to include Geology 100, 108A-108B, 198A-198B (14 units). Other courses may be substituted for 108B and 198A-198B in the Geophysics option and for 198A-198B in the Engineering Geology option with the approval of the department.

#### Options

In addition to the basic requirements, the student must complete the requirements in one of the following options:

## (a) General Geology

Additional preparation for the major. Mathematics 12 and 50; Physics 4A, 4B, 4C (20 units). Recommended: Mathematics 7, 51, and 52; Chemistry 109 or 110.

Major (continued). Geology 30 and 106; 126, or 124 and 125; 130, and at least one of the following: Geology 105, 107, 120, 121, 125, 140, 150, or 160. Electives approved by the departmental adviser to complete 36 upper division units. Recommended: Engineering 2,

## (b) Paleontology

Additional preparation for the major. Biology 15; Mathematics 50, or 21 and 22 (alternative of 21 and 22 should not be selected by students planning academic work beyond the B.S. degree); Physics 2A-2B and 3A-3B, or Physics 4A-4B-4C (16-21 units). Recommended: Zoology 50.

Major (continued). Geology 106, 107, 116, 126, and electives approved by the departmental adviser to complete 36 upper division units.

## (c) Geophysics

Additional preparation for the major. Mathematics 7, 50, 51, and 52; and Physics

4A-4B-4C, 73. Recommended: Engineering 30 (30 units).

Major (continued). Geology 110, 112, 120, 121, 130, Mathematics 119, Physics 110, 120A. Either Mathematics 170 and Physics 156, or Physics 100A and 114. Recommended: Engineering 128A.

#### (d) Geochemistry

Additional preparation for the major. Chemistry 5, and 11 or 12; Physics 4A-4B-4C; Mathematics 50, 51, and 52 (33 units). Recommended: Mathematics 7.

Major (continued). Geology 131; Chemistry 110A-110B. Either Geology 106 and 126, or Geology 124 and 125. Electives approved by the departmental adviser to complete 36 upper division units. Recommended: Geology 130.

#### (e) Engineering Geology

Additional preparation for the major. Geology 30; Engineering 1 or 20, 2 (unless 128A is to be taken as part of the major), 30, 50A; Mathematics 50, 51, 52; Physics 4A-4B-4C (35-38 units)

Major (continued). Geology 110 or 112, and 126; Engineering 116, 120A, 122, 123, 128A (unless Engineering 2 has been completed as a part of the preparation for the major); and 3 units chosen with the approval of the departmental adviser (36 units).

Because of the preparation in mathematics, physics, and geology called for in this emphasis, the School of Engineering will not require of majors with this emphasis the prerequisites specified for engineering majors who wish to take Engineering 116, 122 and 128A.

#### Marine Geology

An option in marine geology is not offered. Interested persons should study marine geophysics, marine geochemistry, paleontology, engineering geology, or general geology.

#### Geology Minor

The minor in geology consists of a minimum of 15 units in geology, six of which must be in upper division courses.

All minors should include Geology 2 and 3, or 4, and 5 (8 units). Preparation for teaching or naturalist work should include at least two of the following: Geology 14, 21, or 24 (7-8) units), and at least two of the following: Geology 100, 102, 106, 108A, 126, or 140. Those interested in environmental studies should take at least two of the following: Geology 14, 21, 24, 30 (7-8 units), and at least two from: Geology 100, 105, 130, 140, 150. Those interested in oceanography should take at least two from: Geology 10, 105, 130, 140, 150. Those interested in 116, 126, 130.

#### **Lower Division Courses**

2. General Geology (3) I, II

Earth materials and processes, the development of land forms, and a brief consideration of the history of the earth. Open to all students except those with previous credit in geology.

3. General Geology Laboratory (1) I, II

Three hours of laboratory. Prerequisite: Credit or concurrent registration in Geology 2.

Recognition of common earth features and materials with experience in both field and map relationships. Designed to accompany and augment Geology 2. Not open to students with previous laboratory credit in geology.

## 4. Physical (4) I, II

Three lectures and three hours of laboratory with related field study during the semester. Prerequisite: High school chemistry or physics, or credit or concurrent registration in college chemistry or physics.

The composition, origin, and distribution of earth materials, and their modification through mechanical and chemical processes. Not open to students with credit for Geology 2. (Formerly numbered Geology 1A.)

5. Historical (4) I, II

Three lectures and three hours of laboratory. Arrangement for field study during the semester.

Prerequisite: Geology 2 and 3, or 4.

Theories of earth origin, and the evolutionary history of the earth as traced through rock and fossil records. Consideration of the Paleontologic Sequence. (Formerly numbered Geology 1B.)

14. Geomorphology (3) I

Prerequisite: Geology 5.

Development and classification of land forms with consideration of processes involved.

## Geology / 239

## 238 / Geology

#### 21. Mineralogy (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Credit or concurrent registration in Geology 2 and 3, or 4; high school chemistry and trigonometry, or credit or concurrent registration in college chemistry and trigonometry.

Practice in the determination of the common minerals; their geologic environment, utilization and economic significance.

24. Petrology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Geology 2 and 3, or 4, and credit or concurrent registration in Geology 21. The origin, occurrence, identification, and classification of rocks in hand specimen and thin section. Introduction to the use of the petrographic microscope.

#### 30. Introduction to Geophysics (3) II

Prerequisites: Geology 2 and 3, or 4; elementary algebra and plane geometry. Physics of the earth and its application to mineral exploration. Emphasis on case histories. Not open to students with credit in Geology 110 or 112.

53. General Geology for Engineers (1) I. II

One three-hour laboratory or field project per week.

Prerequisite: Engineering 2 or 24.

Earth materials, geologic processes, and methods of geologic interpretation of particular concern to the engineer. Open only to students majoring in engineering. Not open to students with credit in Geology 3.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

## **Upper Division Courses**

100. Structural Geology (3) I, II

Two lectures and three hours of laboratory per week with occasional field trips. Prerequisites: Geology 4, 5 and trigonometry.

Structural features of the earth, both deformational and primary. Mechanical principles, causes of folding and faulting, graphic solutions and analyses. 102. Geology of North America (3) I

Prerequisite: Geology 5. A regional analysis of North American geology, its structural, stratigraphic, and tectonic patterns and hypotheses concerning their origin and evolution.

105. Photogeology (3) II

Two lectures and three hours of laboratory. Prerequisites: Geology 14 and 100.

Geologic interpretation of aerial photographs, elementary stereoscopy and stereometry applied to structural and stratigraphic problems, and compilation of geologic maps from annotated aerial photographs.

106. Paleontology (4) I, II Two lectures and six hours of laboratory. Prerequisites: Geology 5 and Biology 1 and 2. Principles and methods, exemplified by a study of the morphology, classification, habit, and geologic significance of fossil invertebrates.

Vertebrate Palentology, see Zoology 160.

107. Stratigraphy (3) II Two lectures and three hours of laboratory.

Prerequisites: Geology 5 and 24.

Stratigraphic principles and practices. Consideration of the North American stratigraphic record.

108A. Field Geology (4) II

One lecture and three hours of laboratory, and twelve Saturday field sessions in the local area

Prerequisites: Geology 100 and credit or concurrent registration in Geology 24. Techniques and methods of geologic observation, interpretation, and field mapping. 108B. Field Geology (4) I

Prerequisite: Geology 108A.

Geologic investigation of an assigned area with preparation of an individual report and a geologic map.

#### 724-5 7 525

mineral deposits. 121. Petroleum Geology (3) II Prerequisites: Completion or concurrent registration in Geology 24 and 100. Geologic occurrence of petroleum and the application of geologic principles in exploration and production. 124. Optical Mineralogy (3) I Two lectures and three hours of laboratory. Prerequisite: Geology 21. Theory and use of the polarizing microscope for determining optical properties of minerals as an aid to their identification. 125. Petrography (4) II Two lectures and six hours of laboratory. Prerequisites: Geology 124 and 130. A study of rocks with the polarizing microscope; identification of mineral constituents; interpretation of textures; classification of rocks; problems of genesis. 126. Sedimentology (3) I

Two lectures and three hours of laboratory.

Prerequisites: Geology 5 and 24. Origin, description, and classification of sedimentary rocks and structures.

130. Geochemistry (3) I, II

110. Petroleum Geophysics (3) I

112. Mining Geophysics (3) II

116. Micropaleontology (3) II

119-S. Summer Field Tour (2)

120. Ore Deposits (3) I

Prerequisite: Consent of instructor.

May be repeated for a maximum of four units.

Prerequisite: Geology 106.

One lecture and six hours of laboratory.

exploration.

Two lectures and three hours of laboratory. Occasional field trips. Prerequisites: Geology 100, Mathematics 52, Physics 4A-4B-4C.

Airborne, surface, and bore-hole geophysical techniques as presently used in oil

Two lectures, and three hours of laboratory or occasional field trips. Prerequisites: Geology 100, Mathematics 52, Physics 4A-4B-4C. Airborne, surface, and bore-hole geophysical techniques used for delineation of ore bodies.

The morphology, classification and geologic significance of the various microfossils.

Prerequisite: Geology 108A and consent of instructor. Field techniques in the investigation of selected geological problems. This course cannot be substituted for Geology 108B.

A two-week study of some of the classic geologic localities in the western United States. A camping trip with travel by chartered bus. Localities visited may vary from year to year.

Geologic relations, origin, distribution, and economics of metallic and non-metallic

Prerequisites: Completion or concurrent registration in Geology 24 and 100.

Two lectures and three hours of laboratory.

Prerequisites: Geology 24 and Chemistry 1B; Mathematics 21 and 22, or 50.

The relationship of basic chemical principles to geologic phenomena and environments, including applications to geologic exploration problems.

131. Advanced Geochemistry (3) II

Prerequisites: Geology 24 and credit or concurrent registration in Chemistry 110B. Application of physical-chemical methods and principles to the solution of geologic problems. Emphasis on major earth cycles and processes.

140. Marine Geology (3) I

Two lectures and three hours of discussion, demonstration, and field work.

Prerequisites: Geology 5, and either Geology 14, 24, 102, or 106.

The morphology, composition, structure, history, and geologic processes of the earth beneath the sea.

150. Engineering Geology (3) I

Two lectures and several weekend field trips

Prerequisite: Geology 108A.

Case histories selected to demonstrate the application of geology to the location, design, and maintenance of engineering projects.

#### German / 241

## 240 / Geology

160. X-Ray Diffraction (2) II

One lecture and three hours of laboratory.

Prerequisites: Chemistry 1A-1B; Mathematics 50; Physics 2A-2B and 3A-3B, or 4A-4B-4C; and credit or concurrent registration in either Chemistry 109A or 110A, Engineering 25, Geology 21, or Physics 101.

Theory and application of X-ray diffraction to the study of materials.

166. Honors Course (1-3) I, II

Refer to Honors Program.

173. Advanced Palynology (3) II One lecture and six hours of laboratory.

Prerequisite: Botany 172.

Investigating problems in anthropology, botany and geology using spores, pollen grains and microplankton. (Formerly numbered Geology 221.)

196. Advanced Topics in Geology (1-3) I. II

Prerequisite: Consent of instructor.

Selected topics in geology and related earth sciences. May be repeated with new content for maximum credit of six units.

198A. Senior Research (1) I, II

Prerequisite: Credit or concurrent registration in Geology 108A.

Selection and design of an individual research project. Oral and written progress reports. 198B. Senior Research (2) I, II

Prerequisites: Geology 198A and credit or concurrent registration in Geology 108B. Individual research project: For all students in the general option the project will involve areal geologic field mapping; for students in the paleontology, geophysics, geochemistry and engineering geology options the project may involve either areal field mapping or research in their respective area.

199. Special Study (1-3) I, II Individual study in field, library, laboratory, or museum work. Four units maximum credit. Prerequisites: Acceptable grade average in at least 12 upper division units within the major and consent of staff.

#### **Graduate Courses**

200. Seminar (1-3)

Prerequisite: Consent of instructor.

An intensive study in advanced geology, topic to be announced in the class schedule. Maximum credit six units acceptable on a master's degree.

208. Graduate Field Geology (3) One lecture and nine Saturday field sessions. Prerequisite: Geology 108A.

Experience in one or more specialized aspects of field mapping,

209. Igneous Petrology (3)

Two lectures and three hours of laboratory. Prerequisites: Geology 125 and 130.

Investigation of problems in igneous petrology, using petrography, geochemistry, and experimental methods.

211. Metamorphic Petrology (3) Two lectures and three hours of laboratory.

Prerequisites: Geology 125 and 130.

Investigation of problems in metamorphic petrology using petrography, geochemistry, and experimental methods. 212. Petrology of Carbonates (3)

Two lectures and three hours of laboratory.

Prerequisites: Geology 124 and 126.

Thin-section and hand-specimen description and classification of carbonate rocks and other chemical sediments. Additional emphasis on recent depositional processes, diagenesis, and geochemistry

220. Biostratigraphy (3) Two lectures and three hours of laboratory. Prerequisite: Geology 107.

Development of concepts and practices in stratigraphic and geochronologic synthesis critically reviewed in context of current knowledge of the fossil record.

Two lectures and three hours of laboratory.

Prerequisites: Geology 106 and Biology 110.

Problems and methods in the study of relationships between fossil organisms and their environment: interpretation of paleoenvironment, paleoclimate, and biologic relationships among fossil organisms.

229. Seminar: Advanced Studies in Stratigraphy (3) Two seminars and three hours of laboratory.

Prerequisite: Geology 107.

Regional stratigraphic patterns in North America and their historical implications.

235. Petrology of Terrigenous Rocks (3) Two lectures and three hours of laboratory.

Prerequisites: Geology 124 and 126.

Thin-section and hand-specimen description and classification of sandstones and mudrocks. Additional emphasis on mineralogy, modern depositional processes, environmental interpretation, and paleogeographic reconstruction.

240. Geotectonics (3)

Prerequisite: Geology 100.

A consideration of topics on continental genesis and evolution, orogeny, geosynclinal theory, and a survey of classic geologic provinces.

245. Advanced Structural Geology (3)

Prerequisite: Geology 100. Topics in advanced structural geology in the light of petrographic, geophysical, and experimental data, combined with classic field observations.

250. Seminar: Physical Properties of Earth Materials (3)

Prerequisite: Geology 110 or 112. Theoretical principles and instrumental techniques used to remotely determine the physical properties of earth materials.

260. Isotope Geology (3) Two lectures and three hours of laboratory.

A survey of isotopic and geochronologic topics with individual projects in isotopic analysis. 270. Pleistocene Geology (3) Three lectures and field trips.

Topics in Pleistocene geology; glaciation, Pleistocene lakes and drainage, relation of geology to early man, including field investigations.

280. Sedimentary Geochemistry (3) Two lectures and three hours of laboratory.

Prerequisite: Geology 130.

Problems in low temperature geochemistry, including clay mineralogy and diagenesis.

285. Genesis of Ore Deposits (3)

Two lectures and three hours of laboratory.

Prerequisites: Geology 120, 125, and Geology 130 or four units of physical chemistry. Application of mineralogy, petrography, and chemistry to an understanding of the origin of ore deposits.

297. Research (1-3)

Prerequisite: Consent of the Department.

Supervised research in an area of geology. Maximum credit six units applicable on a master's degree.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy Preparation of a thesis for the master's degree.

## German In the College of Arts and Letters

Faculty

Emeritus: Walker

Professors: Lawson, Paulin (Chairman), Wolf Associate Professors: Boney, Dunkle, Schaber, Tanaka, Westervelt, Wulbern Assistant Professors: Cross

## 242 / German

Offered by the Department of German and Russian

Master of Arts degree in German.

Major in German with the A.B. degree in liberal arts and sciences.

Minor in German.

Teaching major in German with specialization in both elementary and secondary teaching.

Teaching minor in German with specialization in both elementary and secondary teaching.

## German Major

## With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

Students majoring in German must complete a minor in another field to be approved by the departmental adviser in German.

Preparation for the major. German 1, 2, 3, 4, 10, and 11. (20 units.)

Major. A minimum of 24 upper division units in German to include German 101A-101B, 102A-102B, and 12 units in the period literature of the language excluding German 144 and 145.

## German Minor

The minor consists of a minimum of 15 units in German, six of which must be upper division.

## German Major

## For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major, with specialization in either elementary or secondary teaching may be used by students in Teacher Education as an undergraduate major for the A.B. degree in liberal arts and sciences.

Proficiency Examination: Before taking a student teaching assignment in German, the candidate for the credential may be required to pass an oral and written proficiency examination in the language, administered by the Department of German and Russian. The candidate should consult the chairman of the Department.

## Specialization in Elementary Teaching

Preparation for the major. German 1, 2, 3, 4, 10, and 11. (20 units.)

Teaching Major. A minimum of 24 upper division units to include German 101A-101B, 102A-102B, 125A or 125B, 150; Humanities 144, 145; and three upper division units of electives

## Specialization in Secondary Teaching

Preparation for the major. German 1, 2, 3, 4, 10, and 11. (20 units.)

Teaching Major (Undergraduate). A minimum of 24 upper division units in German to include German 101A-101B, 102A-102B; Humanities 144, 145; and six upper division units of electives in German. Recommended: German 148, 150; and 125A or 125B.

Postgraduate Year. Six units of graduate courses in German.

Proficiency examination. As above, for the major.

#### German Minor

## For the Standard Teaching Credential

Proficiency Examination: Before taking a student teaching assignment in German, the candidate for the credential may be required to pass an oral and written proficiency examination in the language, administered by the Department of German and Russian. The candidate must consult with the chairman of the Department of German and Russian

## Specialization in Elementary Teaching

The minor in German for elementary teaching consists of not less than 20 units in German, six units of which must be in upper division courses.

## Specialization in Secondary Teaching

The minor in German for secondary teaching consists of not less than 20 units in German to include in the lower division, German 1, 2, 3, 4, 10, and 11; and in the upper division,

### German / 243

## German 101A-101B, 102A-102B, and 125A or 125B

#### **High School Equivalents**

High school foreign language courses may be used for purposes of placement in college courses and may be counted toward meeting the foreign language requirement in various majors. These high school courses will not count as college credit toward graduation.

The first two years of high school German may be counted as the equivalent of German I; three years the equivalent of German 2; and four years the equivalent of German 3. The last year-course taken by a student in the high school language sequence may be repeated in college for graduation credit, not to exceed four units of repeated foreign language work.

#### Lower Division Courses

Native speakers of German will not receive credit for taking lower division courses in German except with advance approval from the department.

#### 1. Elementary (4) I, II

Four lectures and one hour of laboratory.

Pronunciation, oral practice, readings on German culture and civilization, minimum essentials of grammar. Not open to students who have completed three years of high school German.

#### 2. Elementary (4) I, II

Four lectures and one hour of laboratory

Prerequisite: German 1 or two years of high school German. Continuation of German 1. Not open to students who have completed four years of high school German.

## 3. Intermediate (4) I, II

Prerequisite: German 2 or three years of high school German. A practical application of the fundamental principles of grammar. Reading in German of cultural material, short stories, novels or plays; oral practice.

## 4. Intermediate (4) I, II

Prerequisite: German 3 or four years of high school German. Continuation of German 3.

7A-7B. Intensive Reading Course in German (2-2)

Prerequisites: German 2 or three years of high school German.

Intensive reading of material from the humanities and social sciences selected for the purpose of developing reading skills in German.

## 8A-8B. Scientific Reading (2-2)

Prerequisite: German 2 or three years of high school German. Readings taken from the fields of chemistry, physics, medicine, zoology, biology, etc.

10. Conversation (2) I, II Prerequisite: German 2 or three years of high school German.

Practice in the spoken language; practical vocabulary; conversation on assigned topics; simple dialogues and plays.

11. Conversation (2) I, II Prerequisite: German 10 or German 3, or four years of high school German. Continuation of German 10.

## 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

## **Upper Division Courses**

101A-101B. Oral and Written Composition (3-3)

Prerequisites: German 4 and 11.

Translation into German of moderately difficult English prose. Free composition in German, written and oral. Outside reading of modern German plays and prose, discussions in German. Oral and written practice in conversational German.

102A-102B. Survey of German Literature (3-3)

Prerequisite: German 4.

Important movements, authors, and works in German literature from the Middle Ages to the present.

103A-103B. German Literature of the Eighteenth Century (3-3)

Prerequisite: German 4 and 11.

The literature of the German Enlightenment, the "Storm and Stress," the Classical Age. Outside readings and reports.

## 244 / German

Greek / 245

105A-105B. German Literature of the 19th Century (3-3) Prerequisites: German 4 and 11. The literature of German Romanticism, Young Germany, Realism, and Naturalism. Outside readings and reports. 107. German Literature from its Beginning to the Reformation (3) Prerequisites: German 4 and 11. Poetry, drama, and prose of the Old High German, Middle High German, and early New High German periods, the early texts to be read in modern German adaptations. 110A-110B. Contemporary German Literature (3-3) Prerequisites: German 4 and 11. The main developments in German literature from Neo-Romanticism to the present. Outside readings and reports. 111. Contemporary German Drama (3) Prerequisite: German 4 and 11. German drama from Hauptmann to the present. 115. Goethe's Faust (3) Prerequisites: German 4 and 11. Goethe's Faust, Parts 1 and 2, its philosophical contents and its position in German and European literature; lectures, reading, reports. 125A-125B. Advanced Oral and Written Composition (2-2) Prerequisite: German 101A-101B. Advanced forms of oral and written German. 144. Golden Age of German Literature (3) The Classic and Romantic movements in Germany, with emphasis on the late eighteenth century: Goethe, Schiller and their contemporaries. Taught in English. (Formerly numbered Comparative Literature 142.) 145. Modern German Literature (3) Outstanding modern German writers, including Nietzsche, Rilke, Hesse, Kafka, Mann, Brecht, and others. Taught in English. (Formerly numbered Comparative Literature 143. 148. Applied German Linguisites (3) Prerequisites: German 101A-101B. Linguistic study of modern German; integration of modern linguistic theory with the language classroom. 150. German Phonology (3) Prerequisites: German 4 and 11. Sounds, intonation, and elocution of German. 152. Middle High German (3) Prerequisite: Twelve units of upper division German. The grammatical structure of Middle High German with readings from the period. 166. Honors Course (1-3) I, II Refer to Honors Program. 185. Topics in German Literature (3) Topics in German literature to be selected by instructor. May emphasize an author, period, movement or genre. Intended primarily for the nonspecialist. Does not fulfill language requirement. May be repeated with new content. Maximum credit six units. 199. Special Study (1-3) I, II Individual study. Six units maximum credit. This course is intended only for students who are currently enrolled in or who already have credit for all upper division courses in German **Graduate Courses** 201. History of the German Language (3) Prerequisite: 12 units of upper division German. The historical development of the German language, with source readings from the Gothic Bible to Luther's translation of the Bible. 202. Middle High German Literature (3) Prerequisite: German 152. Reading and analysis of Middle High German literature. 203. The German Novelle (3) Prerequisite: 12 units of upper division German. The development of the Novelle as a literary form from Goethe to the present. 204. The German Novel in the Twentieth Century (3)

Prerequisite: 12 units of upper division German. Selected German novels of the 20th century,

207. Renaissance and Baroque Literature (3) Prerequisite: 12 units of upper division German. German literature of the 16th and 17th centuries.

Prerequisite: 12 units of upper division German.

208. Goethe (3)

Prerequisite: 12 units of upper division German. Goethe's lyric, epic, and dramatic poetry excluding Faust.

205. German Lyric Poetry From Hölderlin to Rilke (3)

210. Schiller (3) Prerequisite: 12 units of upper division German.

Schiller as poet, dramatist, critic and philosopher, with emphasis on his classical period. 251. Seminar in Eighteenth-Century Literature (3)

Prerequisite: 18 units of upper division German.

Directed research in the works of an important author or in a problem, type, or movement of German literature of the eighteenth century. Maximum credit six units applicable on a master's degree.

255. Seminar in Nineteenth-Century Literature (3)

Prerequisite: 18 units of upper division German.

Directed research in the works of an important author or in a problem, type, or movement of German literature of the nineteenth century. Maximum credit six units applicable on a master's degree.

260. Seminar in Twentieth-Century Literature (3)

Prerequisite: 18 units of upper division German.

Directed research in the works of an important author or in a problem, type, or movement of German literature of the twentieth century. Maximum six units applicable on a master's degree.

265. Seminar in Germanic Linguistics (3)

Prerequisite: 18 units of upper division or graduate German. Directed research in a specialized area of Germanic linguistics or philology. Maximum credit six units applicable to a master's degree.

290. Research and Criticism (3)

Prerequisite: Twelve units of upper division German.

Purposes and methods of research in the language and in the literature; theories and practice of literary criticism. Recommended for the first semester of graduate study.

297. Research (3) Prerequisite: Advancement to candidacy.

Individual research in a specialized subject in German literature or linguistics.

298. Special Study (1-3) Individual study. Six units maximum credit.

Prerequisites: 18 units of upper division German and consent of staff; to be arranged with department chairman and instructor.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# Greek

#### In the College of Arts and Letters

Faculty

Professor: Warren Associate Professor: Schaber Assistant Professors: Eisner, Genovese

Offered by the Department of Classical and Oriental Languages and Literatures

Courses in Greek.

Major and minor work in Greek is offered under classics. (Refer to this section of the catalog on Classics.)

## 246 / Health Science and Safety

#### Lower Division Courses (See also courses in classics.)

1. Elementary (5) I Five lectures and one hour of laboratory.

Introduction to ancient Greek, emphasizing grammatical foundations of New Testament and Attic Prose. Aimed toward rapid comprehension.

2. Elementary (5) II Five lectures and one hour of laboratory.

Prerequisite: Greek 1.

Continuation of Greek grammar with selections illustrating syntax and style.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

### Upper Division Courses

103. Readings in Greek Prose (3) I

Prerequisite: Greek 2.

Readings selected from Greek masterpieces in history, philosophy, oratory. Authors include Xenophon, Plutarch, Plato, Lysias. Emphasis on rapid reading. 104. Readings in Greek Poetry (3) II

Prerequisite: Greek 103.

Readings selected from Greek masterpieces in epic, elegy, tragedy. Authors include Homer, Sophocles, Euripides. 106. New Testament Greek (3)

Prerequisite: Greek 2.

Study of Koine and Byzantine Greek characteristics with selected readings from New Testament and ecclesiastical sources. 155. Advanced Reading in Greek (3-4)

Prerequisite: Greek 104.

Extended, intensive reading in a major author of more difficult or peculiar style or content, such as Aeschylus, Thucydides, Herodotus, Aristotle, Sappho, Aristophanes, Lucian. Emphasis on style, content, interpretation. May be repeated with new content. Maximum credit nine units.

199. Special Study (1-6) I, II Individual study. Maximum credit six units. Prerequisite: Consent of instructor.

## Health Science and Safety In the College of Professional Studies

#### Faculty

**Emeritus: Kitzinger** 

Professors: Burgess (Chairman), Grawunder, Harper, McTaggart Associate Professors: Barnes, Boskin, Fellers, Sorochan Assistant Professors: Beasley, Bender, Kessler, Noto

## Offered by the Department

Master of Arts degree in health science.

Major in health science with the B.S. degree in applied arts and sciences. Minor in health science.

Teaching major in health sciences with specialization in secondary teaching.

Teaching minor in health sciences with specialization in both elementary and secondary teaching.

## Health Science Major

## With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

## **Emphasis in Community Health**

Preparation for the major. Health Science and Safety 21, 29, 65; Family Studies and Consumer Sciences 4; Zoology 8; Psychology 1; and Sociology 1. (19 units.)

## Health Science and Safety / 247

Major. A minimum of 36 upper division units to include Health Science and Safety 100, 101, 145, 146, 160, 165, 169, 175, 176, 177, 197; and Biology 140.

#### **Emphasis in Industrial Safety Education**

Preparation for the major. Health Science and Safety 21, 29, 65; Family Studies and Consumers Sciences 4; Zoology 8; Psychology 1; and Sociology 1. (19 units.)

Major. A minimum of 36 upper division units to include Biology 140; Health Science and Safety 100, 140, 145, 146, and 177; Psychology 121, 122, and 124; Sociology 120; the remaining units to be selected from health science and safety or closely related fields with approval of the adviser.

#### **Emphasis in Traffic Safety**

Preparation for the major. Health Science and Safety 21, 29, 65; Family Studies and Consumer Sciences 4; Psychology 1; Sociology 1; and Zoology 8 (19 units).

Major. Thirty-six upper division units to include Biology 140; Health Science and Safety 100, 140, 145, 146, 147, 148, 149, 177; Psychology 124; the remaining units to be selected from health science or closely related fields with approval of the adviser.

#### **Health Science Minor**

The minor in health science consists of a minimum of 15 units in health science and safety, nine units of which must be in upper division courses approved by the departmental adviser in health science and safety; courses to include Health Science and Safety 100, and 65 or 160.

#### **Health Sciences Major**

#### For the Standard Teaching Credential

## Specialization in Secondary Teaching

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major may be used by students in Teacher Education as a major in health science for the B.S. degree in applied arts and sciences.

Preparation for the major. Health Science and Safety 21, 29, 65; Family Studies and Consumer Sciences 4; Psychology 1; Sociology 1; and Zoology 8. (19 units.)

**Teaching Major** (Undergraduate). A minimum of 36 upper division units to include Biology 140; Health Science and Safety 100, 145, 146, 153, 155, 165, 172; Psychology 106; and Sociology 140. Remaining units to be selected from health science and safety and closely related fields. In addition students must complete School of Education requirements which include Education 121P and Health Science and Safety 151.

Postgraduate Year. Six units of postgraduate courses in the major or minor acceptable toward the credential.

## **Health Sciences Minor**

For the Standard Teaching Credential

## Specialization in Elementary Teaching

The minor in health sciences for elementary teaching consists of 21 units to include Health Science and Safety 21, 29, 65; and in the upper division 15 units to include Health Science and Safety 100, 145, 146; and six units of electives in health science and safety. In addition students must complete School of Education requirements which include Health Science and Safety 150 and Education 121P. Courses should be selected in consultation with the departmental adviser in health science and safety.

## Specialization in Secondary Teaching

The minor in health sciences for secondary teaching consists of 21 units to include Health Science and Safety 21, 29, 65; and in the upper division 15 units to include Health Science and Safety 100, 145, 146, and six units of electives in health science and safety. In addition students must complete School of Education requirements which include Health Science and Safety 151 and Education 121P. Courses should be selected in consultation with the departmental adviser in health science and safety.

## Lower Division Courses

21. Principles of Healthful Living (2) I, II, S

An application of modern knowledge to the development of understandings, attitudes, and practices essential to healthful living. Fulfills statutory requirement in public safety. 29. Physiology of Reproduction (1) I, II

A series of lectures and discussions dealing with normal and abnormal physiology and anatomy of reproduction; facts and frauds in sex hygiene, and related topics.

Health Science and Safety / 249

## 248 / Health Science and Safety

46. Standard and Advanced First Aid (2)

Emergency care in time of accident or sudden illness. Case studies, skills, and practices. Standard and advanced Red Cross concepts and certification.

65. Community Health (3) I, II

Community health problems; the role of the citizen, of the public, and of community health agencies in promoting and protecting the health of the community.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

## **Upper Division Courses**

## 100. Introduction to Health Science and Safety (3) I, II

History and principles of health science and safety and its role in modern society. An orientation course for students with a professional interest in health science and safety. 101. The Change Process and Health Science and Safety (3) I

Prerequisite: Health Science and Safety 21.

Attitude formation, behavior change, decision-making, perception, motivation, group behavior, etc., and their relationship to the practice of health science and safety.

122. Concepts of Health Science (3) I, II

Development and application of concepts in individual, family, and community health. Involvement in health project work. Not open to students with credit in Health Science and Safety 21.

140. Traffic Safety (3) I Problems of traffic safety and programs designed to deal with them.

144. Health in Emergencies (3) An evaluation of the scope of disasters and the necessary planning for effective use of existing facilities, services, supplies and personnel within the communities. Developing emergency plans to minimize loss of life and relieve suffering from natural disasters such as floods, hurricanes, tornadoes and earthquakes as well as from man-made disasters such as fires, civil disturbances and bomb threats.

145. Safety Education and Accident Prevention (3) I, II, S

Principles of safety and safety education as applied to the home, school, industry, traffic, recreation, and fire prevention.

146. Instructor's Course in First Aid (3) I, II, S

Standard Red Cross course for instructors in first aid plus medical-legal problems of emergency care of accident victims. Not open to students with credit in Health Science and Safety 46.

147. Traffic Safety and Driver Education (3) I, II, S

Three lectures and one hour of laboratory.

Analysis of traffic accidents; natural and man-made laws; safe use and care of vehicles; instructional approaches and the development of one's own driving and teaching skills.

148. Advanced Driver Education and Driver Training (3) I, II, S

Two lectures and three hours of laboratory. Prerequisites: Health Science and Safety 145 and 147.

Principles and procedures in organizing and conducting programs in driver instruction with emphasis on behind-the-wheel training. Students will teach high school youngsters to drive.

149. Multi-media Techniques in Driver Instruction (3) I, II

Prerequisite: Health Science and Safety 147.

Teaching devices and techniques in driver education and driver training, including multi-media approaches, psycho-physical testing and multiple car driving ranges; major emphasis on driver simulators, their operation and basic principles.

150. Health Education for Elementary Teachers (2) I, II, S

Prerequisite: Health Science and Safety 21 or 122.

The teacher's function in the different aspects of the elementary school health program, with emphasis upon the planning and presentation of instructional materials and upon community resources and relationships. Not open to students with credit in Health Science and Safety 151.

151. Health Education for Secondary Teachers (2) I, II, S

Prerequisite: Health Science and Safety 21 or 122.

Health status of adolescents and of the teacher's function in the secondary school health program. Emphasis is placed upon statutory requirements in stimulants and narcotics and upon safety and accident prevention. Not open to students with credit in Health Science and Safety 150.

153. Administration of the School Health Program (3) II

Administrative responsibilities of the school health program. Principles, policies, and practices involved in health instruction, health services, environment, legal implications, and community relationships.

154. Workshop in Health Science and Safety (1-3)

Selected problems in health science and safety are used as a basis for workshop experiences. Maximum credit six units; maximum credit three units applicable on a master's degree.

155. Sex Education in the Schools (3) I, II, S

Prerequisite: Health Science and Safety 150 or 151.

Philosophy, current procedures, and materials needed for the development of healthy attitudes and scientific knowledge appropriate to teaching sex education.

160. Introduction to Public Health (3) I

Prerequisite: Health Science and Safety 65.

Philosophy, development, organization, administration, and legal aspects of public health in the United States. Disease prevention and control, health education, and the other functions and activities of official health departments, voluntary agencies, private physicians and others engaged in professional health work.

165. Communicable and Non-Communicable Diseases (3) I, II

Causes, prevention and control of communicable, degenerative and chronic health disorders.

166. Honors Course (1-3) I, II

Refer to Honors Program.

Prerequisite: Health Science and Safety 65.

Health status of selected populations; international approaches to the attainment of world health. Special emphasis on the work of the World Health Organization.

171. Institute on Current Health Issues (1) S

A critical appraisal and analysis of selected contemporary health issues. May be repeated with different subject matter. Maximum of three units may be applied toward a bachelor's degree.

172. Habit Forming Substances (3) I, II, S

Stimulants, depressants and hallucinogens; use and abuse.

175. Health in Later Maturity (3) I

An approach to the conservation of human resources, with emphasis on understandings. attitudes, and practices related to health in later maturity. Designed for those with a personal or professional interest in the field.

176. Health and Medical Care (3) II

Prerequisite: Senior or graduate standing with a major or minor in health education or closely related areas.

Health values, concepts, and attitudes; health products and facilities; hospital care and hospitalization plans; governmental health controls; economic and cultural influences upon health and medical care; professional contributions, relationships, and careers; national and international health programs. Not open to students with credit in Sociology 126.

177. Environmental and Occupational Health (3) I

Prerequisite: Health Science and Safety 65.

Environmental hazards of living and working in this modern technological world stressing air pollution, water pollution, and occupational safety.

196. Measurement and Evaluation in Health Science and Safety (3)

General and specific approaches to measurement in health science and safety: data gathering techniques; organization; presentation, and interpretation of data; basic principles of evaluation of student achievement. (Formerly numbered and entitled: Health Science and Safety 202, Measurement and Evaluation in Health Education.)

197. Supervised Field Experience (1-3) I, II

Prerequisite: Consent of the chairman of the department.

Supervised practical experience in local health agencies and/or schools.

Maximum credit six units. Maximum credit three units applicable on a master's degree. 199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of special study advisor.

169. World Health (3) II

#### 250 / Hebrew

#### **Graduate Courses**

200. Seminar (3)

Prerequisite: Fifteen units completed in Health Science and Safety. An intensive study of advanced problems in health education. Maximum credit six units applicable on a master's degree.

201. Interdisciplinary Factors in Health Education (3)

Prerequisite: Fifteen units completed in Health Science and Safety.

Synthesis of basic scientific and cultural principles which contribute to an understanding of human well-being and how it is deliberately influenced.

204. Program Planning and Evaluation in Community Health Education (3)

Prerequisite: Health Science and Safety 160. Program planning and evaluation theories, systems and techniques in community health

education.

240. Administration of Traffic Safety Education (3)

Prerequisites: Health Science and Safety 145 and 147.

Research and trends in traffic safety education with emphasis on the problems of organization and administration.

245. School Safety Programs and Procedures (3)

Prerequisite: Health Science and Safety 145.

Advanced consideration of school safety programs including legal bases and requirements, personnel responsibilities, liability, instruction, maintenance, and school transportation.

252. Health Science Curriculum Development (3) Prerequisite: Health Science and Safety 150 or 151.

Structuring educational experiences in the health sciences; developing curriculum materials, performance standards and ways of incorporating health education in open learning environments.

270. Problems in Disease Control (3)

Prerequisite: Health Science and Safety 165.

New concepts in the community management of disease. Individual investigation and discussion.

271. Drug Abuse Education (3)

Prerequisite: Health Science and Safety 172.

Drug abuse education in the school and community.

291. Health Science and Safety Research (3)

Prerequisite: Health Science and Safety 196 and advancement to candidacy.

Methods and techniques of research appropriate to health science, the process by which potential problems in health science are analyzed, and the standards for the writing of research papers and theses.

292. Analysis of Professional Literature (3) II

Prerequisite: Health Science and Safety 196.

Investigation and study of literature in the fields which have an important bearing on health science and safety programs in the school and community. (Formerly numbered Health Science and Safety 192.)

297. Research (3)

Prerequisites: Health Science and Safety 291, 292, and advancement to candidacy. Supervised research in an area of health science and safety. Limited to students following

Plan B for the Master of Arts degree in Health Science. 298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department special study adviser and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# Hebrew

In the College of Arts and Letters

Faculty

Assistant Professor: Gefter

Offered by the Department of Classical and **Oriental Languages and Literatures** Courses in Hebrew. Major or minor work in Hebrew is not offered Lower Division Courses

1. Elementary (4) I

Four lectures and one hour of laboratory.

Pronunciation, oral practice, readings in Hebrew culture, essentials of grammar. Not open to students who have completed three years of high school Hebrew.

2. Elementary (4) II

Four lectures and one hour laboratory.

Prerequisite: Hebrew 1.

Continuation of Hebrew 1. Not open to students who have completed four years of high school Hebrew.

3. Intermediate (4) I

Prerequisite: Hebrew 2.

Application of fundamental principles of grammar. Readings in Hebrew cultural material, oral practice.

4. Intermediate (4) II Prerequisite: Hebrew 3.

Continuation of Hebrew 3.

99. Experimental topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

199. Special Study (1-3) I, II Individual study. Maximum credit six units. Prerequisite: Consent of instructor.

## History

#### In the College of Arts and Letters

Faculty

Professors: Berge (Chairman), Coox, Hanchett, Merrill, Munter, Nasatir, Norman, Pincetl, Rader, Ragen, Ridout, Rohfleisch, Ruetten, Strong

Associate Professors: Appleby, Cheek, Chu, Cox, Cunniff, Davies, Detweiler, Dunn, Flemion, J., Hoidal, O'Brien, Schatz, Smith, C. D., Smith, R. T., Starr, Steele, Stites, Sutherland, Vanderwood, Weber

Assistant Professors: Bartholomew, Dill, DuFault, Filner, Flemion, P., Greene, Heyman, McDean, McDonald, Oades, Phillips, Vartanian

#### Offered by the Department

Master of Arts degree in history; and a Master of Arts degree for teaching service with a concentration in history.

Major in history with the A.B. degree in liberal arts and sciences.

Minor in history.

Teaching major in history with specialization in secondary teaching.

Teaching minor in history with specialization in secondary teaching.

#### History Major

## With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. History 4A-4B, or 8A-8B, or 9A-9B, or 17A-17B. (6 units.)

Major. A minimum of 24 upper division units in history to include History 198 (to be taken in the junior year unless a temporary waiver is granted by the department chairman) and a minimum of six units in each of three of the following fields: (a) Ancient and Medieval; (b) Modern Europe; (c) United States; (d) Latin America; (e) South, Southeast, and East Asia; (f) Africa and the Middle East; (g) Topical Subjects. It is the student's obligation, in consultation with the department chairman, to determine which courses fulfill his field requirements.

History / 251

#### 252 / History

#### **History Minor**

The minor in history consists of a minimum of 15 units in history to include six sequence units in the lower division. Nine units must be in upper division courses, including a year course.

#### **History Major**

#### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization outlined in the section of this catalog on the School of Education.

#### **Specialization in Secondary Teaching**

Requirements are the same as the requirements for the undergraduate major for the A.B. degree in liberal arts and sciences, as outlined above, with the provision that a minimum of a year concentration in U.S. history must be included in the upper division work. In addition, students must complete, in the postgraduate year, a minimum of six upper division or graduate units.

#### **History Minor**

#### For the Standard Teaching Credential

#### **Specialization in Secondary Teaching**

The minor in history for secondary teaching consists of a minimum of 21 units to include the following courses: in the lower division, History 4A-4B, or 8A-8B, or 9A-9B, or 17A-17B; and 15 additional units in history to include not less than 12 upper division units selected with the approval of the adviser.

#### **Lower Division Courses**

4A-4B. Western Civilization (3-3)

European institutions, culture, and thought from ancient times to the present. Open only to lower division students.

8A-8B. The Americas (3-3)

The history of the western hemisphere from its discovery to the present time. This year course meets the graduation requirements in American history, institutions and ideals; 8A, also meets the requirements in U.S. Constitution; 8B, meets the requirement in California State and local government.

9A-9B. Asian Civilizations (3-3)

Asian institutions, cultures, and thought from ancient times to the present. Semester I: Traditional Asian civilization. Semester II: Asia since the impact of the West.

17A-17B. American Civilization (3-3)

Prerequisite: History 17A is prerequisite to History 17B. The political and social development of the United States, with emphasis upon the rise of American Civilization and ideals. This course is open only to lower division students. Ordinarily not open to students with credit for Political Science 2, 71A, or 71B. History 17A-17B may be taken by such students with the consent of the chairman of the History Department.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

101A-101B. The Contemporary World in Historical Prespective (3-3)

Prerequisite: History 4B

Trends and developments in the recent past which can contribute to an understanding of the problems of our age.

102. Great Historians and Historical Literature (3) I, II

Lectures and readings in the history of history and the works of major historians. Open to all upper division students, especially recommended for history and social science majors. 104A-104B. The Sources of Civilization in the West (3-3)

Prerequisite: Open only to upper division students.

A survey of the most important items and attitudes which have shaped Western Civilization since ancient times. Emphasis on cultural themes rather than a political continuum. Not open to students with credit in History 4A-4B. The course satisfies the requirement in Western Civilization but cannot be used to satisfy requirement for the major.

105A-105B. War and Civilization (3-3)

The political and social implications of warfare, of the development of military technologies, and of changing concepts of military organization. Semester I: through the 18th century. Semester II: French Revolution and Napoleonic Wars to the present.

106A-106B. The Quest for Peace (3-3)

Prerequisite: Six units in history. An historical analysis of man's efforts to achieve peace from the Greeks to the present. 107A-107B. Science in Western Civilization (3-3)

The development of scientific thought and accomplishment, as they relate to other aspects of Westen culture. Semester I: Pre-classical antiquity through the time of Sir Isaac Newton. Semester II: From 1700 to the present.

111A-111B. Ancient History (3-3)

Fall semester: Greece to the Roman Conquest.

Spring semester: Rome to the 5th century A.D.

121A-121B. Europe in the Middle Ages (3-3)

Prerequisite: History 121A is prerequisite to 121B

European social, cultural, and political developments from the fall of Rome to the Renaissance.

122. The Holy Roman Empire to the Great Interregnum (3)

Prerequisite: History 4A or 121A-121B. The multi-national Holy Roman Empire and its intellectual and social ramifications. Church-state relationships and the development of constitutionalism.

123. The Byzantine Empire (3)

The social, political, cultural, and economic development of the Eastern Roman Empire from the crisis of the third century to the fall of Constantinople in 1453. (Formerly numbered and entitled, History 156, The Byzantine Empire and Its Successors.)

131. The Renaissance (3)

The intellectual, artistic, and social transformation of Europe from the 14th through the early 16th century. (Formerly numbered History 131A.)

132A-132B. Early Modern Europe (3-3) Continental Europe in the 16th and 17th centuries: the religious revolt and religious wars, rise of monarchy, baroque culture, the revolutions in commerce and science. Semester I: the century after Luther. Semester II: the 17th century.

133A-133B. Europe in the 18th Century (3-3)

The "Old Regime" and the influence of the Englightenment and the Enlightened Despots are emphasized. Semester I: the 18th century to 1763. Semester II: intellectual and social changes in the quarter century before the French Revolution.

135A-135B. Europe in the 19th Century (3-3)

Prerequisite: History 135A is prerequisite to 135B.

Social, political, and economic developments of 19th century Europe.

136A-136B. Intellectual History of Modern Europe (3-3)

Selected problems in European intellectual history beginning with the 17th century, with special attention to social and political thought.

137A-137B. Europe in the 20th Century (3-3)

Prerequisite: History 137A is prerequisite to 137B. Political and social developments from 1870 to the present. (Formerly numbered History 144A-144B.)

138A-138B. Diplomatic History of Modern Europe (3-3) Prerequisite: History 4A-4B.

Diplomatic relations of the various European states with European and non-European powers. First semester: From the Concert of Europe (1815) to the Era of *Realpolitik* in the late 19th century. Second semester: The diplomatic backgrounds and results of two wars. (Formerly numbered History 145A-145B.)

141A-141B. History of Scandinavia (3-3)

The major political, economic, and social developments from the Stone Age to the present. Semester I: Stone Age to 1814. Semester II: 1814 to present.

142A. The French Revolution and Napoleonic Era (3) I

Prerequisite: History 4A-4B. France on the eve of the Revolution; the Great Revolution, 1789–1799, the Napoleonic Era. 142B. Modern France (3) II

Prerequisite: History 4A-4B.

The development of France since 1815.

History / 255

#### 254 / History

143A-143B. The Iberian Peninsula (3-3)

A cultural and political survey of Portugal and Spain as well as their empires. Semester I: from medieval times to the early modern period. Semester II: from early modern times to the present. (Formerly numbered and entitled History 149A, Modern Spain.)

145A-145B. Central and Eastern Europe (3-3)

Prerequisite: History 4A-4B.

Semester I: Political, social, and intellectual study of the various nationalities inhabiting the area from the Baltic to the Aegean Sea. Semester II: developments since the late 18th century

146A-146B. Germany and Central Europe (3-3)

Prerequisite: History 4A-4B.

The political, social, and cultural record of the Germanic peoples of Northern and Central Europe from Tacitus to the present.

147A-147B. Russia and the Soviet Union (3-3)

Semester I: Political, social, and economic development of Russia in Europe and Asia from the earliest times to the present. Semester II: Emphasis on the 20th century.

149. Modern Italy (3)

The development of Italy from 1815 to the present. (Formerly numbered History 149B.) 151A-151B. England (3-3)

Prerequisite: History 151A is prerequisite to History 151B.

Political and social history of England from the earliest times to the present day, stressing the origins of American institutions and social patterns. Recommended for majors in English. 152A-152B. Constitutional History of England (3-3)

Evolution of the common law and the development of parliamentary institutions.

153A-153B. Tudor and Stuart England (3-3)

Semester I: The Age of the Tudors. Semester II: England during the Stuart Dynasty, 1603-1714.

154A-154B. Modern Britain (3-3)

Semester I: The development of constitutional and social patterns from the Glorious Revolution to the French Revolution, emphasizing the immediate background to the American Revolution. Semester II: The French Revolution, the rise of parliamentary democracy, the Victorian age and the political thought from the Utilitarians to the Fabians. 155A-155B. History of the British Empire and Commonwealth (3-3)

British expansion, the founding of the colonies of settlement, and development of colonial policy. Semester II: Creation of the Commonwealth and the liquidation of the Empire.

156A-156B. History of the Near East from the 7th Century to World War I (3-3) Prerequisite: History 4A-4B.

Semester I: Medieval Islam from the 7th century A.D. to the rise of the Ottoman Turks. Semester II: The Ottoman Empire to 1914. (Formerly numbered and entitled: History 157A-157B, History of the Near East from the 7th Century to Modern Times.)

157. The Near East in the Twentieth Century, 1914 to Present (3)

Prerequisite: History 4A-4B.

An analysis of socio-political and intellectual developments in the Near East during and after World War I.

158A-158B. Africa (3-3)

Semester I: Civilization of pre-colonial Africa both north and south of the Sahara from the advent of Islam to 1880. Semester II: Colonial and post-colonial Africa.

160A-160B. Latin America (3-3)

Semester I: Colonial Period to approximately 1825. Semester II: Republican Latin America. Not open to students with credit in History 8A-8B.

161A-161B. Mexico (3-3)

Prerequisite: History 8A-8B or 160A-160B. Colonial and modern Mexico. Semester II: Emphasis on the 20th century.

162A-162B. History of Brazil (3-3)

Prerequisite: History 8A-8B or 160A-160B.

The fusion of the Portuguese heritage with Indo-American and Negro elements to form the unique culture of the major nation in the tropics. Semester I: Colony and Empire to 1889. Semester II: Republic, 1889-present.

163A-163B. The Caribbean Area (3-3)

Prerequisite: History 8A-8B or 160A-160B.

Development of the Caribbean area with emphasis on the 20th century.

164. The Pacific Coast Nations of South America (3)

Prerequisite: History 8A-8B or 160A-160B.

The fusion of the native cultures and institutions with those of Spain to form the modern nations of the Pacific Coast of South America.

165A-165B. Economic, Social, and Intellectual Development of Latin America (3-3) Prerequisite: History 8A-8B or 160A-160B.

Designed for students in the Latin American Studies program, foreign trade, and foreign service.

166. Honors Course (1-3) I, II

Refer to Honors Program.

167A-167B. Diplomatic History of Latin America (3-3)

Prerequisites: History 8A-8B or six units of upper division history.

Origins of Inter-Americanism; relations among the Latin American nations; the origins and development of the American States; Latin America in World Affairs.

168. The Platine Nations (3)

Prerequisite: History 8A-8B or 160A-160B.

The historical development of Argentina, Uruguay, and Paraguay, with emphasis on the 20th century

171A-171B. Rise of the American Nation (3-3)

Prerequisite: History 171A is prerequisite to History 171B.

The settlement and development of the British colonies in North America and the American Revolution. Stresses the creation of the American nation through modification of Old World institutions in the new environment.

172A-172B. Development of the Federal Union (3-3)

Prerequisite: History 172A is prerequisite to History 172B. Political, cultural, social and intellectual aspects of the Confederation and early national period; the Convention of 1787 and establishment of the Constitution; the administrations of Washington through John Quincy Adams. This year course meets the graduation requirements in American history, institutions and ideals; 172A meets the requirement in U.S. Constitution; and 172B includes materials which meet the requirements in California state and local government.

173A-173B. The U.S. from Jackson to Grant, 1828-1877 (3-3)

Semester I: The political and economic history of Jacksonian America; the problems posed by slavery and expansion in the context of social, intellectual, and religious ferment. Semester II: The Civil War and Reconstruction, including the sectional controversy, the war, its aftermath, the role of Abraham Lincoln.

174. The Rise of Modern America, 1868-1900 (3)

Economic, social, political, and intellectual developments from the end of the Civil War to the close of the 19th century.

175A-175B. The United States, 1901-1945 (3-3)

The age of reform and the United States as leader of the free world.

175C. The United States in the Nuclear Age (3)

The United States since World War II.

176A-176B. American Foreign Policy (3-3)

Semester I: The development of American foreign policy since 1776. Semester II: Developments since 1916. This year course meets the graduation requirements in American history, institutions, and ideals.

177A-177B. Constitutional History of the United States (3-3)

American constitutional history since the establishment of the federal government. This year course meets the graduation requirement in U.S. Constitution and in American history, institutions and ideals.

178A-178B. The Development of American Capitalism (3-3)

The changes in agriculture, industry, labor, banking, transportation, and commerce in a capitalist society with emphasis on the prominent personalities who made the changes possible.

179A-179B. Intellectual History of the American People (3-3)

The ebb and flow of ideas in the United States since the founding of the English colonies. with attention devoted to social and political thought. This year course meets the graduation requirement in American history, institutions and ideals.

180. Selected Studies in History (3)

Topics in the various fields of history, such as biography, war, science, technology, urbanization, minority groups, immigration, and capitalism. May be repeated for a maximum of six units.

### 256 / History

#### 181A-181B. The Westward Movement (3-3)

The American frontier: Expansion, exploration, settlement and building of the new states, with emphasis upon frontier problems of defense, communications, finance, etc.; the development of cultural institutions. The causes, effects and results of the frontier experiences of the American people. This year course meets the graduation requirement in American history, institutions and ideals.

182A-182B. The Spanish Borderlands and the American Southwest (3-3)

Semester I: Development and colonization of the Spanish Southwest; the growth and influence of Spanish institutions. Semester II: United States' acquisition of the Southwest; the development and problems of expansion, water, industry, transportation, immigration, culture, and agriculture in the region of semi-aridity.

183A-183B. Black American Civilization (3-3)

Semester I: The Black minority group and its contributions and challenges to American civilization. African backgrounds, slavery, the abolitionists, the free Black. Semester II: Ghetto life, leadership personalities, and protest movements.

(Formerly numbered and entitled History 183, The Negro in American Civilization.) 184A-184B. United States History (3-3)

United States history, 1492-present. Semester I: to 1877. Semester II: 1877 to present. Open only to upper division students who do not have credit in History 17A-17B. Cannot be used to satisfy requirements for the major.

185. Conservation History of the United States (3)

The relationship of Americans to their environment from colonial times to the present with emphasis on how attitudes and values have affected personal behavior and public policy toward the land.

#### 189A-189B. California (3-3)

Political institutions; social, cultural, economic, and intellectual development; international background. Semester I: to 1850: Spanish and Mexican heritage. Semester II: 1850 to the present. History 189B will fulfill the requirement in California state and local government.

#### 190A-190B. Southeast Asia (3-3)

Semester I: Cultural traditions of Southeast Asian peoples. Indigenous institutions and the influence of China, India, and Islam. Semester II: Southeast Asia in the modern world. Patterns of foreign stimulus and local response among the peoples of the area.

191A-191B. The Far East (3-3)

Particular, but not exclusive, emphasis on Asian-Western relations. Semester I: Through the 19th century. Semester II: The 20th century.

192. Chinese Civilization (3) I

Chinese internal history and institutions during the period of relative isolation; religions, philosophy, literature, and the arts.

193. China in Modern Times (3) II

The impact of the West on China's history and civilization, particularly in the nineteenth and twentieth centuries with emphasis on internal developments.

194. Japanese Civilization (3) I

Japanese internal history and institutions during the period of indigenous development and Chinese influence including religions, philosophy, literatures, and the arts.

195. Rise of Japan as a Modern State (3) II

The impact of the West on Japan's history and civilization, particularly in the nineteenth and twentieth centuries with emphasis on internal developments.

196A-196B. The Indian Sub-Continent (3-3) Semester I: The historical and cultural development of the sub-continent from earliest times through Muslim rule. Semester II: British rule and its legacy in the sub-continent. The international relations of India and Pakistan.

197A-197B. Intellectual History of Modern Asia (3-3)

Asian intellectual history during the 19th and 20th centuries, with special attention to social and political thought.

198. The Writing of History (3) I, II

Prerequisite: History major or 12 upper division units of history.

Historical method and research in some aspect of history.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of department chairman and instructor.

#### **Graduate Courses**

All graduate courses in the Department of History have a prerequisite of 12 units of upper division courses in history, or consent of the instructor.

201. Seminar in Historical Method (3)

General historical bibliography. The use of libraries and archives. Methods of critical historical investigation. The interpretations of history.

202. Seminar in Historiography (3) A critical study of the works of major historians, their philosophies and the schools of scholarship associated with their work.

240. Directed Reading in Selected Topics (3)

Prerequisite: Permission of the instructor.

Selected readings in source materials and historical literature of various fields of history such as war, science, technology, urbanization, minority groups, immigration, capitalism, conservation, and imperialism. Maximum of six units applicable to the master's degree.

241. Directed Reading in United States History (3) Prerequisite: Six upper division units in United States history. Selected readings in source materials and historical literature in a designated area of United States history. Maximum credit six units applicable on a master's degree.

## 242. Directed Reading in European History (3)

Prerequisite: Six upper division units in European history.

Selected readings in source materials and historical literature in a designated area of European history. Maximum credit six units applicable on a master's degree.

243. Directed Reading in Asian History (3)

Prerequisite: Six upper division units in Asian history.

Selected readings in source materials and historical literature in a designated area of Asian history. Maximum credit six units applicable on a master's degree.

244. Directed Reading in Latin American History (3)

Prerequisite: Six upper division units in Latin American history.

Selected readings in source materials and historical literature in a designated area of Latin American history. Maximum credit six units applicable on a master's degree.

245. Directed Reading in African and Middle Eastern History (3)

Prerequisite: Six upper division units in African or Middle Eastern history.

Selected readings in source materials and historical literature in a designated area of African or Middle Eastern history. Maximum of six units applicable on a master's degree. (Formerly titled Directed Reading in African History.)

246. Directed Reading in Ancient and Medieval History (3)

Prerequisite: Six upper division units in Ancient or Medieval history. Selected readings in source materials and historical literature in a designated area of Ancient or Medieval history. Maximum of six units applicable to a master's degree.

250. Seminar in the Philosophy of History (3)

The major philosophies of history and directed research on topics selected from various philosophers of history such as Bury, Collingwood, Croce, Freud, Hegel, Marx, Pareto, Sorokin, Spengler, and Toynbee.

251. Seminar in United States History (3)

Prerequisite: Six upper division units in United States history. Directed research on topics selected from a designated area of United States history. Maximum credit six units applicable on a master's degree.

252. Seminar in European History (3)

Prerequisite: Six upper division units in European history.

Directed research on topics selected from a designated area of European history. Maximum credit six units applicable on a master's degree.

253. Seminar in Asian History (3)

Prerequisite: Six upper division units in Asian history.

Directed research on topics selected from a designated area of Asian history. Maximum credit six units applicable on a master's degree.

254. Seminar in Latin American History (3)

Prerequisite: Six upper division units in Latin American history.

Directed research on topics selected from a designated area of Latin American history. Maximum credit six units applicable on a master's degree.

255. Seminar in African and Middle Eastern History (3) Prerequisite: Six upper division units in African or Middle Eastern history. Directed research of topics selected from a designated area of African or Middle Eastern history. Maximum of six units applicable to a master's degree. (Formerly titled Seminar in

African History.)

256. Seminar in Ancient and Medieval History (3) Prerequisite: Six upper division units in Ancient or Medieval history.

Directed research on topics selected from a designated area of Ancient or Medieval history. Maximum of six units applicable to a master's degree.

9-84215

Humanities / 259

### 258 / Humanities

296. Area Studies in History (1-3)

Prerequisite: Advancement to candidacy.

Preparation for the comprehensive examinations in the major and minor fields of history for those students taking the M.A. under Plan B. Maximum credit six units applicable on a master's degree.

297. Research (3)

Prerequisite: Advancement to candidacy and written approval of the History Department graduate coordinator.

Independent research in a specialized subject in history.

298. Special Study (1-3)

Individual study. Six units maximum credit.

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. 299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

## **Humanities**

#### Administered by the Dean of the College of Arts and Letters

#### Offered by the College of Arts and Letters

Teaching minor in Humanities, with concentration in Latin, for secondary teaching. (Described in the section on the School of Education.)

Curriculum in Humanities. (Refer to the section of this catalog on Interdisciplinary programs.)

All classes are conducted in English.

#### **Lower Division Courses**

30. The Jewish Heritage I (3) I

Major Hebraic concepts of the Biblical and post-Biblical periods; their impact on Western civilization and their contemporary relevance. (Formerly numbered and entitled: Humanities 30A, The Legacy of Israel.)

31. The Jewish Heritage II (3) I, II

Major Jewish concepts from medieval through modern times; their impact on Western civilization and their contemporary relevance. (Formerly numbered and entitled: Humanities 30B, The Legacy of Israel.)

40. Mythology (3)

Major myths of the world in ancient and modern versions.

42. French Civilization (3) I

The major currents and characteristics of French culture, as expressed through the centuries in literature, art, and philosophy.

Not open to students with credit in French 140, Humanities 142.

French culture from the earliest times to the Enlightenment, with emphasis on the people, their social and political institutions, their arts and letters.

43. French Civilization (3) II

Not open to students with credit in French 141, Humanities 143. French culture from the Enlightenment to the present. Continuation of Humanities 42. 44. German Civilization (3) I

Not open to students with credit in Humanities 144.

The major currents and characteristics of German culture of the Middle Ages and the Renaissance as expressed in literature, art, and philosophy.

45. German Civilization (3) II

Not open to students with credit in Humanities 145.

The major currents and characteristics of German culture as expressed in literature, art, and philosophy since the Renaissance.

48-S. European Civilization (3) S

The civilization of Europe through a conducted travel tour.

52. Russian Civilization (3) I

Not open to students with credit in Humanities 152.

The major currents and characteristics of Russian culture, as expressed through the centuries in literature, art, philosophy, and music from the beginnings to early 19th century.

53. Russian Civilization (3) II

Not open to students with credit in Humanities 153.

Modern Russia's cultural development from early 19th century (The Golden Age) to the present.

54. Italian Civilization (3) I

Not open to students with credit in Humanities 154. The major aspects of Italian civilization with emphasis upon literature, art, philosophy,

music, and history from the earliest times to the Renaissance.

55. Italian Civilization (3) II

Not open to students with credit in Humanities 155.

Continuation of Humanities 54 from the Renaissance to the present.

57. Islamic Culture and Civilization (3) I

Interdisciplinary survey of Islamic culture and civilization, emphasizing religious beliefs, their developments, and their role in creating or being integrated with socio-political systems from the time of Muhammad to the present.

58. African Culture and Civilization (3) II

An interdisciplinary survey.

59A-59B. The Asian Heritage (3-3)

An interdisciplinary year course on the cultures of Southern, Southeastern, and Eastern Asia, with emphasis on the interaction of ideas, peoples and their environment.

66A-66B. Honors Colloquium (3-3)

Prerequisite: Sophomore standing and admission to the special advising program.

Interdisciplinary conference, with readings, discussion, reports.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

## **Upper Division Courses**

138. Introduction to Aesthetic Appreciation (1) I

Same course as Comparative Literature 138.

Major forms of expressions and aesthetic experience in art, music, and literature, presented by an interdepartmental staff through lectures, demonstrations, and panel discussions.

142. French Civilization (3) I

Not open to students with credit in French 140, Humanities 42.

French culture from the earliest times to the Enlightenment, with emphasis on the people, their social and political institutions, their arts and letters.

143. French Civilization (3) II

Not open to students with credit in French 141, Humanities 43.

French culture from the Enlightenment to the present. Continuation of Humanities 142. 144. German Civilization (3) I

Not open to students with credit in Humanities 44.

Investigation of the forces shaping German civilization in the Middle Ages and the Renaissance. Emphasis on history of ideas with reference to their manifestations in the arts and social institutions. (Formerly numbered German 140.)

145. German Civilization (3) II

Not open to students with credit in Humanities 45.

Investigation of the forces shaping German civilization since the Renaissance. Emphasis on history of ideas with reference to their manifestations in the arts and social institutions. (Formerly numbered German 141.)

148-S. European Civilization (3) S

The civilization of Europe through a conducted travel tour.

150A-150B. The Cultural Heritage of Europe I (3-3) I

European history, literature, philosophy, art, and music from the Middle Ages to the French Revolution, stressing major cultural movements: Romanesque, Gothic, Renaissance, Baroque, Rococo, and Classicism.

151A-151B. The Cultural Heritage of Europe II (3-3) II

European history, literature, philosophy, art, and music during the 19th and 20th centuries, stressing major cultural movements: Romanticism, Realism, Naturalism, Symbolism, Expressionism, Existentialism, and Structuralism.

152. Russian Civilization (3) I

Not open to students with credit in Humanities 52.

The major currents and characteristics of Russian culture, as expressed through the centuries in literature, art, philosophy, and music from the beginnings to early 19th century.

153. Russian Civilization (3) II Not open to students with credit in Humanities 53. Modern Russia's cultural development from early 19th century (The Golden Age) to the present.

154. Italian Civilization (3) I Not open to students with credit in Humanities 54. The major aspects of Italian civilization with emphasis on literature, art, philosophy, music, and history from the earliest times to the Renaissance.

155. Italian Civilization (3) II

Not open to students with credit in Humanities 55. Continuation of Humanities 154 from the Renaissance to the present.

160. The Quest for European Unity (3)

Prerequisite: A year course in Western Civilization.

The movement for European unity: background, manifestations, and obstacles.

166. Honors Course (1-3) I, II

Refer to Honors Program.

170. The Humanities and Modern Man (1) Irregular

Lectures open to the public. May be repeated for a total of three units.

Weekly lectures on literature, language, philosophy, and cultural history. Reading and reports required of students enrolled for credit.

180. Study of American Culture (3) I, II S

American Studies as a discipline, the critical methods of the field, the variety of materials for interdisciplinary study.

190. Symposium on European Studies (1) S

A series of lectures and discussions on various aspects of current European developments with particular emphasis on efforts toward European coordination, cooperation, and integration. May be repeated with new content. Maximum credit three units.

198. Integration in the Humanities (3) I, II

The investigation of topics common to two or more departments, with oral and written reports. Required of all senior majors in divisional programs in humanities, and open to seniors with majors in English, foreign languages, history, and philosophy.

199. Special Study (1-3) I. II

Individual study. Six units maximum credit.

Prerequisite: Consent of the instructor.

## Industrial Arts In the College of Professional Studies

#### Faculty

Emeritus: Ford, Luce

Professors: Anderson, Bailey (Chairman), Hammer, Irgang, McLoney, McMullen, J. D. Associate Professors: Dirksen, McEowen

Assistant Professors: Blackmun, Ferree, Guentzler, Lybarger, Marsters, Rasmussen, Sorenson

#### Offered by the Department

Master of Arts degree in industrial arts.

Major in industrial arts with the A.B. degree in applied arts and sciences. Minor in industrial arts.

Teaching major in industrial arts with specialization in secondary teaching.

Teaching minor in industrial arts with specialization in both elementary and secondary teaching.

#### Industrial Arts Major

#### With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Industrial Arts 11, to be taken at the beginning of the major; five courses selected from Industrial Arts 10, 15, 21, 31, 40, 51, 61, 71, and 81 (17 units).

Major. A minimum of 24 upper division units to include nine units in each of two of the following fields: industrial drawing, general metalworking, plastics, general woodworking, electricity-electronics, transportation, graphic arts, industrial crafts, and photography,

## Industrial Arts Minor

The minor consists of 20 units in industrial arts to include Industrial Arts 11, 21, and one lower division and one upper division course in each of two of the following fields: general woodworking, electricity-electronics, transportation, industrial crafts, industrial drawing, photography, plastics, and graphic arts. Choose electives in consultation with the adviser.

#### Industrial Arts Major

#### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

For specialization in secondary teaching, the student must fulfill the requirements for the A.B. degree in applied arts and sciences and, in his postgraduate year, complete two of the following courses, selected in the same two areas used for the undergraduate major: Industrial Arts 202, 203, 204, 205, 206, 207, 208, 210, 215.

#### Industrial Arts Minor

## For the Standard Teaching Credential

The minor in industrial arts for the standard teaching credential, with specialization in either elementary or secondary teaching, consists of 26 units to include Industrial Arts 11 and nine units selected from the following lower division courses: Industrial Arts 10, 15, 21, 31, 40, 51, 61, 71, and 81; and in the upper division, twelve units from the following two-course sequences: Industrial Arts 101 and 102, 111 and 112, 115 and 116, 121 and 123, 131 and 133, 141 and 142, 151 and 153, 161 and 163, 171 and 173, 181 and 183.

### Lower Division Courses

5. General Industrial Arts Laboratory (3)

One lecture and six hours of laboratory.

Open to all students. A general education elective course. Practical utilization of tools and materials with emphasis on drafting, metalworking, and woodworking. Individual projects, field trips, and audio-visual materials.

6. Survey of Electronics (3)

One lecture and six hours of laboratory. A non-mathematical survey of electronics, practical utilization of tools and equipment of today's industry.

10. General Crafts (3) One lecture and six hours of laboratory.

The practical utilization of tools, materials, and methods employed in industrial craft areas. The fundamentals of good design.

11. Orientation to Industrial Arts (2) I, II

Required of all industrial arts majors during their first semester.

The history and philosophy of industrial arts with emphasis on the current status and development of the secondary school curriculum. Discussion of professional requirements, obligations, and development.

## 15. General Plastics (3) I, II

One lecture and six hours of laboratory.

Production methods, mechanical and physical properties, composition of plastics. The basic processes: molding, casting, thermoforming, reinforcing, and foaming.

## 21. Industrial Drawing (3) I, II

One lecture and six hours of laboratory.

Fundamental theories, procedures, and techniques of modern industrial drafting; study and practice intended to develop skill and judgment in application to drafting as the universal language of industry.

31. General Metalworking (3) I, II

One lecture and six hours of laboratory.

Exploration of basic materials and methods employed by industry to produce metal products. The attainment of knowledge and skills involved in the primary fabrication techniques of sheet metal, bench metal, art metal, foundry, forging, machine, and welding.

40. Introduction to Photography (3) I, II

One lecture and six hours of laboratory. A consideration of photographic optics and chemistry; nature of light and image formation; photographic emulsions, exposure and development. Composition and lighting. Not open to students with credit in Journalism 50.

51. General Woodworking (3) I, II

One lecture and six hours of laboratory.

Theories, practices, and basic problems of working in wood; safety practices.

The use of hand tools, the science of working with wood, and the techniques of student personnel management.

61. Basic Electronics (3) I, II

One lecture and six hours of laboratory.

Planning, designing, constructing, and experimenting to develop skills and acquire knowledge in the electronics field. Basic principles, their application to modern electronic equipment, and correct use of common hand tools and simple test equipment.

71. Power Mechanics (3)

One lecture and six hours of laboratory.

Introduction to the various forms of power transmission with emphasis on small engines, innovative fuels, and automotive preventive maintenance.

81. General Graphic Arts (3) I, II One lecture and six hours of laboratory.

The theory and practice in planning, designing, and processing in the various graphic reproduction activities involving type, stencils, paper, and other allied materials. 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

**Upper Division Courses** 

101. Industrial Arts Crafts (3) I. II

One lecture and six hours of laboratory,

Prerequisite: Previous industrial arts experience.

Emphasis on skills in the industrial arts crafts by laboratory experiences in such areas as plastics, jewelry, lapidary, leather, and mosaics. Stress on creativity in design and in utilization of materials.

102. Advanced Industrial Arts Crafts (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 101.

Advanced techniques of industrial arts crafts. Development of audio-visual aids, projects, and resource materials with emphasis on physical setting, organization, and other pertinent laboratory problems.

103. Advanced Industrial Crafts (3)

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 102.

Advanced techniques of industrial crafts. Concentration on the design of craft projects. with best utilization of materials. Development, in at least three areas specified by the instructor, of individual exhibits showing originality.

105. Workshop in Instructional Materials (3) S

One lecture and six hours of laboratory.

Industrial arts laboratory experiences adapted to the individual needs of experienced elementary and secondary school teachers; practice in use of tools common to problematic needs. Preparation of materials and instructional aids for classroom use. Not open to industrial arts majors.

111. Comprehensive Industrial Arts (3)

One lecture and six hours of laboratory.

Prerequisites: Previous industrial arts experience.

Principles, techniques, and procedures effective in meeting problems involved in a multiple activity program. Individual opportunity to explore each area of the selected industrial arts activities, utilizing a variety of tools, equipment, and materials.

112. Organization of Comprehensive Industrial Arts (3)

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 111.

Planning a multiple activities program; selection and organization of subject matter. Individual opportunity to develop skills and to cooperate in mass production studies.

115. Tooling for Plastics Production (3) I. II

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 15.

Design and use of basic tooling; dies for injection and compression molding, forms for reinforced plastics processes, and molds for thermoforming and casting,

116. Thermoplastics (3)

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 115.

Composition and selection of materials; evaluation of physical and mechanical properties of various thermoplastics; special techniques for processing and production of thermoplastics.

117. Thermoset Plastics (3)

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 115.

Composition and selection of materials; evaluation of physical and mechanical properties of various thermoset plastics, special techniques for processing and production of thermoset plastics.

118. Plastic Fabrication and Finishing (3)

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 15.

Methods of plastic fabrication, including composite structures and assembly methods in light and heavy industry. Composition of finishes and methods of finishing plastic products and finishing with plastics.

121. Intermediate Industrial Drawing (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 21.

Complex theories and techniques of graphic delineation. Activities selected to develop individual competence.

122. Architectural Drafting (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 21.

Architectural drafting, primarily in small home planning. Development of drafting skills and understanding of good contemporary home design.

123. Industrial Arts Drawing (3) I, II Two lectures and three hours of laboratory.

Prerequisite: Industrial Arts 21.

Practice in and analysis of modern industrial drafting techniques and theories.

131. Machine Tool Processes (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 31.

Study of machine tools as a manufacturing medium emphasizing precision measurement, standards, tolerance and inspection methods.

132. Welding Processes and Procedures (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 31.

A study of the basic welding processes with emphasis on physical principles and properties, inspection methods and equipment operations.

133. Industrial Arts Metalworking (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 31.

Theory and practice in organization and management of industrial arts metalworking facilities, including material procurement, equipment selection, and maintenance.

140. Photography for Teachers (3)

One lecture and six hours of laboratory.

Designed for more mature students to learn photographic skills useful in teaching. Not open to students with credit in Industrial Arts 40.

141. Intermediate Photography (3) I, II Two lectures and three hours of laboratory.

Prerequisite: Industrial Arts 40 or 140.

Exposure theory, sensitometry, contrast control, specialized development, distortion and perspective control, and advanced studies of photographic lenses and equipment.

142. Advanced Photography (3) I, II One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 40 or 140.

A consideration of advanced negative control, projection printing techniques, composition and editorial content, architectural and illustrative photography, and flood photoflash techniques.

143. Advanced Problems in Photography (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 141. Technical problems and techniques in photography. 144. Color Photography (3) Two lectures and three hours of laboratory. Prerequisite: Industrial Arts 141. Exposure and processing techniques as applied to current color films and papers in relation to the theory of color photography. 151. Machine Woodworking (3) I, II One lecture and six hours of laboratory. Prerequisite: Industrial Arts 51. Experience in the use of selected woodworking machines which offer opportunities for the development of construction activities in wood. Emphasis on creative design, sound safety practices, and techniques of personnel management. 152. Industrial Woodworking (3) I, II One lecture and six hours of laboratory. Prerequisite: Industrial Arts 151. Designed to increase professional skills, craftsmanship, advanced technical skills, and equipment maintenance procedures. 153. Woodworking for Teachers (3) I, II One lecture and six hours of laboratory. Prerequisite: Industrial Arts 151. Industrial arts woodworking resources and materials; experience in industrial arts planning, laboratory and equipment organization, and personnel management. 161. Intermediate Electronics (3) I. II One lecture and six hours of laboratory. Prerequisite: Industrial Arts 61. Development of skills through planning, designing, constructing, and experimenting, Emphasis on the application of advanced principles of electronics to the uses of power, transmission, communication, radio and television. 162. Advanced Electronics (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 161. Development of advanced skills with application to industrial electronics. Techniques in the use of electronics test equipment and analysis of electronic devices. 163. Industrial Electronics (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 162. Advanced problems in industrial electronics circuit development, analysis, theory, and application. 164. Basic Digital Computers (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 162. Functions of circuitry as applied to switching, timing and pulse circuits. Basics of computer digital logic. 165. Analog Computer Fundamentals (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 162 Introduction to electronic analog circuits, with emphasis on instrumentation and measurement techniques. 166. Honors Course (1-3) I, II Refer to Honors Program. 171. Engines and Drive Trains (3) I, II One lecture and six hours of laboratory. Prerequisite: Industrial Arts 71. Advanced study of the operational theory of engines, transmissions and differentials. Emphasis on precision individual systems overhaul. 172. Power System Diagnosis and Evaluation (3) I. II One lecture and six hours of laboratory. Prerequisite: Industrual Arts 171. Theory and application of various types of diagnostic testing equipment, with emphasis on trouble shooting and power system analysis.

Industrial Arts / 265

operation of machines and equipment. 183. Industrial Arts Graphic Arts (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 181.

Advanced techniques in developing skills involved in graphic arts facilities.

190. Experimental Industrial Arts (1 or 2)

173. Accessory Power Systems (3) I, II

One lecture and six hours of laboratory.

181. Intermediate Graphic Arts (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 171.

Prerequisite: Industrial Arts 81.

182. Advanced Graphic Arts (3) One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 181.

Prerequisite: Consent of instructor. Individual laboratory work on complex projects on an experimental basis. May be repeated with consent of instructor.

Study of accessory power systems and technological innovations in the power industries.

Activities in the various graphic arts with emphasis on new technology in the industry.

Planning of activities and perfecting of skills in printing and publication; efficient

193. Industrial Arts Organization and Management (2)

Two lectures.

The organization of industrial arts in secondary schools, review of project requirements and methods of developing student participation in personnel management.

194. Recent Trends in Industrial Arts Education (2)

Two lectures.

Current trends and practices in the field of industrial arts in secondary education. There will be opportunity for individual work on related problems of interest to members of the class.

198. Senior Project (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Consent of instructor.

Each student will work on a project in a selected industrual arts activity area. Oral progress reports will be made and a final written report is required.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor.

#### **Graduate Courses**

An intensive study in industrial arts, topic to be announced in the class schedule.

201. Advanced Teaching Problems (3)

Prerequisites: Teaching experience in area selected and consent of instructor. Materials and advanced techniques of teaching specific activity areas, such as (a) industrial drawing; (b) general metalworking; (c) general woodworking; (d) electricity-radio; (e) transportation; (f) graphic arts; (g) photography; (h) comprehensive industrial arts. Stress on project design and visual materials. Maximum credit six units applicable on a master's degree.

202. Industrial Arts Problems in Graphics and Design (3)

One lecture and six hours laboratory.

Prerequisite: Industrial Arts 123.

The theories and procedures of industrial drafting, including nomographs, descriptive geometry, and graphic solutions. Emphasis on special applications to industrial arts.

203. Industrial Arts Problems in Metalworking (3)

One lecture and six hours laboratory.

Prerequisite: Industrial Arts 133.

Problems involved in industrial arts metalworking. Individual research project dealing with instructional materials or processes.

204. Problems in Photography (3)

One lecture and six hours laboratory.

Prerequisite: Industrial Arts 142, 143, or 144. Advanced problems in photography in industry and photography in education. Individual research project dealing with instructional materials or industrial processes.

205. Industrial Arts Problems in Woodworking (3)

One lecture and six hours laboratory.

Prerequisite: Industrial Arts 153.

Intensive study in selected areas of the woodworking industry as it relates to materials, production, and construction. Presentation of research findings.

206. Problems in Electronics (3)

One lecture and six hours laboratory.

Prerequisite: Industrial Arts 163.

Recent developments in the electronics areas. Special research projects and resource materials.

207. Research in Vehicular Power Systems for Industrial Arts (3)

One lecture and six hours of laboratory. Prerequisite: Industrial Arts 173.

Research in selected areas of the vehicular power systems and effective presentation of findings in oral and written form.

208. Industrial Arts Problems in Graphic Arts (3)

One lecture and six hours laboratory. Prerequisite: Industrial Arts 183.

Selected areas of the graphic arts industry related to materials, production methods, and allied pursuits. Techniques of presentation of findings in effective written and oral form.

210. Problems in Industrial Crafts (3)

One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 103.

Research in selected areas of industrial crafts with emphasis on instructional materials and techniques. Specifically designed for teachers, recreation workers and therapists.

215. Problems in Plastics (3)

One lecture and six hours laboratory. Prerequisite: Industrial Arts 117.

Research with selected plastics processes and materials. Development of projects, aids, resource material, oral and written presentations.

220. History and Philosophy of Industrial Education (3)

A study of the philosophical foundations and development of industrial education and its continuing role in American culture. Contemporary practices and trends will be given consideration.

221. Curriculum Construction in Industrial Arts Education (3)

Selection of teaching content for school situations in compliance with the best known procedures regarding analysis, objectives, methods and learning, and development of instructional devices related directly to course content.

222. Instructional Resources for Industrial Arts Education (3)

Survey, selection, and compilation of materials used in the development of resource units for instruction in industrial education, involving publications, organized talks, field trips, visual materials, technical literature and related materials. Organization and evaluation of such materials.

223. Evaluation in Industrial Arts Education (3)

Principles, methods, and criteria of evaluation including the special problems of measuring growth, achievement, and performance in various phases of industrial education.

224. Organization, Administration and Supervision of Industrial Education Programs (3) The principles, objectives, methods and techniques employed in the supervision of industrial education programs. Emphasis on organizing and administering programs at all levels in industry and education.

267. Field Work in Industrial Arts (3)

Prerequisites: Teaching experience in industrial arts and consent of instructor. Application of the principles of laboratory organization, management, and planning in reference to the objectives of industrial arts in development of school programs.

290. Research Procedures in Industrial Arts (3)

Location, selection, and analysis of scientific and professional literature, research data and specialized bibliographies.

295. Selected Topics in Industrial Arts (3)

Prerequisites: Industrial Arts 290 and advancement to candidacy for the Master of Arts degree.

Study in selected topics of Industrial Arts culminating in a research paper. 298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit. 299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis in industrial arts for the master's degree.

## Industrial Technology in the Department of Industrial Arts in the College of Professional Studies

#### Faculty

Faculty assigned to teach courses in industrial technology are drawn from Industrial Arts.

Offered by the Department of Industrial Arts

Major in industrial technology with the B.S. degree in applied arts and sciences.

## Industrial Technology Major

## With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation

requirements listed on page 57 of this catalog. This major in industrial technology may be planned with an emphasis in electronics technology, industrial sales, or manufacturing technology.

A minor is not required with this major.

## **Emphasis in Electronics Technology**

Preparation for the major. Economics 1A-1B, Mathematics 3, 7, 12, 21, 22, 23, 37; Chemistry 2A-2B; Physics 2A-2B, 3A-3B; Industrial Arts 15, 21, 31, 40, 61, 71. (58 units.)

Major. A minimum of 42 upper division units to include Industrial Technology 121, 161, 174, 191, 194, and 195; Industrial Arts 161, 162, 163, 164, 165, 198; and six units of electives selected with the approval of the adviser.

## **Emphasis in Industrial Sales**

Preparation for the major. Economics 1A-1B; Mathematics 3, 7, 12, 20; Physics 2A-2B, 3A-3B; Business Administration 30A; Industrial Arts 21; and fifteen units selected from: Industrial Arts 15, 31, 40, 51, 61, 71 and 81. (46 units.)

Major. A minimum of 42 upper division units to include Business Administration 150 and three units selected from Business Administration 162, 163, 164; Industrial Technology 191, 192, 193, 194, 195; a minimum of eighteen upper division units in applicable industrial arts and/or industrial technology courses in three technical areas (six units in each area), and three units of electives selected in consultation with the adviser.

## **Emphasis in Manufacturing Technology**

Preparation for the major. Economics 1A-1B; Mathematics 3, 12, 21, 22, 23; Physics 2A-2B; 3A-3B; Business Administration 30A; Industrial Arts 21, 61, and twelve units selected from Industrial Arts 15, 31, 40, 51, 71, 81. (50 units.)

Major. A minimum of 51 upper division units to include Business Administration 135 and six units selected from 132, 136, 137, 138, 140, 145; Industrial Technology 121, 161, 174, 191, 192, 193, 194, 195; a minimum of eighteen units in applicable industrial arts and/or industrial technology courses in two technical areas (nine units in each area) selected in consultation with the adviser.

## **Upper Division Courses**

121. Industrial Design Problems (3)

One lecture and six hours of laboratory.

A study of blueprint reading, the design of jigs, fixtures, and dies, and the application and solution of power transmission problems in the industrial environment.

122. Architectural Drafting (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 122.

Layout of light and medium commercial building using concrete, steel and wood

construction.

123. Technical Illustration (3) One lecture and six hours of laboratory.

Theory and techniques of axonometric projections with emphasis on isometric drawings and their application to technical illustration.

124. Technical Illustration (3) One lecture and six hours of laboratory.

Prerequisite: Industrial Arts 21.

Theory and application of single and multiple point perspectives. Shading and rendering techniques as applied to presentation-type drawings will also be emphasized.

## 268 / Industrial Technology

134. Technology of Ferrous and Non-ferrous Metals (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 31. Applied metallurgy dealing with physical properties, heat treatments, testing and industrial applications. 135. Quality Assurance (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 31. A study of quality control systems in manufacturing; dimensional, non-destructive, and statistical systems are emphasized. 154. Wood Processes and By-Products (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 152. Study of wood by-products manufactured from mascerated wood fibres, laminates, dielectric glue equipment and other processes. 155. Wood Inspection and Testing (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 152. Macro and micro wood identification, chemical and physical testing of wood and wood revived products. 161. Industrial Controls (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 61. Study of industrial controls, including the electrical and electronic systems used in automated manufacturing methods. Emphasis on circuit functions, systems applications, and recent advancements in control techniques. 174. Fluid Power (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 71. Study of fluidic power, including hydraulic and pneumatic systems. Emphasis on circuit design and applications. 184. Printing Processes and Operations (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 181. Recent advancements in the technology of graphic arts-study of work related to various printing processes. 185. Photo-offset Lithographic Principles and Operations (3) One lecture and six hours of laboratory. Prerequisite: Industrial Arts 181. Study and experimentation in the field of offset lithography. 190. Supervised Field Experience (3-6) Prerequisite: Sponsorship by a full-time Industrial Arts Department faculty member. Supervised industrial experience in related occupational field. Specific assignments to be arranged in consultation with the adviser and selected industries. Maximum credit nine 191. Industrial Safety (3) The integration of accident prevention into management functions. The organization of training and safety programs emphasizing the detection and control of hazards, analysis of data, investigations and environment modifications for safety effectiveness. 192. Industrial Materials (3) A survey of various types of manufacturing materials used in industry. Evaluation of materials composition, physical and mechanical properties with emphasis on processing requirements and product design. 193. Manufacturing Processes (3) A survey of manufacturing processes used in industry. Evaluation of forming, shaping, assembly and finishing processes as they relate to characteristics of material and product design. 194. Industrial Proposals and Specifications (3) Research, practice and investigation in the planning and writing of industrial proposals and plant manufacturing systems specifications. 195. Plant Layout and Material Handling (3) Study of education and industrial plant layout for expeditious flow of materials.

## Italian

#### In the College of Arts and letters

#### Faculty

Professor: Vergani, G. Associate Professor: Vergani, L. Lecturers: Mracek, Funston

Offered by the Department of French and Italian

Minor in Italian. Teaching minor in Italian with specialization in both elementary and secondary teaching.

#### Italian Minor

The minor in Italian consists of a minimum of 15 units in Italian, six of which must be upper division.

### Italian Minor

## For the Standard Teaching Credential

## Specialization in Elementary Teaching

The minor in Italian for elementary teaching consists of not less than 20 units in Italian, six units of which must be in upper division courses.

Proficiency Examination: Before taking a student teaching assignment in the language, the candidate for the credential must pass an oral examination in the language administered by the Department of French and Italian. The candidate must consult with the chairman of the Department of French and Italian for permission to take this examination.

#### Specialization in Secondary Teaching

The minor in Italian for secondary teaching consists of not less than 20 units in Italian, exclusive of course equivalents, to include in the lower division, Italian 1, 2, 3, 4, 10, and 11 or equivalents; and in the upper division, Italian 101A, 101B, 102A, 102B, and 122. *Proficiency Examinations:* Before taking a student teaching assignment in the language,

the candidate for the credential must pass proficiency examinations, oral and written, administered by the Department of French and Italian, in the language and its area civilization. (Humanities 54-55 or 154-155 prepare for this latter examination in the area civilization.) The candidate must consult with the chairman of the Department of French and Italian for permission to take these examinations.

#### **High School Equivalents**

High school foreign language courses may be used for purposes of placement in college courses and may be counted toward meeting the foreign language requirement in various majors. These high school courses will not count as college credit toward graduation.

The first two years of high school Italian may be counted as the equivalent of Italian 1; three years the equivalent of Italian 2; and four years the equivalent of Italian 3. The last year-course taken by a student in the high school language sequence may be repeated in college for graduation credit, not to exceed four units of repeated foreign language work.

#### Lower Division Courses

Native speakers of Italian will not receive credit for taking lower division courses in Italian except with advance approval from the department.

1. Elementary (4) I, II

Four lectures and one hour of laboratory.

Pronunciation, oral practice, readings on Italian culture and civilization, essentials of grammar. Not open to students who have completed three years of high school Italian.

2. Elementary (4) I, II Four lectures and one hour of laboratory.

Prerequisite: Italian 1.

Continuation of Italian 1. Not open to students who have completed four years of high school Italian.

3. Intermediate (4) I

A practical application of the fundamental principles of grammar. Reading in Italian of cultural material, short stories, novels of plays; oral and written practice.

4. Intermediate (4) II

879-5 9 20

Prerequisite: Italian 3. Continuation of Italian 3. Reading of selections from Italian literature.

## 270 / Japanese

10. Conversation (2) I

Prerequisite: Italian 2 or three years of high school Italian.

Practice in the spoken language; practical vocabulary, conversation on assigned topics; simple dialogues and plays.

11. Conversation (2) II

Prerequisite: Italian 10 or Italian 3, or four years of high school Italian. Continuation of Italian 10.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

101A-101B. Advanced Oral and Written Composition (3-3) Prerequisite: Italian 4 and 11.

Translation into Italian from moderately difficult English prose. Outside reading of modern Italian prose, with monthly written reports in Italian. Readings and oral discussions in Italian on various facets of Italian life and culture.

102A-102B. Survey of Italian Literature (3-3)

Prerequisite: Italian 4.

Important movements, authors, and works in Italian literature from the Middle Ages to the present.

103A-103B. Dante and the Divine Comedy (3-3)

Prerequisites: Italian 4 and 11. The poet, his cultural background, and his political-historical mission.

104A-104B. Literature of the Italian Renaissance (3-3)

Prerequisites: Italian 4 and 11.

Literature of the 15th and 16th centuries as presented in the works of Poliziano, Lorenzo De'Medici, Pulci and Boiardo; Machiavelli, Ariosto, Michelangelo, Cellini and Tasso. 122. The Foreign Language Laboratory (2) I

Conducted in English.

Prerequisite: Admission to teacher education.

Utilization of the language laboratory, applied to the teaching of foreign languages, including operation of equipment and preparation of material. Discussion and demonstration of related techniques. Not open to students with credit in French, German, Spanish, or Russian 122.

144A-144B. Masterpieces of Italian Literature (3-3)

Works of outstanding Italian writers in English translation. Semester I: from Dante to Machiavelli. The awakening of Italian letters, culminating in the Renaissance. Semester II: Italy in spiritual crisis—the Reformation, Romanticism, Fascism. The search for a national identity from Galileo to contemporary poets and novelists.

150. Advanced Phonetics and Diction (3)

Prerequisites: Italian 4 and 11.

For students and teachers of Italian wishing to perfect their pronunciation and diction. Correct formation of Italian sounds in isolation and combination. Class exercises, individual drill, and use of special discs and tape recordings.

166. Honors Course (1-3)

Refer to honors program.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit. This course is intended only for students who are currently enrolled in or who already have credit for all upper division courses in Italian available in any given semester. Prerequisite: Consent of staff.

### Japanese In the College of Arts and Letters

#### Faculty

Assistant Professor: Yun

Offered by the Department of Classical and Oriental Languages and Literatures Courses in Japanese. Major or minor work in Japanese is not offered.

Native speakers of Japanese will not receive credit for taking lower division courses except with advance approval from the department.

1. Elementary (4)

Four lectures and one hour of laboratory.

Pronunciation, oral practice, readings on Japanese culture and civilization, minimum essentials of grammar.

2. Elementary (4)

Four lectures and one hour of laboratory.

Prerequisite: Japanese 1.

Continuation of Japanese 1.

3. Intermediate (4) Prerequisite: Japanese 2.

A practical application of the fundamental principles of grammar. Reading in Japanese of cultural material, short stories, novels or plays; oral practice; outside reading with oral and written reports.

4. Intermediate (4)

Prerequisite: Japanese 3. Continuation of Japanese 3. Reading of selections from Japanese literature.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 153. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

185. Topics in Japanese Studies (1-4) Topics in Japanese language, literature, culture, and linguistics. May be repeated with new

content. Maximum credit eight units. 199. Special Study (1-3) I, II Individual study. Maximum credit six units. Prerequisite: Consent of instructor.

## Journalism

In the College of Professional Studies

Member of American Association of Schools and **Departments of Journalism** The news-editorial sequence is accredited by American Council on Education for Journalism

#### Faculty

Emeritus: Wimer

Professor: Holowach (Chairman), Julian, Odendahl

Associate Professors: Buckalew, Haberstroh, Sorensen

Assistant Professors: Goggin, Spevak, Whitney, F.

Lecturer: Love

Offered by the Department

Major in journalism with the A.B. degree in liberal arts and sciences. Teaching major in journalism with specialization in secondary teaching. Minor in journalism.

Teaching minor in journalism with specialization in secondary teaching.

## Journalism Major

## With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A total of 36 units in journalism may be counted for graduation, of which a maximum of 14 lower division units in journalism may apply. A minor is not required with this major.

#### 272 / Journalism

#### **Emphasis in Advertising**

Preparation for the major. Journalism 50 and 51A. (6 units.) Major. A minimum of 24 upper division units in journalism to include Journalism 102, 121, 153, 156, 157, and 154 or 159, and six units of electives.

## **Emphasis in Magazine**

## Preparation for the major. Journalism 50 and 51A. (6 units.)

Major. A minimum of 24 upper division units in journalism to include Journalism 101, 102, 103, 121, 193 (minimum of three units) and nine units selected from Journalism 150, 151, 153, 180, and 191 (Internship with a magazine)

### **Emphasis in Mass Communications**

Preparation for the major. Journalism 49, 51A, 51B, and Sociology 1, 60, and Mathematics 3. (18 units.)

Major. A minimum of 24 upper division units in journalism to include Journalism 102, 117. 121 or 162, 144 or 197, 177, and nine units of electives.

#### **Emphasis in News-Editorial**

Preparation for the major. Journalism 50, 51A, and 51B. (9 units.)

Major. A minimum of 24 upper division units in journalism to include Journalism 102, 121. 144, 151, two semesters' enrollment in 192 (minimum of three units), 197, and six units of electives selected from Journalism 101, 105, 117, 150, 153, 155, 191 (Internship with a news medium), 194, or 199.

#### **Emphasis in Photojournalism**

Preparation for the major. Journalism 50, 51A, and 51B. (9 units.)

Major. A minimum of 24 upper division units in journalism to include Journalism 102, 103. 104, 125, 150, 191 (Internship-minimum of three units in photography), and six units of electives.

### **Emphasis in Public Relations**

Preparation for the major. Journalism 49, 50, and 51A. (9 units.)

Major. A minimum of 24 upper division units in journalism to include Journalism 104, 121, or 162, 153, 180, 191 (Internship in public relations), and nine units of electives selected from Journalism 122, 179 or 184, and 183.

## **Emphasis in Radio-TV News**

Preparation for the major. Journalism 50 and 51A (6 units.)

Major. A minimum of 24 upper division units in journalism to include Journalism 102, 104, 121, 124, 125, 191, and six units of electives.

#### Journalism Minor

The minor in journalism consists of 15 units in journalism, nine of which must be upper division.

## Journalism Major

## For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the specialization as outlined in the section of this catalog on the School of Education.

This major, with a specialization in secondary teaching may be used by students in Teacher Education as an undergraduate major for the A.B. degree in liberal arts and sciences.

## Specialization in Secondary Teaching

Preparation for the major. Journalism 50, 51A, and 51B. (9 units.)

Teaching Major (Undergraduate). A minimum of 24 upper division units in journalism to include Journalism 102, 117, 121, and 151 or 104, and one year's enrollment in 124, 125, 192

Postgraduate Year. Six upper division or graduate units in journalism.

## Journalism Minor

#### For the Standard Teaching Credential

#### Specialization in Secondary Teaching

The minor in journalism for secondary teaching consists of not less than 20 units to include in the lower division, Journalism 51A, 51B; and in the upper division, Journalism 102, 151 and 192. Additional journalism electives must be taken to complete the minimum of 20 units. Among the electives recommended but not required, are Journalism 49, 152, and 193. Students selecting this minor must have an academic major.

### **Lower Division Courses**

49. Introduction to Mass Communications (3) I, II The work of mass media, their interrelationships, and the services they perform for society; common problems and responsibilities of the mass media; training and background needed in different media.

50. News and Feature Photography (3) I, II Two lectures and three hours of laboratory.

An elementary course designed primarily for students of journalism and public relations; experience with professional photographic equipment and film processing; contact and projection printing; emphasis on composition and news value of pictures. Not open to students with credit in Industrial Arts 40.

#### 51A. News Reporting (3) I, II

Prerequisite: Sophomore standing and ability to type.

Study of reporting techniques, with intensive laboratory practice in gathering, evaluating, and writing the basic types of news stories.

#### 51B. Advanced News Reporting (3) I, II

Prerequisite: Grade of C or better in Journalism 51A.

Intensive laboratory practice in writing the more complex types of news stories. Work includes some reporting for the campus newspaper, *The Daily Aztec.* 

## 92. Newspaper Production (1-3) I, II

Three hours of laboratory required for each unit. Total credit in Journalism 92, 93, 192, and 193 limited to eight units. A maximum of three units of Journalism 92, or its equivalent, may be counted in the total required for graduation.

Prerequisite: Consent of instructor.

Special work in journalism by arrangement with the instructor. Includes reporting, editing, taking and processing pictures, working with the printer, proofreading in production of The Daily Aztec.

## 93. Magazine Production (1-3) I, II

Three hours of laboratory required for each unit. Total credit in Journalism 92, 93, 192, and 193 limited to eight units.

Special work in yearbook and magazine production by arrangement with the instructor. Includes editing and photographic work on campus magazines.

## 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

## 101. Magazine Article Writing (3) II

Gathering material and writing articles for specialized areas, with emphasis on the business press. Production of eight articles and marketing of at least one article emphasized.

## 102. Law of Mass Communications (3) I, II

Libel, defamation, privacy, censorship, advertising laws, postal regulations, and constitutional guarantees affecting press, radio, television; rights and responsibilities of communicators in reporting public affairs.

## 103. Magazine Editing (3) II

Mechanics of the editorial process in magazines, with emphasis on industrial and business publications; selection and preparation of editorial material; picture selection, cropping, captioning; graphic production processes; layout; preparation of dummies; special purpose booklets and magazines.

886-5 9 55

#### 274 / Journalism

104. Radio and Television News (3) I, II

(Same course as Telecommunications and Film 112)

Gathering, writing, and editing news in special forms required by radio and television; processing wire service copy, still pictures, and kinescopes; filming, editing, and scripting news on motion pictures; using recorders to report special events.

105. Editorial Writing (3) I

Principles and policies of editorial composition for mass communications media.

107. Technical Writing (3) II

Reporting technical developments in nontechnical language. Techniques of writing and editing primarily for nonmajors in journalism.

117. History of Mass Communications (3) I, II

American journalism from colonial times to the present, with special attention to radio and other mass media which have entered the news and entertainment field; the relation of their development to society.

118. The Foreign Press (3) I

The four theories of the press. Flow of international news. Analysis of the foreign media. Problems of propaganda, governmental control, language, and economic support.

121. Current Problems in Mass Communications (3) I, II

Forces affecting American mass communications today: Government restrictions, economics, pressure groups, censorship, mechanical developments, interrelationships of the media and society; professional ethics

122. Public Opinion Measurement (3) I

(Same course as Psychology 122)

The history, methods, and problems of public opinion and attitute measurement. Emphasis will be placed upon the polling of consumers and voters. Students will be given field

124. Radio News Production (3) I, II Prerequisite: Journalism 104 or Telecommunications and Film 112.

Radio news production with experience in writing, editing national wire copy and local copy, preparing tapes and on-the-spot recordings of news events for programs produced over the campus radio station and local commercial radio stations. May be repeated to a maximum

125. Television News Production (3) I, II

Prerequisite: Journalism 104 or Telecommunications and Film 112.

Television news production with experience in photographing news events, processing and editing film, and writing copy to film for programs produced over the campus and local commercial television stations. Maximum credit six units.

144. Reporting of Public Affairs (3) II

Prerequisites: Journalism 51A and 51B. Coverage of the city hall, courthouse, police headquarters, federal agencies, courts, and other public and political centers.

150. Advanced News and Feature Photography (3) II Two lectures and three hours of laboratory.

Prerequisite: Journalism 50.

Techniques for achieving the technical and story-telling quality in photojournalism. 151. News Editing (3) I, II

Three lectures and two hours of laboratory.

Prerequisites: Journalism 51A and 51B. Editing copy, writing headlines, making up pages, handling telegraph copy.

152. High School Journalism (3) II

Methods of conducting high school journalism classes. Editorial, business and mechanical aspects of school publication work, with emphasis on copy editing, headline writing and layout. Not open to journalism majors.

153. Newspaper Advertising (3) I, II

Principles of advertising for newspapers and trade papers. Emphasis on copywriting, layout, typography, and production. Use of consumer and market surveys, and advertising readership studies in planning local advertisers' sales problems and promotions.

154. Newspaper Advertising Practice (1-3) I, II Prerequisite: Journalism 153

Practical work in servicing accounts in advertising on campus media. Supervised work in preparation of copy and layout. Copy-testing methods emphasized. Maximum credit six Journalism / 275

155. Advanced Editing Techniques (3) I

Prerequisite: Journalism 151.

Principles of typography, page layouts, and use of pictorial material; selection, evaluation, editing, and display of news.

156. Advertising Campaigns (3) I

Prerequisite: Journalism 153 or Telecommunications and Film 103.

Cases and problems dealing with advertising campaigns and decision-making involving copy themes, artwork, and media imagery.

157. Advertising Copy, Layout, and Production (3) I, II

Prerequisite: credit or concurrent enrollment in Journalism 153.

Preparation of copy, layout planning, and production of advertising.

159. Advertising Research and Analysis (3) II

Prerequisite: Journalism 153.

Evaluation and use of data collecting and measurement for print media advertising. Cases and problems, with emphasis on quantitative and qualitative characteristics of print advertising.

162. Mass Communication and Society (3) I, II

Prerequisite: Sociology 1.

Social factors underlying nature, functions of mass media. Theories, models, research in media as culture carriers, as opinion shapers, and in relation to government.

166. Honors Course (1-3) I, II

Refer to Honors Program.

177. Research Methods in Mass Communications (3) II

Prerequisite: Sociology 60

Investigate tools and methods of mass media; content analysis, readership studies. audience measurement, experimental designs, and representative studies.

180. Public Relations (3) I, II

Principles, methods, and objectives in the field of public relations; evaluation of the "publics" of institutions and industry; case studies of public relations problems.

181. Public Relations Techniques and Media Usage in Elections (3) II

Prerequisite: Journalism 180.

Use of public relations techniques in political campaigns of all sorts with emphasis on media usage. (Formerly numbered Journalism 179.)

182. Publications Workshop (3) I, II, S

Individual problems in high school publication problems. May be repeated for a maximum of six units.

183. Problems in Public Relations (3) II

Prerequisite: Journalism 180.

Current public relations problems of industry, public agencies, and other institutions.

184. Public Relations Practices (3) I

Prerequisite: Journalism 180.

Examination of current public relations practices in a wide variety of local commercial, industrial, financial, governmental, cultural, and social organizations. Use of the local community's public relations resources.

191. Internship in Journalism (1-3) I, II

Prerequisites: Journalism 51B, or 104, or 153, or 180; and consent of the instructor. Prerequisite must be consistent with the nature of the internship.

Prearranged and supervised work on local magazines, city and county newspapers, radio and television stations, and on public relations, publicity, and advertising staffs of civic and business groups. Maximum credit six units with no more than three units in any one semester. 192. Newspaper Production (1-3) I, II

Three hours of laboratory required for each unit. Total credit in Journalism 92, 93, 192, and

193 limited to eight units.

Prerequisite: Journalism 51B.

Special work in journalism by arrangement with the instructor. Includes reporting, editing, taking and processing pictures, working with the printer, proofreading in production of The Daily Aztec.

193. Magazine Production (1-3) I, II Three hours of laboratory required for each unit. Total credit in Journalism 92, 93, 192, and 193 limited to eight units.

Special work in yearbook and magazine production by arrangement with the instructor. Includes editing and photographic work on campus magazines.

### 276 / Journalism

194. Editorial Conferences (1-3) I, II

More than three hours a week per unit of credit. Prerequisites: Journalism 192 or 193, and consent of publication adviser. Techniques for solving problems in publication production through individual daily conferences with faculty adviser. Open only to editorial executives of *The Daily Aztec and* department magazine. Maximum credit six units.

197. Investigative Reporting (3) I, II

Prerequisite: Journalism 51B.

Development of articles of substance and depth in specialized fields. Research, analysis,

and interpretation of complex issues in the news. May be repeated to a maximum of six units. 199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor.

## **Graduate Courses**

200. Scope and Method of Mass Communications (3)

Intensive preparation in methodology applicable to the various fields related to mass media study.

# 202. Seminar: Mass Media and the Law (3)

Prerequisite: Journalism 102 or Telecommunications and Film 105.

Case studies of legal restrictions and guarantees affecting radio, television, motion pictures, advertising, and printed media.

217. Seminar: History of Journalism (3) Prerequisite: Journalism 117.

Directed research on topics of history of American journalism.

218. Seminar in International Journalism (3)

Prerequisite: Journalism 118.

In-depth exploration of the foreign press and cross-cultural communication; the place of the press in national development and international stability; national images and world opinion; censorship, propaganda and other barriers to international understanding,

221. Seminar: Media Problems (3)

Prerequisite: Six units in courses applicable to the Master of Science degree in Mass Communications.

Reading, investigation, and research concerning current topics in problems of mass media. 222. Mass Communications and Public Opinion (3) Prerequisite: Journalism 122 or 177.

Analysis of media and their opinion-shaping role; methods and effects of pressure groups; propaganda analysis; creation and perpetuation of images and stereotypes.

240. Major Projects in Mass Communications (1-6)

Prerequisite: Journalism 121 or Telecommunications and Film 183.

Design and execution of an in-depth project in one of these areas: advertising campaign, series of detailed expository articles or news stories, or model public relations campaign. Maximum credit six units.

253. Seminar in Print Advertising Problems (3)

Prerequisite: Journalism 153, and 156 or 157.

Investigation of the practice, responsibility, and philosophy of advertising in print media with individual projects, cases, and current literature.

262. Seminar: Mass Communications and Society (3)

Prerequisite: Journalism 162.

Rights, responsibilities, and characteristics of mass media and mass communications practitioners; characteristics and responsibilities of audiences and society. 283. Seminar in Public Relations (3)

Prerequisite: Journalism 180.

Analysis and critique of contemporary public relations programs and theory. Development of a comprehensive public relations project involving original research. 298. Special Study (1-3)

Individual study. Maximum credit six units.

Prerequisite: Consent of staff; to be arranged with the department chairman and instructor.

#### 299. Thesis (3)

Prerequisite: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

Refer to graduate course descriptions in the sections of this bulletin under the Departments of Psychology, Sociology, Speech Communication, and Telecommunications and Film, for their courses.

# Latin

## In the College of Arts and Letters

#### Faculty

Professor: Warren Associate Professor: Ingham

Assistant Professors: Eisner, Genovese

Offered by the Department of Classical and Oriental Languages and Literatures

Major and minor work in Latin is offered under classics. (Refer to this section of the catalog on Classics.)

Teaching minor in Latin with specialization in secondary teaching. (Described in the section on School of Education.)

#### Latin Minor

#### For the Standard Teaching Credential

#### **Specialization in Secondary Teaching**

The minor in Latin for secondary teaching consists of a minimum of 20 units of Latin, at least six units of which must be in upper division courses.

#### **High School Equivalents**

High school foreign language courses may be used for purposes of placement in college courses and may be counted toward meeting the foreign language requirement in various majors. These high school courses will not count as college credit toward graduation.

The first two years of high school Latin may be counted as the equivalent of Latin 1, three years the equivalent of Latin 2. The last year-course taken by a student in the high school language sequence may be repeated in college for graduation credit, not to exceed four units of repeated foreign language work.

#### Lower Division Courses

#### (See also courses in classics.)

1. Elementary (5) I

Five lectures and one hour of laboratory. Introduction to Latin, emphasizing grammatical foundations of classical prose. Aimed toward rapid comprehension. Not open to students who have completed three years of high

school Latin. 2. Elementary (5) II

Five lectures and one hour of laboratory.

Prerequisite: Latin 1.

Continuation of Latin grammar with selections illustrating syntax and style. Not open to students who have completed four years of high school Latin.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

## **Upper Division Courses**

103. Readings in Latin Prose (3) I

Prerequisite: Latin 2. Readings selected from classical Latin masterpieces in history, philosophy, oratory, Authors include Sallust, Cicero, Pliny the Younger. Emphasis on rapid reading.

## 278 / Linguistics

## 104. Readings in Latin Poetry (3) II

Prerequisite: Latin 103.

Readings selected from classical Latin masterpieces in epic, lyric, elegy, comedy. Authors include Vergil, Catullus, Ovid, Plautus. 107. Late Latin (3)

Prerequisite: Latin 2.

Selections from authors ranging from Tertullian and St. Augustine to Erasmus and Milton. The changes in Latin throughout the centuries. May be repeated with new content. Maximum credit six units.

155. Advanced Reading in Latin (3-4)

Prerequisite: Latin 104. Extended, intensive reading in a major author of more difficult or peculiar style or content, such as Lucretius, Caesar, Tacitus, Livy, Terence, Horace, Propertius, Petronius, Juvenal. Emphasis on style, content, interpretation. May be repeated with new content. Maximum

199. Special Study (1-3) I, II Individual Study. Maximum credit six units. Prerequisite: Consent of instructor.

## Linguistics In the College of Arts and Letters

## Faculty

Professor: Frey Associate Professor: Seright (Chairman) Assistant Professors: Cooper, Donahue, Drake, Underhill Lecturers: Dil, Elgin

Offered by the Department Courses in Linguistics. Major or minor work in linguistics is not offered. Master of Arts degree in linguistics.

## Lower Division Courses

65. Language Study (3) II

Introduction to the principles and practice of modern linguistics as applied to the study of English. (Formerly numbered English 65.) 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

180. The English Language (3) I, II

The history of English and its present-day use. (Formerly numbered English 180.) 181. The Structure of English (3) I, II

The structure of modern English, including the various approaches to linguistic analysis (Formerly numbered English 181.) 182. American English (3) I

The development of American English; regional and cultural differences in pronunciation, grammar, and vocabulary. (Formerly numbered English 182.) 183. English Linguistics (3) II

Prerequisite: Open only to seniors and graduate students who have had Linguistics 180, 181, or 196

Advanced study of linguistic theory and its application to the analysis of English. (Formerly numbered English 183.) 184. Phonemics and Morphemics (3) I, II

The study of procedures for arriving at the phonetic inventory of languages and the structuring of sound units (both linear and intonational) into phonemic systems; the study of morphemic hierarchies and their arrangements in forming words. (Formerly numbered

185. Theory and Practice of English as a Second Language (3) II

The nature of language learning; evaluation of techniques and materials for the teaching of English as a second language. (Formerly numbered English 185.)

190. Selected Topics in Linguistics (2-3) I, II Specialized study of a selected topic in literature or linguistics. May be repeated with new content. Maximum credit six units.

196. General Linguistics (3) I

Open only to seniors and graduate students. Recommended: Reading knowledge of Latin. French, Spanish, or German.

The principles of linguistic development illustrated chiefly from the Classical. Romanic. and Germanic language groups. (Formerly numbered General Language 196.)

199. Special Study (1-3) I, II

Individual study. Maximum credit six units. Prerequisite: Consent of instructor.

#### **Graduate Courses**

220. Indo-European (3)

Prerequisite: Anthropology 104 or Linguistics 183.

Phonology, morphology, and syntax of the Indo-European language community, with special attention to "Centum" and "Satem" relationships. (Formerly numbered English 220.)

223. Old English (3) Study of Old English phonology, morphology and syntax. (Formely numbered English 223.)

#### 224. Middle English (3)

Modern linguistic analyses of the Middle English language; emphasis on the development of historical English dialects. (Formerly numbered English 224.)

290. Bibliography and Methods of Linguistic Research (3)

Prerequisite: Twelve units of upper division Linguistics. Basic reference works, scholarly and critical journals; introduction to bibliographical techniques; exercises and problems in methods and exposition of research, including editorial procedures. Recommended for the first semester of graduate work.

295. Seminar in Linguistics (3)

Prerequisite: Completion of three units of 200-numbered courses in the master's program for Linguistics.

Research in linguistics, course content varying according to instructor. Maximum credit six units applicable to a master's degree. (Formerly numbered English 295.)

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

## **Mathematics** In the College of Sciences

#### Faculty

Emeritus: Clark, Emerson, Lemme

Professors: Becker, Bray, Burton, Deaton, Drobnies, Eagle, Fountain, Garrison, Gindler. Harris, Harvey, Ho, Holmes, Moser, Riggs, Saltz, Shaw (Chairman), Smith, Van de Wetering, Warren, Willerding

Associate Professors: Bryant, Davis, Hager, Howard, Khazanie, Kopp, Lopez, Macky, Marcus, Nower, Romano, Short, Villone, Whitman

Assistant Professors: Baase, Burdick, Eckberg, Elwin, Hintzman, Korevaar, Lesley, Marosz, McLeod, Mortensen, Ross, Self, Vinge

Lecturers: Hille, Park, Shotwell, Wadleigh

Mathematics / 281

## 280 / Mathematics

Offered by the Department

Master of Arts degree in mathematics.

Master of Science degree in mathematics.

Master of Science degree in computer science.

Master of Science degree in statistics.

Master of Arts for teaching service with a concentration in mathematics.

Major in mathematics with the A.B. degree in liberal arts and sciences. Major in mathematics with the A.B. degree in applied arts and sciences.

Minor in mathematics.

Teaching major in mathematics with specialization in both elementary and secondary teaching.

Teaching minor in mathematics with specialization in both elementary and secondary teaching.

### **Mathematics** Major

#### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Mathematics 50, 51, and 52. (13 units) Recommended: Physics 4A-4B-4C.

Major. A minimum of 24 upper division units selected with approval of the departmental adviser before starting upper division work, including Mathematics 121A, 149, and 150A, and one two-semester sequence chosen from the following: Mathematics 119 and 170; 121A-121B; 121A and 160; 134 and 140A; 134 and 143; 135A-135B; 136 and 139; 150A-150B; 150A and 158.

#### **Emphasis in Statistics**

Preparation for the major. Mathematics 50, 51, and 52. (13 units).

Major. A minimum of 24 upper division units in mathematics to include Mathematics 121A, 134, 140A, 140B, 149; nine additional units selected with the approval of the adviser from mathematics or closely related areas.

## Mathematics Major

## With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Mathematics 50, 51, and 52. (13 units) Recommended: Physics 4A-4B-4C.

Major. A minimum of 24 upper division units selected with approval of the departmental adviser before starting upper division work, including Mathematics 121A, 149, and 150A, and one two-semester sequence chosen from the following: Mathematics 119 and 170; 121A-121B; 121A and 160; 134 and 140A; 134 and 143; 135A-135B; 136 and 139; 150A-150B; 150A and 138.

## **Mathematics Minor**

The minor in mathematics consists of a minimum of 21 units in mathematics to include in the lower division, Mathematics 50 and 51 or Mathematics 21, 22 and 23, and in the upper division, nine units in mathematics with not more than three units selected from 101, 104, 110A, 130A.

#### **Mathematics Major**

#### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of the Catalog on the School of Education.

This major may be used by students in Teacher Education as an undergraduate major for the A.B. degree in either liberal arts or applied arts and sciences.

## Specialization in Elementary Teaching

Preparation for the Major. Mathematics 21, 22, and 60; or 50, 51 and 52 (9–13 units). Teaching Major. Twenty-four upper division units in mathematics to include

mathematics 150A or 152. The remaining units must be approved by the departmental adviser and may include six units in courses from a related area.

#### Specialization in Secondary Teaching

Preparation for the major. Mathematics 50, 51, and 52. (13 units.) Recommended: Physics 4A-4B-4C.

**Teaching Major (Undergraduate).** A minimum of 24 upper division units in mathematics to include Mathematics 101, 104, 150A, a geometry course and a statistics course. Mathematics 121A is recommended.

**Postgraduate Year.** Six upper division or graduate units acceptable toward the credential, to be selected with approval of the departmental adviser.

#### **Mathematics Minor**

#### For the Standard Teaching Credential

#### **Specialization in Elementary Teaching**

The minor in mathematics for elementary teaching consists of not less than 20 units in mathematics, six units of which must be in upper division courses.

#### Specialization in Secondary Teaching

The minor in mathematics for secondary teaching consists of not less than 21 units, exclusive of course equivalents to include in the lower division, Mathematics 40, or qualifying by examination, mathematics 50 and 51; one course in related areas selected from Astronomy 1, Engineering 20A, Physics 4A or 2A or 1A; and in the upper division, nine units (12 units if major is a non-academic major) in mathematics to include Mathematics 104 and six units of mathematics electives.

#### **Mathematics Placement Examinations**

All students who expect to enroll in Mathematics 3,4,12, 20, 21, 40, or 50 and have not completed prerequisite courses at San Diego State College must take the mathematics placement tests. Students in elementary education who expect to enroll in Mathematics 10A, 10B, or 110A and have not completed prerequisite courses at San Diego State must take the Mathematics Education Placement Test. These tests may be used to satisfy all or part of the prerequisite requirements for these courses and they also serve as a basis for the selection of students for the mathematics bulletin board. Provision is also made for these examinations to be taken by the entering freshman or the transfer student prior to registration. Refer to the calendar.

#### Lower Division Courses

#### 3. Intermediate Algebra (3) I, II

Prerequisite: One year of elementary algebra.

Review of elementary algebra, exponents, radicals, logarithms, quadratic equations, arithmetic and geometric progressions. Not open to students with credit in Mathematics 20 or higher-numbered courses.

#### 4. Trigonometry (2) I, II

Prerequisites: Credit in plane geometry in either high school or college combined with either credit in Mathematics 3 at this college or qualification on Mathematics Placement Examination. Mathematics 4 may be taken concurrently with either Mathematics 40 or 50. Basic concepts of analytic trigonometry.

7. Introduction to Computer Programming (2) I, II

One lecture and three hours of laboratory.

Prerequisite: Mathematics 3.

The use of a problem-oriented language and peripheral equipment. Machine organization. Extensive programming of problems on the computer.

10A. Mathematics for Elementary School Teachers (3) I

Open only to students working towards a teaching credential in elementary education. Prerequisites: High school algebra and geometry, or qualification on Mathematics Education Placement Test.

Sets and relations, functions, the development of the number system from the natural numbers, including the whole numbers, the rational numbers, and the real numbers.

10B. Mathematics for Elementary School Teachers (3) I

Open only to students working toward a teaching credential in elementary education. Prerequisite: Mathematics 10A or qualification on Mathematics Education Placement Test. Elementary number theory and congruences, metric, and non-metric geometry. Introduction to logic and probability and some concepts from algebra.

## 282 / Mathematics

12. Elementary Statistics (3) I, II

Two lectures and two hours of laboratory.

Prerequisite: Mathematics 3 at this college or qualification on the Mathematics Placement Examination.

Tabular and graphical presentation, measures of central tendency and variability, analysis of times series, linear correlation coefficient. Applications from the fields of biology, economics, education, engineering and psychology. Not open to students with credit for, or concurrent enrollment in another statistics course.

18. Introduction to Mathematics (3) I, II

Prerequisites: Two years of high school mathematics.

Topics from logic, modern algebra, and analysis designed to give the student an introduction to the structure of mathematical theories and their applications. Not open to students with credit in Mathematics 40 or higher-numbered courses.

20. Mathematics for Business Analysis (3) I, II

Prerequisite: Mathematics 3 at this college or qualification on Mathematics Placement Examination.

Basic mathematics for business students, including topics from finite mathematics and calculus.

21. Mathematical Analysis (3) I, II

Prerequisites: Mathematics 3 at this college or qualification on the Mathematics Placement Examination.

Concepts and applications of algebra, analytic geometry and the polynomial calculus, with emphasis on graphical methods. Designed for students who do not intend to prepare for a professional career in one of the physical sciences or in engineering. Not open to students with credit in Mathematics 50.

22. Mathematical Analysis (3) I, II

Prerequisite: Mathematics 21.

A continuation of Mathematics 21 including concepts of trigonometry and the calculus of elementary transcendental functions. Not open to students with credit in Mathematics 51. 23. Mathematical Analysis (3)

Prerequisite: Mathematics 22.

Infinite series, partial differentiation, multiple integrals. For the non-major. (Not open to students with credit in Mathematics 52.) 37. Intermediate Computer Programming (4) I, II

Prerequisite: Mathematics 7.

General concept of machine and assembly languages, including data representation, looping and addressing techniques, subroutine linkages and use of system and programmer-defined macros.

40. College Algebra (3) I, II

Prerequisite: Mathematics 3 at this college or qualification on the Mathematics Placement Examination.

Functional notation, mathematical induction, complex numbers, De Moivre's theorem, inequalities, vinomial theorem, determinants, etc. Not open to students with credit in

49. Introductory Matrix Algebra (3) Prerequisite: Math 40.

Matrices, vectors, linear dependence and independence, basis, change of basis, similarity and congruence. Applications to systems of equations, characteristic values and

50. Single Variable Calculus (5) I, II

Prerequisites: Mathematics 40 at San Diego State, with minimum grade of C, and credit or concurrent registration in Mathematics 4; or qualification on Mathematics Placement

Topics in analytic geometry; differentiation and integration of single variable functions, with emphasis on techniques. 51. Calculus and Linear Algebra (4) I, II

Prerequisite: Mathematics 50 with a minimum grade of C.

Infinite series, linear equations and matrices, real vector spaces, linear transformations, determinants, eigenvalues. Emphasis on techniques in low dimensional cases. 52. Multivariable Calculus (4) I, II

Prerequisite: Mathematics 51, with minimum grade of C.

Partial differentiation, differential equations, multiple integrals, applications.

Integers, rationals, and real numbers as mathematical systems; operations, mappings, properties of relations; coordinate geometry; mensuration. Enrollment limited to those in training for or engaged in teaching in the elementary schools.

118A-118B. Methods of Applied Mathematics (3-3) I, II Prerequisites: Mathematics 52. 118A is prerequisite to 118B. Selected topics from ordinary differential equations, with applications; hyperbolic, elliptic, Bessel and gamma functions, Fourier series and integrals, electromechanical analogies, the Laplace transform, and partial differential equations.

119. Differential Equations (3) I, II

Prerequisite: Mathematics 52.

Ordinary differential equations with applications to geometry, physics, and chemistry.

121A. Advanced Calculus I (3)

Prerequisite: Mathematics 52 and 55B.

The real number system, limits and other topics, with emphasis on functions of one variable.

121B. Advanced Calculus II (3)

Prerequisite: Mathematics 121A.

A continuation of Mathematics 121A with emphasis on functions of two or more variables.

60. Introduction to Modern Mathematical Concepts (3) II Prerequisite: Mathematics 40 or 21.

Elementary approach to selected topics from mathematical logic, set theory, probability, matrices, linear programing and theory of games.

Prerequisites: Mathematics 50, with minimum grade of C; 55A with minimum grade of C,

Semester I: Elementary algebraic systems, sets, functions, and induction. Semester II: Real

#### **Upper Division Courses**

99. Experimental Topics (2-4)

is prerequisite to 55B.

numbers and limits.

55A-55B. Elementary Proofs (2-2) I. II

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

100. Mathematical Topics for School Teachers (2 or 3)

Offered only in Extension to currently employed elementary and secondary school teachers.

A study of selected portions of elementary or secondary school mathematics. May be repeated with new subject matter for additional credit. May not be used in a mathematics major or minor.

101. Mathematical Concepts for Secondary School Teachers (3) I, II

Prerequisite: Mathematics 50.

An examination of the concepts of secondary school mathematics from the teacher's point of view.

104. History of Mathematics (3) I, II Prerequisite: Mathematics 21 or 40.

History of mathematics down to early modern times.

105. Introduction to the Foundations of Geometry (3) II

Prerequisite: Mathematics 51 or 22

The foundations of Euclidean and hyperbolic geometries. Highly recommended for all

projections; construction and study of ellipses, hyperbolas, and parabolas by means of projections.

geometry; brief treatment of other types of non-Euclidean geometry.

Prerequisite: Mathematics 52.

Curves in space, Frenet formulas, curves on surfaces, geodesics, lines of curvature, asymptotic lines, Gaussian Curvature.

110A-110B. Modern Elementary Mathematics (3-3) Prerequisite: Mathematics 10B or qualification on a Mathematics Education Placement Test. Mathematics 110A is prerequisite to 100B.

prospective teachers of high school geometry. 106. Projective Geometry (3) I Prerequisites: Mathematics 51 or 22 and consent of instructor.

Concurrence of lines, collinearity of points and other properties of figures not altered by

107. Non-Euclidean Geometry (3)

Prerequisite: Mathematics 22 or 51

History of attempts to prove the fifth postulate; emphasis on plane synthetic hyperbolic

108. Differential Geometry (3)

931-5 9 280

284 / Mathematics 124. Vector Analysis (3) Prerequisite: Mathematics 52. Vector algebra, differentiation of vectors, gradient, divergence, and curl. Applications to geometry and physics. 130A. Statistical Methods (3) I Two lectures and two hours of laboratory. Prerequisite: Mathematics 12 or equivalent statistics course. F, t, Chi-square tests, analysis of variance, confidence intervals, correlation and regression analysis of covariance. 130B. Statistical Methods (3) II Two lectures and two hours of laboratory. Prerequisite: Mathematics 130A. Sequential analysis, sensitivity experiments, design of experiments, nonparametric and distribution-free statistics. 134. Probability (3) Prerequisite: Mathematics 51. Definitions, computation of probability by enumeration of the cases, discrete and continuous random variables, density functions, moments, limit theorems, selected 135A. Numerical Analysis and Computation (3) I Prerequisite: Mathematics 7 and 52. Newton, Lagrange and Chebyshev approximation of functions. Inverse interpolation, numerical evaluation of roots and definite integrals. 135B. Numerical Analysis and Computation (3) II Prerequisites: Mathematics 119 or 118A and 135A. Solution of systems of linear equations. Application of numerical methods to the solution of partial differential equations and of integral equations. 136. Data Structures (3) Prerequisites: Mathematics 37. Basic concepts of data. Linear lists, strings, arrays, and orthogonal lists. Representation of trees and graphs. Multilinked structures. 137. Combinatorial Principles for Digital Computers (3) Prerequisite: Mathematics 23 or 52. Boolean algebra, logical design, and applied combinatorial analysis. 139. Programming Languages (3) Prerequisite: Mathematics 37. Formal definition of programming languages including specification of syntax and semantics. Structure of algorithmic languages. List processing and string manipulation 140A. Mathematical Statistics (3) I Prerequisite: Mathematics 134. Sampling distributions, law of large numbers, central limit theorem, estimation of parameters, confidence intervals, hypothesis testing, regression. 140B. Mathematical Statistics (3) II Prerequisite: Mathematics 140A. Theoretical discrete and continuous distributions, limiting distributions, small sample theory including student's T, Chi-square and F distributions with applications, Analysis of Variance, distribution-free statistics. 141. Statistics, Theory and Applications (3) Prerequisite: Mathematics 140A. Sampling and sampling distributions, confidence limits, hypothesis testing, correlation, regression, analysis of variance and covariance, nonparametric techniques. 143. Stochastic Processes (3) Prerequisite: Mathematics 134. Wiener and Poisson processes, covariance stationary processes, renewal counting processes, Markov chains, 149. Linear Algebra (3) I, II Prerequisite: Mathematics 52 or 23. A study of linear equations, Euclidean spaces, linear transformations, matrices, determinants, and eigenvalues. 150A-150B. Modern Algebra (3) I, II Prerequisites: Mathematics 22 and 60, or 51 and 55A. 150A is a prerequisite to 150B. Selected topics from modern algebra to include an introduction to the theory of groups, theory of equations, and finite mathematics.

Mathematics / 285

152. Number Theory (3)

Prerequisites: Mathematics 22 and 60, or 51.

Selected topics from the theory of numbers to include congruences, Diophantine equations, and a study of prime numbers.

155. Mathematical Logic (3)

Prerequisite: Mathematics 51 or 60, or Philosophy 20.

The logical rules of proof governing sentential connectives and the universal and existential quantifiers with applications. Not open to students with credit in Philosophy 121. 156. Logical Foundations of Mathematics (3)

Prerequisite: Mathematics 52 or 155. Cantor's set theory and its antinomies. Development of various viewpoints on foundations of mathematics: logicism, intuitionalism, formalism.

157. Theory of Recursive Functions (3) Prerequisite: Mathematics 150A, 152, or 155.

The recursion theorem, decision problems, reducibility results, Post's classification of effectively enumerable sets, separability, applications to logic and algebra.

158. Automata Theory (3) II

Prerequisite: Mathematics 150A.

Definition and algebraic description of finite automata. Reduced forms for sequential machines. Regular sets and expressions. Introduction to context-free languages.

160. Introduction to Topology (3) Prerequisite: Mathematics 121A.

Topological spaces. Functions, mappings, and homeomorphisms. Connectivity, compactness. Metric spaces.

166. Honors Course (1-3) I, II

Refer to the Honors Program.

170. Partial Differential Equations (3)

Prerequisite: Mathematics 119.

Study of boundry-initial value problems via separation of variables, eigenfunction expansions, Green's functions, and transform methods. Introductory material includes uniform convergence, divergence theorem's and Fourier series.

175. Functions of a Complex Variable (3)

Prerequisite: Mathematics 52.

Analytic functions, Cauchy-Riemann equations, theorem of Cauchy, Laurent series, calculus of residues.

196. Advanced Topics in Mathematics (1-3) I, II

Prerequisite: Consent of instructor.

Selected topics in classical and modern mathematics. May be repeated with the approval of the instructor for a total of six units.

198. Directed Readings in Mathematics Literature (1)

Prerequisite: Credit or concurrent enrollment in the upper division mathematics course in which readings are to be undertaken.

Individually directed readings in mathematics literature. May be repeated for a maximum of three units, taken each time from a different instructor.

199. Special Study (1-3) I, II

Prerequisite: Consent of instructor. Individual study. Six units maximum credit.

#### **Special Courses for National Science Foundation Institute**

The following courses are open only to participants in the National Science Foundation Institute, except with consent of instructor.

54. Calculus Review (2)

Review of the fundamentals of elementary calculus.

180S. Recent Trends in Secondary School Mathematics (1)

Recent trends in high school mathematics and in application of mathematics.

181. Selected Topics of Secondary School Mathematics (3)

Selected concepts of secondary school mathematics; recommended modern presentation of these concepts; relation of these concepts to more advanced college mathematics.

183S. Modern Algebra (3)

Topics of modern algebra with emphasis on their implications for high school mathematics and with attention to aspects of algebra currently becoming more important.

185S. Modern Geometry (3)

Topics of modern geometry with emphasis on their implications for high school mathematics. Postulational systems, Euclidean and Non-Euclidean geometrics, projective geometry, topology.
### 286 / Mathematics

187A-187B. Probability and Statistics for Secondary School Teachers (3-3) Probability, measures of central tendency and dispersion, characteristics of frequency functions of discrete and continuous variates; applications.

### **Graduate Courses**

200. Seminar (1-3)

Prerequisite: Consent of instructor.

An intensive study in advanced mathematics, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

202. Geometrical Systems (3)

Prerequisites: Mathematics 150A and an upper division course in geometry. Ordered and affine geometries, decompositions, dilations. Projectivities and projective

space. Absolute geometry, isometrics, groups generated by inversions. 203. Topics in Algebra (3)

Prerequisites: Mathematics 121A and 150A.

Unique factorization domains, rings and ideals, groups, algebraic field extensions. A course designed for secondary school teachers. 204A-204B. Topics in Analysis (3-3)

Prerequisites: Mathematics 121A and 150A. 204A is prerequisite to 204B.

Topics in analysis, including the real number system, convergence, continuity, differentiation, the Riemann-Stieltjes integral, complex analysis, designed to give the secondary teacher a broad understanding of the fundamental concepts.

205. Advanced Mathematical Logic (3)

Prerequisite: Mathematics 150A or 155.

First-order theories, completeness theorems, arithmetization, Gödel's incompleteness theorem.

212. Advanced Ordinary Differential Equations (3)

Prerequisites: Mathematics 119 and 121A. Existence and uniqueness theorems, Wronskians, adjoint systems, Sturm-Liouville boundary value problems, equations of Fuchsian type. 214. Advanced Partial Differential Equations (3)

Prerequisite: Mathematics 170.

Theory and application of the solution of boundary value problems in the partial differential equations of engineering and physics by various methods; orthogonal functions, the Laplace transformations, other transformation methods, Green's functions,

220A-220B. Topology (3-3)

Prerequisite: Mathematics 160. Mathematics 220A is prerequisite to 220B.

Metric spaces, regular spaces, Hausdorff spaces, general topological spaces, arcs and curves, and the Jordan Curve Theorem.

222A-222B. Functional Analysis (3-3)

Prerequisites: Mathematics 149 and 160. Mathematics 222A is prerequisite to 222B. Banach spaces, Hilbert spaces, spectral theory and Banach algebras.

224A-224B. Functions of a Complex Variable (3-3)

Prerequisites: Mathematics 121B and 175. Mathematics 224A is prerequisite to Mathematics 224B Analytic continuation, elliptic functions, conformal mapping, Riemann surfaces,

226A-226B. Functions of a Real Variable (3-3)

Prerequisite: Mathematics 121B. Mathematics 226A is prerequisite to Mathematics 226B. Point sets, functions and limits, continuity, differentiations, Riemann and Lebesgue integration.

227. Fourier Analysis (3)

954-5 9 395

Prerequisites: Mathematics 121A, 140, and 150.

Fourier series on the real line and on groups, spectral theorems. Tauberian theorems. 228. Generalized Functions (3)

Prerequisites: Mathematics 121A, 149, and 150A.

Schwartz Distribution Theory, and constructive theory with application to Fourier analysis and differential equations.

230. Rings and Ideals (3) Prerequisite: Mathematics 150B. A development of the theory of rings. 231. Theory of Groups (3) Prerequisite: Mathematics 150B. A development of the theory of groups. 232. Theory of Fields (3) Prerequisite: Mathematics 150B.

A study of both finite and infinite fields, and field extensions.

233. Linear Algebra and Matrix Theory (3)

Prerequisite: Mathematics 149.

A study of matrices, determinants, and vector spaces.

240A-240B. Advanced Mathematical Statistics (3-3)

Prerequisites: Mathematics 140B and 121A. Mathematics 240A is prerequisite to Mathematics 240B.

Theories of common distribution functions, derivation of sampling distributions with emphasis on normal populations, estimation of maximum likelihood, ratio tests of parametric hypotheses, general linear hypothesis theory.

241. Advanced Probability (3)

Prerequisites: Mathematics 121A and 134.

Probability spaces, integration of random variables, convergence in probability, product spaces and product measures; conditional measures and independent measures.

242. Non-parametric Statistics (3)

Prerequisite: Mathematics 140B.

Tolerance regions, randomness problems, most powerful rank tests, the invariance methods, consistency and efficiency of tests.

243. Advanced Hypothesis Testing (3)

Prerequisite: Mathematics 140B.

Sequential probability ratio tests, confidence intervals, minimax and invariance principles. 244. Multivariate Analysis (3)

Prerequisites: Mathematics 140B and 149.

Multivariate normal distributions, multivariate analysis of variance, factor analysis, canonical correlation.

245. Linear Statistical Hypothesis Testing (3)

Prerequisites: Mathematics 140A and 149.

The Multivariate Normal distribution; distribution of quadraic forms; linear and curvilinear models; general linear hypotheses of full rank, regression models.

246. Statistical Decision Theory and Applications (3)

Prerequisites: Mathematics 121A and 140B.

Sequential and nonsequential decision methods, complete classes of decision functions, admissible decision functions, adaptive control systems, stochastic stability and control.

247. Design of Experiments (3)

Prerequisites: Mathematics 140A and 149.

Experimental design models, a basic approach as well as a matrix algebra approach.

260A-260B. Theory of Computability (3-3)

Prerequisites: Mathematics 137 and 158.

Turing machines and their variants. Gödel numbering and unsolvability results. Models of computation.

265A-265B. Formal Languages and Syntactic Analysis (3-3)

Prerequisites: Mathematics 136 and 139.

Definition of formal grammars; Arithmetic expressions and precedence grammars, context-free and finite-state grammars. Algorithms for syntactic analysis. Relationship between formal languages and automata.

268A-268B. Applications of Digital Computation (3-3)

Selected topics for information retrieval, artificial intelligence, theorem proving by computer, simulation, computer graphics, learning theory, computer-assisted instruction. 270A-270B. Advanced Numerical Analysis (3-3)

Prerequisites: Mathematics 121A and 135B.

Matrix norms and bound, localization theorems and eigen problem for matrices. Iterative methods for the solution of linear equations and application to partial differential equations. Extrapolation to the limit. Ordinary boundary value problem.

297. Research (1-3)

Prerequisite: Six units of graduate level mathematics.

Research in one of the fields of mathematics. Maximum credit six units applicable on a master's degree.

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis or Project (3) Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

Mathematics / 287

### Mexican-American Studies / 289

Mexican-American Studies Administered under the Direction of the Dean of **Undergraduate Studies** 

Associate Professor: Nunez Assistant Professors: Villarino (Chairman) Lecturers: Hubbard, Lopez, Palacios, Preston, Quiroz Instructors: DeRivera, Urista

# Offered by Mexican-American Studies

Major in Mexican-American studies with the A.B. degree in liberal arts and sciences Minor in Mexican-American studies

Teaching major in Mexican-American studies with specialization in both elementary and secondary teaching.

Teaching minor in Mexican-American studies with specialization in both elementary and secondary teaching.

# Mexican-American Studies Major

# With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A double major is strongly recommended for students majoring in Mexican-American

Studies.

Students majoring in Mexican-American Studies must complete a minor in another field approved by the adviser in Mexican-American Studies.

Preparation for the major. Mexican-American Studies 1A-1B. (6 units.)

Major. A minimum of 24 upper division units to include Mexican-American Studies 100; History 182A-182B; History 183A or 183B or Comparative Literature 180; and twelve units selected from (social sciences) Mexican-American Studies 101, 102, 103, 104, 105, 111, 121, 122A-122B; or twelve units selected from (humanities) Mexican-American Studies 131, 132, 132A-122B, 135, 165; or twelve units selected from (humanites) incatean-American Studies 131, 132, 133, 134, 135, 165; or twelve units selected from (bilingual systems) Mexican-American Studies 134, 171A, 171B, 172A, 172B, 173A, 173B, 181 (for college teaching, students are urged to include Mexican-American Studies 171C or 172C, 175, and 185); or twelve units selected from (education) Mexican-American Studies 180, 181, 182, 183, 184, 185, 186.

Foreign language requirement. Students majoring in Mexican-American studies must demonstrate knowledge of Spanish by satisfactory completion of 20 units of Spanish (Spanish 1, 2, 3, 4, 10, 11, or equivalents), or by written and oral examinations administered by Mexican-American studies.

# Mexican-American Studies Minor

The minor consists of a minimum of 15 units in Mexican-American studies, nine of which must be upper division.

# Mexican-American Studies Major

# For the Standard Teaching Credential

962-5 9 435

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major with specialization in either elementary or secondary teaching, may be used by students in Teacher Education as an undergraduate major for the A.B. degree in Liberal

# Specialization in Elementary Teaching

Preparation for the Major: Mexican-American Studies 1A-1B, 20A-20B, or 41A-41B, and three units from Mexican-American Studies 10, 50, 60, or 65C.

Teaching Major. A minimum of 25 upper division units to include Mexican-American Studies 171A, 171B, 172A, 172B, 173A or 173B, 174A, 175 and 181.

Foreign Language requirement. Student majoring in Mexican-American studies must demonstrate knowledge of Spanish by satisfactory completion of 20 units of Spanish (Spanish 1, 2, 3, 4, 10, 11, or equivalents), or by written and oral examinations administered by

# Specialization in Secondary Teaching

Students specializing in secondary teaching may select course work from bilingual systems, the humanities, or social sciences.

Teaching Major: A minimum of 24 upper division units to include Mexican-American Studies 100, History 182A-182B, Mexican-American Studies 180; and twelve units selected from (social science) Mexican-American Studies 101, 102, 103, 104, 105, 111, 121, 122A-122B; or twelve units selected from (humanities) Mexican-American Studies 131, 132, 133, 134, 135, 165; or twelve units selected from (bilingual systems) Mexican-American Studies 171A, 171B, 172B, 173A, or 173B, 174B, 175, and 181.

Postgraduate year: Six units of upper division or graduate courses in Spanish or in Mexican-American Studies.

### Mexican-American Studies Minor

#### For the Standard Teaching Credential

### Specialization in Elementary Teaching

The minor in Mexican-American Studies for elementary teaching consists of a minimum of 25 units from course work selected in bilingual systems, including in the lower division Mexican American System 1A-1B, and in the upper division, Mexican American Studies, 171A, 171B, 172A, 172B, 175 and 181.

#### **Specialization in Secondary Teaching**

The minor in Mexican American Studies for Secondary Teaching consists of a minimum of 24 units from course work selected in bilingual systems to include in the lower division Mexican American Studies 1A-1B, and in the upper division, 171A, 171B, 172A, 172B, 175, and 181. For course work selected in social sciences it includes in the lower division Mexican American Studies 1A-1B, six units selected from Mexican American Studies 11, 20A-20B, 41A-41B, or 50 and in the upper division, twelve units selected from History 182A, 182B, Mexican American Studies 101, 102, 103, 104, 105, 111, 121, and 122A-122B. For course work selected in the humanities it includes in the lower division Mexican American Studies 1A-1B. six units selected from Mexican American Studies 30, 50, 60 or 65C, and in the upper division twelve units selected from Mexican-American Studies 100, 131, 132, 133, 134, 135, and 165.

### Lower Division Courses

1A-1B. Introduction to Mexican-American Studies (3-3) Introduction to the culture and the civilization of the Mexican-American. Semester I:

History; Mexican and U.S. roots; the new identity. Semester II: Contemporary problems; social and political movements.

2A-2B. Oral and Written Communication for the Spanish-Speaking (3-3)

Training for the Spanish-speaking in processes of oral and written expression. Semester I; Oral expression; addressing the barrio; formal delivery. Semester II: Written expression; English grammar and composition; the term paper. Mexican-American Studies 2A is equivalent to Speech Communication 3. Mexican-American Studies 2B is equivalent to English 5.

### 10. Mexican-American in Transition (3)

Modern Chicano social problems recognizing the sociological factors involved. Emphasis on scientific method of approach. Evaluation of various causes and solutions of problems of the Chicano. Mexican-American Studies 10 is equivalent to Sociology 10.

11. Field Instruction (3-6)

Field work in the barrio. Directed research and development projects in the San Diego Chicano community. Recommended that this course be taken concurrently with Mexican-American Studies 1A or 1B. Maximum credit six units.

20A-20B. The Mexican-American Role in the American Political System (3-3)

Semester I: Relationship between the Mexican-American community and the American political system. Semester II. The Mexican-American in relation to his city, county, and state institutions in California. This year course meets the graduation requirement in American Institutions.

30. Mexican Literature in Translation (3)

Contemporary Mexican prose and poetry in translation.

40. History and Sociology of Racism (3)

Survey and analysis of majority group racism and its effects upon minority ethnic groups and society.

41A-41B. History of the United States (3-3)

Emphasis on Spanish and Mexican influences. Semester I: U.S. expansion to 1848. Semester II: 1848 to the present. The Treaty of Guadalupe Hidalgo; history of Mexican immigration; farm labor and urban Chicano history; contemporary movements.

10-84215

Faculty

Preparation for the major. Bilingual Systems, Mexican-American Studies 1A-1B, 20A-20B, or 41A-41B, and three units from Mexican-American studies 10, 30, 50, 60 or 65C.

# Mexican-American Studies / 291

### 290 / Mexican-American Studies

50. Introduction to Mexican-American Culture (3)

The individual Chicano and his cultural pattern: The acquisition of his culture, innovation and invention, direction of his cultural development, diffusion and interpenetration of Mexican and U.S. cultures.

60. Mexican-American Art (3)

Contemporary barrio art in the Southwest. Lectures and exhibitions by Chicano artists of California.

65A. History of Mexican-American Drama (3)

The teatro Campesino of Luis Valdes: The Los Angeles teatro urbano. Theory and practice in contemporary Chicano theater, including literary, critical, and technical aspects viewed against the historical background.

65B. Mexican-American Dramatic Production (3)

Two lectures and three hours of laboratory.

Theatrical practices and organization of productions; writing for the Chicano theater; presentation of plays in the barrio and the college.

65C. Mexican and Chicano Music (3)

Music of Mexico and the barrio: Emphasis on the corrido, its history and development in Mexico and the U.S.

99. Experimental topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

### **Upper Division Courses**

100. Mexican-American Culture and Thought (3)

Intellectual history of Mexican-American from Nahua and European origins to synthesis between the two continents in nineteenth and twentieth centuries. The concept of Raza de bronce and Aztlan.

101. Community Organization and Development (3)

Theory of organizing the Mexican-American community for creative roles in educational, political, social change. Role of the professional organizer.

102. Contemporary Problems of the Barrio (3)

Sociological and practical analysis of barrio problems. Observation in informal agencies for experience and sensitizing.

103. Narcotics in the Mexican-American Community (3)

Prevention and cure of drug problems; old and new methods and formal and informal agencies explored.

104. Penology and Criminology and the Chicano (3)

The Chicano and the Pachuco and the penal institutions. Who goes to jail, and why. Field trips to penal institutions, courtrooms.

105. Mexican-American Life Styles (3)

The Mexican-American family in the past, present, and future. Traditional and evolving roles of the man and the woman. The new alternatives in the twentieth century.

111. Advanced Field Instruction (3)

Advanced field work in the barrio. Directed research and development projects in the San Diego Chicano community. Maximum credit six units.

121. Immigration Law and Practices (3)

Legal and political status of the immigrant from Mexico; process of immigration; counseling the immigrant.

122A-122B. The Chicano in Urban Politics (3-3)

Prerequisites: Mexican American Studies 122A is prerequisite to 122B; and consent of instructor.

Semester I: Theory of urban politics; study and observation in county, city, and community organizations and agencies. Identification of specific problems. Semester II: Identification of specific urban problems; study and observation in county, city and community organizations and agencies. Exploration of practical solutions. Field trips.

131. Chicano Poetry: Creative Writing (3)

Reading and writing of Spanish-English macaronic verse: A writing workshop in which students are given opportunity to criticize each other's work. Poetry is the point of departure and goal in sight. Maximum credit six units.

132. Chicano Prose: Creative Writing (3)

A writing workshop. Mutual criticism. Exploration of new form and content in Mexican-American prose. Maximum credit six units.

133. Prehispanic Literature (3)

Literature of Nahua and Maya areas in translation: studied as literature.

134. Language of the Barrio (3) Pachuco, calo, and barrio Spanish: A linguistic study.

135. Mexican-American Literature (3)

Ideas, forms, history of significant Mexican-American prose, poetry and other literary genres.

165. Advanced Chicano Dramatic Production (3)

Two lectures and three hours of laboratory. Theatrical practices and organization of productions; writing for the Chicano theater; presentation of plays in the barrio and in college.

166. Honors Course (1-3) I, II

Refer to Honors Program.

171A. Bilingual Linguistics, Spanish (3)

Prerequisite: Anthropology 120, Linguistics 196, or Spanish 149.

A Spanish-English bilingual description incorporating the study of historical Spanish syntax, historical Spanish phonology, and historical Spanish morphology in the context of generative grammar. Taught in Spanish.

171B. Bilingual Linguistics, Spanish (3)

Prerequisite: Mexican-American Studies 171A.

A Spanish-English bilingual description incorporating the study of modern Spanish syntax, modern Spanish phonology, and modern Spanish morphology within the context of generative grammar. Taught in Spanish.

171C. Bilingual Linguistics, Spanish (3)

The semantic analysis of Spanish. Topics include conditions, truth conditions, meaning, and counter-factual conditionals in the Spanish Language. Taught in Spanish.

172A. Bilingual Linguistics, English (3)

Prerequisite: Anthropology 120, Linguistics 196, or Spanish 149.

An English-Spanish bilingual description incorporating the study of historical English syntax, historical English phonology, and historical English morphology within the context of generative grammar. Taught in English.

172B. Bilingual Linguistics, English (3)

Prerequisite: Mexican-American Studies 172A. An English-Spanish bilingual description incorporating the study of modern English syntax, modern English phonology, and modern English morphology within the context of generative grammar. Taught in English.

172C. Bilingual Linguistics, English (3) The semantic analysis of English. Topics include conditions, truth conditions, meaning, and counter factual conditioning in the English language. Taught in English.

173A-173B. Bilingual Ethnolinguistics and Analysis (3-3)

Prerequisites: Mexican-American Studies 171A, 171B, 172A and 172B.

Semester I: The interrelationship of language and other aspects of human behavior. Language, thought, and reality. Relativity and universals. The origin of language. Semester II: Techniques of bilingual ethnolinguistic analysis (phonetics, phonemics, morphology, syntax). Application of these techniques under field conditions to the recording and analysis of the heterogeneous language styles of bilinguals by direct elicitation. Taught in Spanish and English.

174A-174B. Literature for the Bilingual Student (3-3) Semester I: The study of Iberian, Spanish-American and Chicano literature for the pre-school, elementary, and junior high bilingual student. May be used in lieu of Education 133. Semester II: The study of Iberian, Spanish-American, and Chicano literature for the high school, college, and adult school bilingual student. Taught in Spanish.

175. Bilingual Practicum (4)

Eight hours of laboratory.

Methods of teaching Spanish and English in the elementary, junior high, and high school, emphasizing all valid linguistic approaches to language learning. May be used in lieu of Education 121E.

180. The Mexican-American and the Schools (3) The Mexican-American child's experience in the school system from pre-school through high school with emphasis on social, intellectual, and emotional growth and development.

New methods in bilingual education. Practical field experience in bilingual programs as classroom aids; development of bilingual materials.

182. Mexican-American Curricula (3) Studies of current theories in Mexican-American curricula and their development.

183. Rural and Migrant Education (3) The Mexican-American rural and migrant student: problems and new programs.

980-5 9 525

### 292 / Microbiology

184. Counseling the Mexican-American Student (3)

Motivational counseling at all levels; parent counseling and involvement; recruiting for secondary continuation and college.

185. Testing the Mexican-American Student (3)

Overview of psychological testing of the Chicano student. Topics include current issues in testing, test development, statistical analyses, latest research on testing. 186. The Educational System (3)

Study and observation in county, city, and community administrative and staff offices. Identification of specific problems relating to Mexican-Americans as administrators and teachers.

197. Senior Survey in Mexican-American Studies (3)

Survey integrating studies of selected areas of Mexican-American studies. Senior report will be written.

199. Special Study (1-3) Individual study. Six units maximum credit.

Prerequisites: Consent of instructor and chairman of Mexican-American studies.

# Microbiology In the College of Sciences

Faculty **Emeritus:** Myers

Professors: Baxter, W., Kelly, Moore, H., Walch (Chairman) Associate Professor: Phelps Assistant Professors: Anderes, Jokela, Steenbergen

Lecturers: Campbell, Flanigan

#### Offered by the Department

Master of Science degree in microbiology.

Master of Arts or Master of Science degree in biology with an emphasis in microbiology. Major in microbiology with the A.B. degree in liberal arts and sciences.

Major in microbiology with the B.S. degree in applied arts and sciences.

Major in Environmental Health with the B.S. degree in applied arts and sciences. Minor in microbiology.

Teaching major in the biological sciences, with specialization in secondary teaching, requiring an undergraduate major in one of the biological sciences.

# Microbiology Major

# With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. To satisfy the requirement in foreign language, it is strongly recommended that students select French, German, or Russian.

A minor is not required with this major.

Preparation for the major. Biology 1, 2, and 15 or Mathematics 12; Chemistry 1A-1B, 4 or 5, and 11 or 12; Mathematics 21 and 22, or 40 and 50; and Physics 1A-1B or 2A-2B (37–42 units.) Recommended: Chemistry 13; and Physics 3A-3B.

Major. A minimum of 24 upper division units in Microbiology and approved related fields, to include Microbiology 101, 103, 105 and 114 or Biology 155; and Chemistry 115A-115B. Remaining units to be selected from courses in microbiology, and approved courses in other biological sciences, chemistry and physics.

### Microbiology Major

# With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Biology 1, 2, and 15 or Mathematics 12; Chemistry 1A-1B, 4 or 5, and 11 or 12; Mathematics 21 or 40; and Physics 1A-1B or 2A-2B. (34 or 37 units.) Recommended: French or German; Chemistry 13; Mathematics 22 or 50; Physics 3A-3B.

Major. A minimum of 36 upper division units in microbiology and approved related fields to include Microbiology 101, 103, 105 and 102 or 115; Chemistry 115A-115B; and three of the following courses: Microbiology 104, 107, 114 and 116. Recommended: Chemistry 117, 109A

and 109B. Remaining courses to be selected from courses in microbiology, and approved courses in other biological sciences, chemistry, and physics.

# Medical Technology Curriculum

## In Applied Arts and Sciences

The curriculum in medical technology, which prepares for the licensed profession of Public Health Microbiologist or Clinical Laboratory Technologist or Bioanalyst, may be obtained by taking the microbiology major with the B.S. degree, but following a modified arrangement of courses. A description of the curriculum follows:

Public Health Microbiologist. To fulfill the academic requirements to qualify for the licensing examination given by the California State Department of Public Health for Public Health Microbiologist, the student should follow the major in microbiology described for the B.S. degree, but should include Microbiology 102, 104, 107 and 109 and Zoology 128. Recommended: Microbiology 107L, 111A-111B, 114 and Zoology 108 and 126.

Clinical Technologist. To fulfill the academic requirements to qualify for the licensing examination given by the State for Clinical Technologist and the certification examination for medical technologists given by the American Society of Clinical Pathologists, the student should follow the major in microbiology described for the B.S. degree, but should include Microbiology 102, 104, 107 and 109 and Zoology 128, and should substitute Chemistry 114A-114B for Chemistry 115A-115B. Recommended: Biology 150 and 151; Microbiology 107L, 111A-111B, 114 and Zoology 108 and 126.

# Environmental Health Major

# With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

Preparation for the major. Biology 1 and 2; Chemistry 1A-1B, 4 or 5, and 11 or 12; Physics 1A-1B or 2A-2B, 3A-3B; Mathematics 21 and 22, or 40 and 50; Biology 15 or Mathematics 12; Geology 2; Health Science and Safety 65; and Sociology 1. (48–53 units.)

Major. A minimum of 36 units to include Microbiology 101, 102, 111A-111B, 112, 113; Zoology 128 or Biology 150; Health Science and Safety 160; Public Administration 160; Engineering 123, 125.

# Microbiology Minor

The minor consists of a minimum of 15 units in microbiology to include Microbiology 101, 103 and 105.

# **Biological Sciences Major**

# For the Standard Teaching Credential

# Specialization in Secondary Teaching

The teaching major for secondary teaching requires an undergraduate major in one of the biological sciences: biology, botany, microbiology, or zoology. All elective courses in the major must have prior approval by the adviser for biological sciences teaching programs.

Postgraduate Year. A minimum of six units from courses acceptable for graduate credit on a master's degree program in the biological sciences. Courses must have approval of the adviser for biology teaching programs. (Six units of graduate course work toward completion of a minor may be substituted for this requirement.)

Lower Division Courses

1. Microbiology and Man (3) I, II The biology of microorganisms and their significance in disease, agriculture, sanitation and industry. Not open to biological sciences, nursing and dietetics majors. Fulfills the general education requirement in the natural science area.

1L. Microbiology and Man, Laboratory (1) I, II

# Three hours of laboratory.

Prerequisite: Credit or concurrent registration in Microbiology 1. Laboratory exercises designed to complement material presented in Microbiology 1. Fulfills the general education laboratory requirement in the natural science area.

# 294 / Microbiology

10. General Microbiology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Chemistry 1A or 2A. Students with credit in Microbiology 1 may enroll but will receive only one additional unit of credit.

A course for nursing and dietetics majors. Study of the microorganisms of the environment, including the disease-producing organisms, their actions and reactions. (Formerly numbered Microbiology 1.)

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

101. General Microbiology (4) I, II

Two lectures and six hours of laboratory.

Prerequisite: Chemistry 11 or 12.

The actions and reactions of microorganisms in response to their environment, both natural and as changed by other organisms, including man. Also includes an introduction to the pathogens.

102. Pathogenic Bacteriology (4) I, II Two lectures and six hours of laboratory.

Prerequisites: Microbiology 101, Chemistry 4 or 5. Recommended: Chemistry 114A or 115A

Bacterial and rickettsial agents of disease in man and other animals. Consideration of host-parasite relationships, the biology of the inciting agents and mechanisms of host resistance. Laboratory experience in isolation and identification of bacterial pathogens.

103. Fundamentals of Immunology and Serology (4) I, II

Two lectures and six hours of laboratory. Prerequisites: Microbiology 101; Chemistry 114A or 115A, and one other upper division biological science course.

The immunochemistry of antigens and antibodies and their reactions. Immunohematology and hypersensitivity. Serological techniques.

104. Medical Mycology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Microbiology 101. Recommended: Chemistry 114A or 115A.

Mycotic agents of disease in human and other animals. Consideration of the biology of fungi; concepts of host-parasite relationships, including factors affecting virulence and immunity. Experience in systematic identification.

105. Microbial Physiology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Microbiology 101; Chemistry 4 or 5; and Physics 2A-2B. Recommended: Chemistry 114A or 115A; Physics 3A-3B. Physiology of selected bacteria, fungi, and other microorganisms.

107. General Virology (2) I, II

Prerequisite: Microbiology 101. Recommended: Microbiology 102 and 103.

Viruses, their structure, function, culture, and methods of study.

107L. General Virology Laboratory (2) II

Six hours of laboratory

Prerequisites: Microbiology 102 and credit or concurrent registration in Microbiology 107. The culture, isolation, and characterization of viruses. (Formerly numbered Microbiology 108.

109. Hematology (4) I, II

Two lectures and six hours of laboratory.

Prerequisite: Microbiology 101.

The study of normal and pathological blood with chemical, physical and microscopic methods.

111A-111B. Epidemiology (2-2) Prerequisite: Microbiology 102, Biology 15 or Mathematics 12.

Study of the transmission, distribution, and control of infectious and non-infectious diseases in the community.

112. Survey of Environmental Health (4) I

Three lectures and three hours of laboratory and field work.

Prerequisites: Biology 15 or Mathematics 12; Health Science and Safety 65; and Microbiology 101.

General principles of environmental sanitation, including the relationship of the various aspects of physical environment to preventive medicine; the provision of clean air and water, proper waste disposal, safe food supply, and adequate habitation.

113. Environmental Health Administration (4) II

Three lectures and three hours of field work.

Prerequisites: Microbiology 112; Health Science and Safety 160. Concepts of organization and administration applied to environmental health, factors

affecting these at the local, national and international levels.

114. Bacterial and Viral Genetics (2) I

Prerequisites: Microbiology 101. Recommended: Chemistry 114A or 115A.

The genetics of bacteriophages, selected animal viruses and bacteria.

114L. Bacterial and Viral Genetics Laboratory (2) I

Six hours of laboratory.

Prerequisite: Credit or concurrent registration in Microbiology 114.

115. Advanced General Microbiology (4) II

Two lectures and six hours of laboratory.

Prerequisites: Microbiology 101; Chemistry 114B or 115B. Recommended: Either Microbiology 105, Biology 101, or Botany 130.

Taxonomy, comparative physiology and ecology of representative microorganisms found in various natural environments.

116. Marine Microbiology (4) I

Two lectures and six hours of laboratory.

Prerequisites: Microbiology 101, and one other upper division biological science course. Microbiological population of estuary and ocean waters; interrelationships with other organisms and the physical and chemical environment.

118. Community Epidemiology (3) I, II

Prerequisite: Microbiology 10.

A course for other than biological sciences majors. Epidemiological concepts and methods as they apply to current community problems.

120. Animal Viruses (4) I

Two lectures and six hours of laboratory.

Prerequisites: Microbiology 107. Recommended: Microbiology 103 and 107L.

Animal virus identification and investigation, emphasizing cell culture, cytopathic effects and serology

130. Experimental Immunology (4) I

Two lectures and six hours of laboratory.

Prerequisite: Microbiology 103.

The study of selected antigens and antibodies and their reactions.

140. History of Microbiology (2) I, II

Prerequisite: Microbiology 101.

The development of microbiology as a specialty area of the biological sciences and its influence on social and political developments.

166. Honors Course (1-3) I, II

Refer to Honors Program.

180. Electron Microscopy (4) II Two lectures and six hours of laboratory.

Prerequisites: Physics 2A-2B, Microbiology 101. Recommended: Biology 103, Microbiology 107, and Zoology 108. Principles and techniques in the biological application of the electron microscope.

190. Investigation and Report in Microbiology (2) I, II

Prerequisites: Microbiology 101 and at least one additional upper division course in

microbiology. Investigation and reports on current microbiological literature.

198. Methods of Investigation (2) I, II

One discussion and three hours of laboratory. Prerequisites: Microbiology 101 and one other upper division course in the biological

Selection and design of individual investigation in microbiology; oral and written reports. sciences. Four units maximum credit for Microbiology 198 or a combination of this course with Biology 198 or Zoology 198.

# 296 / Microbiology

199. Special Study (1-3) I, II Individual study. Six units maximum credit. Prerequisites: Fifteen upper division units in the major with an average of B (3.0) or better. Graduate Courses 200. Seminar (2 or 3) Prerequisite: Consent of instructor. An intensive study in advanced microbiology, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree. 205. Seminar in Microbial Physiology (2) Prerequisite: Microbiology 105 May be repeated with new content. Maximum credit four units applicable on a master's degree. 210. Seminar in Pathogenic Bacteriology (2) Prerequisite: Microbiology 102. May be repeated with new content. Maximum credit four units applicable on a master's degree. 215. Seminar in Bacterial and Viral Genetics (2) Prerequisite: Microbiology 114. May be repeated with new content. Maximum credit four units applicable on a master's degree. 220. Seminar in Industrial and Agricultural Microbiology (2) Prerequisite: Microbiology 101 or consent of instructor. May be repeated with new content. Maximum credit four units applicable on a master's degree. 230. Seminar in Medical Mycology (2) Prerequisite: Microbiology 104 or consent of instructor. May be repeated with new content. Maximum credit four units applicable on a master's degree. 240. Seminar in General Microbiology (2) Prerequisites: Microbiology 101 and 105, or consent of instructor. May be repeated with new content. Maximum credit four units applicable on a master's degree. 245. Seminar in Aquatic Microbiology (2) Prerequisite: Microbiology 105 or 116 or Biology 113. Maximum credit four units applicable on a master's degree. 250. Seminar in Virology (2) Prerequisite: Microbiology 107 or consent of instructor. May be repeated with new content. Maximum credit four units applicable on a master's degree. 260. Seminar in Immunology and Serology (2) Prerequisite: Microbiology 103 or consent of instructor. May be repeated with new content. Maximum credit four units applicable on a master's degree. 270. Biology of Animal Pathogenic Fungi (4) Three lectures and three hours of laboratory. Prerequisites: Microbiology 103, 104, 105, and Chemistry 115B. Recommended: Botany 102, Biology 155, and Microbiology 102. Physiological, cytological, genetical, and ecological factors relating to pathogenesis of the fungi-causing diseases in man and other animals. 271. Bacterial Viruses (Bacteriophages) (4) Two lectures and six hours of laboratory. Prerequisites: Microbiology 114 or Biology 155. Effects of temperate and virulent bacteriophages on their hosts, including host-induced modification, lysogenic conversion, and transduction. 272. Advanced Pathogenic Bacteriology (4) Three lectures and three hours of laboratory. Prerequisites: Microbiology 102 and consent of instructor. Biological and chemical nature of disease-producing bacteria. Application of experimental information to diagnostic laboratory procedures. 290. Bibliography (1) Use of basic reference books, journals, pertinent bibliographies preparatory to the writing of a master's thesis.

# Music

# In the College of Professional Studies

### The Department of Music is a member of the National Association of Schools of Music.

#### Faculty

Emeritus: Smith, L. D., Smith, D., Springston Professors: Anderson, P., Blyth, Forman, Genzlinger, Hogg, Hurd, Lambert, Mracek,

Savage, Sheldon, Smith (Chairman), Snider, Ward-Steinman

Associate Professors: Almond, Bruderer, Brunson, Estes

Assistant Professors: Flye, Hill, H., Logan, Loomis, Mitchell, Moe, Murphy, Rohfleisch, Yates

# Offered by the Department

Master of Arts degree in Music

Major in music with the A.B. in liberal arts and sciences.

Bachelor of Music degree in applied arts and sciences.

Minor in music.

Teaching major in music with specialization in secondary teaching.

Teaching majors in fine arts, fine arts and humanities, and fine arts and social sciences, with a concentration in music. See Education.

# Music Curricula

The music curricula are designed to fulfill the needs of all students: (1) those who have professional ambitions in music performance, or seek a foundation for graduate study leading to college or university teaching, (2) those who are preparing for one of the several state teaching credentials with music as either a major or minor, (3) those whose major professional interest is in another department, and are seeking musical study as a minor, and (4) those who are interested in music as an elective study area for the enrichment of their cultural background.

# **General Basic Requirements**

General basic requirements for the B.M. degree in applied arts and sciences, the A.B. degree with a major in music in liberal arts and sciences or in teacher education are as follows:

1. Upon entering the department, each student is required to take an examination in piano for classification, and to commence on no less than four consecutive semesters of class piano

2. In the area of performance studies, each entering student is required to declare his study for credit. major instrument (voice, piano, clarinet, etc.), take an examination thereon for classification and complete seven semesters of study on that instrument for the A.B. degree for the Standard Teaching Credential and eight semesters for the B.M. degree. (The requirements in terms of semesters of study may be reduced for transfer students on the basis of the examination for classification.)

3. Appearance in at least one student recital during each semester in residence, according to departmental recital requirements.

4. As laboratory experience, participation in one or two performing groups each semester to a total of at least 12 units for students in the Bachelor of Music program, or 10 units for to a total of at least 12 units for students in the Dachelor of Music program, or 10 units for students in the Bachelor of Arts program for the Standard Teaching Credential; half of these must be in a major group in which the major instrument or voice is regularly used.

1015-5 10 60

Music / 297

# **Music Major**

# With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. Students must choose French, German or Italian to meet the language requirement. A minor is not required with this major.

Preparation for the major. Music 8A-8B, 10A-10B, 10C, 58A-58B, and four units of Music 50. (23 units.)

Major. A minimum of 24 upper division units to include Music 108, 152A, 152B, six units selected from 154A-154B-154C-154D-154E, four units selected from 170 through 188, six units of upper division electives.

### Music Major

# With the B.M. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

Preparation for the major. Music 8A-8B, 10A-10B, 10C-10D (may be waived in full or in part by examination), 58A-58B; six units selected from courses numbered Music 70 through 90; four to eight units in Music 50 (26-34 units)

Major. Thirty-eight to 42 upper division units to include two units selected from Music 148A-148B or 149A-149B, 152A-152B, 158A-158B, six units selected from courses numbered 170 through 190, four to eight units in Music 150; and the requirements in one of the following fields of emphasis:

(a) Performance. Ten units to include Music 167, 197, and 7 units to be selected with the aid of the departmental adviser. (Pianists, vocalists, and string performers must include Music 141 and 142.)

Students emphasizing performance must appear in a joint recital during the junior year and must present a solo recital during the senior year. The student must pass an audition of the program to be performed before the music faculty no less than one month in advance of the recitals.

(b) Music History and Literature. Ten units to include four units of Music 199 and 6 units of courses to be selected with the aid of the departmental adviser from related fields such as history, etc.

During his senior year, the student emphasizing music history and literature is required to organize, prepare program notes, and present two recitals consisting of recorded or "live" performances. Each will deal with representative works of a certain period, composers, or styles to be compared. Such students must pass an audition of the lecture and the music to be performed no less than one month in advance of the recitals.

(c) Composition. Ten units to include two units of Music 7, two units of Music 107, 197 and four units selected with the aid of the departmental adviser.

An interview with the Department Chairman is required for admission to this emphasis. The student emphasizing composition is required to present a concert of his compositions during the senior year and present the scores of works to be performed to the music faculty no less than one month in advance of the performance.

Foreign Language Requirement. Eight to twelve units (or equivalent knowledge demonstrated in a test of reading knowledge administered by the foreign language department concerned in consultation with the Department of Music) as follows:

I. Vocalists-one semester each of French, German, and Italian. 2. Music History and Literature students-12 units of French, German, or Italian. 3. All other-8 units of one foreign language chosen from French, German, or Italian (except that classical guitar students may substitute Spanish).

# Music Minor

To be admitted to the minor program, the student must demonstrate vocal or instrumental performing ability.

The minor consists of 26 units in music to include Music 8A-8B, 10A-10B, 58A-58B, and 8 units of electives, 6 of which must be upper division, selected in consultation with the departmental adviser.

### **Music Major**

### For the Standard Teaching Credential

# Specialization in Secondary Teaching

All candidates for a teaching credential must complete all requirements for the applicable

specialization as outlined in the section of this catalog on the School of Education.

Students in teacher education may use this major, with specialization in secondary teaching, for the A.B. degree in applied arts and sciences by completing additional departmental requirements in recital attendance and performance, and proficiency examinations in voice and piano.

Preparation for the Major. Music 8A-8B, 10A-10B, 10C-10D, 15A, 58A-58B; five units selected from courses numbered Music 70 through 90; three units selected from courses numbered Music 20 through 35; and four units in the major instrument (33 units)

Teaching Major (Undergraduate). A minimum of 36 upper division units to include Music 147, 148A, 149A, 152A-152B, 158A-158B; five units selected from courses numbered Music 170 through 190; three units selected from courses numbered Music 120 through 135; three units in the major instrument; two units of upper division music electives; and Education 121R or 121S.

Postgraduate Year. Confer with departmental adviser.

### For the Standard Teaching Credential

# Specialization in Elementary Teaching

The teaching minor in music for elementary teaching is restricted to students admitted to and continuing in the credential program for elementary teachers. The teaching minor consists of not less than 20 units to include the following courses: Music 2, 10A, 10B, 10C, 15A, 40, 143, 144, 145, 148A, and two units of music organization courses numbered 170-188.

# Specialization in Secondary Teaching

To be admitted to this program the student must demonstrate vocal or instrumental

The minor consists of 26 units in music to include Music 8A-8B, 10A-10B, 58A-58B, and 8 units of electives, 6 of which must be upper division, selected in consultation with the department adviser.

#### **Electives in Music**

The Music Department offers certain courses for students who are interested in music as an elective study area for the enrichment of their cultural background. Courses particularly suited for these needs are Music 51 and 151 and the music courses numbered 70 to 90 and from 170 to 190. Some students will be musically prepared to elect courses which may or may not be included in this group. Enrollment by qualified students who wish to elect these courses is encouraged.

### **Performance Studies for Credit**

Credit may be allowed for performance studies under the following conditions:

- 1. Properly enrolled music majors may enroll for performance studies with resident faculty without an additional fee.
- 2. Properly enrolled music majors who elect to study off campus with a teacher approved by the Department of Music may do so and may apply for credit by examination. Application for such credit must be made each semester in the Office of the Registrar within the official time limits for filing a change of program. The examination will consist of the regular jury examination required of all music majors at the conclusion
- 3. Students may under no circumstances change teachers in the middle of a semester of each semester. without first securing the permission of the chairman of the Department of Music.
- 4. Prior to the start of performance studies at San Diego State, the student is required to take a preliminary audition conducted by Department of Music faculty which will
- indicate his status at the beginning of his study. 5. Students who have dropped out of school or have stopped taking performance studies for credit for one semester or more, upon resumption of that instruction for credit are
- required to present another preliminary audition. 6. At the end of each semester, the Department of Music will sponsor a jury examination to satisfy itself that its standards have been met.

### Lower Division Courses

2. Basic Musicianship for Non-Music Majors (3) I, II

Rudimentary music theory involving the elements of music: melody, rhythm, and harmony. Developing the understanding of these elements through instrumental and vocal experiences which include the use of unison and part-singing, the keyboard, and simple melodic and harmonic instruments.

### 300 / Music

7. Composition Laboratory (1) II

Three hours of laboratory.

Prerequisite: Consent of instructor.

Original writing in different homophonic and polyphonic forms for various media. May be repeated to a maximum of two units.

8A-8B. Comprehensive Musicianship (3-3) I, II

Two lectures and two hours of laboratory.

Prerequisite: Music 8A is prerequisite to 8B.

Direct analysis of musical forms as they have evolved historically; sight-singing, keyboard harmony, dictation, part-writing and counterpoint and, where relevant, orchestration, aesthetics, art and architecture, literature, and cultural history.

10A-10B. Piano-Elementary Class Instruction (1-1) I, II

Two hours.

Prerequisite: Music 10A is prerequisite to 10B.

Basic keyboard experience through study of music reading, notation, scales, chords, and sight-reading covering a repertoire of beginning and intermediate songs and piano literature, with emphasis on keyboard harmony. Required of music majors and minors and credential candidates for teaching at the kindergarden-primary level.

10C-10D. Piano-Elementary Class Instruction (1-1) I. II

Two hours.

Prerequisite: Music 10B is prerequisite to 10C; and 10C to 10D. Continuation of Music 10A-10B.

15A. Voice-Elementary Class Instruction (1) I, II

Two hours.

Mastery of the fundamentals of voice. Not open to voice majors.

15B. Voice-Elementary Class Instruction (1) I, II Two hours.

Prerequisite: Music 15A.

Observation of individual or group lessons; critiques and discussion; performance in class. 20A. Strings-Elementary Class Instruction (1) I Two hours.

Fundamentals of violin, viola, cello, and string bass by lecture and acquisition of elementary skills. Not open to students with credit in Music 120A. 20B. Strings-Elementary Class Instruction (1) II

Two hours.

Prerequisite: Music 20A or 120A.

Fundamentals of violin, viola, cello, and string bass by lecture and acquisition of elementary skills emphasizing those instruments not previously studied in Music 20A or 120A. Not open to students with credit in Music 120B.

25A. Clarinet and Flute-Elementary Class Instruction (1) I, II

Two hours.

Fundamentals of the clarinet and flute by lecture and acquisition of elementary skills. Not open to students with credit in Music 125A.

25B. Oboe and Bassoon-Elementary Class Instruction (1) I, II Two hours.

Fundamentals of oboe and bassoon by lecture and acquisition of elementary skills. Not open to students with credit in Music 125B.

30. Brass-Elementary Class Instruction (1) I Two hours.

Fundamentals of brass instruments by lecture and acquisition of elementary skills. Not open to students with credit in Music 130A. 35. Percussion-Elementary Class Instruction (1) I, II

Two hours.

Fundamentals of percussion through acquisition of elementary skill on the snare drum and by demonstration and lecture regarding all commonly used percussion instruments of definite and indefinite pitch. Not open to students with credit in Music 135. 40. Guitar-Elementary Class Instruction (1) I, II

Two hours.

Open only to music or elementary education majors. Fundamentals of guitar by acquisition of elementary skills. Not open to students with credit in Music 140.

Prerequisite: Open only to music majors. Audition and approval by departmental faculty. Fifteen one-half hour private lessons or thirty one-hour group sessions for one unit; fifteen one-hour private lessons for two units.

Studies in technical, stylistic, and aesthetic elements of artistic performance. Candidates for the B.M. degree with Performance emphasis enroll for two units of credit per semester. Candidates for the A.B.degree and for the B.M. degree in composition and in music history and literature enroll for one unit of credit per semester. For conditions under which credit is given, see Performance Studies for Credit in the section on the music major. Maximum credit for Music 50 is eight units.

Piano
Harpsichord
Organ
Voice
Flute
Oboe
Clarinet
Cananhono

50. Performance Studies (1-2) I, II

- Bassoon K. French Horn L. Trumpet M. Trombone N. Baritone Horn O. Tuba Percussion Q. Violin
- R. Viola S. Cello T. Contrabass

U. Harp

- V. Classical Guitar
- X. Classical Accordion
- Y. Composition

H. 51. Introduction to Music (3) I

Practical approach to hearing music with understanding and pleasure, through study of representative compositions of various styles and performance media, great musicians and their art. Music correlated with other arts through lectures, recordings, concerts. Closed to music majors and minors.

53. Opera Theatre (2) I, II

A.

B.

C.

E.F.

G

The interpretation and characterization of light and grand opera. Specific work in coordination of operatic ensemble. Maximum credit eight units.

58A-58B. Comprehensive Musicianship (5-5) I, II

Four lectures and two hours of laboratory.

Prerequisite: Music 8B; Music 58A is prerequisite to 58B.

P.

Continuation of Music 8A and 8B.

# **Performance Organization Courses**

The performance organization courses are devoted to the study in detail and the public performance of a wide range of representative literature for each type of ensemble and designed to provide students with practical experience in rehearsal techniques.

70. Chamber Music (1) I, II

Three hours.

Prerequisite: Consent of instructor.

Sections for string, woodwind, brass, piano, vocal, and mixed ensemble groups. Maximum credit four units.

# 75. Marching Band (1) I

Concurrent registration in Music 75 and 76 required. Combined activity, six hours.

Prerequisite: Consent of instructor.

Maximum credit two units.

76. Symphonic Band (1) I, II Semester I: Concurrent registration in Music 75 and 76 required. Combined activity, six

hours.

Semester II: Activity, five hours. Prerequisite: Consent of instructor. Maximum credit four units.

80. Symphony Orchestra (1) I, II

Five hours. Prerequisite: Consent of instructor. Maximum credit four units.

85. Concert Choir (1) I, II

Five hours. Prerequisite: Consent of instructor. Maximum credit four units.

86. Treble Clef (1) I, II

Three hours.

Maximum credit four units.

87. Men's Glee Club (1) I, II

Three hours. Maximum credit four units.

### 302 / Music

## 88. University Chorus (1) I, II

Three hours.

Open to all persons interested in performing oratorio, cantata, opera, and the extended choral works. No entrance auditions are required. Maximum credit four units.

89. Jazz Ensemble (1) I. II Three hours. Prerequisite: Consent of instructor. Maximum credit four units. 90. Collegium Musicum (1) I, II Three hours. Prerequisite: Consent of instructor. Maximum credit four units.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

# **Upper Division Courses**

104. Eighteenth Century Counterpoint (3) I, II Prerequisite: Music 58B.

Two- and three-voice counterpoint in the eighteenth century manner; compositional exercise in appropriate forms. (Formerly numbered: Music 59B).

105. Modern Harmonic Practice (3) I, II Prerequisite: Music 58B.

Analysis and composition in modern idioms.

106. Sixteenth Century Counterpoint (3) I, II

Prerequisite: Music 58B.

Contrapuntal techniques of the sixteenth century, as revealed in the works of Palestrina, Lassus, and Ingegeneri. Compositional exercises in setting parts of the Mass and in writing motets.

107. Composition Laboratory (1) II

Three hours of laboratory. Prerequisites: Music 7 and consent of instructor. Continuation of Music 7. Maximum credit two units.

108. Form and Analysis (2) I, II

Prerequisite: Music 58B

Musical structure and design from traditional and modern literature; development of detailed analytical techniques.

109A-109B. Instrumentation and Arranging (2-2) I, II

Prerequisite: Music 58B. Music 109A is prerequisite to 109B.

Arranging of music for full orchestra. Selected works of students to be performed by standard orchestras.

120A. Strings-Elementary Class Instruction (1) I Two hours.

Fundamentals of violin, viola, cello, and string bass by lecture and acquisition of elementary skills. Not open to students with credit in Music 20A.

120B. Strings-Elementary Class Instruction (1) II Two hours.

Prerequisite: Music 20A or 120A.

Fundamentals of violin, viola, cello, and string bass by lecture and acquisition of elementary skills emphasizing those instruments not previously studied in Music 20A or 120A. Not open to students with credit in Music 20B.

123-S. Workshop in Instrumental Techniques and Chamber Music for String, Woodwind and Brass Instruments (2) Summer Prerequisite: Consent of instructor.

The analysis and interpretation of the literature for each instrument, with performance in various ensemble units; both group and individual instruction in class, under performing professional musicians.

125A. Clarinet and Flute-Elementary Class Instruction (1) I, II

Two hours.

Fundamentals of the clarinet and flute by lecture and acquisition of elementary skills. Not open to students with credit in Music 25A.

125B. Oboe and Bassoon-Elementary Class Instruction (1) I. II. Two hours.

Fundamentals of oboe and bassoon by lecture and acquisition of elementary skills. Not open to students with credit in Music 25B.

Music / 303

130. Brass-Elementary Class Instruction (1) I

Two hours. Fundamentals of brass instruments by lecture and acquisition of elementary skills. Not open to students with credit in Music 30A.

135. Percussion-Elementary Class Instruction (1) I, II

Two hours.

Fundamentals of percussion through acquisition of elementary skill on the snare drum and by demonstration and lecture regarding all commonly used percussion instruments of definite and indefinite pitch. Not open to students with credit in Music 35.

140. Guitar-Elementary Class Instruction (1) I, II

Two hours.

Open only to music or elementary education majors.

Fundamentals of guitar by acquisition of elementary skills. Not open to students with credit in Music 40.

141. Performance Studies Pedagogy (3) I, II

Two lectures and three hours of laboratory.

Prerequisite: Consent of instructor.

Teaching beginning and intermediate applied music. Survey and evaluation of teaching materials. Observation of individual or group lessons.

A. Piano

**B.** Strings

C. Voice

142. Performance Studies Laboratory (2) I, II One lecture and three hours of laboratory.

Prerequisite: Music 141A is prerequisite to 142A and 141B is prerequisite to 142B.

Practical experience in the teaching of individual or group lessons.

A. Piano

**B.** Strings

C. Voice

143. Music Literature for Elementary Teachers (3) I, II

Prerequisites: Music 2 or 8B. Music literature suitable for teaching at the elementary school level; includes background information and ways of classroom presentation.

144. Folk Music (3) I, II

Prerequisite: Music 2 or 8B.

The origin and development of folk music; the social instruments and their use. Participation in singing and playing folk music.

145. Music in Contemporary Life (3) I, II

Prerequisite: Music 2 or 8B.

Functional music in society to include its psychological, physical and recreational uses; music as communication; the composer, the musician, and the audience.

147. Perspectives in Music (3) I, II

Prerequisite: Music 2 or 8B.

Musical understandings from non-performance aspects and perspectives regarding the relationships of music to the visual arts and the humanities.

148A-148B. Choral Conducting (1-1) I, II

Three hours.

Prerequisite: Music 58B; Music 148A is prerequisite to 148B. Elements of baton technique and development of basic skills common to choral conducting. Representative literature and techniques for choral organizations will be studied and performed. Practical experience in typical conducting situations will be emphasized in various grade levels. (Formerly numbered Music 146A.)

149A-149B. Instrumental Conducting (1-1) I, II

Three hours. Prerequisite: Music 58B; Music 149A is prerequisite to 149B.

Orchestra and band scores of graduated levels of advancement. The class will prepare and conduct instrumental works in public performance. (Formerly numbered Music 146B.)

Music / 305

### 304 / Music

# 150. Performance Studies (1-2) I, II

Prerequisite: Open only to music majors. Audition and approval by departmental faculty. Fifteen one-half hour private lessons or thirty one-hour group sessions for one unit; fifteen one-hour private lessons for two units.

Studies in technical, stylistic, and aesthetic elements of artistic performance. Candidates for the B.M. degree with Performance emphasis enroll for two units of credit per semester. Candidates for the A.B. degree and for the B.M. degree in composition and in music history and literature enroll for one unit of credit per semester. For conditions under which credit is given, see Performance Studies for Credit in the section on the music major. Maximum credit for Music 150 is eight units.

H. Saxophone

151. Great Music (3) I, II

Significant music literature of the various historical periods with emphasis on the stylistic characteristics through directed listening.

A. Musical Masterpieces of the 18th and 19th Centuries. B. Musical Masterpieces of the 20th Century. C. Masterpieces of Grand Opera.

D. Twentieth Century American Jazz.

152A-152B. History of Music (3-3) I, II

Prerequisites: Music 58B; Music 152A is prerequisite to 152B.

The chronological development of musical art and forms from the Middle Ages to the present. Analytical score study and assigned recordings. Familiarity with musicological resources through individual assignments.

153. Opera Theatre (2) I. II Four hours

Interpretation and characterization of light and grand opera. Specific work in coordination of opera ensemble. Maximum credit eight units.

154. Music Literature (2) I, II

Prerequisite: Music 58B.

A concentrated study of the literature in the several areas listed. Analysis by use of scores and of recordings, when available.

A. Chamber Music Literature-Strings

B. Small Wind and Percussion Ensemble Literature

C. Symphonic Literature

D. Keyboard Literature

E. Song Literature

158A-158B. Comprehensive Musicianship (5-5) I, II Four lectures and two hours of laboratory. Prerequisite: Music 58B; Music 158A is prerequisite to 158B. Continuation of Music 58A-58B.

166. Honors Course (1-3) I, II

Refer to Honors Program.

167. Junior Recital (1) I, II

Prerequisite: Junior standing in music.

Selection of literature for recital program not to exceed thirty minutes in length; theoretical analysis and historical study of scores chosen; preparation for public performance; and examination before committee of music department faculty.

197. Senior Recital (2) I. II

Prerequisite: Senior standing in music.

Selection of literature for recital program not to exceed one hour in length; theoretical analysis and historical study of scores chosen; preparation for public performance; and examination before committee of music department faculty.

199. Special Study (1-3) I, II Individual study. Six units maximum credit. Prerequisite: Consent of the department chairman.

# Performance Organization Courses

The performance group courses are devoted to the study in detail and the public performance of a wide range of representative literature for each type of ensemble and designed to provide students with practical experience in rehearsal techniques.

170. Chamber Music (1) I, II

Three hours. Prerequisite: Consent of instructor.

Section for string, woodwind, brass, piano, vocal, and mixed ensemble groups. Maximum credit four units

### 175. Marching Band (1) I

Concurrent registration in Music 175 and 176 required. Combined activity, six hours. Prerequisite: Consent of instructor.

Maximum credit two units.

176. Symphonic Band (1) I, II Semester I: Concurrent registration in 175 and 176 required. Combined activity, six hours. Semester II: Five hours per week.

Prerequisite: Consent of instructor.

Maximum credit four units. 180. Symphony Orchestra (1) I, II

Five hours. Prerequisite: Consent of instructor.

Maximum credit four units.

185. Concert Choir (1) I, II

Five hours. Prerequisite: Consent of instructor.

Maximum credit four units.

186. Treble Clef (1) I, II

Three hours.

187. Men's Glee Club (1) I, II

Three hours.

Maximum credit four units. 188. University Chorus (1) I, II

Open to all persons interested in performing oratorio, cantata, opera, and the extended choral works. No entrance auditions are required. Maximum credit four units.

189. Jazz Ensemble (1) I, II Three hours. Prerequisite: Consent of instructor. Maximum credit four units. 190. Collegium Musicum (1) I, II Three hours.

Prerequisite: Consent of instructor. Maximum credit four units.

#### **Graduate Courses**

200. Seminar in Music Education (3)

Prerequisite: Consent of instructor. Seminars in music education are offered to provide an opportunity for concentrated study

in the several areas listed. A. Development and Teaching of Strings B. Choral and Vocal Techniques

C. General Music

201. Foundations of Music Education (3)

History and philosophy of music education in relation to current trends in the teaching

202. Administration and Supervision of Music Education (3) of music.

Curriculum, scheduling, finance, human relations, organizational aspects, and the role of the supervisor-consultant.

204. Comparative Music Education (3)

Various international philosophical and technical approaches to teaching music to include the Orff, Kodaly, Suzuki and other systems.

Maximum credit four units.

### 306 / Music

207. Composition (2 to 3) Three hours of laboratory and public performance of an extended original work as a project. Prerequisite: Music 107. Advanced composition for various media, development of original idiom, intensive study of modern music 208. History and Development of Music Theory (3) Prerequisites: Music 108 and 152B. A survey of important theoretical approaches to music, from pre-Socratic writers to the present. 209. Advanced Orchestration (2) Prerequisite: Music 109B. Intensive work in the practical scoring for ensemble, full orchestra, and symphonic band. Score analysis. Selected works of the class members will be performed. 210. Electronic Music (3) Prerequisite: Undergraduate concentration in composition. Theory, techniques, and composition of various kinds of electronic music. 211. Analytical Studies of Music (3) Prerequisite: Music 108. Melodic, formal, contrapuntal, and harmonic analysis of music. 212. Advanced Contrapuntal Techniques (3) Prerequisites: Music 59B and 106. Traditional and contemporary contrapuntal styles. The development of contrapuntal skills through writing. 213. Seminar: Music Theory (3) Prerequisites: Music 59B and 106. Principles of traditional harmony and ear-training. 246A. Advanced Choral Conducting (2) Prerequisite: Music 146B. Course designed to develop skills at professional level; study of different styles of choral literature and their relationship to conductor's art; score analysis and experience in conducting. 246B. Advanced Instrumental Conducting (2) Prerequisite: Music 146B. Course designed to develop skills at professional level; study of conducting style as related to band and orchestra literature score analysis and experience in conducting, 250. Advanced Performance Studies (2) Fifteen one-hour private lessons. Prerequisite: Audition before music faculty. Advanced studies in technical, stylistic, and aesthetic elements of artistic performance culminating in a graduate recital. Maximum credit four units applicable on a master's degree. A. Piano B. Harpsichord J. Bassoon K. French Horn R. Viola S. Cello C. Organ L. Trumpet T. Contrabass Voice D. M. Trombone U. Harp E. Flute N. Baritone Horn V. Classical Guitar F. Oboe O. Tuba X. Classical Accordion G. Clarinet P. Percussion Y. Composition H. Saxophone Q. Violin 252. Seminar in Music History (3) Prerequisites: Music 152B and consent of instructor. Seminars in music history are offered for intensive study in each of the historical eras as listed below. A. Music of the Middle Ages and Renaissance B. Music of the Baroque Era C.

Music of the 18th and 19th Centuries Twentieth Century Music

D.

E. American Music

253. Musicology (3) Prerequisites: Music 152A and 152B.

Problems and research in musicology. Projects in bibliography, source materials, music history, criticism, aesthetics, and related fields. Writing and presentation of a scholarly paper.

#### 255. Seminar: A Major Composer (3)

Prerequisite: Music 152B. Completion of a seminar in Music 252 is recommended. The life, milieu and works of a major composer, such as Bach, Mozart, or Schubert will be studied. Maximum credit six units applicable on a master's degree.

260. Seminar in the Notation of Polyphonic Music (3) Prerequisite: Music 152B. Completion of Music 252A is recommended. Problems related to the notation of Medieval, Renaissance and Baroque music. Examples will be transcribed into modern notation.

- A. Notation of Soloistic Music: Scores and Tablatures.
  B. Notation of Ensemble Music: White Mensural Notation.
  C. Notation of Ensemble Music: Black Notation to the End of Franconian Notation.
  D. Notation of Ensemble Music: French, Italian, Mixed and Mannered Notation.
- 270. Seminar: Interpretation of Early Music (3)

Prerequisites: Completion of Music 252A and 252B is recommended. Performance practice in Medieval, Renaissance, and Baroque music; projects in music editing; reports; performance on historical instruments. Participation in the Collegium Musicum required.

### 290. Research Procedures in Music (3)

Reference materials, bibliography, investigation of current research in music, processes of thesis topic selection, and techniques of scholarly writing.

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis or Project (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# Offered by Nursing

Major in nursing with the B.S. degree in applied arts and sciences

# Nursing Major

With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

The curriculum in nursing requires completion of a minimum of 128 units as prescribed, with a grade of C or better in each nursing course completed in satisfaction of requirements for the degree. Directed clinical experience in hospitals and health agencies in San Diego County is an integral part of the program. Graduates are eligible to apply for licensing as a registered nurse in California and to apply for the California Certificate of Public Health Nursing.

All students, including registered nurses, are subject to the same requirements. However, graduates of associate degree and diploma programs in nursing may, after evaluation of their competency, be placed in appropriate advanced nursing classes.

Preparation for the major. Chemistry 2A-2B; Microbiology 10; Zoology 8; Biology 9; Sociology 1; Psychology 1; three units in normal nutrition; three units in human growth and development; three units in personality development; three units in marriage and the family.

### Nursing / 307

Oceanography / 309

### 308 / Nursing

### (37 units.)

Major. A minimum of 50 upper division units in Nursing to include Microbiology 118, Nursing 101, 102, 103A-103B, 104A-104B, 105, 106, 116, 130, 131, 132, 133, 136, 137; and 4 units selected from Nursing 150, 151, 152, 153, 154, and 155. A minimum grade of C must be earned in each nursing course in order to enroll in the next sequential course.

#### **Upper Division Courses**

101. Maternal-Neonatal Nursing (3) I, II

Prerequisites: Minimum overall grade point average of 2.50 in courses listed under Preparation for the Major in Nursing, concurrent registration in Nursing 102, 103A, and 104A. Principles of care of mothers and newborn infants, including the recognition of the

manifestation of basic needs with emphasis on the importance of family relationships. 102. Maternal-Neonatal Nursing Experience (4) I, II

Twelve hours of laboratory.

Prerequisites: Concurrent registration in Nursing 101, 103A, and 104A.

Clinical experience in the care of mothers and newborn infants including all phases of the maternity cycle.

103A-103B. Psychiatric and Mental Health Nursing (2-1) I, II Prerequisites: Nursing 103A: Concurrent registration in Nursing 101, 102, and 104A. Nursing 103B: Nursing 103A and concurrent registration in Nursing 104B, 130, and 131.

Beginning development in the utilization of principles and concepts of mental hygiene in meeting needs of patients exhibiting both normal and deviant behavior. 104A-104B. Psychiatric and Mental Health Nursing Experience (2-2) I, II

Six hours of laboratory.

Prerequisites: Nursing 104A: Concurrent registration in Nursing 101, 102, and 103A. Nursing 104B: Nursing 104A and concurrent registration in Nursing 103B, 130, and 131.

Clinical experience focusing on the utilization of mental health concepts in meeting needs of patients.

105. Adult Health Nursing (4) I, II

Prerequisites: Nursing 130 and concurrent registration in Nursing 106, 132, and 133. The analysis of the health-illness needs of the adult and the nursing therapies necessary for the promotion of optimum health.

106. Adult Health Nursing Experience (4) I, II

Twelve hours of laboratory

Prerequisites: Concurrent registration in Nursing 105, 132, and 133.

Clinical experience in recognizing and meeting the health needs of the adult patient in a variety of settings.

116. The Professional Role (3) I, II

Prerequisite: Concurrent registration in Nursing 136 and 137.

Development of the nursing profession in Western Civilization. Focus on the multifaceted role of the professional nurse in modern social order.

130. Child Health Nursing (3) I, II

Prerequisites: Nursing 101 and concurrent registration in Nursing 103B, 104B, and 131. Nursing care needs of the well and the sick child from birth through adolescence.

131. Child Health Nursing Experience (4) I, II

Twelve hours of laboratory.

Prerequisites: Concurrent registration in Nursing 103B, 104B, and 130.

Clinical experience focusing on the growth, developmental and health needs of the child in a variety of settings.

132. Community Health Nursing (3) I, II

Prerequisites: Microbiology 118 and concurrent registration in Nursing 105, 106, and 133. Principles and concepts of community health necessary to maintain the health of individuals, families, and groups.

133. Community Health Experience (3) I, II

Nine hours of laboratory.

Prerequisites: Concurrent registration in Nursing 105, 106, and 132.

Clinical experience, in conjunction with community agencies, directed toward attaining and maintaining the health of the total population. 136. Management of Patient Care (2) I, II

Prerequisites: Nursing 132 and concurrent registration in Nursing 116 and 137 Principles of administration applied to the management and direction of the nursing team.

Focus directed toward the development of the professional nurse in assuming a leadership

137. Management of Patient Care Experience (3) I, II

Nine hours of laboratory

Prerequisites: Nursing 133 and concurrent registration in Nursing 116 and 136. Clinical experience in utilizing tools and skills of management in assessing, providing, and directing health care.

150. Rehabilitation Nursing (4) Irregular Two lectures and six hours of laboratory.

Prerequisite: Nursing 105.

Theory and selected practice in the care of the patient for whom a planned rehabilitation program is essential. The nurse's role as a health team member.

151. Advanced Concepts in Clinical Nursing (4) Irregular

Two lectures and six hours of laboratory.

Prerequisite: Nursing 105

Theory and selected practice in the care of the patient with complex problems requiring intensive care, coronary care and/or rehabilitation.

152. Advanced Psychiatric and Mental Health Nursing (4) Irregular

Two lectures and six hours of laboratory. Prerequisites: Nursing 103A-103B and 132.

Theory of and directed experience in the treatment and rehabilitation of patients with emotional and psychiatric disorders. Focus on the role of the nurse as a member of the mental health team in a variety of community settings.

153. Geriatric Nursing (4) Irregular

Two lectures and six hours of laboratory.

Prerequisites: Nursing 105 and 132.

Principles of gerontology as they apply to the nursing care of the older patient in a variety of settings.

154. Advanced Maternal-Neonatal Nursing (4) Irregular

Two lectures and six hours of laboratory.

Prerequisites: Nursing 102 and 132.

Theory of and experience in the care of the high-risk maternity patient and the high-risk neonate with emphasis on the needs of the family.

155. Cancer Nursing (4) Irregular Two lectures and six hours of laboratory.

Theory and selected experience in the care of the cancer patient. Scope of cancer problem, pathological processes of maligancies, current medical therapies and appropriate nursing intervention are included.

160. School Nursing (3) Extension

The application of health principles and current best practices in schools with emphasis on the functions of the school nurse related to the school, home, and community.

166. Honors Course (1-3) I, II

Refer to Honors Program.

175. Nursing in School Health Services (2) Irregular

Prerequisite: Concurrent registration in Nursing 176.

The philosophy of school health, the functions and responsibilities of the school nurse in planning, organizing and implementing a program of school health services. 176. Practicum in School Health Nursing Services (4) Irregular

Twelve hours of laboratory.

Prerequisite: Concurrent registration in Nursing 175. Supervised field practice and experience in public school nursing.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor.

# Oceanography Administered by the Dean of the College of Sciences

California State University, San Diego provides preparation for work in the oceans by offering degree programs in fundamental fields supplemented by marine-related course work and oceanographic experience. Interdisciplinary instructional and research activities are coordinated by a Bureau of Marine Sciences. Ocean-oriented courses and Bachelor's degree programs are available in the Departments of: Biology, Botany, Chemistry, Civil and Merkerical Engineering, Geography, Geology, Microbiology, Physical Sciences, Physical S Mechanical Engineering, Geography, Geology, Microbiology, Physical Sciences, Physics and

1091-5 10 440

# 310 / Philosophy

Zoology. Master's degree with emphasis on marine problems may be earned in these departments and in the School of Business Administration. The Ph.D. degree is offered in Chemistry, Ecology and Genetics jointly with the University of California.

Prerequisites: One introductory college course in a life science and one in a physical science

Biological and physical aspects of the oceans and their significance to man; problems of modern oceanography. 196. Practical Oceanography (6) I, II

Laboratory, field work, or on-the-job training by arrangement. Prerequisites: Chemistry 1A-1B, Physics 2A-2B, 3A-3B, a course in intermediate college algebra, and an elementary course in statistics. Recommended: a course in analytical chemistry (Chemistry 4 or 5).

Practical experience in oceanography at shore installations and at sea. An intensive full-time program in the laboratory and field aspects of the marine sciences. Students are expected to participate on extended cruises at sea and are advised not to enroll for other courses nor to make employment commitments during the semester.

For additional courses in Oceanography see Biology 113. Biological Oceanography. Chemistry 180. Chemical Oceanography Geology 140. Marine Geology Microbiology 116. Marine Microbiology Physical Science 110. Physical Oceanography Zoology 150. Marine Biology

# Philosophy In the College of Arts and Letters

### Faculty

Emeritus: Mendenhall

Professors: Crawford, P., Howard, R., McClurg, Nelson, S., O'Reilly, Ruja, Shields, Snyder, Warren, E. W., Weissman Associate Professors: Carella, Koppelman (Chairman), Lauer

Assistant Professors: Feenberg, Rosenstein, Troxell Lecturers: Epstein, Groves

Offered by the Department

Master of Arts degree in philosophy. Major in philosophy with the A.B. degree in liberal arts and sciences. Minor in philosophy.

# Philosophy Major

# With the A.B. Degree in Liberal Arts and Sciences

requirements listed on page 57 of this catalog.

All candidates for a degree in liberal arts and sciences must complete the graduation A minor is not required with this major.

Preparation for the major. Nine lower division units in philosophy.

Major. A minimum of 24 upper division units in philosophy. Six units from Philosophy 101, 102, 103, 104, and 175; and six units from Philosophy 121, 122, 123, 125, and 128 are

# Philosophy Minor

The minor consists of a minimum of 15 units in philosophy, nine of which must be upper division. Philosophy 101 is recommended.

### Lower Division Courses

1A-1B. Introduction to Philosophy (3-3) L II

Prerequisite: Philosophy 1A, or consent of instructor, is prerequisite to 1B. The place of philosophy in intelligent living. The methods, areas, and significance of philosophical inquiry. Each student is encouraged to think independently and formulate his own tentative conclusions. In Philosophy 1A, emphasis is placed upon problems of value. In Philosophy 1B, emphasis is placed on problems of knowledge and reality.

### Philosophy / 311

### 20. Logic (3) I, II

Introduction to deductive and inductive logic. Logic and language. Analysis of fallacies. Uses of logic in science and in daily life.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

### **Upper Division Courses**

101. History of Philosophy I (3) I, II Prerequisite: Six units of philosophy. Thales through Marcus Aurelius. 102. History of Philosophy II (3) I, II Prerequisite: Philosophy 101. Plotinus through William of Occam. 103. History of Philosophy III (3) I, II Prerequisite: Philosophy 101. Nicholas of Cusa through Kant. 104. History of Philosophy IV (3) I Prerequisite: Philosophy 103. Fichte through Royce. 105A-105B. Twentieth Century Philosophy (3-3) Prerequisite: Philosophy 1B. Historical treatment of major philosophical issues, movements, and figures in American

and European philosophy. First Semester: emphasis on Great Britain and the United States; second semester: emphasis on continental Europe. 108. Recent Existentialism (3) I

Prerequisite: Six units of philosophy.

The philosophical aspects of Existentialism. Major emphasis is on the diversity of thought within a common approach as this is shown in individual thinkers.

109. Ordinary Language Analysis (3) II

Prerequisite: Six units of philosophy.

The application of linguistic analysis to basic philosophical problems.

110. Philosophy of Law (3) I Prerequisite: Philosophy 1A, 1B or 20, and three units of Political Science.

The nature of law and the logic of legal reasoning. An exploration of certain key legal concepts such as causation, responsibility, personality, and property.

112. Political Philosophy (3) II

Prerequisite: Philosophy 1A.

Selected aspects of the political structures within which we live, such as law, power, sovereignty, justice, liberty, welfare.

121. Deductive Logic (3) I

Prerequisites: Philosophy 20 or Mathematics 60.

Principles of inference for symbolic deductive systems; connectives, quantifiers, relations and sets. Interpretations of deductive systems in mathematics, science, and ordinary language. Not open to students with credit in Mathematics 155.

122. Inductive Logic (3) II Prerequisite: Philosophy 20.

Definition, classification, and division. The logic of experimentation and statistics. Formation and validation of hypotheses. Probability theories.

123. Theory of Knowledge (3) I

Prerequisite: Philosophy 1B.

The major theories of human knowledge: mysticism, rationalism, empiricism, pragmatism.

125. Metaphysics (3) II Prerequisite: Philosophy 1B.

Prominent theories of reality, e.g., realism and nominalism, materialism and idealism, teleology and determinism.

127. Values and Social Science (3) II

Prerequisite: Six units of philosophy.

Analysis and discussion of the nature of values and value-judgment with particular reference to the social sciences. Among relevant issues: the naturalistic fallacy, facts and values; authoritarianism, emotivism, objective relativism; the individual and the community.

Philosophy / 313

# 312 / Philosophy

128. Theory of Ethics (3)

Prerequisite: Six units of Philosophy. Significant and typical value theories and systems and the concrete problems such theories seek to explain. The emphasis will be placed on moral values.

129. Social Ethics (3)

Prerequisite: Philosophy 1A. Ethical issues of contemporary life. Individualism vs. collectivism; democracy vs. dictatorship; ethical problems arising in law, medicine, business, government, and interpersonal relationships.

131. Philosophy of Language (3) II

Prerequisite: Six units of philosophy.

An introduction to theories of meaning for natural languages and formal systems; concepts of truth, synonymy and analyticity; related epistemological and ontological problems.

132. Philosophy of History (3) I

Prerequisite: Six units of philosophy. The nature of history and historical inquiry. As metaphysics: a study of theories of historical development. As methodology: history as science, truth and fact in history, historical objectivity, the purpose of history.

133. Philosophy of Education (3) II Prerequisite: Philosophy 1B.

Various philosophical viewpoints concerning education. The functions of education as conceived by major figures in the western philosophical tradition.

134. Philosophy of Literature (3)

Prerequisite: Six units of philosophy. Study of literature of philosophical significance, and of philosophical problems of literature.

135. Philosophy of Religion (3) I, II

Prerequisite: Six units of philosophy.

The philosophical significance of major themes in religious thought. The role of myth and the nature of religious language.

136. Jewish Philosophy (3)

Prerequisite: Three units of philosophy.

Outstanding men and movements, e.g., Biblical ethics and law, Philo of Alexandria, the rabbinical tradition, the Kabbala, Moses ben Manimon, Moses Mendelssohn, and Martin Buber.

137. Philosophy of Science (3) I

Prerequisite: Six units of philosophy.

The basic concepts and methods underlying contemporary scientific thought. Contributions of the special sciences to a view of the universe as a whole.

141. History of Aesthetics (3) I

Prerequisite: Philosophy 1A.

Major documents in the history of aesthetics.

142. Philosophy of Art (3) II

Prerequisite: Six units of Philosophy. The nature of aesthetic experience. Principal contemporary theories of art in relation to actual artistic production and to the function of art in society.

164. American Philosophy (3)

Prerequisite: Six units of philosophy.

A systematic and critical study of the work of American philosophers from the Puritans through the Pragmatists. Major emphasis is placed upon Peirce. James, Royce, Santayana, Dewey, and Whitehead.

166. Honors Course (1-3) I, II

Refer to Honors Program

175. A Major Philosopher (3) I, II Prerequisite: Philosophy 101.

The writings of one major philosopher. May be repeated with new content for additional credit. Maximum credit six units applicable to the major. Maximum credit six units applicable on a master's degree.

195. Selected Topics (3) I, II

Prerequisite: Six units of philosophy.

A critical analysis of a major problem or movement in philosophy. May be repeated for credit with different content. Maximum credit six units applicable toward the major in philosophy. Maximum credit six units for both 195 and 295 applicable on a master's degree.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit. Prerequisites: Twelve upper division units in Philosophy and consent of instructor.

### **Graduate Courses**

201. Seminar in Ancient Philosophy (3)

Prerequisite: Twelve upper division units in philosophy including Philosophy 101. Directed research in a major author (e.g., Plato or Aristotle), or a school (e.g., the Pythagoreans or the Stoics), or a problem (e.g., causation or the state). Maximum credit six

units applicable on a master's degree.

202. Seminar in Medieval Philosophy (3)

Prerequisite: Twelve upper division units in philosophy including Philosophy 102. Directed research in a major author (e.g., Augustine or Aquinas), or a school (e.g., neo-Aristotelianism), or a problem (e.g., political philosophy or reason and authority). Maximum credit six units applicable on a master's degree.

203. Seminar in Modern Philosophy (3)

Prerequisite: Twelve upper division units in philosophy including Philosophy 103. Directed research in a major author (e.g., Hume or Kant), or a school (e.g., the continental rationalists or the British empiricists), or a problem (e.g., the nature of substance). Maximum credit six units applicable on a master's degree.

205. Seminar in Contemporary Philosophy (3)

200. Seminar in Contemporary Philosophy (3) Prerequisite: Twelve upper division units in philosophy including Philosophy 105. Directed research in a major author (e.g., Dewey or Wittgenstein), or a school (e.g., the pragmatists or the language analysts), or a problem (e.g., perception or personhood). Maximum credit six units applicable on a master's degree.

# 211. Seminar in Legal Philosophy (3)

Prerequisite: Twelve upper division units in philosophy. Directed research in recurrent themes of philosophical significance in jurisprudential literature.

212. Seminar in Political Philosophy (3)

Prerequisite: Twelve upper division units in philosophy.

Directed research in a major problem in political philosophy or the work of a major political philosopher.

221. Seminar in Deductive Logic (3)

Prerequisites: Twelve upper division units in philosophy including Philosophy 121. A comparison of deductive systems in logic. Problems of definability, consistency, and completeness. The role of logic in the foundations of mathematics.

223. Seminar in Epistemology (3) Prerequisite: Twelve units of upper division work in philosophy. Basic problems concerning meaning, perception and knowledge.

225. Seminar in Metaphysics (3)

Prerequisite: Twelve units of upper division work in philosophy.

An inquiry into the search of significant qualities of reality.

Prerequisite: Twelve units of upper division work in philosophy. Contemporary ethical issues. Critical analysis of the works of some leading theorists, such as Moore, Dewey, Stevenson, and Toulmin.

231. Seminar in Semantics and Logical Theory (3)

231. Seminar in Semantics and Logical Theory (3) Prerequisites: Twelve upper division units in philosophy including Philosophy 121 and 131. Contemporary issues in the foundations of logic and theories of language.

235. Seminar in Philosophy of Religion (3)

Prerequisite: Twelve upper division units in philosophy including Philosophy 135. A philosophical investigation of the nature of religious thought: its structure, growth, and

significance.

236. Seminar in Philosophy of Art (3)

Prerequisite: Twelve units of upper division work in philosophy. An analysis, criticism, and comparative study of selected philosophies of art.

237. Seminar in Philosophy of Science (3)

Prerequisites: Twelve upper division units in philosophy including Philosophy 122 and 137. The methodology of the empirical sciences. The logical stucture of science.

295. Seminar in Selected Topics (3)

Prerequisite: Twelve units of upper division work in philosophy. Directed research in a major problem or movement in philosophy. Maximum credit six units applicable on a master's degree.

### 314 / Physical Education

298. Special Study (1-3)

Individual study. Maximum credit six units.

Prerequisites: Twelve units of upper division work in philosophy and consent of staff; to be arranged with department chairman and instructor.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degee.

# **Physical Education** In the College of Professional Studies

#### Faculty

Emeritus: Schwob, Shannon, Sportsman, Tollefsen

Professors: Andrus, Benton, Carter, Cullen, Fox, Governali, Kasch, Lockman, Murphy, Olsen, A. (Chairman), Olsen, L., Phillips, Schutte, Scott, Terry, Ziegenfuss

Associate Professors: Barone, Broadbent, Cave, Franz, Friedman, Selder, Sucec, Wells Assistant Professors: Bird, Gutowski, Hollyfield, Landis, Moore, Quinn, Smith, Whitby, Wilhelm, Williamson, Willis

Lecturers: Boyer, Iverson, Lamke, Zasueta

#### Offered by the Department

Master of Arts degree in physical education.

Major in physical education with the A.B. degree in applied arts and sciences. Teaching major in physical education with specialization in secondary teaching.

Minor in physical education.

Teaching minor in physical education with specialization in both elementary and secondary education.

Minor in dance.

# **Physical Education Major**

#### With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the requirements listed on page 57 of this catalog.

Students majoring in physical education must complete a minor in another field.

# Major for Men

Preparation for the major. Physical Education 8A, 9A, 10A, 12A, 29B, 52, 70, 71, 73; Zoology 8 (16 units). Students may be excused from skill courses by passing a competency test.

Major. A minimum of 29 upper division units to include Physical Education 162, 164, 167, 168, 169, 172, 174, 175, 176, 177. Recreation 140, and four to six elective units to be selected from the Athletics 180 series. Physical Education 151 or 179 may be substituted for one course of the Athletics 180 requirement.

### Major for Women

Preparation for the major. Physical Education 33A-33B, 34A-34B, 52, 56A-56B, one unit of physical education activity elective; Zoology 8 (13 units).

Major. Twenty-seven upper division units to include Physical Education 151 or 154, 155 or 156, 160, 167, 168, and 12 units from health education and/or physical education courses selected with approval of the department adviser.

# **Emphasis in Dance**

50A, 50B, 61, Music 10A, 35, 51, Speech Communication 11A, Drama 5, 8, 30, 31, and 50. (28 units.)

Major. A minimum of 24 upper division units to include three to four units from Physical Education 151 or 153A, 154, 157A, 181, 182A, 182B, 183, 184, and two units of upper division electives to be selected with the approval of the dance adviser. In addition to course requirements, the student must be a member of the Dance-Theatre Group and must participate in a minimum of four semesters of dance programs preferably in the junior and senior years. Substitution for such participation will require departmental approval. (The physical education major with an emphasis in dance does not meet the credential pattern for education.)

# **Physical Education Minor**

The minor, planned in consultation with an adviser, consists of a minimum of 15 units in physical education, nine of which must be upper division.

#### Dance Minor

The minor in dance consists of Physical Education 33A-33B, 34A-34B, 48A-48B, 81, 82; two units selected from Physical Education 153A or 184, 181, 182A, and 182B; and 3 upper division units to be selected from the areas of art, music, drama, and others, with the approval of the adviser in dance. (23 units.)

# Physical Education Major

# For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major may be used by students in Teacher Education as an undergraduate major for the A.B. degree in applied arts and sciences.

### Specialization in Secondary Teaching Major for Men

Requirements are the same as the requirements for the A.B. degree in applied arts and sciences as outlined above. In addition, students must complete, in their postgraduate year, a minimum of six units of 200-numbered courses approved by the department adviser.

### Major for Women

Candidates for a teaching major for women must in addition to the basic requirements, (a) select the generalist program or (b) select two areas of concentration. Courses may be used to satisfy requirements in more than one concentration.

# **Basic Requirements for All Students**

Preparation for the major. Physical Education 11A, 29B, 32A, 33A, 34A, 47A, 55A-55B, 56A or 56B, Zoology 8 (13 units).

Major. A minimum of 30 upper division units to include Biology 140, Physical Education 160, 162, 167, 168 (15 units).

Postgraduate Year. Six units of 200-numbered courses approved by the department adviser.

### **Generalist Program**

Additional preparation for the major. Physical Education 7A, 33B, 34B, 52, 56A-56B (7

Major (continued). Physical Education 151, 152, 154, 155, 156, and 122 or 172 (17 units). units) Concentrations

### a) Team Sports

Additional preparation for the major. Physical Education 7A, 52, 57A or 57B, 58A or 58B, 1 unit intramural or extramural sport, and 1 unit of elective (7 units).

Major (continued). Physical Education 156; 9 units selected from 151, 152, 154, 155, 172, and 3 units electives (15 units).

# b) Individual Sports

Additional preparation for the major. Physical Education 7A, 16B, 17B, 18B, 19A or 19B, 20B, 22A or 22B, 52, and 1 unit of elective (10 units).

Major (continued). Physical Education 155; 9 units selected from 151, 152, 154, 156, 172, and 3 units of electives (15 units).

### e) Folk Dance

Additional preparation for the major. Physical Education 33B, 52 or 81, 82, and 2 units of electives (7 units).

Major (continued). Physical Education 151; 9 units selected from 152, 154, 155, 156, 172; and 3 units of electives.

# f) Modern Dance

Additional preparation for the major. Physical Education 34B, 39, 48A-48B, 81, 82 (8 units). Major (continued). Physical Education 154; 9 units selected from 151, 152, 155, 156, 172;

and 3 units 157A-157B, 183 (15 units). Postgraduate year. Six units of 200-numbered courses approved by the department adviser.

# Physical Education Minor

# For the Standard Teaching Credential

# Specialization in Elementary Teaching

Minor for men. The minor in physical education (men) for elementary teaching consists of not less than 20 units to include, in the lower division, Physical Education 53, 71, 73, and four units to be selected from physical education or recreation; and, in the upper division, Physical Education 175, 177, Health Science and Safety 146, Recreation 140, and two units to be selected from physical education or recreation.

Minor for women. The minor in physical education (women) for elementary teaching consists of not less than 26 units to include, in the lower division, Physical Education 1A, 7A-7B, 33A, 34A, 33B or 34B, 52, 56A, 56B, Recreation 70, and one unit elective; and in the upper division 12 units to include Physical Education 151 or 154, 152, 156, and 162.

# Specialization in Secondary Teaching

Minor for men. The minor in physical education (men) for secondary teaching consists of a minimum of 26 units to include, in the lower division, Physical Education 8A, 9A, 10A, 12A, 29B, 52, 71, and 73; and, in the upper division, Physical Education 174, 175, 176, 177, Recreation 140, Health Science and Safety 146, and two to three units to be selected from either Athletics 180 series, field experiences in intramurals, or recreation, or Physical Education 151.

Minor for women. The minor in physical education (women) for secondary teaching consists of a minimum of 25 units to include, in the lower division, Physical Education 1A, 7A-7B, 16A, 17A, 18A, 20A, 32A, 33A-33B, 34A-34B, 52, 56A-56B; and in the upper division; 9 units in physical education to include Physical Education 151 or 154, and 155 or 156; and three units of electives.

Coaching Emphasis. The minor in physical education with a coaching emphasis (men and women) for secondary teaching consists of 21 units to include, Physical Education 131; 4 units of 133; 161; 165; 1-3 units of 179; 4-6 units of Athletics 180 and/or 181; and 0-3 units of electives in physical education or other departments by prior approval of the designated coaching minor adviser. The units required for Physical Education 133 and Athletics 180 and/or 181 must be completed from two different sport areas.

# **Types of Activity Courses**

A health history record is required of each student entering college. Adapted physical education classes to care for special needs are offered. The content of the required courses is planned to give each student an opportunity to participate in many activities of carry-over value, developmental nature, and recreational interest. An opportunity is afforded students to participate in competitive sports in the extramural and intramural programs.

### Courses

Courses offered for one unit credit meet two hours per week or equivalent. "A" signifies a beginning class, "B" advanced.

# Lower Division Courses

1A-1B. Fundamental Skills (1-1) I, II 2A-2B. Conditioning (1-1) I, II 6A-6B. Team Sports (1-1) I, II 7A-7B. Gymnastics (1-1) I, II 8A-8B. Basketball (1-1) I, II 9A-9B. Soccer (1-1) I, II 10A-10B. Volleyball (1-1) I, II 11A-11B. Track and Field (1-1) I. II

12A-12B. Wrestling (1-1) I, II 16A-16B. Golf (1-1) I, II 17A-17B. Archery (1-1) I, II 18A-18B. Tennis (1-1) I, II 19A-19B. Bowling (1-1) I, II 20A-20B. Badminton (1-1) I, II 21A-21B. Handball (1-1) I, II 22A-22B. Fencing (1-1) I, II 24A-24B. Water Craft (1-1) I, II 29A-29B. Swimming (1-1) I, II 30A-30B. Synchronized Swimming (1-1) I, II 32A-32B. Ballroom Dancing (1-1) I, II 33A-33B. Folk and Square Dancing (1-1) I, II 34A-34B. Modern Dance (1-1) I, II

36A-36B. Selected Activities (1-1) I, II

May be repeated with new activity for additional credit. See class schedule for semester offerings.

38. Individual Adaptives (1) I, II

Prerequisite: Consent of instructor.

Individual exercise programs for those who are handicapped in some respect, or who have functional defects, or deficiencies amenable to improvement through exercise. May be repeated for credit.

39. Basic Ballet (1) I

40. Ballet for Gymnastics (1) II

### Men and Women

#### **Professional Theory Courses**

46. Rhythmic Gymnastics (1) I, II

Two hours of activity. Progressive skills in free exercise, use of hand apparatus, and tumbling for gymnastics teachers.

47A-47B. Professional Activities: Gymnastics (Women) (1-1) I, II

Two hours of activity.

Study and development of competencies, skills, and knowledges needed for teaching and coaching girls' and women's gymnastics.

48A-48B. Advanced Modern Dance (1-1) I, II

Two hours of activity.

Prerequisites: Physical Education 34A and 34B.

Skill techniques. Compositional factors and devices. Materials of design, rhythm and dynamics in group compositions. The use of percussion and various forms of accompaniment. Discussions, lectures and practice.

50. Life Saving (1) I, II

Three hours of activity

Standard American Red Cross course in life saving and water safety, designed to qualify superior swimmers for Senior Life Saving Certificate.

52. Introduction to Physical Education (2) I, II

History and principles of physical education and sports. Study of the objectives of modern physical education with a view towards the development of a basic philosophy and background for professional education. Required of all physical education majors without previous credit in an introductory physical education course.

53. Physical Education of Children (2) I, II

Four hours of activity.

Application of the principles of motor learning and muscular fitness to the elementary physical education activity program.

54. Advanced Skill Techniques in Dance (1) I, II

Two hours of activity.

Prerequisite: Consent of instructor.

Progressively difficult dance techniques using several creative approaches. Emphasis on motivation, body design, rhythm, and dynamics.

55A-55B. Professional Activities: Individual Sports (Women) (1-1) I, II

Two hours of activity. Individual sports golf, archery, and racket sports approached through a study of competencies, skills, and knowledge needed for teaching.

# 318 / Physical Education

56A-56B. Professional Activities: Team Sports (Women) (1-1) I, II Two hours of activity.

Team sports for women approached through a study of competencies, skills, and knowledge needed for teaching.

57A-57B. Officiating Women's Sports (1-1) I, II

Two hours of activity.

Prerequisite: Physical Education 56B.

Practice in officiating techniques in women's sports leading to official's ratings: Fall-volleyball, basketball, and hockey; Spring-softball, track and field, badminton and tennis

58A-58B. Advanced Professional Activities: Team Sports (Women) (1-1) I, II Two hours of activity.

Prerequisites: Physical Education 56A-56B

Team sports basketball, hockey, soccer, speedball, softball and volleyball, and track and field, for women approached through a more concentrated study of advanced skills and knowledge needed for teaching.

70. Orientation to Physical Education (Men) (1) I, II Orientation and guidance of major students in physical education. Course must be taken during the first semester of enrollment in the major at San Diego State (transfer major students included).

71. Gymnastics (Men) (2) I, II

Four hours of activity.

Competency development in gymnastics. Emphasis on skills, movements, rules, officiating, facilities, and organizational procedures in gymnastics.

73. Dance (Men) (2) I, II

Four hours of activity.

Competency development in dance. Emphasis on skills, movements, facilities, and organizational procedures in dance.

81. Introduction to Dance (2) I

Dance as an art form with emphasis on the development of contemporary trends; American dance personalities and their contribution. Required of all physical education majors with an emphasis in dance.

82. Rhythmic Analysis Related to Movement (2) II

Music as related to movement; notation and simple music forms applied to all movement activities; percussion accompaniment; writing of percussion scores; music repertoire for dance.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

122. Water Safety Instruction and Skill Analysis (2) II

Four hours of activity.

Prerequisites: Physical Education 29B and current American Red Cross Senior Life Saving Certificate.

Analysis of swimming skills. Qualification for American Red Cross Swimming Instruction Certificate.

123. Skin and Scuba Diving (2) I, II

Four hours of activity.

Prerequisites: Thesis or class project requiring underwater collection techniques or Physical Education 29B. Medical examination, waiver for hazardous procedures, passage of competency test in swimming.

Functional knowledge of underwater diving to include diving physiology, hyperbaris conditions, medical hazards, safety procedures associated with Scuba Diving and proper care and operation of equipment.

131. Physical Welfare of the Athlete (3) I, II

Two lectures and three hours of laboratory.

Prevention, diagnosis and treatment of athletic injuries; the use of ergogenic aids, nutrition; the conditioning program, including basic knowledge of appropriate parameters (flexibility, strength, endurance, and related areas.) Credit in this course may not be counted towards the Physical Education Major.

133. Theory and Analysis of Coaching Competitive Sports (2) I, II Prerequisite: Athletics 180 or 181.

Concentrated study to include mechanical analysis tactic, and strategy, scouting, officiating and rules, and daily-seasonal practice planning in one of the sports listed below. A. Basketball B. Football

C. Baseball

D. Track and Field (including Cross Country)

E. Women's Field Sports

F. Additional sports (offered on student demand)

151. Folk and Social Dance Skill Analysis (Men and Women) (3) I

Two lectures and two hours of activity.

Prerequisites: Physical Education 32A and 33B, or completion of folk and social dancing competencies tests.

Folk customs, festivals, and costumes. Selection of dance materials for various age groups. Analysis of teaching techniques.

152. Gymnastics Skill Analysis (Women) (3) I

Two lectures and two hours of activity. Prerequisites: Physical Education 7A or 46, and 47A, or completion of competencies tests

in gymnastics and related fields. Advanced materials in tumbling and gymnastics with emphasis on safety devices, spotting, etc. Analysis of teaching techniques and progressions.

153A-153B. Problems in Dance (2-2)

Prerequisite: Physical Education 48A.

Problems in ethnic or modern dance: history, anthropological basis, stagecraft, accompaniment, costuming.

154. Modern Dance Skill Analysis (Women) (3) II

Two lectures and two hours of activity.

Prerequisite: Physical Education 34B, or completion of competencies tests in modern dance.

Advanced skill techniques with emphasis on individual choreography. Selection of materials and course planning for the secondary schools. Class teaching experience. Brief survey of basic literature and current readings in the field.

155. Individual Sports Skill Analysis (Women) (3) II

Two lectures and two hours of activity

Prerequisites: Physical Education 55A and 55B, or completion of competencies tests in archery, badminton, golf, and tennis.

Individual playing techniques, knowledge, rules, and teaching methods in tennis. badminton, archery and golf. Designed for senior majors in physical education who are expected to demonstrate a high degree of competency in the sports indicated.

156. Team Sports Skill Analysis (Women) (3) I

Two lectures and two hours of activity

Prerequisites: Physical Education 56A or 58A and 56B or 58B, or completion of competencies tests in basketball, hockey, soccer, speedball, softball and volleyball, and track and field.

Skills, teaching techniques, officiating, and the organization of materials in team sports for women.

157A-157B. Choreography in Contemporary Dance (Men and Women) (3-3)

Two lectures and two hours of activity.

Prerequisite: Consent of instructor. Experimentation in dance, relating contemporary theories to other art forms.

Force and time-space relationships as factors of choreography. Semester I: Production

problems for large and small groups. Semester II: Production problems for trio3, duos, and solos.

160. Mechanics of Body Movement (Women) (3) II

Two lectures and two hours of activity.

Prerequisite: Physical Education 167.

Efficient use of the body in daily living; evaluation and classification of exercises, study of methods and practice in planning and presenting material.

161. The Psychological Bases of Physical Education (3) I, II

Prerequisite: Psychology 1.

Current issues, experimentation, problems and literature involved in the psychology of motor learning and motor performance.

### 320 / Physical Education

162. Measurement and Evaluation in Physical Education (3) I, II

Existing skills, tests, and other forms of evaluation used in physical education programs, including practical measuring and comparisons with norms, standards, etc. Closely related to required competencies tests for physical education majors with applications to use in teaching.

163. Physical Growth and Development (3) II

Principles of human growth; performance as affected by developmental levels and individual differences in structure and function.

164. Athletic Injuries (Sports Medicine) (2) I, II One lecture and three hours of laboratory.

Prerequisite: Physical Education 167.

Prevention and care of athletic injuries. Environment and hazards of sports. First aid. Use of prescribed modalities.

165. Administration of Interscholastic Sports and Extracurricular Activities (3) I, II Materials covering the organization and administration of activities such as interscholastic sports, drill teams, extracurricular clubs, special events and programs, cheer leaders, intramural and extramural activities.

166. Honors Course (1-3) I. II

Refer to Honors Program.

167. Applied Anatomy and Kinesiology (3) I, II

Prerequisite: Zoology 8.

Arthrology, syndesmology, and myology, with special emphasis on movement analysis. Muscle groups and their functional relationships. Application of simple mechanical principles to movement analysis.

168. Physiology of Exercise (3) I. II

Prerequisite: Zoology 8.

Effects of physical activities on the physiological functions of the body of school and community situations. Analysis and evaluation of actual problems. Written reports required. One lecture and three hours of laboratory

Prerequisites: Physical Education 167 and 168.

Adaptation of programs for the atypical individual, including physical examinations, training, and prescribed exercises, follow-up, instructional problems, and evaluation.

171. History and Philosophy of Physical Education (3) Irregular Review of the historical and philosophical bases for dance, exercise, games, and sports with emphasis on the United States.

172. Aquatics (2) I, II

Four hours of activity

Prerequisite: Physical Education 29B or demonstrated competency.

Emphasis on skills, movements, rules, officiating, facilities, and organizational procedures in aquatics.

174. Combatives (Men) (2) I. II

Four hours of activity

Prerequisite: Physical Education 12A or demonstrated competency.

Competency development in combatives. Review of skills, strategy, tactics, and emphasis on teaching and coaching procedures.

175. Team Sports (Men) (2) I, II

Four hours of activity

Prerequisites: Physical Education 8A, 9A, and 10A, or demonstrated competency. Competency development in team sports. Emphasis on skills, strategy, tactics, rules, officiating, facilities, and organizational procedures in selected team sports.

176. Individual Sports (Men) (3) I, II

Six hours of activity.

Competency development in archery, badminton, golf, handball, and tennis. Emphasis on skills, strategy, tactics, rules, officiating, facilities, and organizational procedures in individual sports.

177. Physical Fitness (Men) (1) I, II

Two hours of activity.

Prerequisite: A conditioning course in the required program, or demonstrated competency.

Skills, movements, facilities, and organizational procedures in physical fitness programs. History and current role in the curricula.

### 178. Workshop in Physical Education (1-2)

Methods, techniques and development of skills in such areas as aquatics, combatives, gymnastics, rhythms and dance, and individual and team sports. Designed for secondary school administrators, teachers, coaches, recreation and youth leaders. May be repeated for a total of six units. May not be used as part of the physical education major for either degree or teaching credential

179. Supervised Field Experience (1-3) I, II

Prerequisite: Consent of the instructor.

Supervised practical experience in the area of physical education. Experience for students in physical education coaching emphasis minor will be in the area of athletic coaching.

181. History and Philosophy of Dance (2) II

(Offered in alternate years)

The cultural background of all forms of dance in various civilizations with emphasis on the relationship of the social structure to the existing dance forms.

182A. Dance Composition (Preclassic Forms) (3) I

(Offered in alternate years)

Two lectures and two hours of activity

Prerequisites: Physical Education 54 and 82.

Compositions based on a study of preclassic dance forms as a contribution to form in contemporary dance. Study of the music of the period. Critical evaluation of group and individual compositions.

182B. Dance Composition (Modern Forms) (3) II

(Offered in alternate years)

Two lectures and two hours of activity.

Prerequisites: Physical Education 54 and 82.

Compositions related to contemporary art forms emphasizing the interaction of form and content in the creative idea. The temporal, spatial, dynamic, and dramatic elements of choreography.

183. Dance Production (3) II

Lecture-demonstration, recital, and concert forms of dance programs. Presentation and staging of original solo and group compositions.

184. Workshop in Dance (1-2) I, II Choreographic techniques and skills with visiting master teachers; written report or project. May be repeated to a total of four units.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of special study adviser.

**Graduate Courses** 

200. Seminar (3)

An intensive study in advanced physical education, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

201. Curriculum in Physical Education (3)

Prerequisite: Major or minor in physical education, or equivalent. Curricula in physical education. Special emphasis on curriculum construction and evaluation.

202. Administration of Physical Education in the Secondary Schools (3)

Prerequisite: Major or minor in physical education, or equivalent.

Topics include personnel problems, selection and maintenance of equipment and facilities, program organization and evaluation, budget, and related items.

203. History of Physical Education (3)

Historical forces guiding the development of physical education from ancient to modern times.

204. Problems in Recreation (3)

(Same course as Recreation 204.)

Current problems facing the recreation profession, through a review of literature, discussion of trends, and observation of school and community situations. Analysis and evaluation of actual problems. Written reports required.

205. Current Trends and Issues in Physical Education (3)

A critical appraisal of contemporary trends and issues.

Investigation and analysis of professional literature.

206. Seminar in Competitive Athletics (3) Prerequisite: Major or minor in physical education or recreation. Knowledge and appreciation of the skills, techniques, and teaching methods involved with the coaching of athletics; the study of possible solutions to problems associated with the program of competitive school athletics.

11-84215

1153-5 11 110

Physical Science / 323

### 322 / Physical Education

207. Advanced Kinesiology and Biomechanics (3)

Prerequisites: Zoology 8 and Physical Education 167.

Principles of mechanics applied to the analysis of human motion. Electromyography and cinematography as aids in analysis. Kinetic analysis of movement.

208. Advanced Physiology of Exercise (3) Prerequisites: Zoology 8, Physical Education 167 and 168. Advanced aspects of the physiology of exercise. Effects of exercise on human beings in relation to health, longevity, morphology, and performance.

209. Advanced Adapted Activities (3)

Prerequisites: Physical Education 167 and 169.

Postural divergencies, lack of physical development, physical handicaps, and special programs. Individual exercise programs. Preventive and corrective exercises. Functional examinations and the physician's report. Ethical procedures and limitations.

210. Seminar in Facilities for Physical Education (3)

Prerequisite: Major or minor in physical education or recreation.

Individual study of problems related to the planning, development and maintenance of physical education and athletics facilities.

211. Advanced Evaluation in Physical Education (3)

Prerequisite: Physical Education 162.

Methods, statistical techniques, and apparatus used in testing physical performance. Sources of error, limitations on application and interpretation. Practice in construction and use of tests.

213. Problems in Physical Education (3)

Prerequisite: Major or minor in physical education.

A study of selected areas of the physical education program.

214. Seminar in Dance Programs (3)

Prerequisite: Major or minor in dance or physical education.

Procedures and evaluation of all forms of educational dance with implications for curriculum planning. Lectures and research. Completion of written project.

215. Philosophical Foundations for Physical Education (3)

Major philosophies and their application in physical education.

220. Principles of Neuromuscular Tension (3)

Prerequisite: Physical Education 167.

Theories underlying the causes of muscular hypertension and the application of hypokinetic principles in daily living.

221. Exercise Electrocardiography (3)

Principles of resting and exercise electrocardiography with emphasis on ergometric methods and application to exercise physiology.

223. Advanced Exercise Physiology Laboratory (3)

Nine hours of laboratory. Prerequisites: Physical Education 169.

A laboratory course designed to develop competency in respiratory metabolism pulmonary function, gas analysis, blood chemistry and ergometry. Experience in the application of exercise procedures with human subjects and analysis and interpretation of results.

227. Fitness of Adults (3)

One lecture and six hours of laboratory.

Prerequisite: Physical Education 169.

Evaluation, exercise prescription, and training of adults. An understanding of the underlying hypokinetic diseases of adults and the procedures used in coping with the associated health problems of an automated environment.

261. Seminar in Motor Learning and Motor Performance (3)

Prerequisite: Physical Education 161.

A review of research in physical education and related fields plus experimental laboratory experiences in motor learning

291. Research Techniques (3)

Prerequisites: Major in Physical Education, and Physical Education 162.

Principles and methods of planning and carrying out the investigation of problems related to physical education. The development of research designs and practice in formulating and testing hypotheses as well as the interpretation of results. (Prerequisite to thesis.)

295. Seminar in Physical Education (3)

Prerequisites: Physical Education 291 and advancement to candidacy for the master's degree in physical education.

Selected subjects in physical education culminating in written projects. Limited to students following Plan B for the Master of Arts degree in Physical Education.

Professors: Dessel, Merzbacher, Shull (Chairman)

Associate Professors: Feher, Ingmanson, Metzger

Wallace

Offered by the Department

Master of Arts degree in physical sciences for teaching.

Teaching major in the physical sciences, with specialization in both elementary and secondary teaching. See "School of Education" in the catalog section Professional Schools: Courses and Curricula. See "School of Education" also for description of an interdepartmental major in physical sciences.

Minor in physical science.

### Physical Science Minor

The minor in physical science consists of a minimum of 15 units selected from astronomy, chemistry, geology, physical science and physics with the approval of the department adviser. Nine of the 15 units must be upper division, 6 of which must be taken in physical science.

#### Lower Division Courses

1. General Physical Science (4) I, II

Three lectures and three hours of laboratory.

Designed specifically to show why an understanding of science is essential for a complete liberal education. Topical emphasis varies with instructor. Satisfies general education requirements in physical science including laboratory. Not open to students with credit or concurrent registration in Physical Science 2A or 10A.

2A-2B. Principles of Physical Science (3-3) I, II Prerequisite: Physical Science 1 or 2A is prerequisite to 2B.

The nature of the physical universe with emphasis on the whole field of physical science rather than on its separate division. Not open to students with credit or concurrent enrollment in Physical Science 1 or 10A. Physical Science 2A may be taken with Physical Science 3 for laboratory credit in natural science.

3. Experimental Methods in Physical Science (1) I, II

Three hours of laboratory.

Prerequisite: Credit for or concurrent registration in Physical Science 1.

Methods in physical science as illustrated by the use of significant examples from the various disciplines. The technique of observation, measurement, and discovery of relationships. Fulfills the general education laboratory requirement in the natural science area

10A-10B. Structure and Concepts of Physical Science (4-4) I, II

Three lectures and three hours of laboratory.

Physical Science 10A is prerequisite to 10B.

Emphasis on processes of inquiry which are characteristic of physical science. Approach is suited for people interested in science instruction at the elementary level. Not open to students with credit or concurrent registration in Physical Science 1 or 2A.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements. Liberal Arts and Sciences

Prerequisite: Consent of special study adviser. Individual study. Six units maximum credit. 299. Thesis (3) Prerequisites: An officially appointed thesis committee and advancement to candidacy.

298. Special Study (1-3)

**Physical Science** 

Preparation of a project or thesis for the master's degree.

# In the College of Sciences

**Emeritus: Watson** 

Assistant Professors: Dowler, Jackson, May, Phleger, Shideler, Springer, Thompson,

# 324 / Physical Science

# **Upper Division Courses**

110. Physical Oceanography (3) I, II

Prerequisites: Chemistry 1A, Mathematics 40, Physics 1A or 2A. History and structure of the ocean basins; geochemistry and origins of sea water; dynamics of ocean currents, waves and tides, heat budget of the oceans.

120. Physical Science for Elementary Teachers (3) I, II, S

An integrated study of the physical sciences for teachers in order to provide a broad background of information, a consideration of current developments, and an opportunity for individualized work. Enrollment limited to those in training for or engaged in teaching in the elementary schools.

130. Modern Physical Science (3) I, II

Recent and current developments in the physical sciences. Discussions concerning such phenomena as radioactivity, cosmic rays, nuclear energy, tracer techniques, radio telescopy, supergalaxies. Not open for credit to physics majors.

135A-135B. IPS Physical Science (3-3) I, II

Two lectures and three hours of laboratory.

Prerequisites: Introductory course work in astronomy, geology, physical science or physics, and chemistry. Physical Science 135A is prerequisite to 135B. Principles of physical science as presented in national curriculum study courses, particularly the IPS program of the Physical Science Study Committee.

140S. Contemporary Problems in Physical Science (1) S

A series of six weekly lectures on varied aspects of physical science. Reading and reports required of students enrolled for credit. May be repeated to a total of three units. These lectures are open to the public.

141. Electronics for Scientists (3) I, II, S

Two lectures and three hours of laboratory.

Primarily for science majors.

Electronic instrumentation used in the sciences; uses and limitations.

142. History of Science I (3) I, II

Prerequisites: completion of minimum general education requirements in science and six units of history.

The growth and development of science from antiquity to the 15th century. Emphasis on man's cognitive reactions to his environment through the coalescence of the occult arts, empirical practices, and rational thought associated with early scientific theory.

143. History of Science II (3) I, II

Prerequisite: Physical Science 142.

The major developments during the 16th through 19th centuries: the scientific revolution, the rise of empiricism, the emerging role of scientific societies. Histories of particular theories in both the life sciences and physical sciences.

150. Readings in Physical Science (3) I

Reading of selected materials with informal class discussion of topics. Emphasis on the historical background, the philosophical implications, and the impact of science on thought and culture.

# 160. The Development of Scientific Thought (3) I, II

Prerequisites: Six units from astronomy, chemistry, geology, physical science, or physics; and Mathematics 21 or equivalent.

Basic scientific concepts and their historical development with emphasis on the problem of theory construction. The relationship between disciplined imagination and observational fact, as illustrated by selected case histories. Limitations of scientific inquiry.

169. Interpretation of Quantum Mechanics (3) I, II

Identity, causality, questions of reality; the uncertainty principle. Especially intended for upper division students in the humanities who are curious about modern science.

196. Advanced Physical Science (1-3) I, II

Prerequisite: Consent of instructor.

Selected topics in classical and modern physical science. May be repeated for additional credit with new subject matter for a total of six units. 199. Special Study (1-3) I, II

Prerequisite: Consent of instructor.

Individual study or laboratory work on a special problem in physical science selected by the student. Maximum credit six units.

#### **Graduate Courses**

200. Seminar (2 or 3)

An intensive study in advanced physical science, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

Prerequisite: Undergraduate major or minor in one of the physical sciences.

Selected topics in classical and modern physical science. Topics covered in a particular semester to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

298. Special Study (1-3)

Individual study. Six units maximum credit.

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. 299. Thesis or Project (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a thesis or project in one of the physical sciences for the master's degree.

# Physics

### In the College of Sciences

Faculty

Emeritus: Kalbfell, Moe, Terhune

Professors: Clark, O., Garrison, J., Morris, R., Skolil, Smith, L., Snodgrass, Teasdale, Templin (Chairman), Wolf, Wolter

Associate Professors: Cottrell, D., Lilly, Nichols, P. F., Piserchio, Rehfuss, Roeder Assistant Professor: Burnett

#### Offered by the Department

Master of Arts degree in physics.

Master of Science degree in physics.

Master of Science degree in radiological physics.

Major in physics with the A.B. degree in liberal arts and sciences.

Major in physics with the B.S. degree in applied arts and sciences.

Major in chemical physics with the B.S. degree in applied arts and sciences.

Teaching major in physics with specialization in both elementary and secondary teaching. Minor in physics.

Teaching minor in physics with specialization in both elementary and secondary teaching.

### Physics Major

# With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the requirements listed on page 57 of this catalog.

To meet the foreign language requirement for graduation, students should choose French. German, or Russian.

A minor in mathematics is required. It should include Mathematics 50, 51, 52, 118A-118B. and three units from Mathematics 121A, 150A, or 175. Mathematics 104 is acceptable for students preparing for elementary or secondary teaching. Students planning graduate work in physics should take additional mathematics beyond these listed.

Preparation for the major. Chemistry 1A-1B or 10A-10B; Physics 4A-4B-4C or 50-50B, and 73. (25 units.)

Major. Twenty-four upper division units in physics to include Physics 100A-100B, 102A-102B, 120A-120B, and 170. The students should choose the remaining units with the guidance of the departmental adviser. For preparation for graduate work in physics, the student should choose from Physics 106, 114, 151, 175, 180, 186, 190, 196, 198A, and 198B.

# **Physics Major**

# With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Chemistry 1A-1B or 10A-10B; Mathematics 50, 51, and 52; Physics 4A-4B-4C or 50A-50B, and 73.

Major. Thirty-six upper division units in physics and mathematics to include Mathematics 118A-118B, Physics 100A-100B, 102A-102B, 120A-120B, 170, and 198A-198B. Courses are to be selected in consultation with the departmental adviser. Concentrations in the areas of applied physics, physical electronics, nuclear physics, optics, and teacher education are available in this degree.

#### Physics / 325

# 326 / Physics

# **Chemical Physics Major**

# With the B.S. Degree in Applied Arts and Sciences

Preparation for the major. Chemistry 1A-1B or 10A-10B, 5, and 12; Mathematics 50, 51, and 52; Physics 4A-4B-4C or 50A-50B (43 units)

Major. Thirty-nine upper division units to include Chemistry 110A-110B, 112, and 127A; Chemistry 111 or 155; Mathematics 118A or 118B; Physics 100A-100B, 102A-102B, and 190; Physics 120A or 120B.

# **Physics Minor**

The minor consists of a minimum of 15 units in physics, six of which must be upper division.

# Physics Major

# For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

The major in physics for elementary or secondary teaching is the same as the major for the A.B. in liberal arts and sciences or for the B.S. in applied arts and sciences, except that for secondary teaching the student must take six units of physics in addition in his postgraduate year. All courses in the teaching major must be approved by the adviser in physics for teaching programs.

### **Physics Minor**

# For the Standard Teaching Credential

The minor in physics for elementary or secondary teaching consists of 20 units in physics, six of which must be upper division. However, if the major for secondary teaching is not an academic major, 12 upper division units in physics must be taken.

Maximum credit 12 units for any combination of Physics 1A-1B, 2A-2B, 3A-3B, 5, and 50A-50B.

# Lower Division Courses

1A-1B. Elementary Physics (4-4) I, II

Two lectures, one discussion and three hours of laboratory.

Prerequisites: Two years of high school mathematics. Physics 1A is prerequisite to 1B. Not open to students who have had high school physics.

This course is for students in those liberal arts and preprofessional courses not requiring physics with calculus. Physics 1A is not open to students with credit in 2A; 1B not open to students with credit in 2A; 1B not open to students with credit in 2B.

2A-2B. General Physics (3-3) I, II

Prerequisites: Completion of high school physics. Physics 2A is prerequisite to 2B. Recommended: Concurrent registration in Physics 2A and 3A and in Physics 2B and 3B.

This course is for students in those liberal arts and preprofessional courses not requiring physics with calculus. Physics 2A is not open to students with credit in 1A; 2B not open to students with credit in 1B.

3A-3B. Physical Measurements (1-1) I, II

Three hours of laboratory

Prerequisite for 3A: Credit or concurrent registration in Physics 2A.

Prerequisite for 3B: Physics 3A and credit or concurrent registration in Physics 2B.

A laboratory course to accompany Physics 2A-2B. 3A: properties of matter, mechanics, heat and sound. 3B: electricity, magnetism, and light.

4A-4B-4C. Principles of Physics (4-4-4) I, II

Three hours of lecture and three hours of laboratory. Prerequisite for 4A: Completion of high school physics or equivalent, and credit or concurrent registration in Mathematics 50.

Prerequisites for 4B: Physics 4A with a grade of C or better and credit or concurrent registration in Mathematics 51.

Prerequisites for 4C: Physics 4B with a grade of C or better and credit or concurrent registration in Mathematics 52. Certain students may, with consent of the Department, substitute credit in Mathematics

22 for the indicated mathematics courses. This course is designed to give a thorough understanding of the fundamental principles

of physics in the areas of mechanics, wave motion, heat, electricity, and light.

### 5. Introductory Physics (4) I, II

Three lectures and three hours of laboratory.

Some of the more important phenomena and concepts in physics with practical illustrations and applications. Not open to students with credit for Physics 1A, 1B, 2A, 2B, 4A, 4B, or 4C.

11. Special Topics in Physics (1 or 2) I, II

Prerequisite: Credit or concurrent registration in Physics 1B or 2B or 4B, or credit in Physics 5

Individual study and laboratory work in the area of the student's major interest. Each student will be assigned a member of the staff who will supervise his work.

50A-50B. Principles of Physics (6-6) I, II

Five lectures and discussions and three hours of laboratory.

Prerequisite for 50A: High school physics, or Physics 1A-1B or 2A-2B; credit or concurrent registration in Mathematics 51. Not open to students with credit in Physics 4A.

Prerequisite for 50B: Physics 50A with a grade of C or better, and credit or concurrent registration in Mathematics 52.

Mechanics, wave motion, heat, electricity, optics, and atomic and nuclear physics. The calculus will be used.

73. Introductory Electronics (3) I, II

Prerequisites: Physics 4B, 50B, or 1B; or 2B and 3B; a working knowledge of the calculus. A qualitative study of electron tubes and electronic systems. Not open to students with credit in Physics 103.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

## **Upper Division Courses**

100A-100B. Classical Physics (3-3) I, II

Prerequisites: Physics 4C or 50B, and credit or concurrent registration in Mathematics 118A. Physics 100A is prerequisite to 100B.

Semester I: Newtonian mechanics and wave motion. Semester II: Electrostatics and magnetostatics.

102A-102B. Modern Physics (3-3) I, II

Prerequisite: Physics 4C or 50B. Physics 102A is prerequisite to 102B.

Semester I: atomic and molecular physics, solid state physics, atomic spectroscopy, and introductory quantum mechanics. Semester II: kinetic theory, classical and quantum statistics, and thermal radiation.

103. Basic Electronics (3) I, II

Prerequisites: Physics 4B or 50B or 1B, or 2B and 3B, and a working knowledge of the

A qualitative study of electron tubes and electronic systems. Not open to students with calculus. credit in Physics 73.

Prerequisites: Physics 4C or 50B or 1B, or Physics 2B and 3B, and a working knowledge

Reflection, refraction, dispersion, interference, diffraction, double refraction and of the calculus. polarization, with applications to optical instruments, wave propagation, radiation, spectra and the nature of light.

107. Optical Design (3) Prerequisite: Physics 4C or 50B.

Ray tracing, aberrations, matrix methods, optical instrumentation.

110. Electricity and Magnetism (3) I, II Prerequisites: Physics 4C or 50B; and credit or concurrent registration in Mathematics

118A, and in Physics 73 or 103. Analysis of direct and alternating current circuits using the operator "j" and circuit theorems; introduction to coupled circuits, resonance and transients. Electrostatics; dielectrics and conductors. Chemical, photo, and thermal effects. Electromagnetism, and

magnetic properties. 111. Concepts is in Modern Physics (3) I, II

Prerequisite: Physics 1B, 2B, or 5. Modern developments in physics for non-physics majors, including relativity, introductory quantum theory, and atomic nuclear and solid state physics.

# 328 / Physics

114. Acoustics (3) I

Prerequisites: Physics 73 and 100B.

Wave motion and its application to the production, transmission and reception of sound. Development of acoustic circuits using electro-acoustic analogs. 120A-120B. Advanced Physical Measurements (3-3) I, II

One lecture and six hours of laboratory.

Prerequisites: Physics 4C or 50B; and credit or concurrent registration in Physics 73 or Physics 103.

A year course stressing laboratory experiments and measurements chosen from all the major areas of physics. 121. Radiation Physics (3)

One lecture and six hours of laboratory. Prerequisites: Physics 1B, or 2B and 3B.

X-rays, radioactivity, interactions of radiations with matter, and methods of measurement. May not be used in the physics major.

122. Senior Physics Laboratory (2) I, II Six hours of laboratory.

Prerequisite: Physics 120B.

Advanced experimental measurements in the fields of classical and modern physics, in one of the following areas: acoustics, nuclear physics, heat and thermodynamics, advanced electronics, electricity and magnetism, microwaves, solid state physics, and analog computers. Combinations of two areas in one semester may be taken with consent of the instructor. May be repeated with new material to a maximum of four units.

130. Physics for Elementary Teachers (3) I

Basic concepts, methods, and materials of physics for the elementary school. Topics in classical and modern physics. Open only to elementary teachers and elementary teacher candidates. Not open to students with credit in Physics 4A-4B-4C or 50A-50B.

135A-135B. Physics for Teachers (4-4) Three lectures and discussions and three hours of laboratory.

Prerequisites: Physics 1B, or 2B and 3B.

A new approach to the study of major concepts of physics. Designed for those who plan to teach science. The course is based on materials prepared by national groups of teachers such as the Physical Science Study Committee and the Harvard Project Physics.

148. Nuclear Physics Laboratory (3) II

One lecture and six hours of laboratory.

Prerequisite: Physics 120B or 121.

Techniques and instrumentation for the detection, identification and measurement of the

properties of nuclear radiations and particles, and their use in the study of nuclear reactions. 151. Nuclear Physics (3) I, II

Prerequisite: Physics 190.

Nuclear phenomena, theory of the nucleus, cosmic rays, and high-energy reactions of particles. 155. Analog Computers (3) II

Prerequisites: Mathematics 118B; Physics 73 or 103.

Electronic integration and differentiation; solution of differential equations; multiplication, division and function generation; simulation of mechanical systems varying with time, solution of typical problems; auxiliary equipment, layout of large installations.

156. Digital Computers (3) I

Prerequisites: Mathematics 7 and 118B; Physics 73 or 103.

The binary number system; electronic and magnetic flip-flop circuits; memory devices; programming; complete computer systems. Auxiliary equipment for inserting information and reading out results rapidly. Typical applications and limitations.

160. Circuit Analysis (3) II

Prerequisite: Physics 73 or 103.

Filter design, transmission lines, and network analysis.

163. Electronics Laboratory (2) I

Six hours of laboratory

Prerequisites: Physics 120B and credit or concurrent registration in Physics 173A. Transistor characteristics, cathode ray oscillograph. One stage RC amplifier. One stage and multistage amplifiers including feedback. Equivalent circuits.

166. Honors Course (1-3) I, II

Refer to Honors Program.

167A. Semiconductor Devices (3) I

Prerequisite: Physics 73 or 103.

Semiconductor physics, diode and transistor mechanisms, equivalent circuits and applications, thermal stability, switching theory and applications.

167B. Semiconductor Devices (3) II

Prerequisites: Physics 102A and 167A.

Field effect devices, semiconductor lasers and photo detectors, four layer devices including SCR's, tunnel diodes, varactors and other microwave devices, thermoelectricity, Hall effect.

170. Electromagnetic Theory (3) I, II Prerequisites: Mathematics 118B and Physics 100B and 102B.

Electrostatics and magnetostatics treated by vector methods; Maxwell's equations. Electromagnetic induction, radiation and wave propagation.

173A. Physical Electronics (3) I

Prerequisites: Mathematics 118B and Physics 100B and 102B.

Conductors, Fermi model, thermionic, photoelectric, and field emission, contact potentials, space charge. Semiconductors, linear equivalent, circuits, elements of frequency and time domain analysis, linear feedback circuits.

173B. Physical Electronics (3) II

Prerequisites: Physics 160 and 173A, each with a minimum grade of C and credit or concurrent registration in Physics 163.

Field approach to transmission lines, coaxial cables, wave guides, resonant cavities, stub matching, radiation and antenna phenomena, interaction of fields and electronic beams and power extraction from fields.

175. Advanced Mechanics (3) I Prerequisites: Mathematics 118B and Physics 100B.

Special theory of relativity, generalized coordinates, Lagrangian and Hamiltonian formulations, normal coordinates, theory of vibrations, and introduction to continuum mechanics.

180. Solid State Physics (3) II

Prerequisites: Mathematics 118B and Physics 100B and 102B.

Elastic, thermal, electric, magnetic and optical properties of solids. Introduction to the energy band theory of solids, with applications to dielectrics, semi-conductors, and metals.

186. Modern Optics (3) I

Prerequisites: Mathematics 118B, Physics 100B and 102B. Optics of solids, coherence and partial coherence theory, Fourier optics, holography.

187. Modern Optics Laboratory (2) I, II

Six hours of laboratory.

Prerequisite: Credit or concurrent registration in Physics 186. Experiments in various fields of modern optics such as holography, Fourier spectroscopy, spatial filtering, non-linear effects, and coherence measurements.

190. Introductory Quantum Mechanics (3) I, II Prerequisites: Mathematics 118B, Physics 100B and 102B. The physical basis of the quantum theory and its mathematical formulation in terms of

Schroedinger's wave equation. 196. Advanced Physics (2 or 3)

Selected topics in classical and modern physics. May be repeated with the approval of the instructor for a total of six units.

198A. Senior Research (1) I, II

One discussion period and two additional hours per week to be arranged. Prerequisite: Senior standing in physics and an acceptable plan for graduation within one

Selection and design of individual research project. Oral and written progress reports. vear

198B. Senior Research (2) I, II Two discussion periods and four additional hours per week to be arranged.

Prerequisite: Physics 198A with grade of C or better. Laboratory work, progress reports, oral and written final reports.

199. Special Study (1-3) I, II Individual study or laboratory work on a special problem in physics selected by the student. Each student will be assigned a member of the staff who will supervise his work. Credit, hours and topics to be arranged in each case. Six units maximum credit.

**Graduate** Courses

200. Seminar (2 or 3)

An intensive study in advanced physics, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

1190-5 11 295

### 330 / Physics

205. Theoretical Mechanics (3)

Prerequisite: Physics 175.

- Mechanics utilizing vector and tensor methods. Study of the motion of rigid bodies, vibration, coupled circuits. Lagrange's and Hamilton's equations. Principle of least action. 210A-210B. Mathematics of Physics (3-3)
- Prerequisites: Mathematics 118B; Physics 210A is prerequisite to Physics 210B.

Topics from matrix theory, vector and tensor analysis, orthogonal function theory, calculus of variations and probability theory with particular emphasis on applications to physical

214. Advanced Acoustics (2) Prerequisite: Physics 114.

The acoustic wave equation in two and three dimensions. Propagation of sound in bounded media and enclosures. Radiation and scattering. Electrical-mechanical-acoustical elements

219. Statistical Mechanics (3) Prerequisites: Physics 175 and 190.

Classical and quantum statistics, kinetic theory, low pressure phenomena, Boltzmann transport equation, irreversible processes. 220. Radiation Physics (2)

Prerequisite: Physics 148.

Topics in nuclear radiation phenomena, including interaction of radiation with matter; radiation detectors.

221. Radiological Physics (2) One lecture and three hours of laboratory. Prerequisites: Physics 148.

Topics and problems in radiological physics.

222. Health Physics (2)

One lecture and three hours of laboratory. Prerequisites: Physics 148.

Topics and problems in health physics.

232. Concepts in Relativity (2)

Prerequisites: Physics 135A and credit or concurrent registration in Physics 135B. The development of the concepts of relative motion from Einstein's assumptions and from experimental results. Designed for physics teachers.

248. Advanced Nuclear Physics Laboratory (3)

One lecture and six hours of laboratory.

Prerequisite: Physics 148.

Experimental work involving sub-critical reactor assembly, neutron generator, whole-body counter, etc. 251. Nuclear Physics (3)

Prerequisites: Physics 151, 175, and 190.

Theory of nuclear forces, nuclear reactions, interaction of radiation with matter, radioactivity, nuclear structure and high energy physics. 260. Advanced Electronics (3)

Prerequisite: Physics 173B.

Advanced topics in contemporary electronics. 270A-270B. Electromagnetic Theory (3-3)

Prerequisite: Physics 170. 270A is prerequisite to 270B.

Boundary value problems; time varying electric and magnetic fields; propagation of radiation; antennas, wave guides.

275A-275B. Quantum Mechanics (3-3)

Prerequisites: Physics 151, 175. 275A is prerequisite to 275B. Quantum theory of radiation, molecular and nuclear systems. Approximation methods.

280. Theory of the Solid State (3)

Prerequisites: Physics 175, 180, and 190.

The bank theory of solids, with applications to the electrical and optical properties of dielectrics, semi-conductors, and metals. 286. Advanced Optics (3)

Prerequisite: Physics 186.

Selected topics in advanced optics such as rigorous diffraction theory, optical spectra, lasers, non-linear optics, and applications of Fourier analysis to optical systems and information processing.

#### 297. Research (1-3)

Prerequisite: Consent of department chairman.

Research in one of the fields of physics. Maximum credit six units applicable on a master's degree.

298. Special Study (1-3) Individual study. Six units maximum credit.

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. 299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis in physics for the master's degree.

# **Political Science** In the College of Arts and Letters

#### Faculty Emeritus: Leiffer

Professors: Andrain (Chairman), Crain, Feierabend, Generales, Gripp, Janssen, Kahng, Miles, Padgett

Associate Professors: Byrne, Cutter, Hobbs, Johns, Lewin, Nesvold, Schultze, Terrell Assistant Professors: Anderson, Conniff, Funston, Keiser, Soule

# Offered by the Department

Master of Arts degree in political science. Major in political science with the A.B. degree in liberal arts and sciences.

Minor in political science. Teaching minor in political science with specialization in secondary teaching.

# Political Science Major

With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

Students majoring in political science must complete a minor in another field to be approved by the chairman of the major department.

Preparation for the major. Political Science 1, 2, 3, and three units of statistics.

Major. A minimum of 24 upper division units to include (a) three units in Political Science 128 or 197, and (b) 21 upper division units in political science distributed among at least four of the groups listed below, provided that at least three units shall be taken in Group

Group I, Research Methods. Courses numbered 100 to 104. Group II, Political Theory. Courses numbered 105 to 114. II.

Group III, Politics. Courses numbered 115 to 134.

- Group IV, Public Law. Courses numbered 135 to 139. Group V, International Relations. Courses numbered 165 to 179. Group VI, Comparative Government. Courses numbered 180 to 195.

# **Political Science Minor**

The minor consists of a minimum of 15 units of political science, to include Political Science 1, and 2 or 3, and nine upper division units.

# **Political Science Minor**

# For the Standard Teaching Credential

# Specialization in Secondary Teaching

The minor for secondary teaching consists of 20 units in political science, 14 of which must be in upper division courses chosen with the guidance of the departmental adviser.

# Lower Division Courses

# 1. Introduction to Political Science (3) I, II Basic concepts of political science including an introduction to the scope of the discipline and representative methods of acquiring political knowledge. Illustrative materials drawn

primarily from the American experience. Completion of both Political Science 1 and 2 will meet all requirements in American Institutions.

### Political Science / 331

# 332 / Political Science

2. Introduction to American Government and Politics (3) I, II

The origin and development, structure and operation of the government of the United States, national, state, and local.

Completion of both Political Science 1 and 2 will meet all requirements in American Institutions. Political Science 2 will meet the requirements in U.S. Constitution and California government.

3. Introduction to Comparative Government (3) I, II

Analytical models and techniques for examination of the problems of decision-making and control in various political systems. Emphasis on patterns of political action in various cultural contexts.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

### **Upper Division Courses**

Research Methods (Group I)

100A-100B. Research Methods in Political Science (3-3)

Prerequisite: Political Science 1, 2, and a three unit course in statistics. Political Science 100A is a prerequisite to Political Science 100B.

The research process, from research design through data processing, analysis and interpretation. Problems of application to election statistics, census data, roll-call records, sample survey data, and biographical information.

# Political Theory (Group II)

105. American Political Thought (3) I, II

The development of American ideas concerning political authority from the period of colonial foundation to the present time.

106A-106B. Socialist Political Thought I, II

Prerequisites: Political Science 1 or 2, and 111B or 112.

Semester I: Socialist thought from an historical perspective. Semester II: Selected topics in socialist thought.

110. Politics and the Arts (3) I, II

Prerequisites: Political Science 1 and 2.

The contribution of the artistic media to the activity and understanding of politics. This course does not meet the departmental requirements for majors of a course from Group II.

111A-111B. Theory of the State (3-3)

Prerequisite: Political Science 111A is prerequisite to 111B.

The nature of the State, its organization and activities, and its relation to the individual and other states.

112. Modern Political Thought (3) I, II

Concepts concerning the nature of the state from Burke to the present.

113. The Theory of Political Inquiry (3) Prerequisite: Political Science 1, 2, and 3. Philosophical bases of science with reference to political science. Concepts, concept formation, theory building, and verification.

114. Problems in Political Theory (3)

Prerequisite: Six units of upper division political theory.

Research methods in political theory; intensive development of selected issues.

Politics (Group III)

115. American Institutions (3) I, II

The principles of the Constitution of the United States of America, and a survey of the political and social institutions which have developed under the Constitution. Meets the graduation requirement in the United States Constitution and California state and local government. When taken with Political Science 105, 117 or 118, will also meet requirements in American history, institutions, and ideals. Not open to students with credit in Political

116. American National Government (3) I, II Prerequisite: Political Science 2 or 115, or History 17A and 17B.

An intensive examination of the primary institutions of the national government. Critical analysis of changing aspects of traditional relationships among the institutions of president, congress, and the judiciary.

117. State and Local Government (3)

A study of public policy-making within the contex of statewide politics, state-federal and state-local relations, including both official and unofficial institutions. Emphasis on California. Meets the graduation requirement in California Government. (Formerly numbered and entitled: Political Science 142, State Government; and Political Science 143, Municipal and County Government.)

118. Urban Politics (3)

Prerequisite: Political Science 1 or 2.

The processes by which social conflicts in American urban areas are represented and regulated. Urban political culture; ecology; group development and activity; power structures; and reform movements are surveyed. The character of the urban political "problem" and proposed solutions are evaluated. (Formerly numbered and entitled: Political Science 148, Government and Politics of Metropolitan Areas.)

119. Community Political Behavior (3)

Prerequisite: Political Science 1 or 2.

The studies of structure of community power are summarized and critically evaluated. The issues of community conflict are treated both by case study and comparative methods. Examples are drawn primarily from American-urban experience. (Formerly numbered Political Science 150.)

120. Political Parties (3) I, II A critical analysis of the political party as a part of the process of government; party organization and activities; nominating and campaign methods; theories and functions of the party system; party responsibility. The function of the two-party system in American government.

121. Political Behavior (3)

Prerequisite: Political Science 1.

Social and attitudinal variables in political behavior. Quantitative research data as used in electoral studies. (Formerly numbered Political Science 124.)

122. Political Communication (3)

Prerequisites: Political Science 121.

Communication as a political process; the effects of political communications on

individuals and groups. 123-S. Contemporary American Politics (3) S

A consideration of a selected group of current major political problems in terms of their possible future implications and of their relationship to established American democratic principles and ideals.

124. The American Presidency (3) I, II

Prerequisites: Political Science 1 and 2.

Analysis of principal institutions, functions, and problems of the presidency and federal executive branch. Attention given to presidential leadership, staffing, executive-legislative

relations, and policy formation.

125. The Legislative Process (3) I, II A detailed analysis of legislatures. Special attention will be devoted to the impact of dynamic factors on formal procedures.

126. Political Groups and Movements (3) I, II

Prerequisite: Political Science 1 or 2. Pressure group activity, lobbies, mass movements; factors which explain origins and motivations of group behavior; votes, money, information, protest as political resources; theories of pluralism, power elite, and mass society; class and ethnic politics.

128. Internship in Politics (2-6) I, II, S

Prerequisites: Political Science 120 and consent of instructor.

Students will be assigned selectively to functional areas of politics, such as political party headquarters, elective public offices and non-partisan political groups for work under joint supervision of activity heads and the course instructor. Participation will include project and internship conferences.

129. The Politics of Bureaucracy (3) I, II

Prerequisites: Political Science 1 and 2.

An analysis of the bureaucracy as an actor in the political system.

130. Government and Public Policy (3)

Prerequisite: Political Science 116 or 117.

Theory and practice of process of formulating public policy, roles of administrators, legislators, courts, interest groups, and political parties; public agencies and public interest, case studies in formulating public policies. (Formerly numbered Political Science 147.)

Political Science / 335

# 334 / Political Science

131. Special Problems in American Politics (3) I, II Prerequisites: Political Science 1 and 2 and three upper division units within Group III. Intensive exploration of selected issues in the field of American politics. 132. Minority Political Thought and Politics in the United States (3) I, II

Political attitudes, behavior, and thought of selected minority groups.

# Public Law (Group IV)

135. The Supreme Court and Contemporary Issues (3) Recent decisions of the Supreme Court of the United States and their relationship to contemporary political and social issues. Not open to students with credit in Political Science 139A or 139B.

136. Constitutional Government (3) I, II

Prerequisites: Political Science 1 and 2

Constitutionalism as a concept of legal and political philosophy; foundations of American constitutionalism; origin and framing of the American Constitution; philosophy of the American Constitution; application of constitutional principles to contemporary political situation and problems.

137. Special Problems in Public Law (3) I, II

Prerequisites: Political Science 1 and 2, and three upper division units within Group IV. Intensive exploration of selected issues in the field of constitutional law.

138. Law and the Political System (3)

Forces influencing the making of law; relationship between social and legal change; nature and limits of the judicial function.

139A-139B. American Constitutional Law (3-3)

Prerequisite: Political Science 139A is prerequisite to 139B.

Principles of American Constitutional law. Includes judicial review, the federal system, the separation of powers, the nature of selected Congressional powers, and the liberties protected by the constitution against national and state action. Meets the graduation requirement in the United States Constitution.

# International Relations (Group V)

165. Dynamics of Modern International Crises (3) I, II Prerequisite: Consent of instructor.

The determination and analysis of facts surrounding international crises since World War II; the evaluation of these crises and their effects upon external policies of the United States and the operations of the United Nations.

166. Honors Course (1-3) I, II

Refer to Honors Program.

168-S. Institute on World Affairs (3) S

Contemporary problems in international relations. May be repeated once for course credit with permission of the instructor.

170A-170B. International Relations (3-3)

A historical and analytical consideration of the basic factors—historic, geographic, economic, ideologic, and strategic—which underlie and condition the modern conflict between the "sovereign state" and the "community of nations." Fall semester: Origins and development through the nineteenth century. Spring semester: Twentieth century experimentation and conflict.

171. The Conduct of American Foreign Relations (3) I

The legal, administrative, and political organizations by which American foreign policies are formulated and implemented. 172. International Organization (3) I

The organization by which the international community seeks to provide for the exercise of legislative, administrative and judicial functions on the international level: diplomatic and consular corps; conferences; administration through commissions and unions; amicable procedures for settlement of disputes; the League of Nations-United Nations experiment.

173. Principles of International Law (3)

The function of law in the international community. The historical development of the ideas and rules of international law and their place in the modern diplomatic and legal

174. National Security Policy (3)

Objectives, instruments, and consequences of national security policy.

175. International Relations of the Latin American States (3)

The foreign policies of the Latin American states; the organization of American states; relationships with the United Nations and with the United States.

# 176. International Relations of the Developing Nations (3)

Prerequisite: Six units of political science. Cooperation and conflict between the developing nations and relations of such nations

with the developed countries. 177. Comparative Foreign Policies (3)

Prerequisite: Six units of political science.

Comparison of foreign policies of nations in various regional, socio-economic, and

ideological areas. 178. Special Problems in International Politics (3) I, II

Prerequisites: Political Science 1, 2 and three upper division units within Group V. Intensive exploration of selected issues in the field of international politics.

# Comparative Government (Group VI)

180. Government of England (3) II-The structure and functioning of the English parliamentary system with emphasis upon

present day political principles and parties.

181. Government of the Soviet Union (3) I Theory and practice of government in the Soviet Union, with some attention to foreign

affairs. 182. Political Violence (3)

Prerequisite: Political Science 1, 2, or 3. Underlying conditions, expressions, and consequences of violence within political systems. 183. Governments and Politics of South and Southeast Asia (3)

The internal political systems and foreign policies of India, Pakistan, Thailand, and Indochinese area, Indonesia, and the Philippines.

184. The Mexican Political System (3)

Prerequisite: Political Science 1 or 3. Principal factors in Mexican governmental decision-making. Ideology, political groups, tactics of leaders and governmental structure.

185. Governments of Continental Europe (3) I, II The political systems of the countries of western continental Europe.

186. Comparative Communist Governments (3) I, II The interrelations between the theory and practice of modern communism as found in

representative communist systems.

187. Governments and Politics of the Far East (3) The internal political structure and foreign policies of China, Japan, and Korea.

Governments and Politics of the African States (3) I

Domestic and international politics of specific African states.

189. Government and Politics of the Middle East (3) The governmental and political structures of representative states in the Middle East,

including Turkey, Israel, and the Arab states.

190. Comparative Political Systems (3) I, II

An examination of selected political and governmental systems for purposes of comparative study and analysis to determine similarities, differences, and general patterns and universals among political systems.

191. Governments and Politics of the Developing Areas (3) I, II

Prerequisite: Political Science 1 or 3. Internal political systems, governmental structures, and the foreign policies of developing

nations.

192. Political Change in Contemporary Africa (3) II General pattern of nationalism in Africa south of the Sahara. Theories of social change and general features of contemporary African political development.

193. Proseminar in Cross-National Studies (3) Prerequisites: Political Science 3 and Political Science 100A. Prerequisites: Fontical science of and Fontical Science 100A. Cross-national analysis of institutional norms, attitudes, and behavior in relation to government; factors which determine patterns and styles of political participation in

contemporary societies.

194. Political Change in Latin America (3) Prerequisite: Political Science 1 or 3. General pattern of political science 1 of 0. General pattern of political and political development in Latin America with an emphasis on those features which condition domestic and foreign policy-making.

195. Political Systems of Latin America (3) Prerequisite: Political Science 194. Domestic and international politics of selected Latin American states.

### Portuguese / 337

# 336 / Political Science

196-S. Institute of Public Affairs (1-3) S

Study of selected phases of American or Comparative Government. May be repeated to a maximum of six units of course credit with new content and consent of instructor. 197. Investigation and Report (3) I, II

Analysis of special topics. Admission by permission of instructor. 198. Special Problems in Comparative Politics (3) I, II

Prerequisites: Political Science 1, 2, 3 and three upper division units within Group VI. Intensive exploration of selected issues in the field of comparative politics. 199. Special Study (1-3) I. II

Individual study. Six units maximum credit.

Prerequisites: Twelve units of upper division political science and consent of the instructor.

### **Graduate Courses**

200. Seminar in the Scope and Method of Political Science (3)

The discipline of political science and systematic training in its methodology. Required of all applicants for advanced degrees in political science.

210. Seminar in Political Theory (3)

Maximum credit six units applicable on a master's degree.

215. Seminar in American National Government (3)

Maximum credit six units applicable on a master's degree.

220. Seminar in Politics (3)

Prerequisite: Six units of upper division political science, three units of which must come from Political Science courses 115 through 134.

Process by which individuals and groups make demands upon political decision-makers; emphasis on the styles, structures, channels, and consequences of interest articulation. Maximum credit six units applicable on a master's degree.

221. Seminar in Political Participation (3)

Prerequisite: Six units of upper division political science, three of which must be from Political Science courses 115 through 134.

American political culture and subculture groupings as related to various dimensions of political behavior. 225. Seminar in the Legislative Process (3)

Prerequisite: Six units of upper division political science. Legislative institutions and processes. Emphasis on U.S., national, state, and local legislatures. 226. Seminar in Political Psychology (3)

(Same course as Psychology 226.)

Prerequisites: Six units selected from Psychology 110, 112, 145; Political Science 100A-100B, 121, 122, 190.

Psychological factors on the individual's political behavior; psychological theory as it applies to political variables such as: ideology, conflict, consensus, and participation. 230. Seminar in Public Law (3)

Maximum credit six units applicable on a master's degree.

250. Seminar in Local Government (3)

Selected problems of state and local government and inter-governmental relations. Maximum credit six units applicable on a master's degree.

255. Seminar in Metropolitan Government and Politics (3) Prerequisite: Political Science 117 or 118 or 119.

Government and politics in the world's major metropolitan areas. Maximum credit six units applicable on a master's degree. 270. Seminar in International Relations (3)

Maximum credit six units applicable on a master's degree. 272. Seminar in International Organization (3)

Prerequisite: Political Science 172

Analysis of selected problems of international organization with special reference to those of the United Nations. Oral and written reports.

275. Seminar in Theories of International Relations (3) Prerequisite: Political Science 170A or 170B.

Theoretical concepts used in the study of international political systems. Maximum credit six units applicable on a master's degree.

280. Seminar in General Comparative Political Systems (3)

Prerequisite: Political Science 190 or 191, and three additional units of upper division political science.

The field of comparative politics, including historical developments, major theoretical approaches, substantive concerns, uses and limitations of the comparative method, methodological innovations in study of foreign political systems.

281. Seminar in Western Political Systems (3)

Prerequisite: Six units of upper division political science. Comparative study of European and other modern political systems. Conditions responsible for the attainment and maintenance of democratic government. The relationship between social modernity and the functioning of Western democratic political institutions

282. Seminar in the Political Systems of the Developing Nations (3)

Prerequisite: Six units of upper division political science.

Theoretical analysis of political development, modernization, and industrialization in the emerging nations. Search for valid generalizations about the non-Western political process. Political trends and developments in the developing nations.

283. Seminar in Latin American Political Systems (3)

Prerequisite: Political Science 190 or 191, and three additional units of upper division political science.

Political developments in selected Latin American nations, with an emphasis on the Mexican political system.

284. Seminar in Communist Political Systems (3)

Prerequisite: Six units of upper division political science.

The differences and similarities among Communist nations in Europe and Asia, with particular reference to instruments of power and ideology. A comparison of Communist ruling techniques and processes.

Exercises in the use of basic reference books, journals, and specialized bibliographies, 290. Bibliography (1) preparatory to the writing of a master's project or thesis.

291. Problem Analysis (3)

Analytical treatment of selected problems in political science. Review of methods for investigation and reporting of data. Consideration of problems in preparation of project or thesis.

297. Research in Political Science (3)

Prerequisite: Consent of the department chairman.

Research in political theory, political parties, comparative government, international relations, public law, or American government.

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

Prerequisites: An officially appointed thesis committee and advancement to candidacy Preparation of a project or thesis for the master's degree.

# Portuquese In the College of Arts and Letters

#### Faculty Assistant Professor: Windsor

Offered by the Department of Spanish and Portuguese

Minor in Portuguese. Courses in Portuguese Major work is not offered.

Portuguese Minor

The minor in Portuguese consists of a minimum of 15 units in Portuguese, six of which must be in upper division courses.

# **High School Equivalents**

High school foreign language courses may be used for purposes of placement in college courses and may be counted toward meeting the foreign language requirement in various courses and may be counted toward incerting the foreign language requirement in various majors. These high school courses will not count as college credit toward graduation. The first two years of high school Portuguese may be counted as the equivalent of

1232-5 11 505

### Psychology / 339

# 338 / Psychology

Portuguese 1; three years the equivalent of Portuguese 2; and four years the equivalent of Portuguese 3. The last year-course taken by a student in the high school language sequence may be repeated in college for graduation credit, not to exceed four units of repeated foreign language work.

### Lower Division Courses

Native speakers of Portuguese will not receive credit for taking lower division courses in Portuguese except with advance approval from the department. 1. Elementary (4)

Four lectures and one hour of laboratory.

Pronunciation, oral practice, reading on Luso-Brazilian culture and civilization, essentials of grammar. 2. Elementary (4)

Four lectures and one hour of laboratory. Prerequisite: Portuguese 1.

Continuation of Portuguese 1.

3. Intermediate (4)

Prerequisite: Portuguese 2.

A practical application of the fundamental principles of grammar. Reading in Portuguese of cultural material, short stories, novels or plays; oral practice. 4. Intermediate (4)

Prerequisite: Portuguese 3. Continuation of Portuguese 3.

10. Conversation (2)

Prerequisite: Portuguese 2.

Practice in the spoken language; practical vocabulary; conversation on assigned topics; simple dialogues and plays. 11. Conversation (2)

Prerequisite: Portuguese 10. Continuation of Portuguese 10.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

# **Upper Division Courses**

101A-101B. Advanced Oral and Written Composition (3-3) Prerequisite: Portuguese 4.

Oral and written composition in Portuguese, based on models from modern Portuguese and Brazilian literature. 134. Portuguese Literature (3)

A study of important movements, authors and works in the literature of Portugal from its beginnings to the present. 135. Brazilian Literature (3)

A study of the important movements, authors and works of the literature of Brazil from the colonial period to modern times. 185. Selected Studies (3)

Topics in Luso-Brazilian language, literature, culture, and linquistics.

# Psychology In the College of Sciences

### Faculty

Emeritus: Carlson, Kidwell, McCollom, Peiffer, Steinmetz, Treat, Voeks

Professors: Alf, Dicken, Feierabend, Gallo, Grossberg, Harari, Harrison, Hillix, Hunrichs, Kaplan, Karen, Kass, Kinnon, Koppman, Leckart, Leukel, Linton, O'Day, Parker, Penn (Chairman), Radlow, Sattler, Stevens, Turner

Associate Professors: Graf, Hornbeck, Levine, Lynn, McDonald, Psomas, Rodin, Sand, Schulte, Sheposh, Smith, Yaremko

Assistant Professors: Bryson, J., Defran, Franzini, Jacobson, Litrownik, Manese, McCordick, Mollenauer, Ohnesorge, Plotnik, Spinetta

Lecturers: Borges, Bryson, R., Hillyard, Johnson, Price, Scollay

Offered by the Department

Master of Arts degree in psychology; and a Master of Science degree in psychology.

Major in psychology with the A.B. degree in liberal arts and sciences.

Major in psychology with the A.B. degrees in applied arts and sciences for students admitted to Secondary Teacher Education.

Teaching major in psychology with specialization in secondary teaching.

Minor in psychology.

Teaching minor in psychology with specialization in both elementary and secondary teaching.

### Psychology Major

# With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

Two plans are provided for the major in psychology: **Plan A** for those students who wish to extend their liberal arts education in the field of psychology; and **Plan B** for those students expecting to pursue the study of psychology beyond the A.B. degree.

#### Plan A

Plan A is for a nonprofessional major in psychology and is designed to provide the student with a greater understanding of human behavior as the emphasis in his liberal arts education. The recommended pattern of courses for this program is not designed to facilitate graduate and professional study in psychology.

Preparation for the major. Psychology 40 and 50. Recommended courses in related fields: six units in biology and/or zoology; three units in philosophy; and six units in anthropology and/or sociology.

Major. A minimum of 24 upper division units in psychology to include Psychology 106, 131, 145, and 150. It is expected that each student under Plan A will select, with the assistance of his adviser, a pattern of courses in line with his particular objectives in pursuing Plan A.

To facilitate the purpose of Plan A the following courses in other departments are recommended as electives: Biology 159, 160; Economics 102; and courses in home economics.

#### Plan B

The purpose of Plan B is to facilitate the specific preparation of those students who wish to pursue graduate and professional preparation in clinical, industrial and personnel, social, and theoretical-experimental psychology

Preparation for the major. Psychology 40, 50, and 70. Recommended courses in related fields: six units in biology and/or zoology; three units in philosophy; and six units in anthropology and/or sociology.

Major. A minimum of 24 upper division units in psychology to include Psychology 105, 110, 150, and one of the following: 111, 112, 113, 114, 115, 116, 117, or 118; and ten units selected from courses in consultation with the departmental adviser. Psychology 167A-167B may be taken instead of Psychology 70 and 110.

# Psychology Major

# With the A.B. Degree in Applied Arts and Sciences

# (For Students in Secondary Teaching Education)

This major is available in applied arts and sciences only to students who have been All candidates for a degree in applied arts and sciences only to students who have been All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

Preparation for the major. Psychology 40, 50, and 70. Recommended: 15 units in anthropology, biology, philosophy, sociology, and zoology.

Major. Psychology 105, 110, 131, 151, and twelve additional units in psychology selected with approval of the departmental adviser.

# Psychology Minor

The minor consists of a minimum of 15 units in psychology, nine of which must be upper division.

# Psychology Major

# For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

1243-5 11 560

# 340 / Psychology

# Specialization in Secondary Teaching

The major in psychology for secondary teaching is the same as the undergraduate major for the A.B. degree in applied arts and sciences described above.

Postgraduate year. Six units of postgraduate courses acceptable toward the credential.

# Psychology Minor

# For the Standard Teaching Credential

The minor for elementary or secondary teaching consists of 21 units in psychology, to include Psychology 1, 106, 131, and 145.

# Lower Division Courses

1. Introductory Psychology (3) I, II

Facts, principles, and concepts which are basic to understanding human behavior. 10. The Evaluation of Psychological Literature (3) I, II

10. The Evaluation of Psychological Literature (3) 1, 11 Designed to increase the non-psychologist's ability to evaluate psychological and quasi-psychological writings. Topics include methods of generating information, concept of controlled observations, interpretation of data, pitfalls in decision making and aids to critical thinking. Practical experience in evaluation will be obtained through the criticism of current

12. Psychology of Individual Adjustment (3) I, II Prerequisite: Psychology 1.

An examination and interpretation of the factors which go into the making of the person as he adapts himself to the social world about him. The development of the normal

40. Principles of Learning and Perception (3) I, II Prerequisite: Psychology 1.

The nature of psychological inquiry. Emphasis on principles and basic experimental data of learning and perception. 50. Introduction to Physiological Psychology (3) I, II

Prerequisite: Psychology 1.

Physiological mechanisms underlying the psychological phenomena of sensation, perception, emotion, motivation, learning and psychosomatic disorders. 70. Statistical Methods in Psychology (3) I, II

Prerequisites: Psychology 1 and Mathematics 3 or qualification on the Mathematics Placement Examination. Quantitative methods in psychology. Measures of central tendency and variability, graphic

methods and percentiles, linear correlation, applications of the normal probability curve, chi-square, and an introduction to statistical inference. Not open to students with credit in

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

### **Upper Division Courses**

100. Selected Topics in Psychology (1-3)

Prerequisite: Six units of psychology.

An intensive study in specific areas of psychology, topic to be announced in the class schedule.

105. Psychological Testing and Measurement (3) I, II

Prerequisite: Psychology 70, or a semester of statistical methods in any other department. Measurement theory and the basic principles of testing. The selection and critical evaluation of group tests of intelligence, personality, aptitude, interest and achievement.

106. Developmental Psychology (3) I, II Prerequisite: Psychology 1.

The psychological development of the normal individual from conception through childhood, adolescence, maturity, and old age. Stress is laid upon the interdependence of the

107. Psychology of Later Maturity (3) II

Prerequisite: Psychology 1

The psychological, physiological, and sociological factors influencing behavior in the later years of life.

108. Advanced Developmental Psychology (3) I, II Prerequisite: Psychology 106.

Selected topics in the areas of infancy, childhood and adolescence.

109. Mental Deficiency (3) I, II Prerequisite: One of the following: Psychology 106, Education 110, 112, 113, or equivalents. The nature and causes of mental retardation, including the psychological effects of brain injury. Characteristics of the mentally defective.

110. Introduction to Experimental Psychology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Psychology 40 and 70.

Understanding of experimental design, quantitative methods, and experimental reports as they are applied to all areas of psychology. Not open to students with credit in psychology 167A-167B.

111. Experimental Psychology: Perception (4)

Two lectures and six hours of laboratory.

Prerequisite: Psychology 110.

Experimental literature, assigned and original laboratory projects in the field of perception.

112. Experimental Psychology: Social (4) I, II

Two lectures and six hours of laboratory.

Prerequisite: Psychology 110.

Experimental literature, assigned and original laboratory projects in the field of social psychology.

113. Experimental Psychology: Physiological (4) Two lectures and six hours of laboratory.

Prerequisites: Psychology 50 or 142 or six units of biology; and Psychology 110.

Experimental literature, assigned and original laboratory projects in the field of physiological psychology. Surgical and histological techniques necessary to research in brain mechanisms and behavior; includes basic electronics for biological scientists.

114. Experimental Psychology: Comparative (4) I, II

Two lectures and six hours of laboratory.

Prerequisite: Psychology 110.

Experimental literature, assigned and original laboratory projects in the field of comparative psychology.

115. Experimental Psychology: Personality and Clinical (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Psychology 110 and 150.

Experimental and theoretical literature, assigned and original laboratory projects in the field of personality and clinical psychology.

116. Experimental Psychology: Learning (4) Two lectures and six hours of laboratory.

Prerequisite: Psychology 110. Experimental literature, assigned and original laboratory projects in the field of learning. 117. Experimental Psychology: Primate Behavior (4) I, II

Two lectures and six hours of laboratory. Prerequisite: Psychology 110. Experimental literature, assigned and original observational and experimental projects in the field of primate learning and behavior.

118. Experimental Psychology: Child Development (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Psychology 106 and 110.

Methods, techniques and principles used in the scientific study of child behavior.

120. Consumer Psychology (3) I, II

Prerequisite: Six units of psychology. A review of the research literature and methods relevant to the individual as a consumer in our society. Attitudes, values, and decision making abilities of people when functioning as a consumer.

121. Personnel and Industrial Psychology (3) I, II

Prerequisite: Psychology 70 or statistics in another field. Psychological principles applied to industrial problems of selection, placement, and training.

122. Public Opinion Measurement (3) I

(Same course as Journalism 122)

(Same course as journalish 122) The history, methods, and problems of public opinion and attitude measurement. Emphasis will be placed upon the polling of consumers and voters. Students will be given field experience.

# 342 / Psychology

123. Organizational Psychology (3) I, II

Prerequisite: Six units of psychology.

The interplay of men and organizations. Psychological literature of the individual and his motivation to work, working in groups, industrial organizations, communications and conflict in industrial organizations.

124. Engineering Psychology (3) I, II

Prerequisite: Psychology 1.

Psychological problems of man-machine-environment systems. Visual, auditory, and other sensory factors involved in the interrelations between man and machines and the environment. Survey of origin and basic data of engineering psychology

125. Human Factors Psychology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Psychology 1 and consent of instructor.

Experimental techniques and procedures in the application of synthesis of behavioral criteria to the design, development, operation and maintenance of man-machine-environmental systems. Government and industry job requirements, routines and practices.

131. Psychology of Personality (3) I, II

Prerequisite: Six units of psychology.

Principles of personality functioning and adaptation.

133. Principles of Personnel Interviewing (3)

Prerequisite: Psychology I.

Psychological factors in interviewing; interviewing techniques. Supervised practice in interviewing for purposes of personnel appraisal and development.

141. Neural Bases of Behavior (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Psychology 50 or six units in the biological sciences. Elements of neurology and psychobiology with emphasis on sensory, central, and motor mechanisms.

142. Physiological Psychology (3) I, II Prerequisites: Psychology 40 and 50 and three units of biology; or nine units of biology. An evolutionary approach to the development of complex behavior in higher organisms and man. The neurophysiology of emotion, sleep, bodily needs, instinctive patterns of behavior, and of learning; brain and behavior disorders.

145. Social Psychology (3) I, II

Prerequisite: Psychology 1

The major problems and findings concerning group behavior and group membership, the socialization of the individual, and processes of social interaction. Not open to students with credit in Sociology 140.

146. Advanced Topics in Social Psychology (3) Prerequisites: Psychology 40 and 145.

An intensive exploration of selected areas within social psychology. Maximum credit six units with the approval of the instructor.

147. Psychology of Contemporary Social Problems (3) Prerequisite: Psychology 1.

Discussion of social issues and problems of importance to the contemporary world, from the point of view of psychological theory, method and knowledge.

150. Abnormal Psychology (3) I, II

Prerequisite: Six units of psychology.

The causes, symptoms, and modification of behavior disorders with emphasis on neurosis, psychosis, and personality disorder.

151. Introduction to Clinical Psychology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Psychology 105 and 150.

History and current status of the profession; professional ethics and interprofessional concerns; clinical assessment and prediction; theory and practice of behavior change.

152. Introduction to Counseling and Therapy (3) I, II

Two lectures and two hours of activity.

Prerequisites: Twelve upper division units of psychology to include Psychology 131 or 178, and 150.

A survey of theory, methods, and research in psychological approaches to personality and behavior change. Practice in basic interviewing and critical analysis of interviews. Not open to students with credit in Psychology 233 or Education 233.

Quantitative methods in psychology with emphasis on methods of correlation, multiple Prerequisite: Psychology 70. correlation, partial correlation, and factor analysis.

171. Intermediate Correlational Analysis (3)

174. Theories of Perception (3) I, II Prerequisite: Psychology 110. Study of research and theory in the areas of sensation, perception, and attention.

175. Theories of Learning (3) I, II

Prerequisites: Psychology 40, and 70.

The facts, principles, and major theories of learning.

177. History of Psychology (3) I, II

Limited to psychology majors with senior standing.

The historical background of modern psychology.

178. Theories of Personality (3) I, II Prerequisites: Major in psychology and six upper division units in psychology. Representative personality theories and supporting evidence.

179. Philosophical Issues in Psychology (3) II

Prerequisite: Twelve units in psychology. Modern empiricism and the philosophy of science as related to issues in contemporary

psychology.

180-S. Contemporary Problems in Psychology (1) S

Lectures open to the public.

Enrollment for credit limited to upper division and graduate majors in psychology; or

A series of six weekly lectures by visiting psychologists on subjects related to current consent of instructor. research problems. Reading and reports required of students enrolled for credit.

197. Senior Project (1-3) I, II

Prerequisites: Twelve units in psychology and consent of instructor. An individual investigation and report on a research project. Maximum credit six units.

Individual study, including library or laboratory research and a written report. Six units 199. Special Study (1-3) I, II

Prerequisite: Twenty-four upper division units of psychology. maximum credit.

### **Graduate** Courses

Prerequisite: 24 upper division units of psychology or consent of instructor. An intensive study in advanced psychology, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

201. Selected Topics in Clinical Psychology (3)

Prerequisites: Psychology 151, 152 and consent of graduate adviser. Advanced study of such clinical topics as community mental health, forensic psychology,

ethics, and autogenic training. Topics will vary on a semester basis.

An intensive study and evaluation of research methodology and current literature concerning the neuroses, psychoses, aphasias, ataxia, mental defect, and psychopharmacology.

Prerequisites: Psychology 40 and mathematical aptitude examination. (See Honors

Integrated approach to the understanding of statistical methods, experimental design and

A further study of quantitative methods in psychology with particular emphasis on

methods of correlation, chi-square, and contingency, and an introduction to the analysis of

the writing of experimental reports as applied to all areas of psychology. Not open to students

166. Honors Course (1-3) I, II

Refer to Honors Program. 167A-167B. Statistical Methods and Experimental Psychology (4-4)

Program.)

variance.

Two lectures and six hours of laboratory.

with credit in Psychology 70 and 110.

Prerequisite: Psychology 70.

170. Advanced Statistics (3) I, II

# Public Administration and Urban Studies / 345

## 344 / Psychology

202A-202B. Contemporary Psychology (3-3)

Prerequisite: Bachelor's degree in psychology.

A comprehensive survey of contemporary literature in psychology, dealing with recent developments in the areas of learning and motivation, perception, psychophysiology, personality and psychodynamics, social behavior, and experimental inference.

204. Psychological Assessment I (4)

Two lectures and six hours of laboratory.

Prerequisites: Psychology 105, 150, 178, and consent of the graduate adviser. Theory and practice in assessment of intelligence and special abilities.

205. Psychological Assessment II (4)

Two lectures and six hours of laboratory.

Prerequisites: Psychology 151, 204, and consent of the graduate adviser.

Theory and practice in assessment of personality and behavior disorders.

211. Seminar in Behavior Disorders of Childhood and Adolescence (3)

Prerequisites: Psychology 106, 151, and consent of the graduate adviser.

Contemporary approaches to emotional and behavioral problems of children and youth. Considers developmental, cognitive, and social variables as well as theory and treatment.

212. Seminar in Behavior Disorders of Adults (3)

Prerequisites: Psychology 151, and consent of the graduate adviser.

Contemporary approaches to emotional and behavioral problems of adults. Considers developmental, cognitive and social variables as well as theory and treatment. 219. Seminar in Personnel Psychology (3)

Prerequisites: Psychology 121, and consent of the graduate adviser.

Problems and procedures in selection, classification, and performance appraisal, focusing on testing in industry, the interview, and other selection and assessment devices. Criterion development and measurement methods.

220. Seminar in Organizational Psychology (3)

Prerequisites: Psychology 123 or Business Administration 145, and consent of the graduate adviser

Applications of psychological principles and methods of investigation to problems of industrial relations and motivation of employees; factors influencing morale and employee productivity; criteria of job proficiency; psychological aspects of worker-management relationships and leadership.

221. Seminar in Problems in Social Psychology (3)

Prerequisites: Psychology 110, 145, 175, and consent of the graduate adviser.

Factors influencing the formation of attitudes, opinions, and stereotypes; the establishment of roles during socialization of the individual; social crises, change, and resistance to change; the causes and alleviation of interpersonal conflict.

222. Seminar in Theoretical Psychology (3)

Prerequisites: Psychology 175, 178, and consent of the graduate adviser.

Basic concepts and principles integrating information in the areas of learning, emotion, motivation, personality, and social interaction. Relationships of scientific methods to the formation and testing of hypotheses and other conceptualizations.

223. Experimental Design (3) Prerequisites: Psychology 110, 170, and consent of the graduate adviser. Principles and methods of planning and carrying out systematic investigations to answer questions concerning human behavior with stress on the interdependence of experimental design and statistical evaluation of results. Practice in formulation of testable hypotheses, techniques of equating groups, solution of sampling problems, and interpretation of results.

224. Advanced Experimental (3)

One lecture and six hours of laboratory.

Prerequisite: Psychology 223, and consent of the graduate adviser. Methods, techniques, and apparatus applicable to questions of various types. Special attention is given to sources of error, limitations on interpretations, and psychophysical methods. Students will design and carry out experiments in preparation for original independent investigations.

225. Principles of Test Construction (3) Prerequisites: Psychology 105, 170, and consent of the graduate adviser.

Detailed consideration of adequate sampling techniques, item construction, item analysis, determination and enhancement of reliability and validity of tests.

226. Seminar in Political Psychology (3)

Prerequisites: Six units selected from: Psychology 110, 112, 145, Political Science 100A-100B,

121, 122, 190, and consent of the graduate adviser. Psychological factors on the individual's political behavior; psychological theory as it applies to political variables such as: ideology, conflict, consensus, and participation. (Same course as Political Science 226.)

230. Seminar in Physiological Correlates of Behavior (3)

Prerequisites: Psychology 50, 113 or 142, or nine units of biology; and consent of the graduate adviser.

An exploration of current research and theory in physiological psychology with emphasis on behavioral correlates and psychophysiology

231. Seminar in Ethology and Comparative Psychology (3)

Prerequisites: Psychology 114 or 117 or Biology 110, or Zoology 170, and consent of the graduate adviser.

Current problems in ethology and comparative animal behavior. Maximum credit six units applicable on a master's degree. (Same course as Biology 231.)

233. Counseling and Psychotherapy Laboratory (4)

Two lectures and six hours of laboratory.

Prerequisites: Psychology 110, 151, 152, 175, 178, and consent of the graduate adviser. Supervised research and practice in interpersonal encounter, with emphasis on the attainment of personality change.

# 270. Statistical Theory (3)

Prerequisites: Psychology 70, 105, and consent of the graduate adviser.

Study of quantitative methods in psychology with emphasis on normal inference and nonparametric statistics. Not open to students with credit in, or concurrent enrollment in Psychology 170.

275. Advanced Principles of Learning (3)

Prerequisites: Psychology 110, and consent of the graduate adviser. The empirical data, basic principles and theoretical positions of major learning theorists. Not open to students with credit in, or concurrent enrollment in Psychology 175.

277. Seminar in the History of Psychology (3) Prerequisites: Psychology 110, and consent of the graduate adviser. The history of modern psychology. Not open to students with credit in, or concurrent enrollment in Psychology 177.

296. Directed Field Experience (3 or 6)

Prerequisites: Psychology 205, 211 or 212, and 233. The student must arrange his practicum setting in cooperation with the chairman of the Psychology Department Practicum Committee and with the express approval of that committee during the semester prior to enrolling for credit in this course. Maximum credit six units.

Research in one of the fields of psychology. Maximum credit six units applicable on a master's degree.

Individual projects involving library or laboratory research in any area of psychological investigation or interest. Maximum credit six units.

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree. Credit is contingent upon acceptance of the completed thesis by the Department of Psychology.

# Public Administration and Urban Studies In the College of Professional Studies

Public Administration and Urban Studies is a member of the National Association of Schools of Public Affairs and Administration

Faculty

Emeritus: Leiffer, Love

Professors: Bigger, Kitchen (Director) Associate Professors: Clapp, Gazell, Gilbreath, Gitchoff, Hamilton

Assistant Professors: Boostrom, Corso, Thompson, Walshok Lecturers: Applegate, Ariessohn, Dahlgren, Erikson, Fogel, Monteleon, Swanson, Williams

# 346 / Public Administration and Urban Studies

Offered by Public Administration and Urban Studies

Master of City Planning degree.

73-74

Master of Public Administration degree.

Master of Science degree in criminal justice administration.

Major in criminal justice administration, with the B.S. degree in applied arts and sciences. (Refer to this section of the catalog on Criminal Justice Administration.)

Major in public administration, with the A.B. degree in applied arts and sciences.

# Public Administration Major

### With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

Preparation for the major. Economics 1A, 1B, Political Science 2, Business Administration 83, and a 3-unit course in statistics (may be taken in upper division). (15 units.)

Major. A minimum of 36 upper division units to include Public Administration 140 and 197 or 198; Economics 131 or Public Administration 162; and additional upper division courses selected with approval of the departmental adviser, including a three-unit course in statistics if not taken in the lower division. Within this program, students may elect to specialize in urban management. Interested students should seek guidance from the director.

### Public Administration Minor

The minor consists of a minimum of 15 units to include Political Science 2, Public Administration 140, and Public Administration 197 or 198, or other courses selected with the guidance of an adviser in public administration.

### Certificate in Public Administration

This certificate is designed primarily for persons who hold administrative or managerial positions or for those who seek to prepare for such responsibilities. Previous academic experience is not a prerequisite; nor need the program be accompanied by work toward a degree. Candidacy will be established by the director of the program. The awarding of the certificate requires completion of an approved pattern of eight courses with a minimum grade point average of 2.5 (C+)

- For further information, consult the director, Public Administration Certificate Program. The department's undergraduate courses fall into three main areas:
- Criminal justice. Most relevant are courses numbered 110, 111, 112, 116, 146, and 188. (1)

Public administration. Most relevant are those numbered 136, 140, 141, 142, 143, 144, 145, 147, 149, 152, 155, and 156.

(3) Urban studies. Most relevant are those numbered 148, 150, 154, and 160.

#### 90. The Urban Scene (3)

Urban society as an environment in which people interact with such public institutions as municipal and county administrations, school districts, and special authorities; community control over institutions within the urban conglomerate; improving urban life styles.

Lower Division Courses

# 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

# **Upper Division Courses**

135. Selected Topics in Public Affairs (3)

Selected topics in the administration of public policy and problems of public administrative organization.

136. Administrative Law (3) II

The law of public office and public officers, powers of administrative authorities, scope and limits of administrative powers, remedies against administrative action.

140. Concepts and Issues in Public Administration (3)

Theory and practice of governmental administration in differing environments; role of administrators in public policy; issues facing administrators, techniques of administration.

141. Studies in Public Administration (1-3) I, II

Offered only in Extension.

Analysis of selected administrative processes and problems of governmental agencies, their legal and political relations to other agencies and to the public. With consent of instructor, may be repeated with new content.

# Public Administration and Urban Studies / 347

142. Management of State Governments (3) I, II

Prerequisite: Public Administration 140.

Administrative and constitutional problems of state management in the American federal system. Emphasis on California.

143. Management of Urban Governments (3) I, II

Prerequisite: Public Administration 140.

Problems of local units of government in the urban environment. Organization and function of local agencies. Emphasis on California.

144. Public Personnel Administration (3) I, II

Prerequisite: Consent of instructor.

Problems in recruitment, placement and supervision of public employees.

145. Administrative Behavior (3) I

Social, psychological, and behavioral theories of organization; concepts of administrative leadership; organization and the individual; emphasis on governmental organizations.

147. Administration and Public Policy Development (3) I. II

Process of formulating public policy with emphasis on the role of public agencies. Case studies.

148. The Metropolitan Area (3) I, II

Prerequisite: Public Administration 142 or 143.

Problems of government and administration arising from population patterns and physical and social structures of metropolitan areas.

149. Comparative Public Administration (3) II

Prerequisite: Public Administration 140.

Administrative organization and process selected foreign and American governments. Analysis of the cultural basis of administrative systems.

150. Decision-Making in the Urban Community (3) I, II

Prerequisite: Public Administration 143.

Processes of decision-making in the management of urban communities.

151. California Law of Municipal Corporations (3) I, II

Offered only in Extension.

California law governing the nature, regulation and control of the counties, charter cities, sixth class cities, school districts and special districts. The creation, alteration, dissolution, legal actions by and against, powers and duties; rights and liabilities of local governments.

152. Administrative Management (3) I, II

Areas and problems of administrative research; methods of analyzing structures and procedures in organizations; planning and administration of programs; design of forms; job classification and salary surveys; preparation of administrative reports.

153. Management of the Federal Government (3) I, II

Prerequisite: Public Administration 140.

Problems in the administration of the federal government: for example, leadership, specialization, unity of command, oversight.

154. Intergovernmental Relations in the United States (3) II

Prerequisite: Political Science 2.

Constitution, political and administrative characteristics of American federalism. including regionalism, interstate compacts, and grants-in-aid.

155. Regulatory Administration (3) I, II

Prerequisite: Public Administration 140 or Criminal Justice Administration 146 or Political Science 139A-139B.

Fundamental structure, problems and criticisms of the regulatory systems in the United States.

156. Public Administrative Systems Analysis (3)

Two lectures and two hours of laboratory.

Prerequisites: Public Administration 140 and a statistics course.

Systems and organization analysis; survey of electronic systems; work standards and units; procedures analysis; administrative planning.

157. Public Relations of Public Agencies (3) I

Prerequisite: Public Administration 140.

Theory and practice of public relations in government. Public opinion and clientele groups in relation to administrative agencies. Problems in public relations of public agencies. Techniques of pubic relations.

160. Principles of Planning (3) I, II

An introduction to community planning: regional, county, and city. Consideration of the Master Plan, including its purposes, contents, and method of adoption.

### 348 / Public Administration and Urban Studies

### 161. Field Studies in Government (3) II, S

Prerequisite: Public Administration 140.

Study of organization, policies and functions of selected government agencies. Discussion by responsible officers and inspection of work operations and facilities in management. public safety, public works and utilities, and other major governmental operations.

162. Fiscal and Budgetary Policy (3) I, II

Prerequisite: Public Administration 140.

Policies of fiscal administration and budgeting; political implicatons of the governmental budget process; revenue, debt, and treasury management; the functions of accounting and financial reporting.

166. Honors Course (1-3) I, II

73-2

Refer to the Honors Program.

197. Investigation and Report (3) I. II

Analysis of special topics. Admission by permission of instructor.

198. Internship in Public Administration (2-6) I. II

Prerequisite: Consent of instructor.

Students will be assigned to various government agencies and will work under joint supervision of agency heads and the course instructor. Participation in staff and internship conferences.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisites: Twelve units of upper division public administration and consent of instructor.

### **Graduate Courses**

201. Scope of Public Administration (3)

Prerequisite: Six units of upper division public administration.

The development of public administration as an academic discipline; a systematic evaluation of the rise and operations of large-scale public bureaucracies.

203. Seminar in Theory of Administrative Organization (3)

Prerequisite: Public Administration 201.

Organization and management; the executive role, decision making; bureaucracy; authority and power; communication and control and organizational system; tactics and strategies in effective management.

205A. Empirical Approaches to Public Administration: Qualitative Analysis (3) Prerequisite: Public Administration 201.

Examination of basic research approaches, i.e., legal, historical, and small-group, etc. 205B. Empirical Approaches to Public Administration: Quantitative Analysis (3) Prerequisite: Public Administration 201.

Study of techniques for the gathering of data on Public Administration with reference to survey research and methodology; examination of various data analysis methods.

230. Seminar in Public Financial Management (3)

Prerequisite: Public Administration 162.

Problems in the administration and budgeting of public revenues.

240. Seminar in Public Administration (3)

Maximum credit six units applicable to a master's degree.

241. Seminar in Public Personnel Administration (3)

Prerequisite: Public Administration 144.

Analysis of special problems of public service recruitment; recent developments in government pay administration; planning administration, and evaluation of executive development and other training programs; collective bargaining in government; construction and administration of tests; evaluation of total personnel program.

242. Seminar in Public Administration in Developing Nations (3)

Prerequisite: Public Administration 140.

Selected problems in administration of economic and technical assistance programs; problems of administration in developing areas.

243. Science, Technology, and Public Policy (3)

Prerequisite: Public Administration 201, or equivalent seminar in another department. The influence of science and technology on governmental policy-making; scientists as administrators and advisers; governmental policy-making for science and technology; government as a sponsor of research and development.

245. Readings in Public Administration (3)

Prerequisite: Public Administration 201, or six graduate units of public administration. Selected readings in the literature of public administration.

### Public Administration and Urban Studies / 349

249. Seminar in Comparative Administration (3)

Prerequisite: Public Administration 140.

Selected problems in administration, organization, and processes of foreign and international governments. Maximum credit six units applicable on a master's degree.

250. Management of Urban Governments (3)

Selected problems in the management of urban governments. Maximum credit six units applicable on a master's degree.

255. The Metropolitan Area (3)

73.74

Prerequisites: Public Administration 143, 148, or 150.

Selected problems in the government and administration of the world's major metropolitan areas.

260. Administration and Public Policy Development (3)

Prerequisite: 12 upper division units in social science.

Social, political, and administrative problems involved in governmental program development and change.

291. Problem Analysis (3)

Analytical treatment of selected problems in Public Administration. Review of methods for investigation and reporting of data. Consideration of problems in preparation of projects or thesis.

296. Internship in Public Administration (1-6)

Students will be assigned to various government agencies and will work under joint supervision of agency heads and the course instructor. Participation in staff and internship conferences. Admission by consent of instructor.

297. Research in Public Administration (3)

Prerequisite: Consent of Director, Public Administration and Urban Studies. Research in one of the areas of public administration.

298. Special Study (1-3)

Individual study. Six units maximum credit.

Prerequisite: Consent of staff; to be arranged with the Director and instructor.

299. Thesis (3) Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# Graduate Courses in City Planning

CP 261. Urban Design and Land Use Planning Studio (6)

Two lectures and eight hours of laboratory.

Prerequisites: City Planning 266A and 266B. Laboratory course concerned with graphic expression, principles of land use planning, land development, and urban design. Project integrating principles. (Formerly numbered Public Administration 261A-261B.)

CP 262. History of Urban Planning (3)

History or urban development and of the field of urban planning.

CP 265. Seminar in Planning Administration (3)

The administration of the planning function in urban government. Relationships between the planner and public and private agencies, governmental departments and elected officials. Case studies and problems.

CP 266A. Seminar in Urban Planning (3)

Prerequisite: Public Administration 160.

Introductory seminar to the Master of City Planning Program, focusing upon the planner's perspective of urban problems and goal formation. (Formerly numbered City Planning 266.) CP 266B. Seminar in Urban Planning Methodologies (3)

Prerequisite: City Planning 266A.

Procedures and analytical techniques in urban planning.

CP 266C. Seminar in Urban Planning Implementation (3)

Prerequisite: City Planning 266B.

Analysis of the content and function of zoning, subdivision regulation, codes, capital budgeting, urban renewal, model cities, and other implementation methods and programs.

CP 266D. Seminar in Urban Planning Theory (3)

Prerequisite: City Planning 266C.

Alternative theories of planning and organization of the planning function. Emphasis on conceptual foundations, relationship to governmental structure, decision-making, and ideological and ethical orientations.

CP 267. Readings in Urban Planning (3)

Selected topics in urban planning. Maximum credit six units applicable on a master's degree.

#### Recreation / 351

#### 350 / Recreation

# CP 296. Internship in Urban Planning (3-6)

Students will be assigned to various government agencies and will work under joint supervision of agency heads and the course instructor. Participation in staff and internship conferences. (Formerly numbered City Planning 293.)

CP 297. Research in Urban Planning (3)

Prerequisite: Consent of Director of City Planning Program.

Research in one of the areas of urban planning. Maximum credit six units applicable on a master's degree. CP 298. Special Study (1-3)

Prerequisite: Consent of staff.

To be arranged with Director of City Planning and instructor. Individual study. Maximum credit six units.

# Recreation In the College of Professional Studies

#### Faculty

Professor: Hanson, R. Associate Professor: Butler, R. (Chairman) Assistant Professors: Hutchinson, Namba Lecturers: Duncan, Gore, Soderberg

### Offered by the Department

Major in recreation administration with the A.B. degree in applied arts and sciences. Minor in recreation.

A cooperative education program is available on a selective basis, whereby a student alternates semesters of study and full-time, paid work experience during the final two years of college. This program normally results in a one-year delay in date of graduation. Students in the program profit from approximately one and one-half years of full-time work experience prior to graduation.

Inquiries and applications should be directed to the Department Chairman.

# **Recreation Administration Major**

# With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

The major in recreation administration may be planned with an emphasis in one of the following four areas: (1) Leisure Agency Leadership, (2) Outdoor Recreation, (3) Park and Recreation Management, or (4) Recreation Rehabilitation. A minor is not required with this major.

# Emphasis in Leisure Agency Leadership

Preparation for the major. Music 2; Physical Education 32A, 33A, 33B; Psychology 1; Recreation 40, 60, 70, 80, 84; Sociology 1 (231/2 units).

Major. A minimum of 37 upper division units to include Health Science and Safety 146; Industrial Arts 101; Journalism 180; Psychology 106; Recreation 140, 165, 184. Nine units selected from Psychology 131, 145, 152; Sociology 113, 114, 125, 157. Eight units selected from Art 110; Drama 110; Education 140; Industrial Arts 140; Physical Education 122, 151, 175, 176.

# **Emphasis in Outdoor Recreation**

Preparation for the major. Biology 1, 2; Botany 1; Economics 1A; Geography 1; Recreation 40, 60, 80; and six or more units selected from: Anthropology 2; Engineering 10; Geology 2, 3; Zoology 50, 60. (26 units.)

Major. A minimum of 36 upper division units to include Biology 115; Geography 170, 171, 175; Health Science and Safety 146; Recreation 165, 175, 185; and twelve units selected from: Anthropology 161; Botany 112; Business Administration 132, 145; History 185; Industrial Arts 101; Journalism 180; Psychology 145; Sociology 150; Zooloy 112, 114, 115, 116, 117, 118, 150 and

# **Emphasis in Park and Recreation Management**

Preparation for the major. Psychology 1; Recreation 40, 60, 70, 80, 84; Sociology 1. Four units selected from Art 2A; Business Administration 80; Music 2; Physical Education 32A, 33A, 33B; Speech Communication 64 (23 units).

Major. A minimum of 38 upper division units to include Industrial Arts 101; Journalism 180; Public Administration 140, 143; Recreation 140, 165, 175, 184. Nine units selected from Psychology 106; Public Administration 144, 152; Sociology 114, 125, 157. Six units selected from Botany 112, Geography 170, 171, 175, or Recreation 185

#### **Emphasis in Recreation Rehabilitation**

Preparation for the major. Psychology 1; Recreation 40, 60, 70, 80, 84; Sociology 1; and four units of electives from art, aquatics, business administration, dance, drama, or music (23 units).

Major. A minimum of 36 upper division units to include Industrial Arts 101; Journalism 180; Recreation 150, 151, 165, 184; Psychology 106, 109, 150. Nine units selected from Drama 110, 142; Physical Education 122, 151, 154; Psychology 145, 152; Sociology 114, 135, 136; Education 135, 167; Health Science and Safety 175, 176.

#### **Recreation Minor**

The minor in recreation consists of a minimum of 15 units to include two lower division units in art, dance, drama, or music; Recreation 60, 70, 80, 165, and 184; and Drama 110 or Recreation 140. Recommended: Industrial Arts 101, Physical Education 151, 175, 176, Psychology 106, Public Administration 144, and Recreation 150.

### Lower Division Courses

40. Challenges of Leisure (3) I, II Study of leisure and its impact on contemporary life; issues affecting recreation in today's

urbanized society. 60. Introduction to Community Recreation (2) I, II

Scope of community recreation; basic philosophy of leisure time agencies; leadership theory; organizations for youth; program planning; and playground practices.

70. Recreation Leadership (3) I, II

Two lectures and three hours of laboratory.

Plan and conduct programs in social recreation, recreational dramatics, song leading, handicrafts and low-organized games. Principles of group leadership.

#### Camp Leadership (2) I, II 80.

Consideration of camp administration and principles of good camp leadership. Lectures and practical sessions aimed at general training in all phases of outdoor education and camp leadership, including skills in axemanship, outdoor cooking, nature projects, camp crafts, campfire and special camp programs.

# 84. Supervised Field Work (3) I, II, Cr/N C

Prerequisites: Credit or concurrent enrollment in Recreation 70.

Observation and participation in community recreation leadership. Practical, volunteer experience in a variety of recreational settings. Minimum of one hour per week in class plus eight hours per week at an agency.

# 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

140. Conduct of Recreational Sports (2) I, II

Two lectures plus outside practical experience in the conduct of recreational sports

programs. Organization of competition, community sports programs, administration of intramural athletics, and techniques of officiating.

150. Recreation in Medical Settings (3) I, II Recreation activities to meet the needs of handicapped confined to private, State, and Federal treatment centers. Designed for social welfare students, nurses, special education teachers, and medical recreators.

151. Practicum in Recreation for Special Groups (3) II

Two lectures and three hours of laboratory.

Prerequisite: Credit for or concurrent enrollment in Recreation 70.

Developing community recreation programs for one of the following groups: aging, mentally retarded, mentally ill and physically handicapped. May be repeated twice in different areas of exceptionality.

165. Administration of Recreation Programs (3) I, II

Prerequisite: Recreation 60.

Administrative authority and responsibility to plan, implement, finance, staff and evaluate organized programs of recreation. The use of social and human resources.

166. Honors Course (1-3) I, II

Refer to Honors Program.

### 352 / Religious Studies

175. Management of Recreation Areas and Facilities (3) I, II

Prerequisite: Credit for or concurrent registration in Recreation 165.

Role of the recreation administrator in the planning, acquisition, development, financing, staffing and maintaining of recreational lands, waters, and structures. Use of natural and man-made resources in the environment.

184. Directed Leadership (3) I, II, S, Cr/N C

One lecture and eight hours of supervised activity.

Prerequisite: Recreation 84.

Supervised leadership experience in public and private recreation agencies. Maximum credit six units.

185. Principles of Outdoor Recreation (3) I, II

Prerequisite: minimum of one summer work experience in a federal or state recreational area

Objectives and practices related to administration of recreational systems in regional, state, and federal parks and forests. Interpretation; enforcement problems; planning and operational techniques.

199. Special Study (1-3) I. II Individual study. Six units maximum credit.

Prerequisite: Consent of special study adviser.

### **Graduate Courses**

204. Problems in Recreation (3) (Alternate years) (Same course as Physical Education 204)

A survey of current problems facing the recreation profession, a review of literature, discussion of trends and observation of school situations together with the analysis and evaluation of actual problems. Written reports are required.

205. Park Management (3) (Alternate years)

Prerequisite: Recreation 165.

Fundamentals of general park maintenance. Principles of planning and development. Personnel and budget problems unique to park management. Coordination of activities with other public agencies.

260. Recreation Administration and Supervision (3) (Alternate years) Prerequisites: Recreation 165 and 184.

Methods, techniques and evaluation systems used by chief administrators, department heads and supervisors in both public and private agencies.

261. Seminar in Specialized Facilities (3)

Prerequisite: Recreation 175.

Management methods in planning, developing and operating specialized recreation facilities such as golf courses, zoos and aquaria, botanical gardens and arboreta, beaches and marinas, centers for the handicapped, sports stadia, and others. May be repeated once in a different area of specialization.

# **Religious Studies** In the College of Arts and Letters

#### Faculty

Professor: Anderson, A. W. Associate Professor: Jordan (Chairman) Assistant Professors: Khalil, Swyhart

Offered by the Department

Major in religious studies with the A.B. degree in liberal arts and sciences. Minor in religious studies.

# **Religious Studies Major**

### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Religious Studies 20, 50, and Philosophy 1A-1B.

Major. A minimum of 24 upper division units in religious studies to include either Religious Studies 100A or 100B, at least six units from courses listed in Group I below, at least six units from Group II, at least three units from Group III, and at least three units from Group IV. Six of the 24 upper division units required for the major may be taken from among

those courses other than religious studies courses which are included in Group III below. Group I: Religious Studies 110, 111A-111B, 114, 115, and 116.

Group II: Religious Studies 121A-121B, 126A-126B.

Group III: Religious Studies 130, 132, Philosophy 135, Sociology 138, Anthropology 153. Group IV: Religious Studies 190, 191.

### **Religious Studies Minor**

The minor in religious studies consists of from 15 to 22 units to include at least three lower division units in religious studies, at least three units from Group I, at least three units from Group II, and at least three units from Group III.

Group II, Religious Studies 110, 111A-111B, 114, 115, 116. Group II: Religious Studies 121A-121B, 126A-126B. Group III: Religious Studies 130, 132, Philosophy 135, Sociology 138, Anthropology 153. Group IV: Religious Studies 190, 191.

#### **Lower Division Courses**

20. World Religions (3)

Major figures, attitudes and teachings of world religions.

50. Problems of Religion (3)

Problems in the study of religions, based on the study of scripture selected from Eastern and Western religions.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 153. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

100A-100B. The Bible (3-3)

Prerequisite: Three units of religious studies. The problems of composition and historical significance in the context of religious meanings. First semester: The Pentateuch, the Prophets and the Writings. Second semester: the New Testament.

110. Greek and Latin Fathers (3)

Prerequisite: Six units of religious studies.

Readings in patristic thought from Ignatius of Antioch through Augustine.

111A-111B. The Western Christian Tradition (3-3)

Prerequisite: Religious Studies 110, 111A is prerequisite to 111B.

Readings in source materials illustrative of the doctrinal and institutional development of the Western Church. First semester: the Medieval Church and early stages of the Reformation. Second semester: the Reformation and the Enlightenment.

114. The Eastern Orthodox Tradition (3)

Prerequisite: Religious Studies 110.

Major doctrines, practices, and developments in the Eastern Church after the Patristic period up to the present.

115. Judaism (3)

Prerequisite: Three units of religious studies.

Major trends and teachings from the Talmudic period to the present.

116. Islam (3)

Prerequisite: Three units of religious studies.

Major doctrines, practices, and developments from the time of Mohammed to the present. 121A-121B. Oriental Religions (3-3)

Prerequisite: Three units of religious studies.

Phenomenological studies in the major religious traditions of south and east Asia. First semester: religions of India-especially Hinduism and Buddhism. Second semester: religions

of the Far East.

126A-126B. Scriptures of India and China (3-3) Formerly Philosophy 150A-150B, Asian Thought.

Prerequisite: Religious Studies 50, 121A, or 121B; or six units of philosophy.

The religious and philosophical modes of thought and ways of life of the Orient. Reading and analysis of primary texts in translation. Semester I: India and Southeast Asia. Semester II: China and Japan.

130. Theory and Practice of Worship (3)

The symbolic structure of devotional performance.

12-84215

1333-5 12 370

### 354 / Russian

The relations between religion and aspects of major cultural traditions. First semester: primarily the plastic arts and music. Second semester: primarily literature and drama.

132. Dynamics of Religious Experience (3)

Prerequisite: Six units in humanities or social sciences.

Chief data and major approaches in the study of individuals' religious behavior and experiences. Special attention to relevant problems in world religions and philosophical views of man. (Formerly numbered 125.)

135. Religion and Science (3) I, II

Prerequisite: Religious Studies 20 or 50.

A critical exploration of the relation of science to religious conceptions of human nature and destiny.

136. Religion and Relevance (3) I, II

Prerequisite: Religious Studies 100A or 100B.

A critical exploration of the contemporary understanding of biblical religion in relationship to social action as exemplified in the writings of theologians and concerned laity. 140. The Oracular Tradition (3)

Prerequisites: Religious Studies 50; and 121A, 121B, 126A, 126B, 131A, or 131B. Oracular traditions of East and West, with special attention to the I Ching and the Tarot.

166. Honors Course (1-3) I, II Refer to Honors Program.

180. A Major Figure (3) I. II

Prerequisites: Religious Studies 20 or 50, and three upper division units in religious studies. Life, works, and significance of one major figure in a religious tradition. May be repeated with new content. Maximum credit six units.

181. A Metaphysical Doctrine (3) I, II

Prerequisites: Philosophy 1B, Religious Studies 20, or 50; and three upper division units in religious studies.

Systematic study of a selected theme or problem basic to the teachings of one of the major religious traditions. May be repeated with new content. Maximum credit six units. 190. Advanced Studies in Religious Practices (3)

Prerequisite: Nine upper division units in religious studies including at least three units in Oriental traditions and three in Western traditions. Research in the function and significance of ritual, prayer, and meditation.

191. Advanced Studies in Religious Doctrines (3)

Prerequisite: Nine upper division units in religious studies including at least three units in Oriental traditions and three in Western traditions.

Research in the significance of selected teachings of the major religions.

192. Recent Christianity (3)

Prerequisite. Religious Studies 111B; 114 is recommended.

Themes in the development of Christian institutions and doctrines in the 19th and 20th centuries.

199. Special Study (1-3) I, II Individual study. Six units maximum credit.

Prerequisite: Twelve upper division units in religious studies.

# Russian

## In the College of Arts and Letters

Faculty

Professors: Dukas, Kozlik Associate Professors: Fetzer Assistant Professors: Bialy

Offered by the Department of German and Russian

Master of Arts degree in Russian.

Major in Russian with the A.B. degree in liberal arts and sciences. Minor in Russian

Teaching major in Russian with specialization in secondary teaching,

Teaching minor in Russian with specialization in both elementary and secondary teaching.

### **Russian Major**

With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

Students majoring in Russian must complete a minor in another field to be approved by the departmental adviser in Russian.

Preparation for the major. Russian 1, 2, 3, 4, 10, and 11. (20 units.) Recommended: History 4A-4B.

Major. A minimum of 24 upper division units in Russian to include Russian 101A-101B, 102A-102B, and 12 units in period literature excluding Russian 144A-144B or 6 units in period literature and 6 units in Russian linguistics.

### **Russian Minor**

The minor in Russian consists of a minimum of 15 units in Russian to include Russian 4 and six units of upper division courses.

## **Russian Major**

### For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education.

This major may be used by students in Teacher Education as an undergraduate major for the A.B. degree in liberal arts and sciences.

Proficiency Examination: Before taking a student teaching assignment in Russian, the candidate for the credential may be required to pass an oral and written proficiency examination in the language, administered by the Department of German and Russian. The candidate must consult with the chairman of the Department of German and Russian concerning this examination.

## Specialization in Secondary Teaching

Preparation for the major. Russian 1, 2, 3, 4, 10, and 11. (20 units.)

Teaching Major (Undergraduate). A minimum of 24 upper division units in Russian to include Russian 101A-101B, 102A-102B; Humanities 152, 153; and six upper division units of Russian in the period literature of the language. Recommended: Russian 130 or 131.

Postgraduate Year. Six units of graduate courses in Russian.

### **Russian Minor**

# For the Standard Teaching Credential

Proficiency Examination: Before taking a student teaching assignment in Russian, the candidate for the credential may be required to pass an oral and written proficiency examination in the language, administered by the Department of German and Russian. The candidate must consult with the chairman of the Department of German and Russian concerning this examination.

# Specializaton in Elementary Teaching

The minor in Russian for elementary teaching consists of not less than 20 units in Russian, six units of which must be in upper division courses.

# Specializaton in Secondary Teaching

The minor in Russian for secondary teaching consists of not less than 20 units in Russian, to include in the lower division, Russian 1, 2, 3, 4, 10, and 11; and in the upper division, Russian 101A-101B, 102A-102B, 130 or 131.

# High School Equivalents

High school foreign language courses may be used for purposes of placement in college courses and may be counted toward meeting the foreign language requirement in various majors. These high school courses will not count as college credit toward graduation.

The first two years of high school Russian may be counted as the equivalent of Russian 1; three years the equivalent of Russian 2; and four years the equivalent of Russian 3. The last year-course taken by a student in the high school language sequence may be repeated in college for graduation credit, not to exceed four units of repeated foreign language work.

### Lower Division Courses

Native speakers of Russian will not receive credit for taking lower division courses in Russian except with advance approval from the department.

### 356 / Russian

1. Elementary (4) I. II

Four lectures and one hour of laboratory.

Pronunciation, oral practice, reading in Russian literature, minimum essentials of grammar. Not open to students who have completed three years of high school Russian.

2. Elementary (4) I, II Four lectures and one hour of laboratory.

Prerequisite: Russian 1.

Continuation of Russian 1. Not open to students who have completed four years of high school Russian. 3. Intermediate (4) I

Prerequisite: Russian 2 or three years of high school Russian. A practical application of the fundamental principles of grammar. Reading in Russian of cultural material, short stories, novels or plays; oral practice. 4. Intermediate (4) II

Prerequisite: Russian 3.

Continuation of Russian 3.

8A-8B. Scientific Reading (2-2)

Prerequisite: Russian 2 or three years of high school Russian. 8A is prerequisite to 8B. Intensive reading in scientific fields. 10. Conversation (2) I

Prerequisite: Russian 2 or three years of high school Russian.

Practice in the spoken language; practical vocabulary; conversation on assigned topics; simple dialogues and plays. 11. Conversation (2) II

Prerequisite: Russian 10 or Russian 3, or four years of high school Russian. Continuation of Russian 10.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 153. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

### **Upper Division Courses**

### 101A-101B. Conversation and Composition (3-3) Prerequisite: Russian 4.

Translation into Russian from moderately difficult English prose, with written reports in Russian. Readings and oral discussions of Russian plays and short stories.

102A-102B. Survey of Russian Literature (3-3)

Russian literature from its beginnings, with emphasis on the nineteenth and twentieth centuries. 103. Old Russian Literature (3)

Masterpieces of Russian literature before 1700.

104. Russian Literature of the 18th Century (3)

Russian Classicism and Sentimentalism.

105A-105B. The Russian Short Story, Drama, and Poetry of the 19th Century (3-3) Development of the Russian short story, drama, and poetry of the 19th Century. 110A-110B. The Russian Novel of the 19th Century (3-3)

Development of the Russian novel of the 19th Century.

111. Russian Literature of the 20th Century (3)

Poetry, prose, and drama of the 20th century.

130. Russian Syntax and Stylistics (3) Prerequisite: Russian 101A-101B.

The structure of contemporary Russian.

131. Russian Phonology and Morphology (3)

Prerequisite: Russian 4 and 11.

The sounds and forms of contemporary Russian.

144A-144B. Masterpieces of Russian Literature (3-3) I, II

Selected Russian literary work in English translation. Semester I: The classic Russian authors of the 19th century—Pushkin, Gogol, Dostoyevsky, Tolstoy, and Chekhov. Semester II: literature of the Modernist and Soviet periods. 166. Honors Course (1-3) I. II

Refer to Honors Program.

185. Topics in Russian Literature (3)

Topics in Russian literature to be selected by instructor. May emphasize an author, period, movement or genre. Intended primarily for the nonspecialist. Does not fulfill language requirement. May be repeated with new content. Maximum credit six units.

Prerequisite: 12 units of upper division Russian. Structure of Old Church Slavic with readings and analysis of medieval Slavic texts. 203. Slavic Linguistics (3) Prerequisite: 12 units of upper division Russian. Selected topics in historical and comparative Slavic linguistics. 204A-204B. The Soviet Novel and Short Story (3-3) Prerequisite: 12 units of upper division Russian. Intensive study of major writers of Soviet prose fiction. 205. Russian Poetry from Pushkin to the Present (3) Prerequisite: 12 units of upper division Russian. The major Russian poets of the nineteenth and twentieth centuries. 253. Russian Literary Criticism (3) Prerequisite: 12 units of upper division Russian. Literary criticism from the early 18th century to the present. 255. Seminar: A Major Author or Movement (3) Prerequisite: Russian 290. A major author or movement. Maximum credit six units applicable to a master's degree. 290. Research and Bibliography (3) Prerequisite: 12 units of upper division Russian. Purposes and methods of research in Russian literature and Slavic linguistics. 298. Special Study (1-3)

Individual study. Six units maximum credit.

Prerequisite: 18 units of upper division Russian and consent of staff; to be arranged with department chairman and instructor.

299. Thesis (3)

Prerequisite: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

# Social Welfare In the School of Social Work

### Faculty

Professor: Pilcher, D. Associate Professors: Griffin, Haworth, J., Pilcher, A., Perry Assistant Professors: Fort, Guidry, Watson Lecturers: Brewer, Garner, Hubert, Stanger

Offered by the School of Social Work

Major in social welfare with the A.B. degree in liberal arts and sciences. Major in social welfare with the A.B. degree in applied arts and sciences. Minor in social welfare.

# Social Welfare Major

# With the A.B. Degree in Liberal Arts and Sciences or in Applied Arts and Sciences

All candidates for a degree in liberal arts and sciences or in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog. A minor is not required with this major.

A minor is not required with this major. This major provides the undergraduate portion of the program leading to the Master of Science in Social Work. In addition, it serves broad educational purposes based on an understanding of contemporary social welfare programs. It prepares for immediate employment in those social welfare positions which do not require professional social work education at the graduate level, and it qualifies one for admission to graduate professional schools of social work.

Preparation for the major. Anthropology 2; Economics 1A, 1B; Political Science 1 and 2; Sociology 1, 10, 60; and Psychology 1, (27 units). Recommended: Biology 1 and 2.

Social Welfare / 357
#### 358 / Social Welfare

Major. (Undergraduate): A minimum of 31 upper division units to include: Social Welfare 100A-100B; 180A-180B; 182A-182B; 183A-183B; and 189A-189B; Sociology 140 or Psychology 145.

Recommended: Social Welfare 187 (strongly recommended for those students planning to seek admission to the San Diego State School of Social Work), Sociology 122, Psychology 106, Biology 159, and courses from anthropology, literature, history, philosophy, political science, economics, psychology, and sociology. Students should consult with their adviser in social welfare for selection and arrangement of courses

#### Social Welfare Minor

The minor consists of a minimum of 15 units in social welfare, nine units of which must be in upper division courses.

#### Lower Division Courses

#### 30. Contemporary Courtship and Marriage (3) I, II

Developing understanding and ability to evaluate various concepts, attitudes and value systems as they relate to contemporary courtship, marital and family relationships. Assist students in coping with interpersonal relationships. Not open to students with credit in Home Economics 35, Sociology 35, or other lower division course in courtship and marriage or marriage and the family. (Formerly numbered Social Welfare 35.)

80. Explorations in Human Services (3) I, II

Two lectures and three hours of field work.

Orientation to the field of social welfare. Readings, class discussions and participation in social welfare activities on campus and in the community. Work as a volunteer in the agency is required in a variety of field settings. Scheduling is flexible.

#### 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

100A-100B. Man in Society (3-3) I. II

Prerequisites: Biology 1 and 2, Psychology 1, and Sociology 1; Social Welfare 100A is a prerequisite to 100B.

Biological, psychological, and social aspects of human growth and development from birth to death. Integration of concepts from various disciplines.

166. Honors Course (1-3) I, II

Refer to Honors Program.

180A. Exploring Social Issues (3) I, II

Prerequisite: Sociology 10.

Study of the social forces and institutions as they relate to and determine social policy.

180B. Exploring Social Services (3) I. II

Prerequisite: Social Welfare 180A.

Study of issues and dilemmas related to the delivery of social services.

181. Field Observation (1-2) I, II

Prerequisite: Social Welfare 80.

Field observation assignments in the social welfare area. Maximum credit four units.

182A-182B. Social Work Practice (3-3) I, II Prerequisites: Social Welfare 100B and 180B.

Concurrent registration in Social Welfare 183A and 189A for 182A; Concurrent registration in Social Welfare 183B and 189B for 182B.

The professional base, principles, and interventive techniques of social work practice with individuals, families, groups, and communities.

183A-183B. Integrating Proseminar (2-2) I. II

Prerequisites: Social Welfare 100B and 180B. Concurrent registration in Social Welfare 182A and 189A for 183A; concurrent registration in Social Welfare 182B and 189B for 183B.

The integration of social work theory, principles, and practice techniques.

185. Public Welfare (3) I, II

A historical and current perspective of public welfare. Analysis of current programs of social insurance, public assistance, general relief, and other public welfare policies and programs.

#### Social Work / 359

187. Methods of Social Welfare Research (3) I, II

Prerequisites: Sociology 60 and Social Welfare 189A.

Sources, nature, and uses of social work theory and research. Application of the principles of scientific analysis to the study of social welfare institutions and the practice of social work.

189A-189B. Field Experience in Social Welfare (3-6, 3-6) I, II

Prerequisites: Social Welfare 100B and 180B.

Concurrent registration in Social Welfare 182A and 183A for 189A; concurrent registration in Social Welfare 182B and 183B for 189B.

Eight to sixteen hours per week of laboratory field assignments in selected social welfare activities.

197. Investigation and Report (3) I, II

Prerequisite: Consent of instructor.

Analysis of special topics in social welfare.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor.

# Social Work

#### In the School of Social Work

The graduate program of the School of Social Work is accredited by the Commission on Accreditation of the Council on Social Work Education.

#### Faculty

Professors: Haworth, G., Horowitz, Ishikawa, Kelley (Associate Dean), Lee, Maxwell, Morgan, Ontell, Pilcher, D., Reichert (Dean), Stumpf, Tebor, Weinberger

Associate Professors: Anderson, Andresen, Clary, Griffin, Haworth, J., Herman, Kahn, Kessel, Peer, Perry, Pilcher, A., Sardinas, Totman

Assistant Professors: Ajemian, Baily, Cohen, Fletcher, Fort, Gilliam, Guidry, Hollander, Raymer, Watson, E., Weissman

Lecturers: Brewer, Garner, Hubert, Jacobs, Logan, Mason, Munoz, Ngubo, Stanger, Treske Appointments Under Grants from Outside Funds

Lecturers: Hudson, Kukkonen, Murphy, Richardson, Schiffrin, Shenko, Stanford

Offered by the School of Social Work

Master of Social Work, a two-year degree. Master of Science in Social Work, a one-year degree.

#### **Graduate** Courses

Prerequisite for enrollment in all graduate courses: admission to the School of Social Work. 200. Social Welfare Policy and Services I (3)

Social welfare as a societal institution; philosophical, historical, and comparative analysis of the welfare functions, issues, and problems, with special focus on personal and social

deprivation. 201. Social Welfare Policy and Services II (3)

Prerequisite: Social Work 200. Conceptional analysis of social welfare programs related to income maintenance and other social service areas, including social insurance, child welfare, and community development. 202. Social Welfare Policy and Services III (3)

Prerequisite: Social Work 201. Problems and issues in emerging social welfare programs, including analysis of the structure of social services and of social work as a profession.

203. Social Welfare Policy and Services IV (3)

Prerequisite: Social Work 201.

Analysis of existing or projected social welfare programs or service.

205. Social Work Administration I (3)

Prerequisite: Social Work 201. Administration as an aspect of all social work practice. nature of social work administration involving board and staff participation in determining goals and in planning programming and management operations to achieve goals. Administrative organization; interagency policy and control; management processes.

#### 360 / Social Work

220. Human Behavior and Social Environment I (3)

Theoretical perspectives on man in the changing world. View based on biological, psychological, interpersonal, and social structure assumptions over the life-cycle, for application to social work practice.

221. Human Behavior and Social Environment II (3)

Prerequisite: Social Work 220.

Examination of deviant behavior from relative frameworks of a medical model and a career process model. Selected social problem areas are used as illustrations.

222. Human Behavior and Social Environment III (3)

Prerequisite: Social Work 221.

Theories of natural and induced change in human behavior which have utility for social work practice.

230. Social Work Practice I (3)

Prerequisite: Concurrent registration in Social Work 250.

Principles of social work practice with individuals, families, groups, and communities. Attention is given to social work objectives, principles and skills.

231. Social Work Practice II (3)

Prerequisites: Social Work 230 and concurrent registration in Social Work 251

Principles of social work practice with individuals, families, groups, and communities with emphasis on refinement of skills of social study and social problem analysis. Attention to interactional and small group processes in determination of goals and change.

232. Social Work Practice III (3)

Prerequisites: Social Work 231 and concurrent requirement in field work.

Social work intervention with families and groups toward personal, social, organizational, and institutional change and problem solving. Emphasis on social, ethnic, and economic interaction contexts.

233. Social Work Practice IV (3)

Prerequisites: Social Work 231 and concurrent requirement in field work.

Designed to offer opportunity for integration and application of the student's knowledge of an array of approaches to practice. Specific content relevant to selected models of social problems experienced by individuals, families, and groups in interaction with their social environment.

#### 234. Social Work Practice V (3)

Prerequisites: Social Work 231, and concurrent requirement in field work.

Applications of major theories of social change to improve the social environment and ameliorate social problems of individuals, families and groups. Model problems in social welfare planning; mobilization of resources; analysis of issues and resistances; designing programs and structures and reassessments.

235. Social Work Practice VI (3)

Prerequisites: Social Work 231, and concurrent requirement in field work.

Exploration of collaborative social work roles with other professional roles in planned change. Differential applications of values, strategies and power in social welfare and host settings, by and on behalf of various population groupings.

236. Social Work Practice VII (4)

Prerequisite: Concurrent registration in Social Work 232 or 234.

Laboratory field instruction enabling the student to integrate social work theory, knowledge and concepts in developing interventive skills with individuals, families, groups, organizations and communities. Enrollment limited to students admitted to the MSSW program.

237. Social Work Practice VIII (4)

Prerequisite: Social Work 236.

Continuation of Social Work Practice VII with emphasis on refinements of skills in intervention with individuals, families, groups, organizations and communities.

238. Social Work Practice IX (6-8) S

Emphasis on the further development of skills with individuals, families, groups, organizations, and communities. Enrollment limited to students admitted to M.S.S.W. program.

#### 250. Field Instruction I (4)

Prerequisite: Concurrent registration in Social Work 230.

Field instruction in a public or voluntary social work setting. Experiences are drawn upon in relation to classroom learning to emphasize application of social work objectives, principles and skills to services to individuals, families, groups, and communities.

#### 251. Field Instruction II (4)

Prerequisite: Social Work 250 and concurrent registration in Social Work 231. Continuation of field instruction initiated in Social Work 250. Opportunities are provided for the application of social study and social problem analysis to experience with interactional and small group processes.

252. Field Instruction III: Individuals, Families and Groups (4-5)

Prerequisites: Social Work 251 and concurrent registration in Social Work 232. Field instruction in a social work setting providing a concentration on social work practice

aimed at achieving change in or on behalf of individuals, families, and groups. Practice under educational direction at an advanced level.

253. Field Instruction IV: Individuals, Families and Groups (4-5)

Prerequisites: Social Work 252 and concurrent registration in Social Work 233. Continuation of Field Instruction III at an advanced level. Emphasis is placed on the use

of diverse problem-solving strategies and resources in social work

255. Field Instruction V: Organizations and Communities (4-5) Prerequisites: Social Work 251 and concurrent registration in Social Work 234. Field instruction in a social work setting providing a concentration on social work practice aimed at achieving changes in social policies, organizations, and communities. Practice under educational direction at an advanced level.

256. Field Instruction VI: Organizations and Communities (4-5)

Prerequisites: Social Work 255 and concurrent registration in Social Work 235. Continuation of Field Instruction V at an advanced level. Emphasis is placed on the use of diverse social work strategies and resources in social planning or community development. 270. Seminar. Social Work Analysis (1-4)

Discusson of student experience in field instruction and its broader implications. Maximum credit four units applicable on a master's degree.

290A-290B. Social Work Research Methods and Analysis (2-2)

Definition and purpose of research in social work. Techniques and methods used in collecting, organizing, and interpreting social welfare and related data; steps involved in planning a research project and selecting a research design.

Selected topics in social work and/or social welfare. Topics to be announced in the class 291. Seminar (2-3) schedule. Maximum credit six units applicable on a master's degree.

297A-297B. Research (3-3)

Prerequisite: Social Work 290.

Research in the field of social work and completion of a research project. Individual or group project.

Prerequisite: Consent of staff; to be arranged with Dean and instructor. Individual study. Six units maximum credit.

## Sociology In the College of Arts and Letters

#### Faculty

Emeritus: Barnhart Professors: Daniels, DeLora, J. R., El-Assal, Gillette (Chairman), Kirby, Milne, Mouratides,

Wendling, Winslow Associate Professors: Buck, Chandler, DeLora, J. S., Schulze, Somerville, Sorensen, Werner Assistant Professors: Cottrell, Drake, Emerick, Halpern, Kennedy, Kolodij, Preston,

Scheck, Stephenson Lecturers: Arbini, Barron, Ima, Kirkpatrick, McJunkins, Mueller

Offered by the Department

Master of Arts degree in sociology.

Major in sociology with the A.B. degree in liberal arts and sciences Minor in sociology

# Sociology Major

With the A.B. Degree in Liberal Arts and Sciences All candidates for a degree in liberal arts and sciences must complete the graduation

requirements listed on page 57 of this catalog.

Students majoring in sociology must complete a minor in another field.

#### 362 / Sociology

Preparation for the major. Sociology 1, 10, and 60 (9 units.) Major. A minimum of 24 upper division units in sociology to include Sociology 101, 122. and 140.

#### Sociology Minor

The minor in sociology consists of from 15 to 22 units in sociology, nine units of which must be in upper division courses.

Lower Division Courses

1. Introductory Sociology (3) I, II

This course is prerequisite to all upper division courses in sociology

Development and use of the concepts applied to sociological analysis; the effects of isolation and social contacts, interaction, processes, forces, controls, collective behavior, and social progress. Not open to students with credit in Sociology 102.

Revolutionary and reform movements in relationship to the larger society. Conditions

leading to development of social movements, emergence of leadership, ideologies, strategies, recruitment of members and social consequences, case studies in depth.

148. Small Groups (3) I

Prerequisites: Sociology 1 and 140.

Processes, morale and organization of small groups; their role in society and institutions such as industry, military, recreation and education; recent studies and methods of research.

150. Population Problems (3) I

Prerequisite: Sociology 1.

Problems of population relative to age, sex, and racial distribution. Population practices and theories. Biological and geographical aspects of population problems. International population movements.

151. Research Methods in Demography (3) II

Prerequisites: Sociology 60 or Economics 2, and Sociology 150.

Standard procedures in the measurement of fertility, mortality, natural increase, migration, population growth and manpower, and working activities. Appraisal of source materials. Students to complete one project during term.

157. Urban Sociology (3) II

Prerequisite: Sociology 1

The structure and function of the modern city; types of neighborhoods; forms of recreation; social forces in a metropolitan area; types of urban personalities and groups; rural-urban conflicts of culture. Practical field studies required.

160. Quantitative Methods in Social Research (3) I

Prerequisite: Sociology 60.

The use of parametric and non-parametric techniques in the analysis of social research data; including analysis of variance; covariance; multiple and partial correlational techniques.

164. Methods of Social Research (3) I, II

Prerequisites: Sociology 1 and 60.

Research methods and interpretation used in the study of communities, institutions, and social conditions.

197. Investigation and Report (3) I, II

Prerequisite: Fifteen units in sociology and consent of instructor. Analysis of special topics in sociology. Maximum credit six units.

199. Special Study (1-3) I, II Individual study. Six units maximum credit. Prerequisite: Consent of instructor.

#### **Graduate Courses**

200. Seminar in Social Theory (3) Prerequisites: Sociology 101 and 164.

Classics of sociology, American social theory, theory construction, application of theory to research, theoretical models, sociology of knowledge, special topics. See class schedule for specific content. Maximum credit six units applicable to a master's degree.

205. Directed Readings in Social Theory (3)

Prerequisites: Sociology 101 and 164.

Selected readings providing comprehensive coverage of the field of social theory.

210. Seminar in Social Disorganization (3)

Prerequisites: Sociology 110 and 164

Theories of social disorganization, anomie and alienation, deviance, crime, delinquency, personal pathology, institutional malfunction, social conflict, disaster, special topics. See class schedule for specific content. Maximum credit six units applicable to a master's degree.

215. Directed Readings in Social Disorganization (3)

Prerequisites: Sociology 110 and 164.

Selected readings providing comprehensive coverage of the field of social disorganization. 220. Seminar in Social Organization (3)

Prerequisites: Sociology 122 and 164.

Social groups, formal organization, organizational change, authority and leadership, special topics. See class schedule for specific content. Maximum credit six units applicable to a master's degree.

225. Directed Readings in Social Organization (3)

Prerequisites: Sociology 122 and 164.

Selected readings providing comprehensive coverage of the field of social organization. 230. Seminar in Social Institutions. (3)

Prerequisites: Sociology 122 and 164.

The family and kinship, political organization, economic organization, religion, education, industry, occupations and professions, social stratification, special topics. See class schedule for specific content. Maximum credit six units applicable to a master's degree.

235. Directed Readings in Social Institutions (3)

Prerequisites: Sociology 122 and 164.

Selected readings providing comprehensive coverage of the field of social institutions. 240. Seminar in Social Psychology: Sociological Approaches (3)

Prerequisites: Sociology 140 and 164.

Socialization, role theory, motivation, perception, self, social context of personality, attitude theory, interaction, language and symbolic process, social types, collective behavior, small groups, special topics. See class schedule for specific content. Maximum credit six units applicable to a master's degree.

245. Directed Readings in Social Psychology: Sociological Approaches (3)

Prerequisites: Sociology 140 and 164.

Selected readings providing comprehensive coverage of the field of social psychology. 250. Seminar in the Community (3)

Prerequisites: Sociology 157 and 164.

Ecological structure and process; community institutions and structure; community deterioration, planning and renewal; urbanization; suburbia; megalopolis; special topics. See class schedule for specific content. Maximum credit six units applicable on a master's degree. 255. Directed Readings in the Community (3)

Prerequisites: Sociology 157 and 164. Selected readings providing comprehensive coverage of the sociological study of human communities.

1413-6 1 130

#### 366 / Spanish

#### 260. Seminar in Research Methods (3)

Prerequisites: Sociology 101 and 164.

Analysis of methods used in current sociological research, including evaluation of reported findings. Discussion of research designs appropriate to particular types of projects. Evaluation of research in progress by members of the seminar. May be repeated with new content for additional credit. Six units maximum credit applicable on a master's degree.

265. Directed Readings in Research Methods (3)

Prerequisite: Sociology 164.

Selected readings providing comprehensive coverage of sociological research methods. 270. Seminar in Population and Demography (3)

Prerequisites: Sociology 164 and 150.

Demographic theories, fertility, mortality, migration, construction and application of demographic indices, demographic prediction, world population trends, special topics. See class schedule for specific content. Maximum credit six units applicable on a master's degree.

275. Directed Readings in Population and Demography (3)

Prerequisites: Sociology 164 and 150.

Selected readings providing comprehensive coverage of the fields of population and demography.

290. Bibliography (1)

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

297. Research (3)

Prerequisite: Sociology 164. Independent investigation of special topics.

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

Emeritus: Brown, L.

Professors: Baker, Case, Head (Chairman), Lemus, Walsh

Associate Professors: Barrera, Sender, Talamantes, Weeter

Assistant Professors: Christensen, Jiménez-Vera, O'Brien, Santaló, Segade, Windsor, Young, R. R.

#### Offered by the Department of Spanish and Portuguese

Master of Arts degree in Spanish.

Major in Spanish with the A.B. degree in liberal arts and sciences.

Teaching major in Spanish with specialization in both elementary and secondary teaching. Minor in Spanish.

Teaching minor in Spanish with specialization in both elementary and secondary teaching.

#### Spanish Major

#### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

Students majoring in Spanish must complete a minor in another field approved by the departmental adviser in Spanish.

Preparation for the major. Spanish 1, 2, 3, 4, 10, and 11. (20 units.)

Major. A minimum of 24 upper division units in Spanish to include Spanish 101A-101B, 102A-102B, and 12 units of courses in the period literature of the language.

#### Spanish Minor

The minor in Spanish consists of a minimum of 15 units in Spanish, six units of which must be in upper division courses.

All candidates for a teaching credential must complete all requirements for the applicable specialization as outlined in the section of this catalog on the School of Education. This major, with specialization in either elementary or secondary teaching, may be used by students in Teacher Education as an undergraduate major for the A.B. degree in liberal arts and sciences.

#### Specialization in Elementary Teaching

Preparation for the major. Spanish 1, 2, 3, 4, 10, and 11. (20 units.)

Teaching Major. A minimum of 24 upper division units to include Spanish 101A, 101B, 102A, 102B, 150, 190, and six upper division units of electives in Spanish.

#### Specialization in Secondary Teaching

Preparation for the major. Spanish 1, 2, 3, 4, 10, and 11. (20 units.)

Teaching Major (Undergraduate). A minimum of 24 upper division units in Spanish to include Spanish 101A-101B, 102A-102B, 150, 190, and six units of upper division electives.

Postgraduate Year. Six units of graduate courses (200 numbered courses) in Spanish.

#### Spanish Minor

Spanish Major

#### For the Standard Teaching Credential

For the Standard Teaching Credential

#### Specialization in Elementary Teaching

The minor in Spanish for elementary teaching consists of not less than 20 units in Spanish, six units of which must be in upper division courses.

#### Specialization in Secondary Teaching

The minor in Spanish for secondary teaching consists of a minimum of 20 units in Spanish, Spanish 101A-101B, 102A-102B.

#### **High School Equivalents**

High school foreign language courses may be used for purposes of placement in college courses and may be counted toward meeting the foreign language requirement in various majors. These high school courses will not count as college credit toward graduation.

The first two years of high school Spanish may be counted as the equivalent of Spanish 1; three years the equivalent of Spanish 2; and four years the equivalent of Spanish 3. The last year-course taken by a student in the high school language sequence may be repeated in college for graduation credit, not to exceed four units of repeated foreign language work. Students entering San Diego State with five or six years of high school Spanish may enroll in Spanish 4; the department recommends, however, that they take Spanish 21, 22, or 23.

#### Lower Division Courses

1. Elementary (4) I, II

Four lectures and one hour of laboratory. Pronunciation, oral practice, readings on Spanish culture and civilization, minimum essentials of grammar. Not open to students who have completed three years of high school Spanish.

Elementary (4) I, II 2

Four lectures and one hour of laboratory.

Prerequisite: Spanish 1 or two years of high school Spanish.

Continuation of Spanish 1. Not open to students who have completed four years of high

school Spanish. 3. Intermediate (4) I, II

Prerequisite: Spanish 2 or three years of high school Spanish.

A practical application of the fundamental principles of grammar. Reading in Spanish of cultural material, short stories, novels or plays; oral practice; outside reading with oral and written reports. Special sections available for the Spanish speaking.

4. Intermediate (4) I, II Prerequisite: Spanish 3 or four years of high school Spanish. Continuation of Spanish 3. Special sections available for the Spanish speaking.

10. Conversation (2) I, II Prerequisite: Spanish 2 or three years of high school Spanish.

Practice in the spoken language; practical vocabulary; conversation on assigned topics; simple dialogues and plays.

#### 368 / Spanish

11. Conversation (2) I, II Prerequisite: Spanish 10 or Spanish 3, or four years of high school Spanish. Continuation of Spanish 10. 21. Intermediate Oral and Written Composition (3) Prerequisites: Spanish 4 and 11. Directed written composition with stress on current usage. Oral reports on assigned topics. 22. Introduction to Syntax and Style (3) Prerequisites: Spanish 4 and 11. Study of structure and idiomatic usage. Analysis of style based on passages chosen from modern literature. 23. Introduction to Literature (3) Prerequisites: Spanish 4 and 11. Selected readings from Peninsular and Latin American prose. Oral and written reports and class discussions. Course conducted in Spanish. 40. Spanish Civilization (3) I Prerequisite: Spanish 4. The major currents and characteristics of Spanish culture, as expressed through the centuries in literature, art, and philosophy.

41. Spanish-American Civilization (3) II

Prerequisite: Spanish 4

The major currents and characteristics of Spanish-American culture, as expressed through the centuries in literature, art, and philosophy.

42. Mexican Civilization (3)

Prerequisite: Spanish 4.

The major currents and characteristics of Mexican culture, as expressed through the centuries in literature, art, and philosophy.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

101A-101B. Advanced Oral and Written Composition (3-3) Prerequisites: Spanish 4 and 11.

Translation into Spanish of moderately difficult English prose passages. Free composition in Spanish. Outside reading of modern Spanish plays, with written reports in Spanish. Oral practice on colloquial Spanish with extensive use of phonograph recordings. Special sections available for the Spanish speaking.

102A-102B. Survey Course in Spanish Literature (3-3)

Prerequisite: Spanish 4.

Important movements, authors, and works in Spanish literature from the Middle Ages to the present.

104A-104B. Spanish-American Literature (3-3)

Prerequisites: Spanish 4 and 11.

Reading from representative Spanish-American authors during the colonial, revolutionary and modern periods. Lecturers, class reading, collateral reading and reports.

105A-105B. Modern Spanish Drama (3-3)

Prerequisites: Spanish 4 and 11.

The development of the drama of Spain from the beginning of the nineteenth century to the present time.

106A-106B. Mexican Literature (3-3)

Prerequisites: Spanish 4 and 11.

Aspects of Mexican culture. The first semester, a rapid survey of Mexican literature from the colonial period to the twentieth century. The second semester, the twentieth century, with emphasis on the contemporary Mexican novel and theater.

107. Caribbean Area Countries Literature (3)

Prerequisites: Spanish 4 and 11

Literature of Caribbean Islands, Central America, Colombia and Venezuela, from colonial period to present. Special emphasis on contemporary era.

108. Andean Countries Literature (3)

Prerequisite: Spanish 4 and 11.

Literature of Ecuador, Peru, Bolivia and Chile from the period immediately preceding the Spanish conquest to today.

109. River Plate Literature (3)

Prerequisites: Spanish 4 and 11 Literature of Argentina, Paraguay and Uruguay from colonial period to present.

110. Nineteenth Century Spanish Novel and Short Story (3)

Prerequisites: Spanish 4 and 11. The development of the novel and short story in Spain in the nineteenth century.

111. Twentieth Century Spanish Novel and Short Story (3)

Prerequisites: Spanish 4 and 11.

The development of the novel and short story in Spain to 1936, with emphasis on the novel of the generation of 1898.

112. Contemporary Spanish Novel (3)

Prerequisites: Spanish 4 and 11.

The development of the novel and short story in Spain since 1936.

130. Poetry of the Spanish Golden Age (3)

Prerequisites: Spanish 4 and 11.

Major poets of the Siglo de Oro.

131. Prose of the Spanish Golden Age (3)

Prerequisites: Spanish 4 and 11.

Major prose writers of the Siglo de Oro.

132. Drama of the Spanish Golden Age (3)

Prerequisites: Spanish 4 and 11. The major dramatists of the Siglo de Oro.

140. Spanish Civilization (2)

Offered only at the Imperial Valley campus.

An advanced course in Spanish culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics.

141. Spanish-American Civilization (2) II

Offered only at the Imperial Valley campus.

An advanced course in Spanish-American culture. From the period of the Spanish Conquest to the present, with emphasis on the arts, literature, and philosophy. Lectures, class discussions, outside readings, written reports on individual topics.

144. Masterpieces of Spanish Literature (3)

Reading selections from major Spanish authors. Taught in English. (Formerly numbered Comparative Literature 144.)

149. Spanish Linguistics (3)

Prerequisites: Spanish 4 and 11.

Structural, historical, and applied Spanish linguistics.

150. Phonetics and Phonemics (3) II

Prerequisites: Spanish 4 and 11 with a grade of C or better.

The sounds of Spanish and of the Spanish phonemic system, with special attention to the problems involved in the teaching of Spanish pronunciation to English-speaking students.

166. Honors Course (1-3) I, II

Refer to Honors Program.

170. Spanish-American Poetry (3)

Prerequisites: Spanish 4 and 11. Spanish-American poetry of the 19th and 20th centuries.

171. Spanish-American Short Story (3)

Prerequisites: Spanish 4 and 11.

Principal Spanish-American short story writers.

172. Spanish-American Theatre (3)

Prerequisites: Spanish 4 and 11.

Principal Spanish-American dramatists and movements.

180. Modern Spanish Poetry (3)

Prerequisites: Spanish 4 and 11

Spanish poetry of the 19th and 20th centuries.

185. Selected Studies in Spanish (3) Topics in Spanish or Spanish-American language, literature, culture, and linguistics.

Maximum credit six units.

190. Advanced Grammar (3)

Prerequisites: Spanish 101A and 101B. Significant systematic features of modern Spanish grammar with analysis of passages from literature. Recommended for credential applicants.

#### 370 / Spanish

#### 199. Special Study (1-3) I, II

Individual study. Six units maximum credit. This course is intended only for students who are currently enrolled in or who already have credit for all upper division courses in Spanish available in any given semester. Prerequisite: Consent of instructor.

#### **Graduate Courses**

All graduate courses in the Department of Spanish and Portuguese have a prerequisite of 12 units of upper division courses in Spanish, or consent of instructor. 201. History of the Spanish Language (3) Prerequisite: Credit or concurrent enrollment in Spanish 149 or 150.

The development of the Spanish language in Spain and Spanish America, with particular attention to the phonology, morphology, and syntax of medieval Spanish.

202. Cervantes (3)

The principal prose works of Cervantes: The Novelas ejemplares and Don Quixote.

203. Lope de Vega and Calderón (3)

The works of Lope de Vega and Calderón.

204. The Spanish-American Novel (3) The Spanish-American novel to 1935.

205. The Gaucho Epic (3)

The Poesía gauchesca, with particular emphasis on Martín Fierro, Fausto, and Santos Vega.

The Modernista movement in Spanish America, with special attention to representative poets.

207. Medieval Spanish Literature (3)

Prerequisite: Spanish 201.

The literature of Spain from the earliest extant works to the Celestina. 208. The Modern Spanish Essay (3)

The thinkers, essayists, and philosophers of Spain from the generation of 1898 to the present. 209. The Spanish-American Essay (3)

Principal Spanish-American essayists of the 19th and 20th centuries. 210. Contemporary Spanish-American Prose Fiction (3)

The principal writers of prose fiction in Spanish America from the mid-thirties to today. 220. Seminar in Spanish Golden Age Literature (3) A representative author, a genre or movement of the Spanish Golden Age. Maximum

credit six units applicable on a master's degree. 230. Seminar in 19th Century Spanish Literature (3)

A representative author, a genre or movement of the 19th century in Spain. Maximum credit six units applicable on a master's degree. 240. Seminar in 20th Century Spanish Literature (3)

A representative author, a genre or movement of the 20th century in Spain. Maximum credit six credit units applicable on a master's degree. 250. Seminar in Spanish-American Literature (3)

A genre or movement of Spanish America. Maximum credit six units applicable on a master's degree. 255. Seminar in Spanish-American Culture and Thought (3)

Works of representative authors of Spanish America. Maximum credit six units applicable on a master's degree. 260. Seminar in Medieval Spanish Literature (3)

A representative author of the medieval period. Maximum credit six units applicable on a master's degree. 270. Applied Spanish Linguistics for Teachers (3)

Prerequisite: Spanish 149 or 150.

The application of linguistic theory to the teaching of Spanish at the secondary and college

levels.

290. Research and Bibliography (3)

Purposes and methods of research in the fields of the language and literature, the collection and collation of bibliographic material, and the proper presentation of the results of such investigation. Recommended for the first semester of graduate work.

#### Speech Communication / 371

294. Comprehensive Reading and Survey Course (3)

Prerequisite: Consent of graduate adviser and department chairman. A study of important movements, authors, and works in Spanish literature. Designed to supplement the reading done in previous courses, in preparation for the comprehensive examination in literature for candidates for the Master of Arts degree.

298. Special Study (1-3)

Prerequisite: Consent of staff, to be arranged with department chairman and instructor. Individual study. Six units maximum credit.

299. Thesis (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

#### Speech Communication In the College of Professional Studies

#### Faculty

Emeritus: Ackley

Professors: Adams, Benjamin (Chairman), Mills, Samovar Associate Professor: Sanders

Assistant Professors: Hunsaker, King, Moore

Offered by the Department

Master of Arts degree in speech communication.

Major in speech communication with the A.B. degree in applied arts and sciences. Teaching major in speech communication, with specialization in secondary teaching. Minor in speech communication.

Teaching minor in speech communication, with specialization in both elementary and secondary teaching.

# Speech Communication Major

With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Speech Communication 4, 5, 11A, 35 and 60. (15 units.)

Major. A minimum of 27 upper division units in speech communication to include Speech Communication 135, 150 and 192B; twelve units selected from (Rhetoric and Public Address) Speech Communication 101, 108, 109, 152, 154, 161, 162, 166, 180, 189, 194, 198, 199; or twelve units selected from (Communication) Speech Communication 109, 130, 166, 189; 191, 193, 198, 199; or twelve units selected from (General Speech Communication) Speech Communication 109, 130, 161, 162, 192B, 194 and six units of electives.

# Speech Communication Minor

The minor in speech communication consists of a minimum of 23 units in speech communication to include Speech Communication 3 or 4, 11A or 11B, 35, 60, and twelve units of upper division electives in speech communications.

# Speech Communication Major

# For the Standard Teaching Credential

All candidates for a teaching credential must complete all requirements for the applicable

specialization as outlined in the section of this catalog on the School of Education. This major may be used by the students in Teacher Education as an undergraduate major for the A.B. degree in applied arts and sciences.

# Specialization in Secondary Teaching

Preparation for the major. Speech Communication 4, 5, 11A, 35 and 60. (15 units.)

166, 180, 189, 194, 198, 199; or twelve units selected from (Communication) Speech Communication 109, 130, 166, 189, 191, 193, 198, 199; or twelve units selected from (General Speech Communication 109, 100, 109, 191, 190, 199; or twelve units selected from (General of electives.

1447-6 1 300

Speech Communication / 373

#### 372 / Speech Communication

Postgraduate Year. Six upper division or graduate units in speech communication. These may include any 100-numbered course not previously taken or any 200-numbered course.

### Speech Communication Minor

## For the Standard Teaching Credential

The minor in speech communication for elementary and secondary teaching consists of a minimum of 23 units to include Speech Communication 3 or 4, 11A or 11B, 35 and 60, and twelve units of upper division electives drawn from the speech communication major pattern.

#### Lower Division Courses

#### 3. Oral Communication (2-3) I. II

Training in fundamental processes of oral expression; method of obtaining and organizing material; outlining; principles of attention and delivery; practice in construction and delivery of various forms of speeches. Speech Communication 3 or 4 recommended in general education. Not open to students with credit for Mexican-American Studies 2A.

4. Intermediate Public Speaking (3) I, II

Practice in extemporaneous speaking on subjects of current interest, both national and local, with stress on organization and delivery. Speech Communication 3 or 4 recommended in general education. Not open to students with credit for Mexican-American Studies 2A.

5. Introduction to Speech Communication (3) I, II An introduction to the field of speech communication.

11A. Fundamentals of Interpretation (3) I, II

Application of the principles involved in "making words come alive": response to thought and mood, sensory association, emphasis, climax. Practice selections in poetry and prose.

11B. Intermediate Interpretation (3)

Prerequisite: Speech Communication 11A.

Oral reading of various types of material suitable for popular audiences: stories, humorous sketches, light and sentimental verse.

## 35. Principles of Communication (3) I, II

Identification, description, and study of fundamental communication principles such as definitions and models, coding, meaning, organization. Emphasis on applying principles to personal, historical, literary and political human interactions. (Formerly numbered and entitled: Speech Communication 62, Interpersonal Communication.)

60. Argumentation and Debate (3)

Obtaining and organizing of evidence and the construction and use of the brief; study and discussion of current issues; the presentation of formal and informal debates. Participation in intercollegiate debate optional.

61. Intercollegiate Debate (1) I, II

Two field trips required.

Three hours of activity and two coaching hours to be assigned. Credit for participation in intercollegiate program. Maximum credit four units, for 61 and 161.

64. Principles of Parliamentary Procedure (1) I, II Two hours.

The rules which govern discussion and procedures in organized assemblies. The class will be arranged as a parliamentary body to afford practice in the application of the rules.

#### 99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

101. Management of Speech Activities (1) I, II

Two hours of activity.

Planning, preparation, management and supervision of speech tournaments and other interscholastic activities under the supervision of the speech communication staff. Maximum credit two units.

108. Advanced Interpretation (3) I, II

Three lecture-demonstrations per week and 32 hours of laboratory per semester. Prerequisite: Speech Communication 11A or 11B.

Analysis of techniques of literary composition as guides to oral interpretation. Achievements of the creative artists as they affect the interpretative artist. 109. Workshop in Speech (1-3)

Study of some problems in speech communication. Maximum credit six units,

130. Semantics (3) I, II

Recognition of various types of linguistic meaning; logical distinctions in discourse; distinction between real and verbal disagreement; recognition and correction of semantic fallacies.

135. Theories of Human Communication (3) I, II

Prerequisite: Six units of speech communication.

Special emphasis on various communication theories and models; the relationship of mental variables such as perception, roles and status, behavior change, language and motivation to the entire communication process.

150. Rhetorical Theory and Criticism to 400 A.D. (3) I, II

An analysis of rhetorical theory and criticism with special attention to Plato, Aristotle, Isocrates, Quintillian, and Cicero. The development of theory and systems of criticism culminating in the application of principles to public address.

152. Rhetorical Theory and Criticism 400 A.D. to 1900 (3) I, II Prerequisite: Speech Communication 150. An analysis of rhetorical theory and criticism with special attention to Longinus, Vives, Ramus, Cox, Bacon, Campbell, Whately, Blair, and James. The development of theory and systems of criticism culminating in the application of principles to public discourse.

154. Contemporary Rhetorical Theory and Criticism (3) I, II

Prerequisite: Speech Communication 150.

An analysis of rhetorical theory and criticism in the twentieth century with special attention to Arnold, Bitzer, Burke, Hochmuth, and Winans. A unified body of principles for rhetorical theory and criticism will be derived and applied to contemporary discourse.

161. Intercollegiate Debate (1) I, II

Two field trips required. Three hours of activity and two coaching hours to be assigned. Credit for participation in intercollegiate program. Maximum credit four units for 61 and 161.

162. Advanced Argumentation (3) I

The approaches to argument and the patterns and problems in argument. Consideration of implications for society. Written and oral reports.

166. Honors Course (1-3) I, II

Refer to Honors Program.

180. American Public Address (3) I, II

Public discourse from the colonial period to the present.

189. Ethics of Speech Communication (3) Prerequisite: 6 upper division units in philosophy or speech communication. Classical and modern ethical concepts applied to oral persuasion.

191. Group Communication (3) I, II

The role of group discussion in a democratic society. Principles and methods of group discussion in problem solving and learning situations. Practice in dealing with questions of policy and controversial issues. Development of skills in discussion preparation, participation and leadership.

192A. Advanced Public Speaking (3) I

Prerequisite: Speech Communication 4.

The preparation and delivery of longer speeches. Study of classic models of public address. 192B. Oral Persuasion (3) II

Prerequisite: Speech Communication 4.

Oral persuasion with an emphasis on motivation and the evaluation of persuasive techniques. Research project on a significant current problem. Results of research and persuasive principles used in actual speech.

193. Mass Persuasion (3) I, II

Prerequisite: Speech Communication 4.

An historical and critical analysis of the theories, techniques and ethics of oral communicators who employ radio and television as a means of presenting social, political and

religious issues. 194. History of Public Address (3) II

Speakers and speaking from Ancient Greece to the present. Functions of public speaking in the growth and development of ideas, ideals, and institutions. Prerequisite: Speech Communication 4.

198. Selected Topics in Speech Communication (1-3) I, II

Prerequisite: Twelve units in speech communication. A specialized study of selected topics from the areas of speech communication. May be repeated with new content. Maximum credit six units.

#### 374 / Speech Communication

199. Special Study (1-3) I, II Individual study. Six units maximum credit. Prerequisite: Consent of instructor.

#### **Graduate Courses**

200. Research and Bibliography (3)

Basic reference works, scholarly and critical journals; introduction to bibliographical techniques; exercises and problems in methods and exposition of research as it relates to speech communication. Recommended for first semester of graduate work, and prerequisite to advancement to candidacy.

208. Seminar in Oral Interpretation (3)

Prerequisite: Speech Communication 108.

Aesthetic discipline applied to oral interpretation of various forms of literature. Analysis of thought and emotional content, and aesthetic form. Investigation of advanced problems of delivery. May be repeated with new content for maximum of six units.

230. Seminar in the Analysis of Language (3)

Prerequisite: Speech Communication 130.

Special problems in language theory which may be integrated into the larger bodies of rhetorical and communication theory.

235. Seminar in Communication Theory (3)

Prerequisite: Speech Communication 135.

Theories of communication; communication models, codes, perception and effects.

250. Seminar in Rhetorical Theory (3)

Leading figures in rhetorical theory from Plato to contemporary theorists. Special attention given to the application of theory to public address.

251. Seminar in Rhetorical Criticism (3)

Major systems of speech criticism. Special attention to measuring the effectiveness of a given piece of discourse in terms of actuality and potentiality.

262. Seminar in Argumentation (3)

Prerequisite: Speech Communication 162.

Significant topics in argumentation: the formulation of problems for argument; analysis; the brief with patterns of argument, traditional and recent; presumption; probability; laws of evidence; fallacies

280. Seminar in Public Address, 1600-1850 (3)

Examination of the problems confronting American speakers and the solutions they offered. Special emphasis placed on the rhetorical means used to solve major crises in American history.

281. Seminar in American Public Address, 1850 to Present (3)

Examination of the problems confronting American speakers and the solutions they offered. Special emphasis placed on the rhetorical means used to solve major crises in American history.

282. Seminar: Contemporary American Public Address (3)

Prerequisites: Speech Communication 190 and 192A or 192B.

290. Experimental Procedures in Speech Communication (3)

Prerequisite: Credit or concurrent registration in Speech Communication 200. Examination and evaluation of appropriate experimental procedures and traditional methods; special problems in research design.

291. Seminar in Group Discussion Theory (3)

Prerequisite: Speech Communication 191

A study of descriptive and experimental literature on group discussion covering such topics as interaction, leadership, and means of evaluation.

293. Seminar: Greek and Roman Public Address (3)

Prerequisites: Speech Communication 150 and 192A or 192B.

294. Seminar: 18th Century British Public Address (3)

Prerequisites: Speech Communication 150 and 192A or 192B.

298. Special Study (1-3)

Individual study. Six units maximum credit.

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. 299. Thesis or Project (3)

Prerequisite: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

Professors: Earnest, Kopp (Chairman), Nichols, Riedman Associate Professor: Thile Assistant Professors: Allen, Dimmick, Wood

Lecturers: Sanchez

Offered by the Department

Master of Arts degree in speech pathology and audiology.

Major in speech pathology and audiology with the A.B. degree in applied arts and sciences. Minor in speech pathology and audiology.

Specialized preparation in lieu of a minor: teacher of deaf or severely hard of hearing. See Education.

Restricted Credential, Speech and Hearing Specialist (Plan II).

# Speech Pathology and Audiology Major With the A.B. Degree in Applied Arts and Sciences.

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with the major.

Preparation for the major. Mathematics 3 (or qualification on the mathematics placement examination); Physics 5; Psychology 1, 50, and 70; Speech Communication 3 or 4; Speech Pathology and Audiology 4, 5, and 6 (26–27 units).

Major. A minimum of 24 upper division units in speech pathology and audiology selected with the approval of the adviser. Those with an emphasis in the area of deaf education must include Education 167, 172, and 179 to complete their major.

# Speech Pathology and Audiology Minor

The minor in speech pathology and audiology consists of a minimum of 18 units in speech pathology and audiology, ten of which must be in upper division courses. The following are required: Speech Pathology and Audiology 4, 5, 6, 121, 140, 142; and three units selected from 120, 122, 124, or 151.

# Restricted Credential: Speech and Hearing Specialist

This is a five-year program leading to a credential which authorizes service in all grades in the area specified. It requires the same lower division courses as are required in the preparation for the major in speech pathology and audiology, a bachelor's degree, and completion of the following courses: Education 101 (or 202) and 167; Psychology 106; Speech Pathology and Audiology 120, 121, 122, 123, 124, 126, 127, 128, 129, 140, 145, 151; and 15 units, be selected from: 156, 157, 240, 244, 245, 246, 249, 256, 257.

# Lower Division Courses

Vocal and articulatory dynamics as bases of standard and non-standard oral language 4. Voice and Articulation (3) I, II patterns. Practice in recognition and recall of such patterns.

Audiology in diagnosis and rehabilitation of hearing impairment, medical practice, hearing 5. Survey of Audiology (2) I conservation and research. Fifteen hours of observation required.

6. Language, Speech and Hearing Disorders (3) I, II Normal growth and development and its relationship to language, speech and hearing development and disorders, covering all areas of exceptionality. Fifteen hours of observation or project required.

7. Management of Clinical Activities (1) I, II Assisting in the operations of the speech and hearing clinic. Maximum credit two units.

(Formerly numbered Speech Pathology and Audiology 101.)

#### 376 / Speech Pathology and Audiology

8. Oral Communication Laboratory (1) I, II

Two hours of laboratory.

Individual laboratory training on specific speech problems. Student chosen through testing by Department of Speech Pathology and Audiology. (Formerly numbered Speech Pathology and Audiology 3.)

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

105. Language and Speech Development and Disorders (3) I, II

Normal development of speech and language; prevention and remediation of communication disorders commonly found in the classroom. Five hours of observation required per semester. For students not majoring in speech pathology and audiology.

120. Phonetics (3) I, II

Auditory and kinesthetic analysis of the sounds of the English language. Problems of foreign and bilingual dialect.

121. Anatomy, Physiology and Pathology of Speech (3) I, II

Prerequisites: Speech Pathology and Audiology 6 and Psychology 50.

Anatomy, physiology and pathology of speech. Survey of aphasia, cerebral palsy, cleft palate, voice disorders, including study of multiply handicapped child. Twenty hours of observation required.

122. Functional Communication Disorders (3) I

Prerequisites: Speech Pathology and Audiology 6 and 121.

Speech disorders of emotional etiology, including stuttering. Genetic and cultural aspects of speech and language; phenomena of human communication, including theories of learning and behavior. Relation between disorders of personality and difficulties in communication.

123. Mechanics of Speech Production (3) I, II

Two lectures and two hours of laboratory.

Prerequisite: Psychology 50.

Functional anatomy of head, neck and thorax including laboratory exercises and demonstrations of charts, models, histological materials and cadavers.

124. Methods of Speech Therapy (3) I

Prerequisites: Speech Pathology and Audiology 6 and 121.

Application of theories of learning to techniques in treatment of specific speech and language disorders with emphasis on problems of articulation, voice, and foreign dialect. Demonstrations.

126. Clinical Practice in Speech Pathology (1-3) I, II, S

Prerequisites: Speech Pathology and Audiology 120, 124, and three upper division units in speech pathology and audiology.

Supervised practice with representative speech problems. Maximum combined credit, eight units for Speech Pathology and Audiology 126, 145, 146 and 226. One unit represents 26 hours of direct clinical practice.

127. Diagnostic Methods in Speech Pathology (3) I, II

Prerequisites: Speech Pathology and Audiology 120, 121, 123, and 140, and credit or concurrent registration in Speech Pathology and Audiology 126.

Principles and procedures in the assessment and prognosis of communication disorders to include delayed speech and mental retardation. Case histories, testing, interviewing, and clinical reporting. Child, parent, and teacher counseling.

128. Diagnostic Practicum in Speech Pathology (3)

Prerequisite: Speech Pathology and Audiology 127. Supervised clinical practice in diagnostic methods. Experience in multi-disciplinary assessment. Practicum minimum of six hours.

129. Speech Therapy in the Public Schools (2) 1

Prerequisite: Speech Pathology and Audiology 121.

Knowledge, goals, organization, procedures in public education as related to speech and hearing; conducting surveys; preparing reports. Includes 15 hours of observation and 15 hours of participation and screening per semester.

130. Family Communication Dynamics (3) S

Prerequisites: Speech Pathology and Audiology 122 and 126.

The communication environment in the home. Parent-child interaction in relation to the origin and alleviation of functional and organic speech disorders.

131. Language Structure (3)

Prerequisite: Speech Pathology and Audiology 6.

Systematic study of the design features of language as they relate to communication behavior. The primary focus is the role of language structure in disordered communication.

132. Assessment of Language Disorders (3) I, II

Prerequisite: Speech Pathology and Audiology 131.

Identification of semantic and structural features of language.

133. Clinical Practice in Public Schools (4) I, II

Prerequisite: Four units of practica.

Clinical practice in elementary or secondary schools or community colleges in speech pathology. Applies only toward Restricted Credential, Speech and Hearing specialist.

140. Audiometry: Principles (3) I, S

Prerequisite: Psychology 50, Speech Pathology and Audiology 5.

Anatomy and physiology of the human ear, theories of hearing, physics of sound, medical aspects, pathology and surgery of the ear, survey of current audiometric techniques.

141. Audiometry: Application (3) II Two lectures and two hours of laboratory.

Prerequisite: Speech Pathology and Audiology 140.

Tuning fork assessment, speech testing, masking, tests for nonorganic and for sensorineural hearing loss, industrial audiometry and hearing aid evaluation.

142. Techniques of Audiometry (1-3) I, II

Three hours of laboratory per unit.

Prerequisite: Credit for or concurrent registration in Speech Pathology and Audiology 140. Provides the laboratory experience necessary for the California School Audiometrist Certificate when taken concurrently with 171A. Duplicates classic auditory experiments when taken in conjunction with 143 or 244. Maximum credit three units.

143. Hearing Amplification (1-3) II

Prerequisites: Speech Pathology and Audiology 140 and 141. Specific application of amplification for rehabilitation of the impaired hearing mechanism; devices, methods for their evaluation, historical perspective and practical considerations. 145. Clinical Practice in Audiologic Assessment (1-3) I, II, S

Prerequisite: Speech Pathology and Audiology 141. Supervised procedures with pure tone, speech, and special audiologic testing. Maximum combined credit eight units for 126, 145, and 146. One unit represents 26 hours of direct

clinical practice. 146. Clinical Practice with Hard of Hearing (1-3) I, II, S

Prerequisite: Speech Pathology and Audiology 151.

Supervised practice with hard of hearing clients at San Diego State. Maximum credit eight units for 126, 145, and 146. One unit represents 26 hours of direct clinical practice.

150. Education of Deaf Children (3) I

Educational programs, services and resources for hearing impaired, historical background, philosophy, sociological and psychological problems.

151. Speech Reading and Auditory Training (3) I, II

Prerequisites: Speech Pathology and Audiology 120 and 140.

Theory and methods of speech reading; auditory training techniques including survey of amplification systems. Twenty-six hours observation in programs for deaf, severely hard of

hearing.

152. Speech for the Hearing Impaired (3) II

Prerequisites: Speech Pathology and Audiology 120, 123, 131, and 151. Theory and practice of speech habilitation of hearing impaired. Includes evaluation of current research and application in developing cognitive and motor processing.

153. Language for the Hearing Impaired (3) I

Prerequisites: Speech Pathology and Audiology 120, 131, and 151. Significant theories and research in language development as applied to hearing impaired

individuals.

156. Field Work with the Deaf (1-3) I, II Prerequisites: Speech Pathology and Audiology 151, 152, and 153. Supervised experience in auditory training, lipreading, speech therapy and language building, with individual cases. Maximum credit six units.

157. Clinical Practice with the Deaf (1-2) I, II Prerequisites: Speech Pathology and Audiology 151, 152, and 153. Supervised therapy with representative deaf problems in the California State University, Supervised therapy when top Clinic. Maximum combined credit six units for 156 and 157.

166. Honors Course (1-3) I, II

Refer to Honors Program.

1489-6 1 510

#### 378 / Speech Pathology and Audiology

190. Workshop in Speech Pathology and Audiology (1-3) I, II Study of some problem in speech pathology or audiology. Maximum credit six units. 198. Selected Topics in Speech Pathology and Audiology (1-3) I, II

Prerequisite: Twelve units in speech pathology and audiology

Specialized study of selected topics from the area of speech pathology and audiology. Maximum credit six units

199. Special Study (1-3) I, II Individual Study. Six units maximum credit. Prerequisite: Consent of instructor.

#### **Graduate Courses**

#### 200. Research and Bibliography (3)

Bibliographical techniques in methods and exposition of research in the fields of Speech Pathology and Audiology. Recommended for the first semester of graduate work, and prerequisite to advancement to candidacy.

201. Voice Science (3)

Prerequisite: Speech Pathology and Audiology 120.

Relationship of basic principles of sound to the speech mechanism. Analysis of speech sound production. Application of mechanical electronic equipment to speech.

202. Problems of Aphasia (3)

Prerequisites: Speech Pathology and Audiology 121 and 123.

Evaluation of aphasia, familiarity with diagnostic tools, theories of aphasia, and therapy for persons with disorders of symbolization (adult and congenital aphasia). It is recommended the student take one unit of Speech Pathology and Audiology 226 concurrently with this course.

#### 203. Problems of Cerebral Palsy (3)

Prerequisites: Speech Pathology and Audiology 123 and 124.

Evaluation, theories of treatment and therapy for persons with speech disorders in cerebral palsy. It is recommended the student take one unit of Speech Pathology and Audiology 226 concurrently with this course.

#### 204. Problems of Cleft Palate (3)

Prerequisites: Speech Pathology and Audiology 123 and 124.

Evaluation and therapy for persons with cleft palate speech problems. It is recommended the student take one unit of Speech Pathology and Audiology 226 concurrently with this course.

**205.** Problems of Stuttering (3) Prerequisite: Speech Pathology and Audiology 122.

Differential diagnosis of stuttering, individual and group therapy for children and adults with dysfluency problems. It is recommended the student take one unit of Speech Pathology and Audiology 226 concurrently with this course.

#### 206. Problems of Voice Pathology (3)

Prerequisites: Speech Pathology and Audiology 123 and 124.

Structural medical and functional voice problems. Differential diagnosis of vocal anomalies, theories and therapy for vocal problems. It is recommended the student take one unit of Speech Pathology and Audiology 226 concurrently with this course.

226. Advanced Clinical Practice in Speech Pathology (1 or 2)

Prerequisite: Speech Pathology and Audiology 124.

Supervised work with representative advanced speech cases such as stuttering, aphasia, laryngectomies, etc. Maximum credit four units. Maximum credit four units of 226, 245, and/or 246 applicable on a master's degree.

228. Advanced Diagnostic Methods in Speech Therapy (3)

Prerequisites: Speech Pathology and Audiology 126, 127, and 128.

Diagnosis of individuals with complicated speech problems as brain injury, congenital aphasia, adult aphasia, cerebral palsy, hearing loss, laryngectomy, mental retardation, stuttering and voice problems.

240. Medical Audiology (3) Prerequisites: Speech Pathology and Audiology 145 and 244.

Problems of diagnosis, referral and report writing. Testing in a medical setting and medically significant hearing pathologies.

244. Audiology (3)

Prerequisite: Speech Pathology and Audiology 141. Psychophysical concepts underlying clinical audiology. Relationship of audiologic test results to the conditions under which they were obtained.

245. Advanced Clinical Practice in Audiologic Assessment (1-2)

Prerequisites: Speech Pathology and Audiology 140 and 244.

Advanced casework in hearing evaluation. Maximum credit four units. Maximum credit four units of Speech Pathology and Audiology 226 and 245 applicable on a master's degree.

1500 G 1 56

#### Study Skills / 379

246. Advanced Clinical Practice with Hard of Hearing (1-2)

Prerequisite: Speech Pathology and Audiology 141. Supervised practice with problem hearing cases. Maximum credit four units of Speech Pathology and Audiology 226, 245, and 246 applicable on a master's degree.

249. Seminar in Audiology (3) Prerequisite: Speech Pathology and Audiology 244. Major research in clinical audiology. Audiologic techniques used in differential diagnosis. Maximum credit six units applicable on a master's degree. (Formerly numbered Speech Pathology and Audiology 250.)

254. Physiological Phonetics (3)

Prerequisites: Speech Pathology and Audiology 120 and 152. Physiology underlying the production of continuous speech, including transitional movements, based upon a syllabic concept. (Formerly numbered Speech Pathology and

Audiology 154.)

256. Advanced Field Work with the Deaf (1-3)

Prerequisites: Speech Pathology and Audiology 151, 152, 153. Supervised clinic practicum at an advanced level with representative deaf cases. Maximum credit six units of Speech Pathology and Audiology 256 and 257 applicable on a master's degree.

257. Differential Diagnosis of the Hearing Impaired (3)

Prerequisite: Speech Pathology and Audiology 6, 150, 151, or 127 Diagnosis of multiply-handicapped, hearing impaired children, including clinical teaching; assessment methods; materials and equipment; prognosis; current philosophies and trends. Maximum credit six units of Speech Pathology and Audiology 256 and 257 applicable on a master's degree. Twenty-six hours of observation are included.

258. Seminar in Deaf Education (3) II

Prerequisites: Speech Pathology and Audiology 150, 156; Education 179

Problems of deafness, evaluation of research, interdisciplinary approach to habilitation.

Prerequisite: Advancement to candidacy and consent of the graduate adviser.

Research in speech pathology, deaf education or audiology. Maximum credit two units applicable on a master's degree.

298. Special Study (1-3)

Individual study. Six units maximum credit.

Prerequisite: Consent of staff; to be arranged with department chairman and instructor.

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

## Study Skills Administered by the Dean of Students

Assistant Professors: Crafts (Acting Director), Denman Faculty Lecturers: Dirks, Hallahan, McFall

Offered by the Study Skills Center

Courses in Study Skills. Major or minor work in Study Skills is not offered.

Lower Division

R. Reading Laboratory (0), I, II A semitutorial service for students wishing to improve reading ability or secure individual help with study problems. Open to students at any level of college work.

S. Spelling (0) I, II

A semitutorial service for students wishing to improve their spelling through an intensive review of principles and practice. Open to students at any level of college work.

W. Writing Laboratory (0) I, II A semitutorial service for students wishing assistance in composition, either remedial or advanced. Open to students at any level of college work.

99. Experimental Topics (2-4) Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### Telecommunications and Film / 381

### **Telecommunications and Film** In the College of Professional Studies

#### Faculty

Professors: Jones, Lee

Associate Professors: Anderson, Jameson (Chairman), Johnson, Madsen, Martin, Wylie Assistant Professors: Heighton, Meador

#### Offered by the Department

Master of Arts degree in radio-television.

Major in radio-television, with the A.B. degree in applied arts and sciences. Major in radio-television, with the B.S. degree in applied arts and sciences. Major in drama, with emphasis in design for television. See Drama. Minor in radio-television.

#### Radio-Television Major

#### With the A.B. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements on page 85 of this catalog.

The A.B. degree is designed for students interested in developing a more liberal education as they develop competency in, and understanding of, radio, television, and film. The A.B. degree permits flexible programs utilizing courses in and out of the department which will prepare students in such broad areas as design for television and film, media communications theory, broadcast advertising, instructional radio and television, and the like.

A minor is required with this major.

Preparation for the major. Telecommunications and Film 1, 2A-2B, 10, 30, 67 and 83. (23 units.)

Major. A minimum of 24 upper division units in telecommunications and film to include Telecommunications and Film 101 or 105, 162, and eighteen units of electives selected with the approval of the department. No more than 48 units in telecommunications and film may be counted toward the 124 units required for graduation.

#### **Radio-Television Major**

#### With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

The B.S. degree is designed to prepare students for professions in radio, television, and film or for occupations where extensive knowledge of these media is required. A minor is not required with this major.

Preparation for the major. Telecommunications and Film 1, 2A-2B, 10, 30, 67 and 83. (23) units.)

Major. A minimum of 36 upper division units to include Telecommunications and Film 162, a core professional sequence, and a minimum of six units in an allied professional sequence; five to twelve units of electives as required.

#### **Core Professional Sequences.**

TV Production: Telecommunications and Film 101 or 105, 110, 156, 180, 183, 184. (21 units.) Management: Telecommunications and Film 101, 103, 105, 130, and Psychology 122. (15 units.)

Film: Telecommunications and Film 101 or 105, 110, 150, 156, 168A, 168B, 180. (22 units.)

Allied Professional Sequences. (Courses taken in Core Professional Sequences cannot be counted toward the Allied Professional Sequence.)

Advertising. Telecommunications and Film 103, 104, Business Administration 150, 153, and Iournalism 153.

Art. Art 107, 114A, 114B, 190, and Industrial Arts 115.

Communication. Speech Communication 135, 193, Journalism 117, 121, and 162.

Criticism. Humanities 138, Music 151, Philosophy 142, Comparative Literature 152, and Speech Communication 154

Education. Telecommunications and Film 170, Education 101, 111, and 144.

Information Systems. Business Administration 184, 185, 186, and 188.

International Media. Telecommunications and Film 108, 163, and Journalism 118.

Management. Telecommunications and Film 101, Business Administration 140, 143 and 145.

News. Telecommunications and Film 105, 112, and Journalism 102, 124, and 125

1512-6 1 625

Performance. Telecommunications and Film 181, Drama 131, 132, and Speech Communication 108.

Playwriting. Telecommunications and Film 110, Drama 120, 122, and English 171. Scene Design. Telecommunications and Film 150, 156, and Drama 140A and 148.

#### **Radio-Television Minor**

The minor consists of a minimum of 15 units in telecommunications and film to include Telecommunications and Film 1, and at least six units in upper division courses.

#### Lower Division Courses

## 1. Backgrounds in Broadcasting (3) I, II

Theory and operation of the broadcasting industry to include the history and regulation of broadcasting in the U.S., the social and economic setting of American broadcasting and the organization of commercial and educational radio and television stations. (Formerly numbered Speech Arts 80.)

2A-2B. Telecommunications Production (4-4) I, II

Two lectures and six hours of activity.

Prerequisite: Limited to Telecommunications and Film majors.

Technical practices and aesthetic considerations of visual and sound productions. Control room, studio, and auxiliary equipment.

10. Broadcast Writing (3) I, II

Two lectures and more than three hours scheduled activities. Theory and practice in writing materials for oral presentation. Problems of timing and pacing, conversational expression, and word color. Students provide continuity for KPBS-FM.

# 30. Radio Production (3) I, II

Two lectures and more than three hours of activity.

Prerequisite: Telecommunications and Film 2A-2B.

Theory of radio production augmented by practice in program planning and production

for KPBS-FM.

32. Workshop in Educational Radio Broadcasting (6) S (9 weeks) Practice and theory in educational radio broadcasting operations, to include program planning, staff administration, and announcing. Students in the workshop will function in staff duties for KPBS-FM. Offered jointly with Telecommunications and Film 132. Not open to students with credit for Telecommunications and Film 132.

67. Cinema as Art and Communication (3) I, II

An appreciative survey of cinema, with emphasis upon the feature film and the Prerequisite: Sophomore standing. documentary. Historical and stylistic influences upon the aesthetic values and social implications of cinema. Illustrated by screen examples.

70. Broadcasting Activities for Schools (3) I

Two lectures and three hours of scheduled activity. The planning and production of radio and television broadcasts. Designed for students interested in handling broadcast activities in speech and drama classes and workshops for high schools and junior colleges. Not open to students with credit in Telecommunications

and Film 1. 83. Television Production and Directing (3) I, II

Two lectures and more than three hours of activity. Prerequisites: Telecommunications and Film 2A-2B and 10, with average grade of 2.0 or

Theory and practice in the skills and knowledge of television production. Includes basic program types, responsibilities of director, and director's relationships to production staff. 90. Broadcast and Film Performance (3) I, II

Two lectures and more than three hours of activity.

Prerequisites: Drama 10 or Speech Communication 11A, and Drama 30. Preparation and delivery of materials before the microphone and camera. Participation in productions for KPBS-FM, KPBS-TV, ETV, ITV and motion pictures.

99. Experimental ropics (2-4) Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

1518-6 2 15

#### Telecommunications and Film / 383

#### 382 / Telecommunications and Film

#### **Upper Division**

101. Broadcast Management (3) I, II

Prerequisites: Telecommunications and Film 1, 30, and 83.

Administration and organization of radio and television, including radio and television as advertising media, broadcasting research, station organization, promotion and sales, and current developments in radio and television as mass media.

103. Broadcast Advertising (3) I

Prerequisites: Two courses in broadcasting or journalism.

Theory, procedures, and the role of broadcast advertising, including marketing and media research, campaign planning, media strategy, time purchasing, and evaluation.

104. Broadcast Commercial Practices (3) II

Prerequisites: Telecommunications and Film 30, 83, 103, and permission of instructor. Planning and execution of broadcast advertising and promotion campaigns; creative strategy and production techniques; use of research; campaign evaluation.

105. Regulation of Broadcasting (3) I, II

Prerequisites: Telecommunications and Film 1, 30, and 83.

Responsibilities of broadcasters as prescribed by law, governmental policies and regulations, and significant court decisions.

108. International Broadcasting (3) II

Prerequisite: Telecommunications and Film 105.

Comparative study of broadcasting in various world areas; economic, social, and political determinants of broadcasting patterns.

110. Writing and Producing for Broadcasting and Film (3) I, II Prerequisites: Telecommunications and Film 1, 30, and 83.

Scripting of dramatic and documentary forms, to include the development of original materials and adaptations for the broadcast media and film, as well as problems in the post-writing process of preparing scripts for production, and the development of program and series ideas.

112. Radio and Television News (3) I, II

(Same course as Journalism 104)

Gathering, writing, and editing news in special forms required by radio and television; processing wire service copy, still pictures and kinescopes; filming, editing and scripting news on motion pictures; using recorders to report special events.

130. Radio Programming (3) II

Two lectures and more than three hours of scheduled activity.

Prerequisites: Telecommunications and Film 1 and 30.

Formats, policies, production practices, and research in modern programming. Student work is broadcast on KPBS-FM.

132. Workshop in Educational Radio Broadcasting (6) S (9 weeks)

Practice and theory in educational radio broadcasting operation to include program planning, staff administration, and announcing. Students in this workshop will function in staff duties for KPBS-FM. Offered jointly with Telecommunications and Film 32.

150. Lighting for Television and Film (3) I, II

Two lectures and three hours of laboratory.

Theory and application of such aspects as color temperature, light sources and film emulsions, filters and design of values and colors, and factors of electronic transmission. Work on KPBS-TV, ETV, CCTV, and formal films.

156. Advanced Lighting and Staging for Television and Film (4) I, II

One lecture and more than nine hours of activity. Prerequisites: Telecommunications and Film 2A-2B.

Production elements of television and film, to include lighting and staging techniques, art and graphics, scene design and scene decoration. Experience in various technical and production specialties of television and film, as demonstrated principally by work for KPBS-TV and ETV.

## 161. Film Applications in Super-8mm (3) I, II

Explorations of visualized motion through production of super-8mm motion pictures and filmic materials. Cinema as creative expression, particularly as it applies to the student of art and education. Not acceptable for credit in the Telecommunications and Film major.

162. Film Techniques (3) I, II Two lectures and three hours of activity.

Prerequisite: Telecommunications and Film 2A-2B.

Principles of film theory, and practice in cinematography and editing; use of motion picture equipment. Technique and theory as they apply to the several filmic forms. Preparation of filmed materials.

163. International Cinema (3) I

Prerequisite: Telecommunications and Film 67.

Foreign feature films as expressions of national attitudes.

165. Animated Film Techniques (3) I, II Screening of representative examples and production of a filmograph or animated motion

picture. 166. Honors Course (1-3) I, II

Refer to Honors Program.

168A-168B. Film Production (3-3) I, II

One lecture and six hours of activity.

Prerequisite: Telecommunications and Film 162. Telecommunications and Film 168A is

Advanced practicum in film production. Studio and location work in the preparation of prerequisite to 168B. filmed materials, and complete nontheatrical films. (Formerly numbered Telecommunications and Film 168.)

170. Educational Broadcasting (3) II Prerequisites: Telecommunications and Film 1, and Education 101.

The role of educational broadcasting in the United States: social and educational impact of noncommercial radio and television; introduction to production techniques for instructional television; and procedures for the utilization of television in the classroom.

172. Workshop in Educational Television (6) S

(Same course as Education 143-S) Open to teachers and students interested in instruction by television.

The procedures and theories of television production as it pertains to closed-circuit and instructional use of television. The selection and utilization of program content and the method of presenting material through the television medium will be discussed and demonstrated.

180. Directing Television and Film Drama (3) I, II

Planned for prospective directors of plays for television and film. The student will become acquainted with principles, procedures and methods.

181. Acting for TV and Film (3) I, II

Interrelationship of acting and the various media-radio, television, film. Experience in

film and television productions. 183. Advanced Programing and Development for Television (4) I, II

One lecture and more than nine hours of scheduled activity. Prerequisites: Telecommunications and Film 110, 162, and consent of instructor. The development of program ideas into formats for television productions of all types. Experience in developing and producing programs for CCTV and ETV.

# 184. Advanced Television Directing (4) I, II

One lecture and more than nine hours of activity. Prerequisites: Telecommunications and Film 1, 83, 162, 180 and consent of instructor. Presentational techniques and individual projects in the direction and production of television programs for CCTV and ETV

195. Workshop in Broadcasting (1-3) I, II Study of some problem in radio, television or film. Maximum credit six units.

198. Selected Topics in Telecommunications and Film. (1-3) I, II

Prerequisite: Twelve units in Telecommunications and Film. Specialized study of selected topics from the areas of telecommunications and film. May be repeated with new content. Maximum credit six units.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisite: Consent of instructor.

#### **Graduate** Courses

Basic reference works, scholarly and critical journals; Bibliographical techniques; exercises Basic reference works, scholarly and ernical journals, biolographical techniques; exercises and problems in methods and exposition of research as it relates to the various areas of telecommunications and film. Recommended for first semester of graduate work, and prerequisite to advancement to candidacy.

201. Seminar in Broadcast Management (3) Prerequisite: The equivalent of an undergraduate major in telecommunications and film. The legal and regulatory milieu of broadcasting from the perspective of station

#### Women's Studies / 385

#### 384 / Women's Studies

202. Seminar in Broadcast Advertising Problems (3)

Prerequisite: The equivalent of an undergraduate major in telecommunications and film. Analysis of the social, economic and cultural context of advertising in commercial broadcasting; criticism and evaluation of the function of the advertiser; survey of broadcast advertising theory and research.

203. Seminar in History of Broadcasting (3)

Prerequisite: The equivalent of an undergraduate major in telecommunications and film. The development of broadcasting in its social, legislative, and economic settings, with emphasis upon broadcasting in the U.S.

205. Mass Communications Research (3)

Prerequisite: Telecommunications and Film 200.

Design and execution of a media research project; audience and message analysis; experimental design and survey research methodology.

210. Seminar in Writing for Broadcast and Film (3)

Prerequisites: Telecommunications and Film 110, 162, and 163.

Dramatic structures as they apply to broadcasting and cinema. Writing a full length script or scenario.

212. Criticism of Broadcasting and Cinema (3)

Prerequisites: The equivalent of an undergraduate major in telecommunications and film. Standards for objective appraisal of the ethical and artistic aspects of radio, television, and film programs.

268. Directing the Dramatic Film (3)

Prerequisites: Telecommunications and Film 168, 180 and consent of instructor.

Analysis of techniques and stylistic contributions of major directors as seen in their films. Production of a short dramatic film embodying concepts so learned.

270. Seminar in Educational Broadcasting (3)

Prerequisite: The equivalent of an undergraduate major in telecommunications and film. Educational uses of electronic media. Use of telecommunications in classrooms and school systems. Relationship of noncommercial radio and television (Public Broadcasting) to commercial broadcast media and education. (Formerly numbered Speech Arts 285.)

272. Seminar in Mass Communication Theory (3)

Prerequisite: Speech Communication 135.

Analysis of theoretical models of mass communication. Application of operational models for the diffusion of information, and the adoption of innovation, to problems in the mass media. (Formerly numbered Speech Arts 288.)

273. Mass Communications Message Design (3)

Prerequisite: Speech Communication 135.

Selection and organization of message design elements in the mass communications media. Analysis of different effects of various types of mass communications formats, presentations, and systems on individuals and groups.

284. Seminar in Programing and Production (3)

Prerequisite: The equivalent of an undergraduate major in telecommunications and film. Theory and analysis of programming and production of broadcasting. 298. Special Study (1-3)

Individual study. Six units maximum credit.

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. 299. Thesis or Project (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

## Women's Studies Administered by the Dean of the College of Arts and Letters

#### Faculty

Assistant Professors: Bravo (Chairman) Lecturers: Askari, Oredson, Rodriquez

Offered by Women's Studies Courses in Women's Studies Major or minor work is not offered.

13-84215

1542-6 2 135

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

#### 100. Women in Comparative Cultures (3) I, II

Women's life styles (value systems, self-image, and world view) from least to most differentiated societies. Impact of women's autonomy and influence on different family models, kinship systems, and economic patterns. Women's roles and behavior in cooperative versus individualistic societies.

#### 110. Socialization Process of Women (3) I, II

Role socialization of women; the effects of formal and informal social, economic, and political institutions upon role socialization from infancy to old age.

120. Self-actualization of Women (3) I, II

Self-actualization psychology, emphasizing individual uniqueness and the maximization of human potential; theories of human behavior as they are applied to women; development of women's self-concept in American society.

125. Psychological Aspects of Women (3) I, II

Prerequisite: Women's Studies 120.

Prevalent theories of the psychological aspects of women in light of recent developments in the theory of sexuality, readings from Women's Liberation and experiences as women. Development of new methods of research and therapy, which will aid women.

130A-130B. Contemporary Issues in The Liberation of Women (3-3) I, II

Prerequisite: one course in women's studies.

The movement to win greater political, social, and economic equality for women. Semester I: The development and continuing of the Women's Movement evolution. Semester II: racism and sexism: relationship to the Women's Movement.

140. Women in History (3) I, II

A survey of the social, cultural, economic, and intellectual history of women; origins of women's roles.

141A-141B. Women in American History (3-3)

A survey of the social, cultural, economic, political, and intellectual history of women in America. Semester I: To 1920. Semester II: Since 1920.

150A-150B. Women in Literature (3-3) I, II

Semester I: images, roles, and identities of women found in literature, their sociological and political implications. Semester II: famous female writers; the treatment of women as literary artists.

151. Women in the Arts (3) I

Images of women in the arts. Discussion on how these images reinforce ideas such as male dominance, the nuclear family, monogamy, and female stereotypes.

160. Human Sexuality (3) I, II

Biological criteria in sex role determination; the relationship of sexual mores and customs to a person's self-concept of sexuality; the relevance of current scientific investigations of the psycho-physiology of human sexual response.

170. Women and the Law (3) I, II Prerequisite: One course in Women's Studies.

The legal status of women in employment, education, health and welfare; property ownership, criminal justice, and the abortion, rape and prostitution.

180. Status of Women Under Various Economic and Political Systems (3) I, II

Historical and contemporary institutional factors influencing the social and political status of women under various economic systems; economic implications of alternatives to expected patterns of women's behavior and institutional arrangements.

190. Women and Education (3) I, II The educational process and female role socialization; research into personnel policies and curriculum. New learning methods and environments, e.g., women's studies programs, child care centers, and "free" schools.

198. Field Experience (3) I, II

Prerequisite: one course in women's studies.

Exploration and analysis of sex discrimination in public and private agencies in the San Diego area as they relate to women through supervised experience and observation; understanding principles and utilizing skills in organizing and effecting change. Maximum credit six units.

Zoology / 387

#### Zoology In the College of Sciences

#### Faculty

Emeritus: Harwood

Professors: Bohnsack, Carpenter (Chairman), Cohn, Crouch, Etheridge, Huffman, Hunsaker, Kaston, McLean, Olson, Wilson

Associate Professors: Atkins, Catlett, Chen, Collier, Dexter, Lillegraven, Norland, Plymale Assistant Professor: Krekorian

#### Offered by the Department

Master of Arts and Master of Science in biology, with an emphasis in zoology.

Major in zoology with the A.B. degree in liberal arts and sciences.

Major in zoology with the B.S. degree in applied arts and sciences.

Teaching major in the biological sciences, with specialization in secondary teaching. Minor in zoology.

#### Zoology Major

#### With the A.B. Degree in Liberal Arts and Sciences

All candidates for a degree in liberal arts and sciences must complete the graduation requirements listed on page 57 of this catalog. To satisfy the requirement in foreign languages, it is strongly recommended that students select French, German, or Russian, A minor is not required with this major.

Preparation for the major. Biology 1, 2, and 15; Zoology 50 and 60 or 106; Chemistry 1A-1B and 11 or 12; Physics 1A-1B or 2A-2B; Mathematics 21 or 40. (38-42 units.) Recommended: Mathematics 22 or 50, and Physics 3A and 3B if 2A-2B were taken.

Major. A minimum of 24 upper division units in biology, botany, microbiology and zoology to include the following: Biology 101 or Zoology 140; Biology 110 and 155; Botany 100, 101, 102, or 103; Biology 101 or 103, or Microbiology 101, or Zoology 108; Biology 156 or Zoology 102, or 103.

#### Zoology Major

#### With the B.S. Degree in Applied Arts and Sciences

All candidates for a degree in applied arts and sciences must complete the graduation requirements listed on page 57 of this catalog.

A minor is not required with this major.

Preparation for the major. Biology 1, 2, and 15; Zoology 50 and 60 or 106; Chemistry 1A-1B and 11 or 12; Physics 1A-1B or 2A-2B; Mathematics 21 or 40. (38-42 units.) Recommended: Mathematics 22 or 50, and Physics 3A and 3B if 2A-2B were taken.

Major. A minimum of 36 upper division units, 28 of which must be in biology, botany, microbiology and zoology, to include the following: Biology 101 or Zoology 140; Biology 110 and 155; Botany 100, 101, 102, or 103; Biology 101 or 103, or Microbiology 101, or Zoology 108; Biology 156 or Zoology 102, or 103. Units to complete the major must be selected with the approval of the adviser; up to 8 upper division units can be in chemistry, geology, mathematics and physics.

#### Zoology Minor

The minor consists of a minimum of 15 units in biological sciences, six of which must be upper division. Approval of the zoology adviser is required.

#### **Biological Sciences Major** For the Standard Teaching Credential

#### Specialization in Secondary Teaching

The teaching major for secondary teaching requires an undergraduate major in one of the biological sciences: biology, botany, microbiology, or zoology. All courses in the major must have prior approval by the adviser for biological sciences teaching programs.

Postgraduate Year. A minimum of six units from courses acceptable for graduate credit on a master's degree program in the biological sciences.

#### Lower Division Courses

8. Human Anatomy (4) I, II Two lectures and six hours of laboratory. Prerequisite: An introductory course in high school or college biology or zoology. Systems of the human body and their interrelationships.

50. Invertebrate Zoology (4) I, II Two lectures and six hours of laboratory.

Prerequisites: Biology 1 and 2.

Structure, function, relationships and significance of invertebrate animals as shown through a study of selected invertebrate types.

60. Vertebrate Zoology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Biology 1 and 2.

An introductory course in the biology of the vertebrates with emphasis on the vertebrate organism as a whole: anatomy, physiology, development and evolution.

99. Experimental Topics (2-4)

Refer to the catalog statement on Experimental Topics on page 105. Limit of nine units applicable to a bachelor's degree in courses under this number of which no more than three units may be applicable to general education requirements.

#### **Upper Division Courses**

102. Invertebrate Embryology (3) Two lectures and three hours of laboratory. Prerequisite: Zoology 50. Description and experimental analysis of the development of invertebrates. 103. Embryology (4) I, II Two lectures and six hours of laboratory. Prerequisite: Zoology 50, 60, or 106. Studies in comparative gametogenesis, morphogenesis, and reproductive physiology. 106. Comparative Anatomy of the Vertebrates (4) I, II Two lectures and six hours of laboratory. Prerequisites: Biology 1 and 2. Dissection, study and comparison of organ systems of typical vertebrates. 108. Histology (4) I, II Two lectures and six hours of laboratory. Prerequisites: Biology 1 and 2. Recommended: Zoology 8 or 60 or Microbiology 101. The microscopic structures and differentiation of tissues and organs of the vertebrates, especially mammals.

112. Marine Invertebrate Zoology (4) I, II

Two lectures and six hours of laboratory Prerequisites: Zoology 50 and Biology 110. Application for collecting permit must be made at least six weeks before class begins at Bureau of Marine Sciences (AS 111).

Ecology, morphology, behavior, and physiology of marine invertebrates. Frequent field trips to local marine environments.

114. Natural History of the Vertebrates (3) I, II

Two lectures and three hours of laboratory.

Prerequisite: One semester of college biology. Natural history, distribution and classification of vertebrate animals; emphasis on local forms. Not open to zoology majors.

115. Ichthyology (4) I, II

Two lectures and six hours of laboratory.

Prerequisite: Zoology 60 or 106. Identification, systematics, evolution, structure, physiology, behavior, and ecology of

fishes.

116. Herpetology (4) I Two lectures and six hours of laboratory.

Prerequisites: Consent of instructor. The origin, evolution, distribution, and systematics of amphibians and reptiles of the world.

117. Ornithology (4) II

Two lectures and six hours of laboratory or field excursions, and a field project.

Prerequisites: Biology 1 and 2 and consent of instructor. The study and identification of birds, especially those of the Pacific Coast and the San

Diego region.

118. Mammalogy (4) I Two lectures and six hours of laboratory.

Prerequisites: Zoology 60 or 106. The evolution, systematics, distribution, and ecology of mammals of the world.

#### 388 / Zoology

119-S. Field Zoology (4) S

Two lectures and six hours of laboratory.

Prerequisite: A course in college biological science.

Observational methods; collecting techniques; identification, ecology, and behavior of southern California animals. Primarily for students not majoring in the biological sciences.

121. General Entomology (4) I, II

Two lectures and six hours of laboratory.

Prerequisites: Biology 1 and 2.

Structure, physiology, natural history, and classification of insects.

123. Immature Insects (3) II

Two lectures and three hours of laboratory.

Prerequisite: Zoology 121.

Collection, preservation, identification, and biological study of the immature stages of the different insect orders. Course designed to meet the needs of students specializing in invertebrate zoology, agricultural and medical entomology, parasitology, and systematics. 124. Insect Ecology (4) II

Two lectures and six hours of laboratory.

Prerequisites: Biology 110, and Botany 100 or 103. Recommended: Zoology 50, 105, or 121. Ecological principles as applied to insects, including consideration of crop ecosystems in relation to insect and mite outbreaks.

125. Economic Entomology (4) II Two lectures and six hours of laboratory.

Prerequisites: Zoology 50, or 121 (preferred), and Botany 103. Recommended that this course be followed by Zoology 127.

Course designed for students of agriculture and horticulture. Emphasis is placed on determination and control of insects affecting plants. Quarantine measures are also studied.

126. Medical Entomology (3) I

Two lectures and three hours of laboratory.

Prerequisites: Zoology 50, 60, or 121 (preferred) or Microbiology 101. Recommended: Zoology 127.

The role of insects and other arthropods in transmission and causation of human diseases. 127. Insect Control (2) I

Prerequisites: Zoology 121, Botany 100 or 103. Recommended: Zoology 125 or 126.

A review of methods of reducing insect populations, including chemical, cultural biological and legislative control.

128. Parasitology (4) I, II

Two lectures and six hours of laboratory,

Prerequisite: Zoology 50 or Microbiology 101.

Study of animal parasites with special reference to those of man. Laboratory including identification of important parasites of man, and collection and preservation of local forms.

129. Principles of Pest Management (3) I

Two lectures and three hours of laboratory

Prerequisites: Botany 100, 103, or 162; and Zoology 121, 124. Recommended: Zoology 125 and 127.

Systematic analysis and synthesis of all suitable techniques known to reduce and maintain pest populations at levels below economically important injury in forestry and agriculture, based on firm ecological principles. (Formerly numbered Zoology 127.)

130. Advanced Invertebrate Zoology (3) I, II

One lecture and six hours of laboratory.

Prerequisite: Zoology 50.

Selected topics in advanced invertebrate zoology. May be repeated with new content for a maximum of six units.

135. Scientific Illustration (3)

Two lectures and three hours of laboratory; field trips.

Preparation of illustrative materials, inked drawings, charts, lettering, models, still and movie photography, and photomicrography.

140. Physiological Zoology (4) I, II

Three lectures and three hours of laboratory.

Prerequisites: Zoology 60 or 106, and Chemistry 12.

A comparative and evolutionary study of the functions of organ systems and their environmental significance.

145A-145B. Experimental Animal Surgery (2-2) I, II One lecture and three hours of laboratory

Prerequisites: A course in vertebrate anatomy and a course in animal physiology and consent of instructor; 145A is prerequisite to 145B.

Fundamental principles of animal care, disease prevention, and aseptic surgery.

150. Marine Biology (3) I, II

Two lectures and three hours of laboratory.

Prerequisite: Biology 1.

An introduction to marine organisms and their environment. Not open to students with credit for Zoology 50 or Biology 110.

155. Principles of Taxonomy, Systematics and Phylogeny (4) II

Two lectures and six hours of laboratory.

Prerequisites: Any one of the following: Zoology 50, 60, 106, Botany 101, 102, 103. Basis for the classification of organisms. Modern concepts and their application in zoology.

Specific problems in laboratory and field.

160. Vertebrate Paleontology (4) II

Two lectures and six hours of laboratory.

Prerequisite: Zoology 106.

Advanced studies in the evolution of vertebrates, including relations to earth history and topics in paleoecology and functional morphology. Laboratory emphasizes field and preparatory techniques and identification of mammalian fossils.

166. Honors Course (1-3) I, II

Refer to Honors Program.

170. Animal Behavior (4) I, II

Two lectures and six hours of laboratory. Prerequisites: Zoology 50 and 60 or Psychology 40, 50, and consent of instructor. Biological bases of animal behavior with emphasis on the ethological approach, including the evolution and adaptive significance of behavior.

172. Neurobehavior (4) II

Two lectures and six hours of laboratory.

Prerequisites: Zoology 170 or Psychology 113 or 114, and consent of instructor. Evolution of the senses and central nervous system and their significance in animal behavior. Invertebrates and lower vertebrates will be emphasized. Advanced laboratory

training in neurophysiology and psychobiology.

190. Senior Investigation and Report in Invertebrate Zoology (2)

Prerequisite: Consent of instructor.

Investigation and reports on the current literature of invertebrate zoology.

191. Senior Investigation and Report in Vertebrate Zoology (2)

Prerequisite: Consent of instructor.

Investigation and reports on the current literature of vertebrate zoology.

198. Methods of Investigation (2) I, II

One discussion and three additional hours to be arranged.

Prerequisite: Consent of instructor.

Selection and design of individual research in zoology; oral and written reports. Four units maximum credit for Zoology 198 or a combination of this course with Biology or Microbiology 198.

199. Special Study (1-3) I, II

Individual study. Six units maximum credit.

Prerequisites: Fifteen units in biological sciences with a grade of A or B and consent of instructor.

#### **Graduate** Courses

An intensive study in advanced zoology, topic to be announced in the class schedule. Maximum credit six units applicable on a master's degree.

201. Seminar in Marine Zoology (2)

Recent developments in marine zoology. Maximum credit four units applicable on a

master's degree. 206. Seminar in Vertebrate Morphology (2)

Current problems in the descriptive, functional and evolutionary anatomy of vertebrates. Maximum credit four units applicable on a master's degree.

### 390 / Zoology

209. Seminar in the Biology of Cold-blooded Vertebrates (2) Prerequisite: Zoology 60 or 106.

Biology of ectothermic animals. Maximum credit four units applicable on a master's

degree.

210. Seminar in the Biology of Warm-blooded Vertebrates (2)

Prerequisite: Zoology 60 or 106.

Biology of endothermic animals. Maximum credit four units applicable on a master's degree.

211. Animal Energetics (3) Three lectures.

Prerequisites: An upper division course in physiology. A course in calculus and one in biochemistry are recommended.

Energy transformation in animals to include the physiology of starvation, animal energetic efficiency, nutrition, and temperature regulation.

212. Advanced Marine Invertebrate Zoology (3) One lecture and six hours of laboratory.

Prerequisite: Zoology 112.

Selected topics in advanced marine invertebrate zoology. Maximum credit six units applicable on a master's degree. 215. Advanced Vertebrate Zoology (2)

Prerequisite: Consent of the instructor and any one of the following: Zoology 115, 116, 117, 118 depending on the specific topic announced in the class schedule.

Advanced treatment of ichthyology, herpetology, ornithology, or mammalogy. May be repeated with new content to a maximum of six units. Maximum credit six units applicable on a master's degree.

222. Advanced Entomology (3)

Two lectures and three hours of laboratory.

Prerequisite: Zoology 121, Biology 110, Botany 100 or 103.

Advanced treatment of some phase of entomology such as physiology, morphology, toxicology or systematics. Topic to be announced in the class schedule. May be repeated with new content. Maximum credit six units applicable on a master's degree.

290. Bibliography (1)

The use of basic reference books, journals, pertinent bibliographies preparatory to the writing of a master's thesis.

291. Research techniques (3)

Prerequisite: Consent of graduate adviser. Analysis of research techniques in zoology.

297. Research (1-3)

Research in one of the fields of zoology. Maximum credit six units applicable on a master's degree.

298. Special Study (1-3)

Prerequisite: Consent of staff; to be arranged with department chairman and instructor. Individual study. Six units maximum credit. 299. Thesis or Project (3)

Prerequisites: An officially appointed thesis committee and advancement to candidacy. Preparation of a project or thesis for the master's degree.

#### 392

# **Faculty and Officers of Administration** 1972-1973

GOLDING, BRAGE (1972), President, Professor of Chemistry and Engineering B.S. Ch.E., Ph.D., Purdue University, ABBOTT, MITCHEL T. (1964), Professor of Chemistry B.Sc., Ph.D., University of California, Los Angeles. ABBOTT, PATRICK L. (1971), Assistant Professor of Geology B.S., California State University, San Diego; M.A., Ph.D. candidate, University of Texas. ACKERLY, ROBERT S., JR. (1963), Associate Dean, Academic Planning B.A., College of Wooster; A.M., Colgate University; Ed.D., Indiana University. ADAMS, EILEEN (Mrs. H. L.) (1949), Education Resource Center Librarian A.B., Willamette University; B.S. in L.S., University of Denver. ADAMS, ELSIE B. (Mrs. G. R.) (1971), Assistant Professor of English B.S., M.A., Ph.D., University of Oklahoma. ADAMS, WILLIAM J. (1955), Professor of Speech Communication B.S., McMurry College; M.A., Northwestern University; Ph.D., Stanford University. AJEMIAN, JAMES A. (1970), Assistant Professor of Social Work B.A., Harvard College; M.S., Columbia University; Ph.D., University of Michigan. AKERS, FRED C. (1966), Associate Professor of Marketing B.S., University of Missouri; M.B.A. (Marketing), Northwestern University; M.B.A. (Economics), Ph.D., University ALEXANDER, JAMES B. (1967), Associate Professor of Botany A.B., California State University, San Diego; M.S., Ph.D., University of California. ALF, EDWARD F., JR. (1963), Professor of Psycholog A.B., California State University, San Diego; Ph.D., University of Washington. ALLEN, ELIZABETH J. (1971), Assistant Professor of Speech, Pathology and Audiology B.A., Seattle Pacific College; M.A., Ph.D., Louisiana State University. ALMOND, FRANK W. (1968), Associate Professor of Music A.B., M.A., California State University, San Diego; Ph.D., Florida State University ALTAMURA, NICHOLAS C. (1967), Assistant Professor of Secondary Education B.S., Ithaca College; M.Ed., University of Arizona; Ph.D., Arizona State University. AMBLE, KJELL (1962), Professor of Drama B.A., Denison University; M.A., Ph.D., Northwestern University, AMBRIANO, JOHN D. (1969), Assistant Sciences Librarian B.A., University of Oklahoma; M.S., Columbia University. ANDERES, EUGENE A. (1968), Assistant Professor of Microbiology A.B., M.S., California State University, San Diego; Ph.D., Oregon State University. ANDERSON, ALLAN W. (1962), Professor of Religious Studies B.A., Washington Missionary College; M.A., Trinity College; Ph.D., Columbia University. ANDERSON, ARTHUR J. O. (1961), Professor of Anthropology A.B., California State University, San Diego; M.A., Claremont Colleges; Ph.D., University of Southern California. ANDERSON, DWIGHT G. (1969), Assistant Professor of Political Science B.A., University of Montana; M.A., Ph.D., California State University, San Diego; University of California, Berkeley. ANDERSON, ERNEST F. (1971) (Under contract 1969–70), Associate Professor of Social Work B.A., California State University, Los Angeles; M.S.W., California State University, San Diego. ANDERSON, EVANS L. (1954), Professor of Elementary Education B.A., Gustavus Adolphus College; M.A., University of Minnesota; Ed.D., University of Denver. ANDERSON, GRAYDON K. (1949), Professor of Economics A.B., Willamette University; Ph.D., University of Wisconsin. ANDERSON, HAYES L. (1966), Associate Professor of Telecommunications and Film B.A., Oregon State University; M.A. and additional graduate study, Michigan State University.

ANDERSON, PAUL S. (1955), Professor of Elementary Education A.B., Colorado State College; M.S., Ph.D., University of Wisconsin. ANDERSON, PAUL V. (1954), Professor of Music

B.M., North Texas State College; M.M., University of Wisconsin ANDERSON, W. CARLISLE (1955), Professor of Industrial Arts

B.S., Nebraska State Teachers College; M.A., Ph.D., University of Minnesota.

ANDERSON, ZOE E. (1965), Associate Professor of Family Studies, and Consumer Sciences B.S., Illinois Institute of Technology; M.S., Ph.D., University of Illinois. ANDRAIN, CHARLES F. (1964), Professor of Political Science B.A., Whittier College; M.A., Ph.D., University of California.

ANDRESEN, GRACE E. (Mrs.) (1970) (Under contract 1968-70), Associate, Professor of Social Work B.S., University of Illinois; M.S.W., Tulane University.

ANDREWS, MICHAEL (1972), Assistant Professor of Electrical and Electronic Engineering B.A., B.S.E.E., Rutgers University; Ph.D., University of Arizona

ANDRUS, RUTH (1962), Professor of Physical Education B.S., Utah State University; M.S., University of Oregon; Ph.D., State University of Iowa. ANGIONE, RONALD J. (1969), Assistant Professor of Astronomy A.B., M.S., California State University, San Diego; Ph.D., University of Texas.

ANINGER, THOMAS (1967), Assistant Professor of English B.A., M.A., Ph.D., University of California, Los Angeles.

ANNAS, ALICIA M. (1970), Assistant Professor of Drama

A.B., University of Detroit; M.F.A., University of Texas.

BAXTER, WILLIAM L. (1963), Professor of Microbiology A.B., Ph.D., University of California, Los Angeles. BEASLEY, JOHN M. (1972), Assistant Professor of Health Science and Safety B.S., M.A., California State University, San Diego; Ph.D. candidate, United States International University. BECKER, GEORGE J. (1969), Assistant Professor of Elementary Education B.A., St. Peter's College; M.A., Fordham University; Ph.D., New School for Social Research. BECKER, GERALD A. (1958), Professor of Mathematics B.A., M.S., Ph.D., State University of Iowa. BECKLUND, LESTER A. (1967), Associate Professor of Secondary Education B.S., M.Ed., Ph.D., University of Minnesota. BEDORE, ROBERT L. (1959), Professor of Mechanical Engineering B.S.M.E., M.S.M.E., Purdue University. Registered Professional Mechanical Engineer. BEE, CLIFFORD P. (1969), Associate Professor of Secondary Education B.A., M.A., Western Michigan University; Ph.D., Michigan State University. BELASCO, JAMES A. (1971), Professor of Management B.S., Cornell University; M.B.A., Hofstra University; Ph.D., Cornell University. BELCHER, DAVID W. (1957), Professor of Management B.B.A., M.A., Ph.D., University of Minnesota. BENDER, STEPHEN J. (1970), Assistant Professor of Health Science and Safety B.S., Brockport State University; M.S., H.S.D., Indiana University. BENJAMIN, ROBERT L. (1953), Professor of Speech Communication A.B., University of California; M.S., Ph.D., University of Wisconsin. BENNETT, LARRY E. (1970), Associate Professor of Chemistry B.S., California State University, San Diego; Ph.D., Stanford University. BENSON, JACKSON J. (1966), Professor of English A.B., Stanford University; M.A., California State University, San Francisco; Ph.D., University of Southern California. BENTON, CARL W. (1948), Professor of Physical Education B.S., University of California, Los Angeles; M.S., Ed.D., University of Southern California. BERG, MARLOW J. (1970), Assistant Professor of Elementary Education B.S., M.A., Ph.D., University of Minnesota. BERG, ROBERT V. (1963), Associate Professor of Art B.S., Moorhead State College, Minnesota; M.F.A., University of Minnesota. BERGE, DENNIS E. (1963), Professor of History A.B., M.A., California State University, San Diego; Ph.D., University of California. BERRY, RICHARD W. (1961), Professor of Geology B.S.E.M., Lafayette College; M.A., Ph.D., Washington University. BIALY, RENATE S. (1969), Assistant Professor of Russian B.A., M.A., University of California; Ph.D. candidate, University of California, Los Angeles. BIANCHINI, VICTOR E. (1971), Counselor B.A., California State University, San Diego; J.D., University of San Diego School of Law. BICELOW, MARYBELLE S. (Mrs. K. G.) (1956), Professor of Art A.B., M.A., University of California, Los Angeles; additional graduate study, Teachers College, Columbia University, BIGGER, W. RICHARD (1952), Professor of Public Administration and Urban Studies B.A., M.A., University of Wisconsin; Ph.D., University of California, Los Angeles. BIGGS, MILLARD R. (1958), Acting Dean of Graduate Studies; Professor of Music B.M., Youngstown University; M.F.A., Ohio University; Ph.D., University of Iowa. BILTERMAN, HENRY L. (1956), Assistant Professor of Mechanical Engineering B.S.E.E., University of Iowa; M.A., California State University, San Diego. BIRCH, AILEEN J. (Mrs. C. E.) (1949), Assistant Professor of Elementary Education A.B., M.A., California State University, San Diego. BIRD, ANNE M. (1972), Assistant Professor of Physical Education B.S., State University of New York; M.A., University of Maryland; Ph.D., University of Colorado. BLACK, BARBARA B. (1970), Associate Professor of Nursing R.N., E. W. Sparrow Hospital School of Nursing; B.S., University of Minnesota; M.S., Indiana University. BLACKMUN, RUPERT B. (1970), Assistant Professor of Industrial Arts B.A., M.A., California State University, San Jose. BLANC, SAM S. (1966), Acting Associate Dean, School of Education; Professor of Elementary Education A.B., Colorado State College; M.A., Ed.D., University of Denver. BLICK, JAMES D. (1966), Associate Professor of Geography A.B., M.A., Ph.D., University of California, Los Angeles. BLOCK, RUSSELL L. (1969), Associate Professor of Business Law A.B., California State University, San Diego; J.D., University of California. BLYTH, JOHN D. (1957), Professor of Music B.M., M.M., Illinois Wesleyan University; Ed.D., Teachers College, Columbia University, BOE, ALFRED F. (1968), Assistant Professor of English B.A., M.A., Ph.D. candidate, University of Arizona. BOGGS, WILMA T. (Mrs. A. H.) (1971), Assistant Professor of Family Studies and Consumer Sciences B.S., Kansas State University; M.S., California State University, San Diego. BOHNSACK, KURT K. (1956), Professor of Zoology B.S., Ohio University; M.S., Ph.D., University of Michigan. BONEY, ELAINE E. (1963), Associate Professor of German A.B., University of Kansas; M.A., University of Wisconsin; Ph.D., University of Texas. BOOSTROM, RONALD L. (1971), Assistant Professor of Public Administration, and Urban Studies B.A., California State University, Long Beach; Master of Criminology, University of California, Berkeley. BOSKIN, WARREN D. (1965), Associate Professor of Health Science and Safety B.S., Brooklyn College; M.S., University of Illinois; Ed.D., West Virginia University.

BOTKIN, PATRICIA T. (Mrs.) (1969), Assistant Professor of Elementary Education B.S., M.S., Brockport State Teachers College; Ed.D., University of Rochester. BOWNE, WILLIAM F. (1959), Associate Professor of Art B.Ed., M.A., University of California, Los Angeles. BRADFORD, MARY (1969), Physician A.B., Barnard College, Columbia University; M.D., Temple University. BRADLEY, WALLACE W. (1961), Assistant Professor of Secondary Education B.S., University of Maryland; M.A., California State University, San Diego. BRANAN, ALVORD G. (1969), Assistant Professor of French B.A., University of Florida; M.A., Middlebury College; Ph.D. Tulane University. BRANDT, CHARLES L. (1957), Professor of Biology B.A., Ph.D., Stanford University. BRANDT, WILLIAM R., Captain, USAF (1971), Assistant Professor of Aerospace Studies B.S., M.S., Oklahoma State University. BRANSTETTER, R. DEANE (1955), Acting Dean of Undergraduate Studies; Professor of Mathematics B.S., B.A., Northeast Missouri State Teachers College; M.S., State University of Iowa; Ph.D., Iowa State College. BRASHERS, HOWARD C. (1968), Associate Professor of English B.A., University of California; M.A., California State University, San Francisco; Ph.D., University of Denver. BRAVO, ELLEN L. (Mrs. C.S.) (1972), Assistant Professor of Women's Studies B.A., Cornell University; M.A., Cambridge University; Ph.D. candidate, McGill University. BRAY, HENRY G. (1962), Professor of Mathematics A.B., California State University, San Diego; M.S., Ph.D., Iowa State University. BREEDEN, SHIRLEY O. (Mrs. J. S.) (1971, Assistant Professor of Family Studies and Consumer Sciences A.B., M.S., California State University, San Diego; BREWER, JACK L. (1972), Lecturer in Social Work B.A., M.S.W., California State University, San Diego. BRIDENSTINE, DON C. (1956), Professor of Economics B.S., University of Oregon; A.M., Ph.D., University of Southern California. BRIGGS, ROBERT M. (1957), Professor of Secondary Education A.B., Colorado State College of Education; M.A., Stanford University; Ed.D., Colorado State College of Education. BROADBENT, HARRY H. (1949), Associate Professor of Physical Education A.B., University of Oklahoma; M.S., University of Pennsylvania. BRODSHATZER, ARTHUR (1956), Professor of Accounting B.B.A., City College of New York; M.B.A., New York University; D.B.A., University of Southern California; Certified Public Accountant. BROOKES, JOHN A. (1964), Professor of Biology A.B., Occidental College; M.S., California State University, San Diego; Ph.D., University of Southern California. BROOKS, DOUGLAS G. (1971), Assistant Professor of Marketing B.S., M.S., Stanford University; Ph.D., University of Washington BROWN, HAROLD K. (1971), Associate Dean, Planning Director, Afro-American Studies. B.A., California State University, San Diego; M.B.A., Fordham University. BROWN, RUTH M. C. (Mrs. C.) (1971), Assistant Professor of English B.A., Montana State University; M.A., Texas Western College; Ph.D., Arizona State University. BROWN, WILLIAM L. (1962), Assistant Professor of Electrical and Electronic Engineering B.S.E.E., Professional Degree in Electrical Engineering, Mississippi State University. BROWNLEE, WILLIE C. (1972), Lecturer in Art B.A., M.F.A., University of California, Los Angeles. BRUCE, PAUL (1957), Professor of Counselor Education A.B., Antioch College; M.A., Claremont Graduate School; Ph.D., State University of Iowa. BRUDERER, CONRAD (1963), Associate Professor of Music B.M., Oberlin Conservatory; M.M., D.M., Indiana University. BRUNSON, THEODORE R. (1966), Associate Professor of Music B.Sc., University of Minnesota; M.M., University of Nebraska; D.M.A., University of Arizona. BRYANT, STEVEN J. (1964), Associate Professor of Mathematics B.A., University of Chicago; M.A., University of North Carolina; Ph.D., University of Missouri. BRYDEGAARD, MARGUERITE A. (Mrs. H.) (1936), Professor of Elementary Education A.B., California State University, San Diego; M.A., Ph.D., Claremont Graduate School. BRYSON, JEFF B. (1970), Assistant Professor of Psychology B.A., University of Texas; M.S., Ph.D., Purdue University. BUCK, ROBERT E. (1969), Associate Professor of Sociology B.S., M.S., Trinity University; Ph.D., University of Texas. BUCKALEW, JAMES K. (1967), Associate Professor of Journalism A.B., M.A., Indiana State College; Ph.D., University of Iowa. BUMPUS, JERRY D. (1971), Assistant Professor of English B.A., University of Missouri; M.F.A., University of Iowa. BURDICK, DAVID L. (1968), Assistant Professor of Mathematics A.B., University of California; M.A., Ph.D., University of New Mexico. BURGESS, WILLIAM C. (1961), Professor of Health Science and Safety A.B., M.A., University of North Carolina; Ed.D., Teachers College, Columbia University. BURIAN, ROBERT J. (1968), Associate Professor of Counselor Education B.A., M.A., University of Arizona; Ed.D., Arizona State University. BURNETT, LOWELL J. (1972), Assistant Professor of Physics
 B.S., Portland State University; M.S., Ph.D., University of Wyoming.
 BURNSIDE, HOUSTON M. (1968), Associate Professor of Elementary Education
 B.S., Kent State University; M.A., Ph.D., Claremont Graduate School. BURTON, CHARLES R. (1959), Professor of Mathematics B.A., M.A., University of Kansas; M.A., Ph.D., University of California. 43-10 8 420

BURTON, JOHN W. (1968), Assistant Professor of Spanish, Imperial Valley B.A., University of Utah; M.A., University of Mexico; additional graduate study, Brigham Young University. BUTLER, GERALD J. (1968), Assistant Professor of English A.B., University of California; M.A., Ph.D., University of Washington. BUTLER, RAY R. (1967), Associate Professor of Recreation B.A., M.Ed., University of Minnesota. BYRNE, GARY C. (1969), Associate Professor of Political Science B.A., University of Redlands; Ph.D., University of North Carolina CAMPBELL, L. BERYL (1947), Associate Professor of Elementary Education A.B., University of California; M.A., Teachers College, Columbia University. CANNON, NONA H. (Mrs. R. C.) (1959), Professor of Family Studies and Consumer Sciences B.S., Harding College; M.S., University of California; Ed.D., Teachers College, Columbia University. CAPP, MARTIN P. (1953), Dean, School of Engineering; Professor of Civil Engineering B.S., M.S., University of Colorado. Registered Professional Engineer and Land Surveyor. CARELLA, MICHAEL J. (1967), Associate Professor of Philosophy B.A., St. Patrick's College, California; M.A., St. Louis University; Ph.L., Ph.D., University of Louvain, Belgium. CARMICHAEL, NANCY M. (1968), Assistant Professor of Botany B.A., Barnard College, Columbia University; M.A., Ph.D., Columbia University. CARNEVALE, JAMES P. (1967), Associate Professor of Counselor Education B.A., University of California, Los Angeles; M.A., California State University, San Diego; Ph.D., University of Southern California. CARPENTER, ROGER E. (1963), Professor of Zoology B.A., University of Arizona; Ph.D., University of California, Los Angeles. CARTER, J. E. LINDSAY (1962), Professor of Physical Education Diploma in Physical Education, University of Otago, New Zealand; Teaching Certificate, Auckland Teachers College, New Zealand; M.A., Ph.D., State University of Iowa. CASE, THOMAS E. (1961), Professor of Spanish B.A., St. Thomas College; M.A., Ph.D., State University of Iowa. CATLETT, ROBERT H. (1964), Associate Professor of Zoology A.B., M.A., Colorado College; Ph.D., University of California, Davis. CAVE, MARY F. (1946), Associate Professor of Physical Education B.S., University of North Dakota; M.A., California State University, San Diego. CHADWICK, LEONARD E. (1949), Associate Professor of Economics B.S. and additional graduate study at the University of California. CHAMBERS, NORMAN E. (1972), Professor of Afro-American Studies B.A., Lincoln University; M.A., California State University, San Diego; Ph.D., United States International University. CHAMLEY, JOHN D. (1969), Associate Professor of Counselor Education B.A., Pacific Lutheran University; M.A., Ed.D., Arizona State University. CHAN, LILLIAN L. (Mrs. S. Y.) (1969), Reference Librarian B.S., M.A.L.S., University of Michigan. CHAN, SHU-YUN (1965), Professor of Electrical and Electronic Engineering B.S., Susquehanna University; B.S.E.E., Columbia University; M.S.E.E., Ph.D., University of Michigan. CHANDLER, SHELLY E. (Mrs. D.) (1966), Associate Professor of Sociology B.A., M.A., Ph.D., University of California, Los Angeles. CHANG, HAI-YAIN (1967), Associate Professor of Aerospace Engineering B.S., Cheng Kung University, China; M.S., Ph.D., Colorado State University. CHARLES, CAROL M. (1961), Professor of Elementary Education B.A., M.A., Eastern New Mexico University; Ph.D., University of New Mexico. CHATER, ELIZABETH E. (Mrs. M.) (1964), Associate Professor of English B.A., University of British Columbia; M.A., California State University, San Diego. CHEEK, WILLIAM F. (1968), Associate Professor of History B.A., Hampden-Sydney College; M.A., University of Richmond; Ph.D., University of Virginia. CHEN, LO-CHAI (1969), Associate Professor of Zoology B.S., National Taiwan University; M.S., University of Alaska; Ph.D., University of California, San Diego. CHILDRESS, WILLIAM A. (1968), Assistant Professor of Art A.B., Florida State University; M.F.A., University of California, Los Angeles. CHOU, FANG-HUI (1969), Associate Professor of Civil Engineering B.S., National Taiwan University; M.S., University of Minnesota; Ph.D., Northwestern University. CHRISTENSEN, CLAY B. (1968), Assistant Professor of Spanish B.A., M.A., Brigham Young University; Ph.D., University of Washington. CHRYSLER, EARL (1970), Assistant Professor of Information Systems B.S., M.S., California State Univesity, San Diego. CHU PAOCHIN (1967), Associate Professor of History B.A., National Taiwan University; M.A., Ph.D., University of Pennsylvania. CLAPP, JAMES A. (1968), Associate Professor of Public Administration and Urban Studies B.S., LeMoyne College; M.R.P., D.S.S., Syracuse University. CLARK, MARGARET A. (1966), Associate Professor of Elementary Education B.A., Whittier College; M.A., Ed.D., Teachers College, Columbia University. CLARK, MARY E. (1969), Associate Professor of Biology A.B., M.A., Ph.D., University of California. CLARK, ORRIN H. (1960), Professor of Physics A.B., Columbia College; M.A., Columbia University; Ph.D., New York University. CLARY, VIRGINIA L. (1970) (Under contract 1967-70), Associate Professor of Social Work B.A., Municipal University of Omaha; M.S.W., University of Chicago. CLEMENT, NORRIS C. (1968), Associate Professor of Economics B.A., Ph.D., University of Colorado. CLEVELAND, JOHN L. (1972), Associate Professor of Elementary Education B.A., California State University, Los Angeles; M.A., California State University, San Francisco; Ph.D., Wayne State 50-10 8 455

# Faculty / 397 CLINGER, LAWRENCE A. (1969), Assistant Coordinator of Extension B.S., California State University, San Diego. COCHRAN, ALICE J. (Mrs. H.) (1965), Assistant Professor of Counselor Education B.A., Ball State Teachers College; M.A., State College of Iowa; additional graduate study, University of Minnesota. COFFEY, DEWITT, JR. (1968), Associate Professor of Chemistry B.S., Abilene Christian College; B.S., Ph.D., University of Texas. COHEN, LESTER M. (1970) (Under contract 1969-70), Assistant Professor of Social Work B.S., University of Wisconsin; M.S.W., University of Pennsylvania. COHN, THEODORE J. (1964), Professor of Zoology B.S., Cornell University; M.S., Ph.D., University of Michigan. COLLIER, BOYD D. (1966), Professor of Biology B.A., University of California; M.S.T., Ph.D., Cornell University COLLIER, GERALD (1961), Associate Professor of Zoology B.A., M.A., Ph.D., University of California, Los Angeles. COLM, C. LELAND (1938), Physician M.D.C.M., McGill University. COLOMBO, ALBERT A. (1967), Assistant Professor of Geography B.S., California State University, Long Beach; M.A., California State University, San Diego. COMSTOCK, PAUL B. (1972), Lecturer in Telecommunications and Film B.A., J.D., University of Oklahoma; M.A., Columbia University. CONLEY, BRYAN C. (1972), Lecturer in Economics B.A., University of Washington; Ph.D., University of California, Santa Barbara. CONLY, JOHN F. (1962), Professor of Aerospace Engineering B.S.M.E., M.S.M.E., University of Pennsylvania; Ph.D., Columbia University. CONNER, LELAND W.C., Captain, USAF (1972), Assistant Professor of Aerospace Studies B.S., Air Force Academy, M.A., California State University, San Diego. CONNIFF, JAMES J. (1968), Assistant Professor of Political Science B.A., M.A., Rutgers University; Ph.D., Columbia University. COOPER, CHARLES F. (1971), Professor of Biology B.S., University of Minnesota; M.S., University of Arizona; Ph.D., Duke University. COOPER, GWEN O. (Mrs.) (1966), Counselor B.S., University of Miami; M.A., Ed.D, Colorado State College. COOPER, ROBERT L. (1971), Assistant Professor of English B.A., Harvard University; M.A., Teachers College, Columbia University; M.B.A., University of Pennsylvania; Ph.D., Columbia University. COOX, ALVIN D. (1964), Professor of History B.A., New York University; M.A., Ph.D., Harvard University. COTTRELL, ANN W. (Mrs. D.) (1967). Assistant Professor of Sociology B.A., Miami University, Ohio; M.A., Ph.D., Michigan State University. COTTRELL, DON M. (1967), Associate Professor of Physics B.S., Ph.D., University of Washington. COULOMBE, HARRY N. (1969), Assistant Professor of Biology B.A., M.A., Ph.D., University of California, Los Angeles. COVENY, CECELIA T. (1957), Professor of Nursing B.S., University of Minnesota; M.P.H., University of North Carolina. COVER, CLARENCE B. (1959), Facilities Planning Assistant B.S., M.A., Ohio State University. COVINGTON, DON P. (1965), Associate Professor of Art B.A., Southern Methodist University; M.A., University of California, Los Angeles. COWAN, ERROL (1971), Assistant Professor of Finance B.SC., California State University, San Jose; M.B.A., University of California, Berkeley. COX, GEORGE W. (1962), Professor of Biology B.A., Ohio Wesleyan University; M.S., Ph.D., University of Illinois. COX, THOMAS R. (1967), Associate Professor of History B.S., Oregon State College; M.S., Ph.D., University of Oregon. CRAFTS, GRETCHEN (Mrs. R.) (1966), Assistant Professor, Study Skills Center A.B., M.A., University of California, Riverside. CRAIG, GEORGE T. (1968), Associate Professor of Mechanical Engineering B.S., Pennsylvania State University; M.S., Ph.D., Louisiana State University. CRAIG, ROBERT L. (1960), Assistant Professor of Physics A.B., Doane College; M.S., University of Nebraska; additional graduate study at Universities of Minnesota and Idaho. CRAIN, MELVIN (1959), Professor of Political Science A.B., University of Redlands; M.A., Ph.D., University of Southern California. CRANE, NATHALIA (1958), Assistant Professor of English Special study at Barnard College, University of Madrid, and Sorbonne. CRAWFORD, JAMES (1968), Physician B.S., M.D., University of Indiana. CRAWFORD, MAURICE L. (1954), Professor of Information Systems B.S., M.S., University of Utah; Ed.D., University of California, Los Angeles. CRAWFORD, PATRICIA A. (1961), Professor of Philosophy B.A., M.A., University of Rochester; Ph.D., University of Minnesota. CRISLEY, CORNELIUS J. (1962), Reference Librarian A.B., University of Pittsburgh; M.L.S., Carnegie Institute of Technology.

CROSS, CHRISTA M. (Mrs. R. K.) (1969), Assistant Professor of German B.A., M.A., Ph.D., University of California, Los Angeles. CROUCH, JAMES ENSIGN (1932), Professor of Zoology B.S., M.S., Cornell University; Ph.D., University of Southern California. CRUM, CLYDE E. (1955), Professor of Secondary Education B.S., M.S., Kansas State Teachers College; Ed.D., University of Colorado. CULLEN, F. PATRICIA (1964), Professor of Physical Education B.S., Illinios State University; M.A., State University of Iowa; Ph.D., University of Illinois. CUMMINS, EMERY J. (1966), Professor of Counselor Education B.A., Wheaton College; M.S., University of Southern California; Ph.D., Michigan State University. CUNNIFF, ROGER L. (1967), Associate Professor of History B.A., M.A., Colorado State College; Ph.D., University of Texas. CURRY, JOAN F. (1972), Assistant Professor of Secondary Education B.A., M.S., City University of New York; Ed.D., Boston University. CUTTER, CHARLES H. (1968), Associate Professor of Political Science A.B., M.A., University of California; doctoral candidate, University of California, Los Angeles. DAHMS, ARTHUR S. (1972), Assistant Professor of Chemistry B.S., College of St. Thomas; Ph.D., Michigan State University. DANIELS, MORRIS J. (1956), Professor of Sociology B.A., Southern Methodist University; M.A., Ph.D., University of Texas. DARLEY, RICHARD D. (1961), Professor of Marketing B.S., Cornell University; M.S., University of Missouri; Ph.D., Purdue University. DAUB, CLARENCE T., JR. (1967), Professor of Astronomy B.A., Carleton College; Ph.D., University of Wisconsin. DAUCHERTY, WAYNE F., JR. (1966), Associate Professor of Biology B.A., California State University, Long Beach; Ph.D., Johns Hopkins University. DAVIES, THOMAS M., JR. (1968), Associate Professor of History B.A., M.A., University of Nebraska; Ph.D., University of New Mexico. DAVIS, CRAIG H. (1967), Assistant Professor of Biology B.S., Oregon State University; M.S., Ph.D., University of Washington. DAVIS, GLOVER T., II (1966), Associate Professor of English B.A., California State University, Fresno; M.F.A., State University of Iowa. DAVIS, RICHARD L. (1969), Head Coach, Basketball B.S., M.S., University of California, Los Angeles. DAVIS, RONALD W. (1968), Associate Professor of Mathematics B.A., Ph.D., University of Colorado. DEANGELIS, RICHARD A. (1971), Lecturer in Political Science B.A., Harvard College; M.A., University of Chicago. DEATON, EDMUND I. (1960), Professor of Mathematics B.A., Hardin-Simmons University; M.A., Ph.D., University of Texas. DEFRAN, RICHARD H. (1970), Assistant Professor of Psychology A.B., Loyola University; M.A., Ph.D., Bowling Green State University. DELORA, JACK R. (1955), Professor of Sociology B.S., Bowling Green State University; M.A., Western Reserve University; Ph.D., Michigan State University. DELORA, JOANN S. (Mrs. J.) (1967), Associate Professor of Sociology B.A., M.A., Ph.D., University of Texas. DEMARINIS, FREDERICK M. (1969), Assistant Professor of English B.A., M.A., University of Montana. DENMAN, MARY E. (Mrs.) (1972), Assistant Professor, Study Skills Center B.A., M.A., California State University, San Diego. Additional graduate work, University of California, San Diego and University of Southern California. DERIVERA, RUTH A. (Mrs. C.) (1971), Instructor in Mexican-American Studies B.A., Muskingum College. DESSEL, NORMAN F. (1961), Professor of Physical Science B.A., M.A., Ph., State University of Iowa. DETWEILER, ROBERT C. (1968), Associate Professor of History B.A., Humboldt State College; M.A., California State University, San Francisco; Ph.D., University of Washington. DEXTER, DEBORAH M. (1967), Associate Professor of Zoology B.A., M.A., Stanford University; Ph.D., University of North Carolina. DHARMARAJAN, SANGIAH (1960), Professor of Aerospace Engineering B.Eng., College of Engineering, Madras, India; M.S., Ph.D., University of Illinois. DICKEN, CHARLES F. (1962), Professor of Psychology B.A., M.A., Ph.D., University of Minnesota. DICKERSON, MARY E. (1967), Assistant Professor of Family Studies and Consumer Sciences B.S., M.S., Kansas State University. DICKINSON, FIDELIA R. (Mrs.) (1966), Reference Librarian B.A., M.A., Immaculate Heart College; M.L.S., Ph.D., University of California, Los Angeles. DICKINSON, JOHN W. (1962), Professor of English A.B., University of California, Santa Barbara; A.M., Ph.D., University of California, Los Angeles. DICKINSON, PAULINE E. (Mrs. J. S.) (1968), Assistant Lower Division Librarian B.A., M.L.S., University of Washington. DIEHL, WILLIAM P. (1968), Associate Professor of Biology B.S., University of Arizona; Ph.D., University of California, Los Angeles. DIETZ, JAMES C. (1972), Coach in Athletics B.S., Southern Oregon College; M.S., Ph.D. candidate, University of Oregon. DIL, AFIA (Mrs.) (1972), Lecturer in English B.A., M.A., University of Dacca; Dip. in Education, University of New Zealand; M.A., University of Michigan; Ph.D., Stanford University.

DILL, ROBERT S., JR. (1970), Assistant Professor of History B.A., Kent State University; M.A., Ph.D. candidate, University of Michigan. DIMMICK, KENNETH D. (1970), Assistant Professor of Speech Pathology and Audiology B.A., Northwestern State College; Ph.D., Stanford University. DINTRONE, CHARLES V. (1972), Documents Librarian B.A., M.A., University of California, Los Angeles; M.L.S., University of California, Berkeley. DIRKS, JOHN H. (1947), Professor of Art A.B., California State University, San Diego; M.F.A., Claremont Graduate School. DIRKSEN, DENNIS A. (1969), Associate Professor of Industrial Arts B.A., McPherson College; M.S., Kansas State Teachers College; Ed.D., Utah State University. DODDS, LOWELL J. (1957), Professor of Accounting A.B., University of Redlands; M.B.A., University of Denver. Certified Public Accountant. DONAHUE, THOMAS S. (1968), Assistant Professor of English B.A., Denison University, M.A., Miami University, Ohio; Ph.D., Ohio State University. DOORLAG, DONALD H. (1970), Associate Professor of Special Education B.S., Central Michigan University; M.A., Ph.D., Michigan State University. DORRIS, HELEN L. (1952). Professor of Family Studies and Consumer Sciences B.S., Southern Illinois University; M.S. and additional graduate study, University of Illinois. DOWHOWER, RODNEY D. (1970), Coach in Athletics A.B., California State University, San Diego; M.A. candidate, United States International University. DOWLER, MICHAEL J. (1971), Assistant Professor of Physical Science B.A., Ph.D., University of California, Santa Barbara. DOWNEN, ROBERT E. (1965), Admissions Officer B.S., United States Naval Academy; M.S., California State University, San Diego. DRAKE, CHARLES A. (1970), Assistant Professor of Sociology B.S., Brigham Young University; M.A., University of Maine; Ph.D., Michigan State University. DRAKE, CLENDON F. (1966), Assistant Professor of English A.B., Miami University, Ohio; M.A., Oklahoma State University; additional graduate study, Michigan State University and University of Michigan. DROBNIES, SAUL I. (1963), Professor of Mathematics B.S., M.A., Ph.D., University of Texas; Post-Doctoral Fellow, Rice University. DUBBS, PATRICK J. (1971), Assistant Professor of Anthropology B.A., University of Notre Dame. DUCKWORTH, JOSEPH B. (1968), Associate Professor of Secondary Education B.A., Oglethorpe College; M.A.T., Oberlin College; Ed.D., Wayne State University. DUFAULT, DAVID V. (1962), Assistant Professor of History B.A., M.A., Occidental College; Ph.D., University of Oregon. DUKAS, VYTAS (1959), Professor of Russian A.B., M.A. (Russian), M.A. (German), Ph.D., University of Michigan. DULING, JOHN L. (1970), Assistant Professor of Education, Imperial Valley B.S., B.A., Morningside College; M.A., Iowa State University; Ed.D., University of California. DUNHOUSE, WILLIAM B. (1968), Assistant Professor of French B.A., University of Illinois; M.A., Middlebury College; Ph.D. candidate, University of Wisconsin. DUNKLE, HARVEY I. (1963), Associate Professor of German A.B., New York University; M.A., Ph.D., University of California. DUNN, ROSS E. (1968), Associate Professor of History B.A., State University of New York at Albany; M.A., Ph.D., University of Wisconsin. EAGLE, JOHN E. (1946), Professor of Mathematics B.S., Montana State College; M.A., Ed.D., Stanford University. EARNEST, SUE W. (Mrs L. E.) (1947), Professor of Speech Pathology and Audiology A.B., California State University, San Diego; M.A., Ph.D., University of Southern California. EBERT, THOMAS A. (1969), Associate Professor of Biology B.S., University of Wisconsin; M.S., Ph.D., University of Oregon. ECKBERG, CARL F. (1969), Assistant Professor of Mathematics B.A., Cornell University; M.S., Ph.D., Purdue University. EGGLESTON, DAVID M. (1970), Associate Professor of Aerospace Engineering B.S., M.S., Ph.D., University of California. EIDEMILLER, DONALD I. (1956), Professor of Geography A.B., California State University, San Diego; M.A., University of California; Ph.D., Indiana University. EISNER, ROBERT E. (1970), Assistant Professor of Classics B.A., St. Peter's College; M.A., Ph.D., Stanford University. EL-ASSAL, MOHAMED M. E. (1967), Professor of Sociology M.S., M.A., Ph.D., Indiana University. ELCIN, PATRICIA A. (Mrs. G. N.) (1972), Lecturer in English B.A., California State University, Chico; M.A., Ph.D. candidate, University of California, San Diego. ELLIOTT, ROSALIE C. (1968), Associate Professor of Elementary Education B.A., Mount Holyoke College; M.A., Bryn Mawr College; Ph.D., Claremont Graduate School. ELWIN, JOHN D. (1969), Assistant Professor of Mathematics B.S., University of Washington; Ph.D., Oregon State University. EMERICK, ROBERT E. (1968), Assistant Professor of Sociology B.A., University of California, Santa Barbara; Ph.D., Northwestern University. EPSTEIN, FANNY L. (Mrs. L. D.) (1972), Lecturer in Philosophy B.A. (French literature), B.A. (Philosophy), M.A., Hebrew University; Ph.D., Boston University. ERB, EMERSON C. (1971), Visiting Professor of Accounting B.S., M.B.A., D.B.A., Indiana University. ERICKSON, PAUL (1963), Professor of Secondary Education B.A., Arizona State University; M.A., Stanford University; Ed.D., University of Southern California.

ESTES, RUSSELL G. (1963), Associate Professor of Music B.M.E., M.M.E., Millikin University, Illinois; Ed.D., Colorado State College. ETHERIDGE, RICHARD E. (1961), Professor of Zoology B.S., Tulane University; M.S., Ph.D., University of Michigan. EZELL, PAUL H. (1956), Professor of Anthropology B.A., M.A., Ph.D., University of Arizona FARBER, GERALD H. (1968), Assistant Professor of English B.A., University of California, Los Angeles; M.A., California State University, Los Angeles; Ph.D., Occidental College. FARRIS, DAVID A. (1960), Professor of Biology A.B., Indiana University; Ph.D., Stanford University. FEARN, LEIF (1967), Associate Professor of Elementary Education B.S., Shippensburg State College, Pa.; M.A., Ed.D., Arizona State University. FEENBERG, ANDREW L. (1969), Assistant Professor of Philosophy B.A., Johns Hopkins University; M.A., Ph.D. candidate, University of California, San Diego. FEHER, ELSA (Mrs. C.) (1971), Associate Professor of Physical Science B.A., University of Buenos Aires; M.S., Ph.D., Columbia University. FEIERABEND, IVO K. (1959), Professor of Political Science B.A., M.A., University of California; Ph.D., Yale University. FEIERABEND, ROSALIND A. (Mrs. I.) (1964), Professor of Psychology B.A., Swarthmore College; M.A., University of California; Ph.D., Yale University. FELLERS, STANFORD (1966), Associate Professor of Health Science and Safety A.B., Adams State College; M.A., Colorado State College; Ed.D., Boston University. FERREE, RICHARD J. (1969), Assistant Professor of Industrial Arts A.B., M.A., California State University, San Diego FERREL, DALE B. (1957), Professor of Accounting B.S., M.B.A., University of Denver. Certified Public Accountant. FETZER, LELAND A. (1966), Associate Professor of Russian B.S., University of Utah; M.L.S., M.A., Ph.D., University of California FILNER, ROBERT E. (1970), Assistant Professor of History B.A., Cornell University; M.A., University of Delaware; Ph.D. candidate, Cornell University. FINCH, WILLIAM A., JR. (1961), Professor of Geography B.A., East Carolina College; M.A., University of Oklahoma; Ph.D., University of Illinois. FIROVED, JAMES (1970), Physician B.S., Monmouth College; M.D., Northwestern University. FISCH, ARLINE M. (1961), Professor of Art B.S., Skidmore College; M.A., University of Illinois. FISHBURN, CLARENCE E. (1955), Professor of Secondary Education A.B., Arizona State University; M.A., Northern Arizona State University; Ed.D., Stanford University. FISHER, HORACE H. (1966), Associate Professor of Finance A.B., University of Utah; M.A., Ph.D., University of Southern California. FISHER, J. SHERRICK (1953), Professor of Elementary Education B.S., Bethany College; M.A., Teachers College, Columbia University; Ph.D., University of Pittsburgh. FISHER, ROBERT T. (1966), Assistant Professor of Business Law B.S., M.Ed., Wayne State University; Ed. D., Michigan State University; J.D., Wayne State University. FITZ, RICHARD A. (1959), Professor of Mechanical Engineering B.S., Baldwin-Wallace College; M.S. (Ch.E.), Ph.D., Ohio State University. FLAGG, DENIS A. (1955), Professor of Economics B.A., Harvard College; Ph.D., University of California. FLAGG, JOAN M. (Mrs. J. E.) (1969), Assistant Professor of Nursing B.S.N., State University of Iowa; M.S., University of California, San Francisco. FLEMION, JESSIE L. STODDART (Mrs. P. F.) (1966), Associate Professor of History B.A., Carroll College; M.A., University of Nebraska; Ph.D., University of California. FLEMION, PHILIP F. (1968), Assistant Professor of History B.A., B.S., M.A., Ohio State University; Ph.D., University of Florida. (1970), Professor of Biology A.B., M.A., University of California; Ph.D., University of Michigan. FLYE, RICHARD C. (1950), Assistant Professor of Music B.A., University of Virginia; M.A. and Professional Diploma, Columbia University. FORBING, SHIRLEY E. (Mrs.) (1969), Associate Professor of Special Education A.B., M.S., California State University, San Diego; Ed.D., University of Southern California. FORD, DAVID H. (1967), Associate Professor of Elementary Education B.A., M.Ed., University of Arizona; D.Ed., University of Oregon. FORD, LAWRENCE R. (1970), Assistant Professor of Geography B.Sc., M.A., Ohio State University; Ph.D., University of Oregon. FORD, RICHARD F. (1964), Professor of Biology B.A., Pomona College; M.A., Stanford University; Ph.D., University of California, San Diego. FORMAN, ROBERT B. (1963), Professor of Music B.M.E., University of Kansas; M.A., Teachers College, Columbia University; Ed.D., Florida State University. FORREY, ROBERT J. (1968), Assistant Professor of English B.A., M.A., Wesleyan University, Ph.D., Yale University FORT, MARTHA (Mrs.) (1968), Assistant Professor of Social Work A.B., Oberlin College; M.S.W., University of Pittsburgh. FOSTER, FRANCES S. (Mrs.) (1972), Assistant Professor of Afro-American Studies B.S., Miami University; M.A., University of Southern California.

FRANKLIN, ROBERT J. (1967), Assistant Professor of History; Imperial Valley B.A., Greenville College; M.A., University of Michigan; Ph.D., University of Southern California. FRANZ, EDWARD P. (1965), Associate Professor of Physical Education B.S., M.A., Washington University. FRANZINI, LOUIS R. (1969), Assistant Professor of Psychology B.S., University of Pittsburgh, M.A., University of Toledo; Ph.D., University of Pittsburgh. FREDERIKSEN, NORMAN O. (1969), Associate Professor of Geology B.A., Hamilton College; M.S., Pennsylvania State University; Ph.D., University of Wisconsin. FREDRICH, BARBARA E. (1972), Assistant Professor of Geography B.A., University of Wisconsin; M.A., University of California, Los Angeles. FRENCH, HAROLD S., Lt.Col., USAF (1969), Professor of Aerospace Studies B.S., University of Missouri; M.B.A., University of Alabama. FREY, LEONARD H. (1956), Professor of English A.B., Dartmouth College; M.A., Ph.D., University of Oregon. FRICK, FAY A. (Mrs.) (1970), Assistant Professor of Art B.A., University of Chicago; M.A., University of Wisconsin; Ph.D., University of Michigan. FRIEDMAN, ABRAHAM M. (1963), Associate Professor of Physical Education B.S., Springfield College, Massachusetts; graduate study, Columbia University, School of Social Work; M.A., California State University, San Diego; Ph.D., United States International University. FRIEDRICH, HARRIET B. (Mrs. K.) (1970), Professor of Speech Pathology and Audiology B.A., M.A., Brooklyn College, Ph.D., Columbia University. FRIEDRICH, KURT (1949), Professor of Secondary Education A.B., Columbia College; M.A., Columbia University; Ed.D., Teachers College, Columbia University. FULKERSON, E. GLEN (1954), Director of Audio-Visual Services; Professor of Education B.E., Southern Illinois University; M.A., Ed.D., University of California, Los Angeles. FUNSTON, RICHARD Y. (1970), Assistant Professor of Political Science A.B., M.A., Ph.D., University of California, Los Angeles. FUTCH, DAVID G. (1967), Assistant Professor of Biology B.A., University of North Carolina; M.A., Ph.D., University of Texas. GALBRAITH, OLIVER, III (1955), Professor of Management B.S., M.B.A., Northwestern University; Ph.D., University of California, Los Angeles. GALLO, PHILIP S., JR. (1963), Professor of Psychology B.A., M.A., University of California, Santa Barbara; Ph.D., University of California, Los Angeles. GALLUP, AVERY H. (1952), Professor of Botany A.B., California State University, San Diego; M.A., Claremont Graduate School; Ph.D., University of Michigan. GANGE, SAMUEL J. (1969), Counselor B.A., Pacific Lutheran University; M.A., Ed.D., University of Wyoming. GANUS, WILLIAM J. (1972), Assistant Professor of Geology B.S., University of Texas, Austin; M.S., Ph.D., University of Arizona. GARRISON, BETTY B. (1962), Professor of Mathematics B.S., B.A., Bowling Green State University; M.A., Ohio State University; Ph.D., Oregon State University. GARRISON, JOHN D. (1956), Professor of Physics B.A., M.A., University of California, Los Angeles; Ph.D., University of California. CASPARI, RUSSELL A. (1972), Lecturer in Electrical and Electronic Engineering B.S., University of California, Berkeley; M.S., California State University, San Diego; Ph.D., University of California, GAST, DAVID K. (1963), Professor of Elementary Education B.A., Occidental College; M.A., Northern Arizona State University; Ed.D., Arizona State University. GASTIL, R. GORDON (1959), Professor of Geology A.B., Ph.D., University of California. GATES, GERALD F. (1955), Professor of Elementary Education B.F.A., Syracuse University; M.F.A., University of Colorado; M.A., Ed.D., University of Denver. GAZELL, JAMES A. (1968), Associate Professor of Public Administration and Urban Studies B.A., M.A., Roosevelt University; Ph.D., Southern Illinois University. GEFTER, IRVING (1970), Assistant Professor of Hebrew B.A., University of Toronto; M.A., Michigan State University; additional graduate study, Brandeis University. GEGA, PETER C. (1955), Professor of Elementary Education A.B., M.S., Ed.D., University of Southern California. GELFAND, CAROL E. (Mrs. D.) (1967), Assistant Professor of Social Work A.B., Stanford University; M.A., Southern Methodist University. GELLENS, JAY H. (1961), Professor of English B.A., Kenyon College; M.A., Ph.D., Yale University. GENERALES, MINOS D. (1949), Professor of Political Science Degree in Law and Political Science, University of Athens, additional graduate study at the University of Paris Law School and Institute of International Studies, Paris and Geneva. GENOVESE, E. NICHOLAS (1970), Assistant Professor of Classics A.B., Xavier University; Ph.D., Ohio State University. GENZLINGER, CLEVE K. (1957), Professor of Music B.M., M.M., University of Nebraska; additional graduate study, Teachers College, Columbia University. GERVAIS, RONALD J. (1969), Assistant Professor of English B.A., M.A., Michigan State University; Ph.D., University of Oregon. CHILBERT, JEANNE S. (Mrs. H.) (1965), Assistant Professor of French B.A., B.Ed., University of Puget Sound; M.A., and Doctoral Candidate, University of Washington.

FOUNTAIN, LEONARD D. (1960), Professor of Mathematics A.B., S.M., University of Chicago; Ph.D., University of Nebraska.

B.S., Kansas State Teachers College; M.A., State University of Iowa; Ph.D., University of Southern California.

FOX, KATHLEEN (1962), Professor of Physical Education

HARRISON, PATRICK J. (1970), Assistant Professor of Educational Technology and Librarianship B.S., M.S., Stout State University; Ph.D., Michigan State University. HARRISON, ROBERT C. (1953), Professor of Psychology B.S., M.S., Ph.D., University of Washington HARVEY, A. R. (1949), Professor of Mathematics B.S., Bates College; A.M., Ph.D., Harvard University. HARVEY, MICHAEL L. (1969), Associate Professor of Drama B.S., Harvey Mudd College; M.A., University of California, Los Angeles; Ph.D., University of Minnesota. HASSALL, DOROTHY M. (1971), Assistant Professor of Nursing B.S., Hunter College of the University of the City of New York; M.Ed., Teachers College, Columbia University. HAWLEY, PEGGY J. (Mrs. P. F.) (1968), Associate Professor of Counselor Education B.A., California State University, Los Angeles; M.A., University of Redlands; Ph.D., Claremont Graduate School. HAWORTH, GLENN O. (1966), Professor of Social Work A.B., California State University, San Diego; M.S.W., D.S.W., University of California. HAWORTH, JOANNE (Mrs. G. O.) (1970), Associate Professor of Social Work B.S., University of Illinois; M.S.W., additional graduate study, University of California HAYS, ROBERT L. (1972), Assistant Professor of Biology B.S., California State University, San Diego; Ph.D., Stanford University. HAZEN, WILLIAM E. (1962), Professor of Biology B.S., St. Lawrence University; M.S., Ph.D., University of Michigan. HEAD, GERALD L. (1964), Professor of Spanish and Portuguese B.A., Ph.D., University of California, Los Angeles. HEG, E. BIDDLE (1969), Financial Aid Counselor B.A., Swarthmore College; graduate study, University of Pennsylvania. HEIGES, HARVEY E. (1968), Associate Professor of Geography B.A., Principia College; M.S., Pennsylvania State University; Ph.D., University of Washington. HEIGHTON, ELIZABETH J. (1966), Assistant Professor of Telecommunications and Film B.A., University of Washington; M.S., Syracuse University. HELLBERG, LARS H. (1956), Professor of Chemistry B.S., Northwestern University; Ph.D., University of California, Los Angeles. HENDERSON, FLOYD M. (1972), Lecturer in Geography B.A., Nebraska Wesleyan University; M.A., University of Kansas. HENIG, SUZANNE (1968), Associate Professor of English B.A., M.A., Ph.D., New York University. HERMAN, ELSIE (Mrs. E.) (1969), Associate Professor of Social Work A.B., M.A., University of Chicago. HEYMAN, NEIL M. (1969), Assistant Professor of History B.A., Yale University; M.A., Ph.D., Stanford University. B.A., Tate University, M.A., FILD, Stanford University.
 HIGGINS, WINIFRED H. (Mrs. J.) (1964), Professor of Art B.S., Massachusetts College of Art; M.A. (History), Boston College Graduate School; M.A., (Art History), Boston University; Ph.D., University of California, Los Angeles. HILL, HOWARD (1967), Assistant Professor of Music B.A., University of Washington; graduate study, Juilliard School of Music; M.A., Teachers College, Columbia HILL, PATRICIA J. (Mrs. J.) (1964), Assistant Professor of Elementary Education A.B., M.A., California State University, San Diego. HILL RICHARD A. (1972), Head Coach of Track B.S., Southern University; M.Ed., University of Buffalo; Ed.D., State University of New York at Buffalo HILL, RICHARD B., JR. (1969), Assistant Professor of Sociology, Imperial Valley B.A., M.A., University of Missouri at Kansas City; Ph.D. University of Missouri, Columbia. HILL, WAYNE O. (1955), Professor of Elementary Education B.A., M.Ed., Eastern Washington College of Education; Ed.D., Stanford University. HILLE, EINAR (1972), Visiting Lecturer in Mathematics Kandidat (Philosophy), Stockholms Hogskola; Magister (Philosophy), Licentiat (Philosophy), Filosofie Doktor, University of Stockholm. HILLIX, WILLIAM A. (1963, except 1967–69), Professor of Psychology B.A., M.A., Ph.D., University of Missouri, Columbia. HIMES, JOAN K. (1967), Assistant Professor of Nursing B.S., University of California, San Francisco; M.N., University of Washington. HIMES, RONALD S. (1969), Associate Professor of Anthropology B.S., Georgetown University; M.A., Ateneo de Manila University, Philippines; Ph.D., University of Hawaii. HINKLE, JAMES C. (1961), Assistant Professor of English B.A., Denison University; M.A., doctoral candidate, Harvard University. HINTZMAN, WILLIAM R. (1969), Assistant Professor of Mathematics B.A., University of Wisconsin, Milwaukee; M.A., University of Michigan; Ph.D., University of Wisconsin. HIPPAKA, WILLIAM H. (1957), Professor of Business Law and Real Estate B.S.C., Jur.D., State University of Iowa. HO, HUNG-TA (1966), Professor of Mathematics B.Sc., Ordnance Engineering College, China; Sc.M., Virginia Polytechnic Institute; Ph.D., Brown University. HOBBS, JOHN A. (1964), Associate Professor of Political Science A.B., M.A., University of Illinois; Ph.D., Princeton University. HODGE, STANLEY B. (1968), Assistant Professor of Art B.A., M.A., University of California, Los Angeles. HOGG, MERLE E. (1962), Professor of Music B.S.Ed., B.S.Mus., Kansas State Teachers College; M.A., M.F.A., Ph.D., State University of Iowa. HOIDAL, ODDVAR K. (1967), Associate Professor of History A.B., California State University, San Diego; Ph.D., University of Southern California.

HOLLANDER, EARL D. (1970), Assistant Professor of Social Work B.A., Yeshiva University; M.S., Simmons College; Ph.D., University of Pittsburgh.

HOLMES, CALVIN V. (1956), Professor of Mathematics B.A., M.A., University of Mississippi; M.S., University of Illinois; Ph.D., University of Kansas.

HOLOWACH, FRANK S. (1960), Professor of Journalism B.S., Edinboro State Teachers College, Pennsylvania; M.A., State University of Iowa.

HOPKINS, JACK R. (1961), Professor of Art B.A., California College of Arts and Crafts; M.F.A., Claremont Graduate School.

HOWARD, EDGAR J. (1966), Associate Professor of Mathematics B.S., M.S., California State University, San Diego; Ph.D., New Mexico State University.

HOWARD, ROY J. (1963), Professor of Philosophy B.A., Lic. Phil., Woodstock College, Maryland; Ph.D., Louvain University, Belgium.

HUNTER, LAWRENCE B. (1963), Associate Professor of Art A.B., California State University, San Diego; M.A., University of California, Los Angeles.

IMA, KENJI (1972), Lecturer in Sociology A.B., Whitman College; M.S., University of Oregon; Ph.D., Northwestern University

INGHAM, MURIEL B. (1967), Associate Professor of English B.A., Willamette University; M.A., Ph.D., University of California, Riverside.

INGMANSON, DALE E. (1968), Associate Professor of Physical Science B.S., Rollins College; M.Ed., Rutgers University; Ed.D., University of Florida.

HUSSAIN, NIHAD A. L. (1969), Associate Professor of Mechanical Engineering B.Sc.M.E., Baghdad University, Iraq; M.Sc.M.E., Purdue University; Ph.D., University of Notre Dame.

INSKEEP, JAMES E., JR. (1960), Professor of Elementary Education B.S., U.S. Naval Academy; M.A., California State University, San Diego; Ph.D., University of Minnesota.

ISHIKAWA, WESLEY H. (1969), Professor of Social Work B.S., Willamette University; M.S.W., University of Denver; D.S.W., University of Southern California.

B.S., Willamette Oniversity, Booth Carlo and Carlo an

HUTCHINS, ROBERT C. (1968), Associate Professor of Finance B.S., M.S., Adv. M.Ed., Florida State University; M.B.A., D.B.A., University of Southern California.

HULS, HARRY E. (1961), Professor of Elementary Education B.S., St. Cloud State Teachers College; M.A., Ph.D., University of Minnesota.

HUNSAKER, DON, II (1960), Professor of Zoology B.A., M.S., Texas Technological College; Ph.D., University of Texas.

IKEDA, MIYOSHI (1970), Assistant Professor of Education, Imperial Valley B.A., University of Hawaii; M.A., Ph.D., University of New Mexico.

IRGANG, FRANK J. (1956), Professor of Industrial Arts B.S., Central Michigan College; M.A., Ph.D., University of Michigan.

IRONHILL, STEPHEN J. (1970), Activities Adviser A.B., M.S., California State University, San Diego.

115-10 9 140

IRWIN, MICHAEL A. (1964), Test Officer A.B., M.A., M.S., California State University, San Diego.

ISENSEE, ROBERT W. (1948), Professor of Chemistry A.B., Reed College; M.A., Ph.D., Oregon State College.

HOWELL, MAXWELL L. (1972), Dean, College of Professional Studies; Professor of Physical Education B.A., M.A., Ed.D., University of California, Berkeley; Ph.D., University of Stellenbosch.

HUNGATE, ROBERT P. (1961, except 1965-69), Dean, School of Business Administration; Professor of Finance B.A., University of Washington; Ph.D., University of California, Los Angeles.

HUNSAKER, DAVID M. (1971), Assistant Professor of Speech Communications B.A., University of California, Santa Barbara; M.A., Bradley University; J.D., Columbia University School of Law.

HORNBECK, FREDERICK W. (1968), Associate Professor of Psychology B.A., M.S., Yale University; Ph.D., University of California, Los Angeles.

HOROWITZ, CIDEON (1968), Professor of Social Work A.B., M.A., New York University; M.S.W., Ph.D., University of Chicago.

HOLLYFIELD, CYNTHIA A. (1968), Assistant Professor of Physical Education B.S., Southwest Texas State College; M.A., Ball State University.

HOLMAN, DOROTHY J. (1966), Associate Professor of Secondary Education B.S., M.S., North Texas State University, Ed.D., University of Kansas.

HOLT, HOWARD B. (1961), Professor of Educational Administration B.S., Ed.M., Oregon State College; D.Ed., University of Oregon.

HOOVER, CRACE V. (1956), Assistant Sciences Librarian A.B., University of Nebraska; B.S. in L.S., University of Denver.

HOSTETLER, DAVID K. (1966), Counselor B.S., University of Tampa; M.Ed., Ed.D., University of Virginia.

B.S., M.S., Cantorna State Orderson of Drama BOWARD, GORDON S. (1968), Associate Professor of Drama B.S., M.S., University of Oregon; Ph.D., University of Minnesota.

HUFFMAN, EDWARD W. (1955), Professor of Zoology B.S., M.S., University of Illinois; Ph.D., Ohio State University.

HUNRICHS, WILLIAM A. (1957), Professor of Psychology B.A., M.A., Ph.D., Stanford University.

HUNT, A. MARK (1970), Lecturer in Biology B.A., University of California, San Diego.

HURD, LYMAN C., III (1958), Professor of Music A.B., M.M., Syracuse University.

HURLBERT, STUART H. (1970), Assistant Professor of Biology B.A., Amherst College; Ph.D., Cornell University.

JACOBSON, EDWARD A. (1968), Assistant Professor of Psychology B.S., Brooklyn College; Ph.D., Indiana University. JACOBSON, PETER (1971), Visiting Assistant Professor of Political Science B.A., University of Chicago; M.A., Stanford University. JAMESON, K. CHARLES (1965), Associate Professor of Telecommunications and Film B.A., M.A., University of Michigan, Ph.D., University of Southern California. JANSSEN, HENRY L. (1953), Professor of Political Science B.A., M.A., University of Oklahoma; Ph.D., University of California. JENCKS, CLINTON E. (1964), Professor of Economics B.A., University of Colorado; M.A., Ph.D., University of California. JENSEN, REILLY C. (1958), Professor of Chemistry B.S., M.S., University of Nevada; Ph.D., University of Washington. JIMENEZ-VERA, ARTURO (1970), Assistant Professor of Spanish-Portuguese A.B., California State University, San Diego; M.A., Arizona State University; Ph.D., The University of Arizona. JOHNS, DAVID H. (1965), Associate Professor of Political Science A.B., Dartmouth College; M.A., Ph.D., University of Chicago. JOHNS, GERALD E. (1967), Assistant Catalog Librarian B.A., University of California, Santa Barbara; M.S.L.S., University of California, Los Angeles. JOHNSON, ALBERT W. (1964), Dean, College of Sciences; Professor of Biology B.S., Colorado Agricultural and Mechanical College; M.S., Ph.D., University of Colorado. JOHNSON, C. DALE (1963), Professor of Sociology B.A., M.A., Ph.D., University of Minnesota. JOHNSON, EULALIA G. (1962), Professor of Nursing B.S., Mount St. Mary's College; M.S., University of Colorado. JOHNSON, JOSEPH S. (1967), Associate Professor of Telecommunications and Film B.A., University of Utah; Ph.D., Michigan State University. JOHNSON, KENNETH D. (1972), Assistant Professor of Botany B.A., Ph.D., University of California, Santa Barbara. JOHNSON, PHILIP E. (1958), Professor of Civil Engineering B.S.C.E., University of Idaho; M.S.C.E., University of California. Registered Civil Engineer. JOHNSON, WARREN A. (1969), Associate Professor of Geography B.S., University of California; M.S., Ph.D., University of Michigan. JOKELA, ALICE C. (Mrs. A. W.) (1969), Assistant Professor of Microbiology B.S., National Taiwan University, Taiwan; M.S., Massachusetts Institute of Technology; Ph.D., University of California, JONASSON, J. FRANKLIN (1968), Financial Aid Counselor B.S., Ed.M., Oregon State University. JONES, KENNETH K., JR. (1948), Professor of Telecommunications and Film B.S., Northwestern University; M.A., Stanford University. JONES, WALTER D. (1962), Professor of Chemistry B.S., University of Washington; Ph.D., Oregon State College. JORDAN, G. RAY, JR. (1966), Associate Professor of Religious Studies A.B., Duke University; M.A., Ph.D., University of Southern California. JOY, NED V. (1953), Acting Vice President for Academic Affairs; Professor of Political Science A.B., Ph.D., University of California. JULIAN, JAMES L. (1951), Professor of Journalism B.S., B.A., University of Houston; M.A., University of Texas; Ph.D., State University of Iowa. KAATZ, JAMES M. (1967), Associate Professor of Elementary Education B.A., Andrews University; M.A., California State University, Long Beach; Ed.D. University of Southern California. KAHN, MARION J. (Mrs.) (1967), Associate Professor of Social Work B.A., Queens College; M.S., University of Wisconsin. KAHNG, TAE JIN (1962), Professor of Political Science B.A., Kent State University; M.A., Ph.D., Columbia University. KAPLAN, OSCAR J. (1946), Professor of Psychology B.A., M.A., University of California, Los Angeles; Ph.D., University of California. KAREN, ROBERT L. (1964), Professor of Psychology B.A., M.A., University of California, Los Angeles; Ph.D., Arizona State University. KARNATH, DAVID L. (1968), Assistant Professor of English B.A., Notre Dame University; M.A., Stanford University; Ph.D., University of Minnesota. KARR, O. KENNETH, JR. (1969, Director of Athletics; Professor of Physical Education B.S., Illinois State University; M.S., Ph.D., University of Illinois. KARTMAN, ARTHUR E. (1968), Associate Professor of Economics A.B., MacMurray College; M.A., Ph.D., University of Washington. KASCH, FREDERICK W. (1948), Professor of Physical Education B.S., M.S., University of Illinois; Ed.D., New York University.Ed.D., New York University. KASS, NORMAN (1961), Professor of Psychology B.A., M.A., Ph.D., Western Reserve University. KASTON, BENJAMIN J. (1964), Professor of Zoology B.S., North Carolina State College; Ph.D., Yale University. KEEN, ELMER A. (1967), Associate Professor of Geography B.A., M.A., Peabody College; Ph.D., University of Washington. KEHLER, DOROTHEA F. (Mrs. H. F.) (1970), Assistant Professor of English B.A., City College of New York; M.A., Ph.D., Ohio University. KEHLER, HAROLD F. (1968), Associate Professor of English B.S., Albright College; M.A., Ph.D., Ohio University. KEISER, KENNETH R. (1968), Assistant Professor of Political Science A.B., Brown University; Ph.D., University of North Carolina.

KOREVARR, PIA R. (Mrs. J.) (1971), Assistant Professor of Mathematics Ph.D., Federal Institute of Technology, Zurich, Switzerland.

KOZLIK, LUDEK A. (1965), Professor of Russian B.A., M.A., Ph.D., University of Texas.

KREKORIAN, CHARLES O. (1970), Assistant Professor of Zoology
 KREKORIAN, CHARLES O. (1970), Assistant Professor of Zoology
 A.B., M.A., California State University, Los Angeles; Ph.D., University of Toronto.
 KRISHNAMOORTHY, GOVINDARAJALU (1968), Associate Professor of Civil Engineering
 KRISHNAMOORTHY, GOVINDARAJALU (1968), Associate Professor of Civil Engineering, India; M.S.C.E., Ph.D., Illinois Institute of Technology.

KRUMMENACHER, DANIEL (1968), Professor of Geology M.S. (Chemistry), M.S. (Geology), Ph.D., University of Geneva.

KURTZ, DONALD V. (1967), Assistant Professor of Anthropology B.A., M.A., University of California; Ph.D. candidate, University of California, Davis. KWALLEK, NANCY B. (Mrs. V. F.) (1969), Assistant Professor of Family Studies and Consumer Sciences B.S., Kent State University; M.S., Oregon State University.

Emeritus Faculty	
MALCOLM A. LOVE, Ph.D., President; Professor of Public Administration and Urban Stu	udies
WALTER R. HEPNER, Ed.D., President	1935-1952
IOHN W ACKLEY, Ph.D., Professor of Speech Communication	1947-1971
IOHN B ADAMS, Ph.D., Chairman, Division of Humanities; Professor of English	1928-1908
MARVIN D. ALCORN, Ed.D., Professor of Secondary Education	1941-1909
HILLA C ANDREWS, M.A., Associate Professor of Art.	
IOF A APPLE Ed D. Professor of Secondary Education	
CUINIVERE K BACON, M.A., Associate Professor of Elementary Education	
KENNETH F. BARNHART, Ph.D., Professor of Sociology	1939–1964
RAVI OF BROOKS BA, Professor of Geology	
BAILOR BROOKS, D.H., PhD., Professor of French	
ELIZABETH M. DROWN MA Professor of Accounting	
EUGENE P. BROWN, BhD, Professor of Spanish and French.	
LESLIE P. BROWN, FILD., Frofessor of English and Classics	
GAIL A. BURNETT, TH.D., Thistory of Psychology	
HILDING B. CARLSON, FILD, Frofessor of Business Law	1957-1972 (except 1962-1972)
JAMES L. CHAPMAN, J.D., Horesson of Mathematics	
HELEN S. CLARK, D.A., Assistant Professor of Home Economics	
NORITA N. COMIN, M.A., Associate Professor of Education	
KATHERINE E. CORDETT, M.A., Associate Marketing	
LORENZ F. dejULIEN, M.B.A., Lecturer in management of Mathematics	
ARTHUR T. EMERSON, B.S., Assistant Professor of Industrial Arts	
WALTER B. FORD, B.E., Assistant Processor of Independent	
LULA E. GERMANN, B.S., Supervising Librarian Systems	
E. DANA GIBSON, Ph.D., Professor of Information Systems of English	
SIDNEY L. GULICK, Ph.D., Dean of Arts and Sector of Education	
EDITH C. HAMMACK, B.A., Associate Professor of Education.	
ISABELLA S. HAMMACK, M.A., Associate Professor of Botany	
DOROTHY R. HARVEY, M.A., Assistant Professor of Zoology	
ROBERT D. HARWOOD, Ph.D., Professor of English	1940-1971 (except 1943-45)
HARRIET HASKELL, Ph.D., Protessor of English	
GERALDINE K. HAYNES, B.S.L.S., Supervising Labrarian	
CHARLES M. HUFFER, Ph.D., Protessor of Astronomy Education	
JAMES J. HUNTER, JR., Ph.D., Protessor of Secondary Loudenness	
EVERETT GEE JACKSON, M.A., Professor of Art	
FRANK L. JOHNSON, Ph.D., Professor of English	
LIONEL JOSEPH, Ph.D., Professor of Chemistry	
DAVID C. KALBFELL, Ph.D., Lecturer in Physics	
IOSEPH S. KEENEY, Ph.D., Professor of English	
CHESTER B. KENNEDY, Ph.D., Professor of English	Psychology1949-1970
WILLIAM M. KIDWELL, Ed.D., Director of Placement and I manched and	
TAMES S. KINDER, Ph.D., Professor of Education	
MARGARET E. KINSEY, M.A., Circulation Librarian	
ANCELA M. KITZINGER, Ph.D., Professor of Health Education	
DONALD B. LEIFFER, Ph.D., Professor of Political Science	
MAUBICE M. LEMME, Ph.D., Dean of Graduate Studies, Professor of Mathematic	
TAMES M LINLEY, Ph.D., Professor of Secondary Education	
AWBENCE W. LUCE, Ed.D., Professor of Industrial Arts	1939-1966 (except 1961-64)
PICHARD MADDEN, Ph.D., Professor of Education	
EDNEST I. MARCHAND, Ph.D., Professor of English	
ERVEST EV C MCAMIS, B.A., Documents Librarian	
LESSLEI C. ROLLOM, Ed.D., Processor of Psychology	
IVAN N. MCCOLLOUL, Ph.D., Professor of Philosophy	
MART MERCHANNER Ph.D., Professor of Physics	
CHESNET R. MOLITOR, A.B., Associate Professor of Geography	
VINNIE C. MOLITOR, AND	

DORIS G. MURDOCK, B.S.L.S., Catalog Librarian	
MABEL A. MYERS, Ph.D., Professor of Microbiology	
NEVA E. NYE, M.Litt., Professor of Nursing	
HERBERT C. PEIFFER, Ph.D., Dean of Students; Professor of Psychology	
PAUL L. PFAFF, Ph.D., Professor of Speech Pathology and Audiology	
LAUREN C. POST, Ph.D., Professor of Geography	
E. KINGSLEY POVENMIRE, M.F.A., Professor of Drama	
ROBERT W. RICHARDSON, Ph.D., Professor of Geography	. 1939-1972 (except 1946-1947)
SPENCER L. ROGERS, Ph.D., Professor of Anthropology	
ROBERT D. ROWE, Ph.D., Professor of Chemistry	
ELSIE L. ROY, A.B., Assistant Catalog Librarian	. 1936-1972 (except 1945-1959)
ILSE H. RUOCCO, M.A., Professor of Art	
FREDERICK L. RYAN, Ph.D., Professor of Economics	
FRANCES I. SCHALLES, A.B., Education and Curriculum Materials Librarian	
MARION L. SCHWOB, M.S., Associate Professor of Physical Education	
HUNTON D. SELLMAN, M.S., Professor of Drama	
FLORENCE S. SHANNON, M.S., Associate Professor of Physical Education	
CLAUDE F. SHOUSE, Ph.D., Professor of English	
CLIFFORD E. SMITH, Ph.D., Professor of Astronomy	
DEANE F. SMITH, M.Mus., Associate Professor of Music	
LEILA D. SMITH, M.A., Professor of Music	
CHARLES C. SPORTSMAN, M.S., Associate Professor of Physical Education	
CHRISTINE SPRINGSTON, M.A., Professor of Music	
HARRY C. STEINMETZ, Ph.D., Associate Professor of Psychology	
HAMILTON L. STONE, B.S., Associate Professor of Mechanical Engineering	
ALVENA S. STORM, M.A., Professor of Geography	
RUTH A. TALBOY, M.A., Associate Professor of Home Economics	
JOHN A. TERHUNE, M.S., Assistant Professor of Physics	
JOHN R. THEOBALD, Ph.D., Professor of English	
DOROTHY J. TOLLEFSEN, M.A., Professor of Physical Education	
FRANCES B. TORBERT, M.A., Professor of Management	
WOLCOTT C. TREAT, Ph.D., Professor of Psychology	
VIRGINIA W. VOEKS, Ph.D., Professor of Psychology	
HILDE K. WALKER, M.A., Assistant Professor of German	
CURTIS R. WALLING, E.E., Professor of Electrical and Electronic Engineering	
DONALD R. WATSON, Ed.D., Vice President for Academic Affairs; Professor of Physica	I Science
ALFRED E. WHITE, Ed.D., Assistant to Dean of the College; Professor of Education	
ARTHUR C. WIMER, M.A., Professor of Journalism	
ERNEST F. WITTE, Ph.D., Professor of Social Work; Dean of the School of Social Work	
WILLIAM H. WRIGHT, Ph.D., Professor of Accounting	
JOHN M. YARBOROUGH, Ph.D., Director of Housing; Professor of Education
